---

We write to express our deep concerns regarding the above proposal but in particular to the re-wording of the proposal from MUST to SHOULD.

This must not be permitted since it gives the planners wider scope to change/amend their intentions. They asked for a rail interchange nothing else. This is bad enough because it will have a major impact on the green belt in a wide area of the West Midlands impacting on animals, woodland and countryside.

Please give this serious thought and do not allow the wording to be changed prior to a decision being made.

Yours faithfully

Mary-Ann Burke and Brian Harvey.
