Subject: Re: Northampton Gateway Rail Freight Interchange (TR050006) - Rule 8

My reference: 20010329

I would like to add further arguments against Northampton Gateway Rail Freight Interchange (TR050006):

On the grounds of air pollution affecting health around Junction 15 of the M1:

I moved from Edinburgh (Balerno) to Collingtree in 1989. I had experienced no breathing problems up to this date when I was aged 40. However, since then I have frequently suffered wheezing due to chest infections. The traffic congestion around this junction is a daily occurrence as the housing expansion in Wootton and Grange Park has added to greatly increased car movements and the growth of warehousing at Brackmills, Grange Park and Rothersthorpe has led to many more HGVs.
