This project is within the green area dividing town from country. We need all the farmland we can get to help provide food for our ever growing population. What is now a quiet rural area will be blighted with noise, light and traffic pollution, 24 hours a day.

Where will they find enough workers to employ? This area has low unemployment so bringing in workers will create traffic to the already congested road network. Our infrastructure is presently unable to cope so what will the future bring if this SRFI is given planning consent.

The area already has a RFT a few miles north (DIRFT) which is not at full capacity. The opening of the new Northampton University campus has added to traffic problems and consequential pollution.

This is a farming area and not an industrial one.

Ruth Thompson
