The Planning Inspectorate

I wish to object in the strongest possible way to this proposed development.

- It has long been understood that the west of M1 motorway was to remain as farm land. This proposed development will inevitably lead to further industrial and housing [expansion](#) to the detriment of the whole county.
- Traffic and the consequent pollution is already at unacceptably high levels in the area. This development will considerably worsen the situation. Quite frequently the motorway is blocked and this results in even further traffic chaos and pollution.
- There is currently no overriding need for further rail freight interchanges. Certainly with the HS2 development increasingly doubtful, there is quite simply insufficient rail freight path availability to properly service the proposed development.

Yours faithfully

Alan Lewis
