Subject: Northampton gateway rail freight interchange project - non material change TR050006

Hi,

I have received communication in regards to subject and I would like to register my displeasure at this request and appeal that the request for non material change be rejected.

I believe that if this change, if approved, will prove to be material (instead of non material) and will have considerable adverse effect on heavy goods vehicle traffic levels around and through wootton. The roads have major schools on them and I believe the risk to school going children will also increase by the increased level of heavy traffic. I foresee that it will also increase the noise and environmental pollution levels in and around wootton having serious effect on quality of life of residents.

I strongly oppose this change.

Regards,

Lesley Fenlon-Smith
