Subject: Amednment to Northampton Gateway development by SEGRO
Date: 17 August 2022 00:07:48

Dear Sir/Madam

Regarding the amendment to original planning application proposed by Segro. This is a significant change to the original planning application and will create an large increase in HGV traffic levels around and through Wootton. The bulk of the traffic will go directly passed CCS school making it far more dangerous to familys and students. The additional traffic will add significant levels of noise to the houses along and near to the newport pagnell road which is already unacceptable at peak times. Additional HGV traffic will also contribute to dangerous junctions and roundabouts through Wootton clearly not designed for an increased level of traffic.

Regards
Luke Barford
