Re:northampton Gateway rail freight order 2019. SI 2019 no.1358

I write to express my objection to the proposed ammendment to the above planning.

The opening of warehousing prior to any rail freight link would significantly increase heavy lorry traffic in the surrounding areas. Wooldale Road Wootton hope drive and curtlee Hill in Wootton currently have seen an excess increase in traffic since the construction work has begun. These roads are not built for such heavy traffic flows and both pass through housing estates with crossings and schools. This will increase harmful emissions in a residential area and have a major impact on road safety around the schools and crossings.

Regards

K Day
