---

To whom it my concern,

I strongly object to the proposed changes from Segro to the DCO plans at this late juncture. The HS2 project has already had a devastating impact on the wildlifes natural habitat, not to mention the dust and noise pollution that we, the residents, have had to endure! The traffic & road congestion has been unbearable. This village does not need the added burden of more passing traffic, It is no longer a tranquil place to live!
