I wish to object to this proposed amendment to the original agreement which was passed by the then minister for the department of transport.. This is not a minor amendment, nor in all probability, a temporary one.

The original objections were always based on the lack of rail capacity, we were ignored.

If this amendment were to go ahead it would be an ecological and environmental disaster.

I consider this to be a bare faced attempt to circumnavigate the law of this country and would set up a precedent which would open the floodgates to similar cynical attempts at profiteering from this nations heritage.

Margaret Denny,
