Change to consent order

After reading the information below I consider that the proposals are not a "non material change" but rather a "very material change."

Reported Press release (extract)

Constituents have been contacting Angela Leadsom over a proposed change to the Development Consent Order (DCO) for the terminal. They are concerned by the potential impact of the so-called 'non-material change' on the DCO. They fear that the rail terminal part of the development will be sidelined, but the logistics part will go ahead, with road access only. They are worried about the potential detriment to the local area.
