

Please can the examination ensure a thorough analysis into the validity of the transport model used needs very careful examination I, with respect to the national infrastructure and the local impact on villages and nearby settlements. Focus should also be given to the Air quality, ecological and economical impact of the development on the local area. The assumptions made do not appear in keeping with current policy and messages. Due to an older generation of residents in the local villages, an examination hearing should take place in Stoney Stanton (as the largest Fosse settlement) with appropriate physical advertising to all residents of the Fosse Villages.
