

My comments within my Relevant Representations are all still of concern. No concerns have been alleviated as a result of additional information or meetings held to date.

I would like, as a resident of Elmesthorpe, to emphasise my major worries about night lighting, operational noise (particularly at night) and flood risk.

Residents of Elmesthorpe live extremely close to this proposal and I am genuinely worried the impact the lighting and noise will have on mine, my husband's and my child's quality of sleep and the resulting effect on our lives/jobs and education.

I also live on [REDACTED] and I am concerned about the safety aspects associated with increased traffic and HGVs on this road; both in general and with regards to it being a residential road with the risk of children running onto the road from homes.
