

Dear Sirs

My comments and concerns raised in my Relevant Representation are still applicable. This proposal is bearing down so heavy on residents with the worry and stress of it all making us all feel quite unwell.

I would really like the Examining Authority to apply some serious weight to the consideration of the effect it will have on the lives of those living quite literally next door to this. It has the potential to absolutely cripple communities and people's mental and physical health.

Thank you for your time,

A Roper
