APPENDIX B: Scheme Vehicle Tracking Drawings

1. INTRODUCTION

Introduction

1.1 Tritax Symmetry (Hinckley) Limited (the Applicant), have submitted an application for a Development Consent Order (DCO). The DCO will authorise the Applicant to construct and operate a Strategic Rail Freight Interchange (SRFI), which is a "nationally significant infrastructure project", as defined in the Planning Act 2008.

1.2 The SRFI site is proposed on land to the north west of the M69 motorway off J2 and to the south east of the Leicester to Hinckley railway line. It comprises a total of approximately 247 ha (610 acres) including the works associated with Junction 2.

1.3 A detailed description of the SRFI development is found at Chapter 2 of the Environmental Statement. The proposals include significant improvements to M69 J2 and the construction of a new link between the B4668 and M69 J2.

1.4 The report is based on the following information:

- Design standards listed in Chapter 2 below
- Topographical survey information by MK Surveys
- OS mapping, aerial photos and Google Streetview

Purpose

1.5 The purpose of this report is to record the strategy for the geometric design for the upgrades to J2 and the construction of the new link between the B4668 and the M69. Hence this report is termed the Design Strategy Record (DSR). It covers all the upgrades to J2 and the construction of the new link between the B4668 and the M69, as well as commentary on the proposed remote junction improvement works within Leicestershire County Council's (LCC) jurisdiction as Highway Authority.

1.6 For each aspect of geometric design this report will describe the proposed geometry. Where relaxations or departures from standard are required, these will be highlighted and a justification provided.

1.7 This report does not include analysis of the motorway highway works or other works to the Strategic Road Network (SRN), these are covered in a separate report.

Overview of the Scheme

1.8 The purpose of the junction upgrades and the new link is to provide access and sufficient capacity to facilitate the development of the NRFI. The junction upgrades and the new link would consist of the following:

- New link from M69 J2 to the B4668
- Capacity upgrades to M69 J2.

1.9 The drawings listed below show the scheme layouts.

List of Drawings

1.10 The following 1:500 scale drawings are found at **Appendix A:**

Section of Scheme	Drawing Number
B4668 New Roundabout	HRF-BWB-HGN-HW01-DR-CH-0100_General Arrangement Sheet 1
Link Road North of Railway	HRF-BWB-HGN-HW02-DR-CH-0100_General Arrangement Sheet 2
Link Road North of Railway	HRF-BWB-HGN-HW03-DR-CH-0100_General Arrangement Sheet 3
Railway Bridge Area	HRF-BWB-HGN-HW04-DR-CH-0100_General Arrangement Sheet 4
Link Road South of Railway	HRF-BWB-HGN-HW05-DR-CH-0100_General Arrangement Sheet 5
Roundabout 3	HRF-BWB-HGN-HW06-DR-CH-0100_General Arrangement Sheet 6
Link Road and bus interchange	HRF-BWB-HGN-HW07-DR-CH-0100_General Arrangement Sheet 7
Roundabout 2	HRF-BWB-HGN-HW08-DR-CH-0100_General Arrangement Sheet 8
Roundabout 1	HRF-BWB-HGN-HW09-DR-CH-0100_General Arrangement Sheet 9
M69 J2 west	HRF-BWB-HGN-HW10-DR-CH-0100_General Arrangement Sheet 10
M69 J2 east	HRF-BWB-HGN-HW11-DR-CH-0100_General Arrangement Sheet 11
B4669/Stanton Lane Junction	HRF-BWB-HGN-HW16-DR-CH-0100_General Arrangement Sheet 16
B581/Hinckley Road Junction	HRF-BWB-HGN-HW17-DR-CH-0100_General Arrangement Sheet 17
Sapcote Village	HRF-BWB-HGN-HW18-DR-CH-0100_General Arrangement Sheet 18
Normandy Way/Ashby Road Junction	HRF-BWB-HGN-HW19-DR-CH-0100_General Arrangement Sheet 19
A47/B4668/The Common Roundabout	HRF-BWB-HGN-HW20-DR-CH-0100_General Arrangement Sheet 20
B4114/Croft Road Junction	HRF-BWB-HGN-HW21-DR-CH-0100_General Arrangement Sheet 21
A5 Cross in Hand Roundabout	HRF-BWB-HGN-HW22-DR-CH-0100_General Arrangement Sheet 22
Bostock Close/B581 Crossing	HRF-BWB-HGN-HW23-DR-CH-0100_General Arrangement Sheet 23
B4114/Broughton Road Junction	HRF-BWB-HGN-HW24-DR-CH-0100_General Arrangement Sheet 24

1.11 The highway information can also be found on the highway plans (Sheets 1 – 8) found within the formal documentation associated with the Development Consent Order application. In addition, long sections associated with the A47 link road can be found at **Appendix A** on drawing HRF-BWB-LSI-D1-DR-CH-00105, Document 2.4J (PINS Ref APP-030)

1.12 The following vehicle tracking drawings are found at **Appendix B**:

Section of Scheme	Drawing Number
Roundabout 3	HRF-BWB-HGN-HW06-DR-CH-0115_Vehicle Tracking Roundabout 3
Link Road and bus interchange	HRF-BWB-HGN-HW07-DR-CH-0115_Vehicle Tracking Bus Interchange
Roundabout 2	HRF-BWB-HGN-HW08-DR-CH-0115_Vehicle Tracking Roundabout 2
Roundabout 1	HRF-BWB-HGN-HW09-DR-CH-0115_Vehicle Tracking Roundabout 1

B4114/Broughton Road Junction	HRF-BWB-GEN-XX-DR-TR-133_B4114 B581 Mitigation Swept Paths

2. GEOMETRIC DESIGN STANDARDS

Existing Situation

2.1 The existing M69 J2 is subject to national speed limit. The B4668 is subject to 50mph in the area of the proposed new roundabout.

2.2 The M69 J2 circulatory is not currently signalised. LCC are the highway authority for the circulatory carriageway and surrounding roads with the exception of the north facing slip roads to the M69 which are the responsibility of National Highways. The boundary is shown on the highway plans.

2.3 There are existing entry path deflection departures on the B4669 approaches to the circulatory in both directions.

2.4 The B4668 is a rural single carriageway road with a shared footway/cycleway to its north side.

2.5 There is an existing access to a traveller's site in the vicinity of the proposed roundabout and a layby to the south west of the proposed roundabout.

Standards Used

2.6 Unless stated otherwise the upgrades to J2 and the construction of the new link between the B4668 and the M69 will be designed in accordance with the following Design Manual for Roads and Bridges (DMRB) standards:

- CD109 "Highway Link Design"
- CD116 "Geometric Design of Roundabouts"
- CD127 "Cross-Sections and Headrooms"
- CD123 "Geometric design of at-grade priority and signal-controlled junctions"
- CD143 "Designing for walking, cycling and horse-riding"
- CD169 "The design of lay-bys, maintenance hardstandings, rest areas, service areas and observation platforms"
- CD195 "Designing for cycle traffic"

Design Speed

2.7 The design speeds for each section of the scheme are given as follows.

Road/Link Section	Road/Link Type	Design Speed (kph)	Derived from
M69 J2 to B4668 Link			
M69 J2 to Roundabout 1	Urban dual carriageway	70kph	CD109 Table 2.5 for 40mph speed limit
Roundabout 1 to	Urban dual carriageway	70kph	CD109 Table 2.5 for

Roundabout 2			40mph speed limit
Roundabout 2 to Roundabout 3	Urban dual carriageway	70kph	CD109 Table 2.5 for 40mph speed limit
Roundabout 3 to a point 200m north of the rail bridge	Urban single carriageway	70kph	CD109 Table 2.5 for 40mph speed limit
From point 200m north of the rail bridge to the B4668	Rural single carriageway	100kph	CD109 Figure 2.1
North east of B4668 roundabout	Urban single carriageway	70kph	CD109 Table 2.5 for 40mph speed limit
South west of B4668 roundabout	Urban single carriageway	85kph	CD109 Table 2.5 for 50mph speed limit
M69 Junction 2			
B4669 East approach to J2	Rural single carriageway	85kph	CD109 Figure 2.1
B4669 West approach to J2	Rural single carriageway	100kph	CD109 Figure 2.1

3. HORIZONTAL DESIGN OF LINKS

3.1 The horizontal alignment consists of various elements, depending on the type of link. Each aspect is considered below

M69 J2 to B4668 Link

M69 J2 to Roundabout 3				
Chainage	Element	Standard (70kph design speed)	Proposed Design	
			Details	Relaxations/Departures
0-56.874	Roundabout			
56.874-109.713	Right hand curve – Approach to roundabout	360m desirable min radius	255m	None – CD 116 applies
109.713-171.730	Right hand curve	360m desirable min radius	180m	Two steps below desirable minimum is a permitted relaxation
171.730-263.410	Roundabout			
263.450-349.650	Straight	-	-	None
349.650-430.470	Right hand curve	360m desirable min radius	1020m	None
430.470-542.920	Roundabout			
542.920-586.440	Left hand curve	360m desirable min radius	255m	One step below desirable minimum is a permitted relaxation
586.440-664.640	Transition to straight	~78.2m length transition curve	~78.2m length transition curve	None
664.640-671.011	Straight	-	-	None
671.011-826.478	Right hand curve	360m desirable min radius	1020m	None
826.478-829.216	Straight	-	-	None
829.216-853.467	Right hand curve	360m desirable min radius	1440m	None
853.467-927.150	Straight	-	-	None
927.150-949.614	Roundabout			

Roundabout 3 to Chainage 1855.374				
Chainage	**Element**	**Standard (70kph design speed)**	**Proposed Design**	
			Details	**Relaxations/Departures**
1009.590-1048.530	Roundabout			
1048.530-1094.089	Straight	-	-	None
1094.089-1162.089	Transition to Curve	~68m length transition curve	~68m length transition curve	None
1162.089-1407.096	Curve	360m desirable min radius	360m	None
1407.096-1475.096	Transition to straight	~68m length transition curve	~68m length transition curve	None
1475.096-1609.506	Straight	-	-	None
1609.506-1682.106	Transition to Curve	~72.6m length transition curve	~72.6m length transition curve	None
1682.106-1782.774	Curve	360m desirable min radius	220m	Two step below desirable minimum is a permitted relaxation
1782.774-1855.374	Transition to straight	~72.6m length transition curve	~72.6m length transition curve	None

Chainage 1855.374 to B4668				
Chainage	**Element**	**Standard (100kph design speed)**	**Proposed Design**	
			Details	**Relaxations/Departures**
1855.374-1938.245	Straight	-	-	None
1938.245-2299.534	Curve	720m desirable min radius	2040m	None
2299.534-2363.534	Transition	64m length transition curve	64m length transition curve	None
2363.534-2550.782	Curve	720m desirable min radius	720m	None
2420.110-2546.547	Roundabout			

4. SIGHT DISTANCE ON LINKS

4.1 The stopping sight distance is assessed for each of the links identified above. Note that visibility to traffic signals or roundabout give way lines are assessed separately.

M69 J2 to B4668 Link

M69 J2 to Roundabout 3 Northbound (70kph)			
Chainage	**Junction Features within Length**	**Proposed SSD (120m desirable SSD)**	**Relaxations / Departures**
0	M69 Junction 2		
0-13.939	None	≥120m	None
13.939-193.939	Immediate approach to proposed roundabout 1	≥120m	None
193.939-241.423	Roundabout 1		
241.423-283.998	None	≥120m	None
283.998-463.998	Immediate approach to proposed roundabout 2	≥120m	None
463.998-523.990	Roundabout 2		
523.990-769.614	None	≥120m	None
769.614-946.614	Immediate approach to proposed roundabout 3	≥120m	None
946.614	Roundabout 3		

M69 J2 to Roundabout 3 Southbound (70kph)			
Chainage	**Junction Features within Length**	**Proposed SSD (120m desirable SSD)**	**Relaxations / Departures**
946.614	Roundabout 3		
946.614-703.990	None	≥120m	None

1855.374-2199.047	None	≥215m	None
2199.047-2521.547	Immediate approach to proposed B4668 roundabout	≥215m	None
2521.547	B4668 roundabout		

Chainage 1855.374 to B4668 Southbound (100kph)			
Chainage	**Junction Features within Length**	**Proposed SSD (215m desirable SSD)**	**Relaxations / Departures**
2521.547	B4668 roundabout		
1855.374-251.547	None	≥215m	None
1855.374	Change in speed limit		

5. VERTICAL DESIGN OF LINKS

5.1 The vertical alignment consists of various elements, depending on the type if link. Each aspect is considered below.

M69 J2 to B4668 Link

M69 J2 to Roundabout 3 Northbound (70kph)					
Chainage	Vertical alignment feature	Junction features within the section	Minimum Standard	Proposed design	
				Details	Relaxations / Departures
0	M69 Junction 2 Exit				
5.689-49.122	Grade	None	0.5%-4%	-0.568%	None
49.122-129.120	Crest Curve	Immediate approach to proposed roundabout 1	30KF	40KF	None
129.120-180.799	Grade	Immediate approach to proposed roundabout 1	0.5%-4%	-2.568 %	None
180.799-193.939	Sag Curve	Immediate approach to proposed roundabout 1	20KF	300KF	None
193.939-241.423	Roundabout 1				
241.423-283.998	Sag Curve	None	20KF	300KF	None
283.998-463.998	Sag Curve	Immediate approach to proposed roundabout 2	20KF	300KF	None
463.998-523.990	Roundabout 2				
523.990-769.614	Sag Curve		20KF	300KF	None
769.614-946.614	Sag Curve	Immediate approach to proposed roundabout 3	20KF	300KF	None
946.614	Roundabout 3				

M69 J2 to Roundabout 3 Southbound (70kph)					
Chainage	Vertical alignment feature	Junction features within the section	Minimum Standard	Proposed design	
				Details	Relaxations / Departures
946.614	Roundabout 3				
946.614-703.990	Sag Curve	None	20KF	300KF	None
703.990-523.990	Sag Curve	Immediate approach to proposed roundabout 2	20KF	300KF	None
523.990-463.998	Roundabout 2				
463.998-421.423	Sag Curve	None	20KF	300KF	None
421.423-241.423	Sag Curve	Immediate approach to proposed roundabout 1	20KF	300KF	None
193.939-241.423	Roundabout 1				
193.939-180.799	Sag Curve	None	20KF	300KF	None
180.799-129.120	Grade	Immediate approach to M69 Junction 2	0.5%-4%	-2.568%	None
129.120-49.122	Crest Curve	Immediate approach	30KF	40KF	None

		to M69 Junction 2			
49.122-5.689	Grade	Immediate approach to M69 Junction 2	0.5%-4%	-0.568%	None
0	M69 Junction 2 Exit				

Roundabout 3 to Chainage 1855.374 (70kph)					
Chainage	**Vertical alignment feature**	**Junction features within the section**	**Minimum Standard**	**Proposed design**	
				Details	**Relaxations / Departures**
1009.590	Roundabout 3				
1009.590-1311.808	Sag Curve	None	20KF	300KF	None
1311.808-1483.707	Sag Curve	None	20KF	100KF	None
1483.707-1524.990	Crest Curve	None	30KF	30KF	None
1524.990-1669.659	Crest Curve	Immediate approach to minor junction	30KF	30KF	None
1669.659-1855.374	Sag Curve	Immediate approach to minor junction	20KF	175KF	None
1855.374	Change in speed limit				

Chainage 1855.374 to B4668 (100kph)					
Chainage	**Vertical alignment feature**	**Junction features within the section**	**Minimum Standard**	**Proposed design**	
				Details	**Relaxations / Departures**
1855.374	Change in speed limit				
1855.374-2260.160	Sag Curve	None	26KF	175KF	None
2260.160-2307.376	Sag Curve	Immediate approach to proposed B4668 roundabout	26KF	175KF	None
2307.376-2521.547	Grade	Immediate approach to proposed B4668 roundabout	0.5%-4%	0.369%	Deviation from recommendation in CD 109 para 5.2.2 but **not** a departure from standards
2521.547	B4668 Roundabout				

6. CROSS SECTIONS OF LINKS

6.1 Proposed cross sections of the links to CD 127 are shown on the drawings. These are summarised as follows:

- M69 J2 – Roundabout 1 – D2UAP urban dual carriageway
- Roundabout 1 – Roundabout 2 – D2UAP urban dual carriageway
- Roundabout 2 – Roundabout 3 – D2UAP urban dual carriageway
- Roundabout 3 to Ch 1855.374 – SU2 urban single carriageway
- Ch 1855.374 – B4668 roundabout – S2 rural single carriageway

7. M69 J2 TO B4668 LINK JUNCTION AND FEATURES

Roundabout 1

7.1 The proposed ICD is 60.0m and the circulatory width is 10.0m, which is between 1 and 1.2 times the maximum entry width of 9.0m.

7.2 There will be two approaches to the roundabout and these are assessed as follows:

Roundabout 1 Northbound Approach (Design speed: 70kph)			
Requirement	**Criteria**	**Actual provided**	**Departure from Standard?**
Visibility on approach	120m for 180m (1.5 x SSD)	≥ 120m for 180m	No
Visibility on entry	40m at 15m back from give way line	≥ 40m at 15m back from give way line	No
Visibility to right on entry	40m from give way line and 15m back from give way line	≥ 40m at 15m back from give way line	No
Entry path curvature	≤ 100m	82.87m	No
Entry angle	20° to 60°	32°	No
Entry radius	20m to 100m	20m	No
Lane width on entry	3-4.5m	2x4.5m	No

Roundabout 1 Southbound Approach (Design speed: 70kph)			
Requirement	**Criteria**	**Actual provided**	**Departure from Standard?**
Visibility on approach	120m for 180m (1.5 x SSD)	≥ 120m for 180m	No
Visibility on entry	40m at 15m back from give way line	≥ 40m at 15m back from give way line	No
Visibility to right on entry	40m from give way line and 15m back from give way line	≥ 40m at 15m back from give way line	No
Entry path curvature	≤ 100m	96.4m	No
Entry angle	20° to 60°	43.5°	No
Entry radius	20m to 100m	20m	No
Lane width on entry	3-4.5m	2x4.5m	No

Roundabout 2

7.3 The proposed ICD is 60.0m and the circulatory width is 10.0m, which is between 1 and 1.2 times the maximum entry width of 9.0m.

7.4 There will be four approaches to the roundabout and these are assessed as follows:

Roundabout 2 Northbound Approach (Design speed: 70kph)			
Requirement	**Criteria**	**Actual provided**	**Departure from Standard?**
Visibility on approach	120m for 180m (1.5 x SSD)	≥ 120m for 180m	No
Visibility on entry	40m at 15m back from give way line	≥ 40m at 15m back from give way line	No
Visibility to right on entry	40m from give way line and 15m back from give way line	≥ 40m at 15m back from give way line	No
Entry path curvature	≤ 100m	94.36m	No
Entry angle	20° to 60°	31.1°	No
Entry radius	20m to 100m	20m	No
Lane width on entry	3-4.5m	2x4.5m	No

Roundabout 2 Southbound Approach (Design speed: 70kph)			
Requirement	**Criteria**	**Actual provided**	**Departure from Standard?**
Visibility on approach	120m for 180m (1.5 x SSD)	≥ 120m for 180m	No
Visibility on entry	40m at 15m back from give way line	≥ 40m at 15m back from give way line	No
Visibility to right on entry	40m from give way line and 15m back from give way line	≥ 40m at 15m back from give way line	No
Entry path curvature	≤ 100m	91.70m	No
Entry angle	20° to 60°	39.3°	No
Entry radius	20m to 100m	20m	No
Lane width on entry	3-4.5m	2x4.5m	No

Roundabout 2 Westbound Approach (Design speed: 60kph)			
Requirement	**Criteria**	**Actual provided**	**Departure from Standard?**
Visibility on approach	90m for 135m (1.5 x SSD)	≥ 90m for 135m	No
Visibility on entry	40m at 15m back from give way line	≥ 40m at 15m back from give way line	No
Visibility to right on entry	40m from give way line and 15m back from give way line	≥ 40m at 15m back from give way line	No
Entry path curvature	≤ 100m	76.33m	No
Entry angle	20° to 60°	40°	No
Entry radius	20m to 100m	20m	No
Lane width on entry	3-4.5m	2x4.25m	No

Roundabout 2 Eastbound Approach (Design speed: 40kph)			
Requirement	**Criteria**	**Actual provided**	**Departure from Standard?**
Visibility on approach	70m for 135m (1.5 x SSD)	≥ 70m for 135m	No
Visibility on entry	40m at 15m back from give way line	≥ 40m at 15m back from give way line	No
Visibility to right on entry	40m from give way line and 15m back from give way line	≥ 40m at 15m back from give way line	No
Entry path curvature	≤ 100m	56.87m	No
Entry angle	20° to 60°	32.7°	No
Entry radius	20m to 100m	20m	No
Lane width on entry	3-4.5m	4.5m	No

Roundabout 3

7.5 The proposed ICD is 60.0m and the circulatory width is 10.0m, which is between 1 and 1.2 times the maximum entry width of 9.0m.

7.6 There will be four approaches to the roundabout and these are assessed as follows:

Roundabout 3 Northbound Approach (Design speed: 70kph)			
Requirement	**Criteria**	**Actual provided**	**Departure from Standard?**
Visibility on approach	120m for 180m (1.5 x SSD)	≥ 120m for 180m	No
Visibility on entry	40m at 15m back from give way line	≥ 40m at 15m back from give way line	No
Visibility to right on entry	40m from give way line and 15m back from give way line	≥ 40m at 15m back from give way line	No
Entry path curvature	≤ 100m	97.05m	No
Entry angle	20° to 60°	40.3°	No
Entry radius	20m to 100m	20m	No
Lane width on entry	3-4.5m	2x4.5m	No

Roundabout 3 Eastbound Approach (Design speed: 60kph)			
Requirement	**Criteria**	**Actual provided**	**Departure from Standard?**
Visibility on approach	90m for 135m (1.5 x SSD)	≥ 120m for 180m	No

Visibility on entry	40m at 15m back from give way line	≥ 40m at 15m back from give way line	No
Visibility to right on entry	40m from give way line and 15m back from give way line	≥ 40m at 15m back from give way line	No
Entry path curvature	≤ 100m	77.78m	No
Entry angle	20° to 60°	29.5°	No
Entry radius	20m to 100m	40m	No
Lane width on entry	3-4.5m	2x4.25m	No

Roundabout 3 Southbound Approach (Design speed: 70kph)			
Requirement	**Criteria**	**Actual provided**	**Departure from Standard?**
Visibility on approach	120m for 180m (1.5 x SSD)	≥ 120m for 180m	No
Visibility on entry	40m at 15m back from give way line	≥ 40m at 15m back from give way line	No
Visibility to right on entry	40m from give way line and 15m back from give way line	≥ 40m at 15m back from give way line	No
Entry path curvature	≤ 100m	71.80m	No
Entry angle	20° to 60°	32.8°	No
Entry radius	20m to 100m	20m	No
Lane width on entry	3-4.5m	2x3.5m	No

Roundabout 3 Westbound Approach (Design speed: 60kph)			
Requirement	**Criteria**	**Actual provided**	**Departure from Standard?**
Visibility on approach	90m for 135m (1.5 x SSD)	≥ 120m for 180m	No
Visibility on entry	40m at 15m back from give way line	≥ 40m at 15m back from give way line	No
Visibility to right on entry	40m from give way line and 15m back from give way line	≥ 40m at 15m back from give way line	No
Entry path curvature	≤ 100m	96.27m	No
Entry angle	20° to 60°	39.5°	No
Entry radius	20m to 100m	20m	No
Lane width on entry	3-4.5m	2x4.25m	No

B4668 Roundabout

7.7 The proposed ICD is 50.0m and the circulatory width is 10.0m, which is between 1 and 1.2 times the maximum entry width of 8.75m.

7.8 There will be three approaches to the roundabout with a segregated left turn lane (SLTL) on the westbound approach and these are assessed as follows:

B4668 Roundabout Northbound Approach (Design speed: 100kph)			
Requirement	**Criteria**	**Actual provided**	**Departure from Standard?**
Visibility on approach	215m for 322.5m (1.5 x SSD)	≥ 215m for 322.5m	No
Visibility on entry	40m at 15m back from give way line	≥ 40m at 15m back from give way line	No
Visibility to right on entry	40m from give way line and 15m back from give way line	≥ 40m at 15m back from give way line	No
Entry path curvature	≤ 100m	65.10m	No
Entry angle	20° to 60°	41°	No
Entry radius	20m to 100m	30.0m	No
Lane width on entry	3-4.5m	2x4.5m	No

B4668 Roundabout Eastbound Approach (Design speed: 70kph)			
Requirement	**Criteria**	**Actual provided**	**Departure from Standard?**
Visibility on approach	120m for 180m (1.5 x SSD)	≥ 120m for 180m	No
Visibility on entry	40m at 15m back from give way line	≥ 40m at 15m back from give way line	No
Visibility to right on entry	40m from give way line and 15m back from give way line	≥ 40m at 15m back from give way line	No
Entry path curvature	≤ 100m	97.90m	No
Entry angle	20° to 60°	29.2 °	No
Entry radius	20m to 100m	20.0m	No
Lane width on entry	3-4.5m	4.5m	No

B4668 Roundabout Westbound Approach (Design speed: 70kph)			
Requirement	**Criteria**	**Actual provided**	**Departure from Standard?**
Visibility on approach	120m for 180m (1.5 x SSD)	≥ 120m for 180m	No
Visibility on entry	40m at 15m back from give way line	≥ 40m at 15m back from give way line	No
Visibility to right on entry	40m from give way line and 15m back from give way line	≥ 40m at 15m back from give way line	No
Entry path curvature	≤ 100m	67.90m	No

Entry angle	20° to 60°	25.4°	No
Entry radius	20m to 100m	22.0m	No
Lane width on entry	3-4.5m	4.5m	No
SLTL Radius	-	100m	No
SLTL Width	6.2m	6.2m	No
Lane Width	3.7m	3.7m	No

M69 Junction 2 Roundabout

7.9 The M69 Junction 2 roundabout is to be widened in various locations and fully signalised. New south facing slip roads are to be connected to the southern half of the roundabout.

7.10 The existing bridge structures over the M69 are unaffected by the proposed works, with no widening proposed, nor new connections to the structures.

7.11 The roundabout is to be widened on the eastern and western sections to 13.5m. This is between 1 and 1.2 times the maximum approach width of 13.3m.

7.12 The B4668 arms are to be realigned to provide suitable entry path deflection and permit space to install the new site access arm and the new south facing merge slip road.

7.13 The geometry of the roundabout is assessed below.

M69 J2 Site Access Arm Approach (Design speed: 70kph)			
Requirement	**Criteria**	**Actual provided**	**Departure from Standard?**
Visibility on approach	120m for 180m (1.5 x SSD)	≥ 120m for 180m	No
Visibility on entry	40m at 15m back from give way line	≥ 40m at 15m back from give way line	No
Visibility to right on entry	40m from give way line and 15m back from give way line	≥ 40m at 15m back from give way line	No
Entry path curvature	≤ 100m	70.0m	No
Entry angle	20° to 60°	36.1°	No
Entry radius	20m to 100m	35m	No
Lane width on entry	3-4.5m	3x4.4m	No

M69 J2 Southbound Diverge Approach (Design speed: 70kph)			
Requirement	**Criteria**	**Actual provided**	**Departure from Standard?**

Visibility on approach	120m for 180m (1.5 x SSD)	≥ 120m for 180m	No
Visibility on entry	40m at 15m back from give way line	≥ 40m at 15m back from give way line	No
Visibility to right on entry	40m from give way line and 15m back from give way line	≥ 40m at 15m back from give way line	No
Entry path curvature	≤ 100m	95.0m	No
Entry angle	20° to 60°	23.8°	No
Entry radius	20m to 100m	45m	No
Lane width on entry	3-4.5m	2x4.4m	No

M69 J2 B4669 Westbound Approach (Design speed: 100kph)			
Requirement	**Criteria**	**Actual provided**	**Departure from Standard?**
Visibility on approach	215m for 332.5m (1.5 x SSD)	≥ 215m for 322.5m	No
Visibility on entry	40m at 15m back from give way line	≥ 40m at 15m back from give way line	No
Visibility to right on entry	40m from give way line and 15m back from give way line	≥ 40m at 15m back from give way line	No
Entry path curvature	≤ 100m	98.0m	No
Entry angle	20° to 60°	68°	Not in accordance with recommendations but **not** a departure from standards.
Entry radius	20m to 100m	30m	No
Lane width on entry	3-4.5m	3x4.4m	No

M69 J2 Northbound Diverge Approach (Design speed: 70kph)			
Requirement	**Criteria**	**Actual provided**	**Departure from Standard?**
Visibility on approach	120m for 180m (1.5 x SSD)	≥ 120m for 180m	No
Visibility on entry	40m at 15m back from give way line	≥ 40m at 15m back from give way line	No
Visibility to right on entry	40m from give way line and 15m back from give way line	≥ 40m at 15m back from give way line	No
Entry path curvature	≤ 100m	90.0m	No

Entry angle	20° to 60°	42.2°	No
Entry radius	20m to 100m	30m	No
Lane width on entry	3-4.5m	2x4.1m	No

M69 J2 B4669 Eastbound Approach (Design speed: 70kph)			
Requirement	**Criteria**	**Actual provided**	**Departure from Standard?**
Visibility on approach	215m for 332.5m (1.5 x SSD)	≥ 215m for 332.5m	No
Visibility on entry	40m at 15m back from give way line	≥ 40m at 15m back from give way line	No
Visibility to right on entry	40m from give way line and 15m back from give way line	≥ 40m at 15m back from give way line	No
Entry path curvature	≤ 100m	98.0m	No
Entry angle	20° to 60°	48.4°	No
Entry radius	20m to 100m	30m	No
Lane width on entry	3-4.5m	3x4.4m	No

Bus Lay-by

7.14 A bus lay-by will be provided on both the northbound and southbound sides between roundabouts 2 and 3. Both of these have been designed in accordance with CD169 and are dimensioned on the drawings.

Non-motorised user (NMU) crossing points

7.15 Shared footway/cycleways are provided along the length of the link road as shown on the layout drawings. These are provided on both sides of the road through the 'urban' section and on the south western side only through the 'rural' section to the north of the railway. An uncontrolled crossing point is provided to the north of the railway to provide connectivity between the two sides of the carriageway.

7.16 At the B4668 roundabout, an uncontrolled crossing point utilising the splitter island on the eastbound approach is provided to link the new footway/cycleway along the link road to the existing footway/cycleway to the north of the B4668.

7.17 A permissive path is provided along the private means of access to Bridge Farm in order to link the bridleway (U52/9) to the footway/cycleway on the link road.

7.18 A bridleway underpass is provided in this location to connect Burbage Common Road to U59/2.

7.19 NMU crossing points have been incorporated into the splitter islands where footway cycleway is present. The predominant crossing points will be over the site access arms

of the roundabouts on the link roads where the expected AADT is below the recommended threshold for introducing controlled crossings.

7.20 Controlled crossing points for the link road are provided at two locations. A two stage toucan crossing near the proposed bus stops and a one stage pegasus crossing near the M69 J2 roundabout.

7.21 Uncontrolled crossing points are provided over the link road at the splitter islands on the roundabouts but it is not expected that these will form a significant desire line and therefore they are not expected to be heavily used.

7.22 At M69 J2, the existing uncontrolled crossing points over the north facing slip roads will be retained and improved with new tactile paving and widened footway provision. These will become 'walk with traffic' style crossings as the roundabout is to be signalised. The expected AADT utilising the north facing slip roads is below the threshold for provision of controlled crossings.

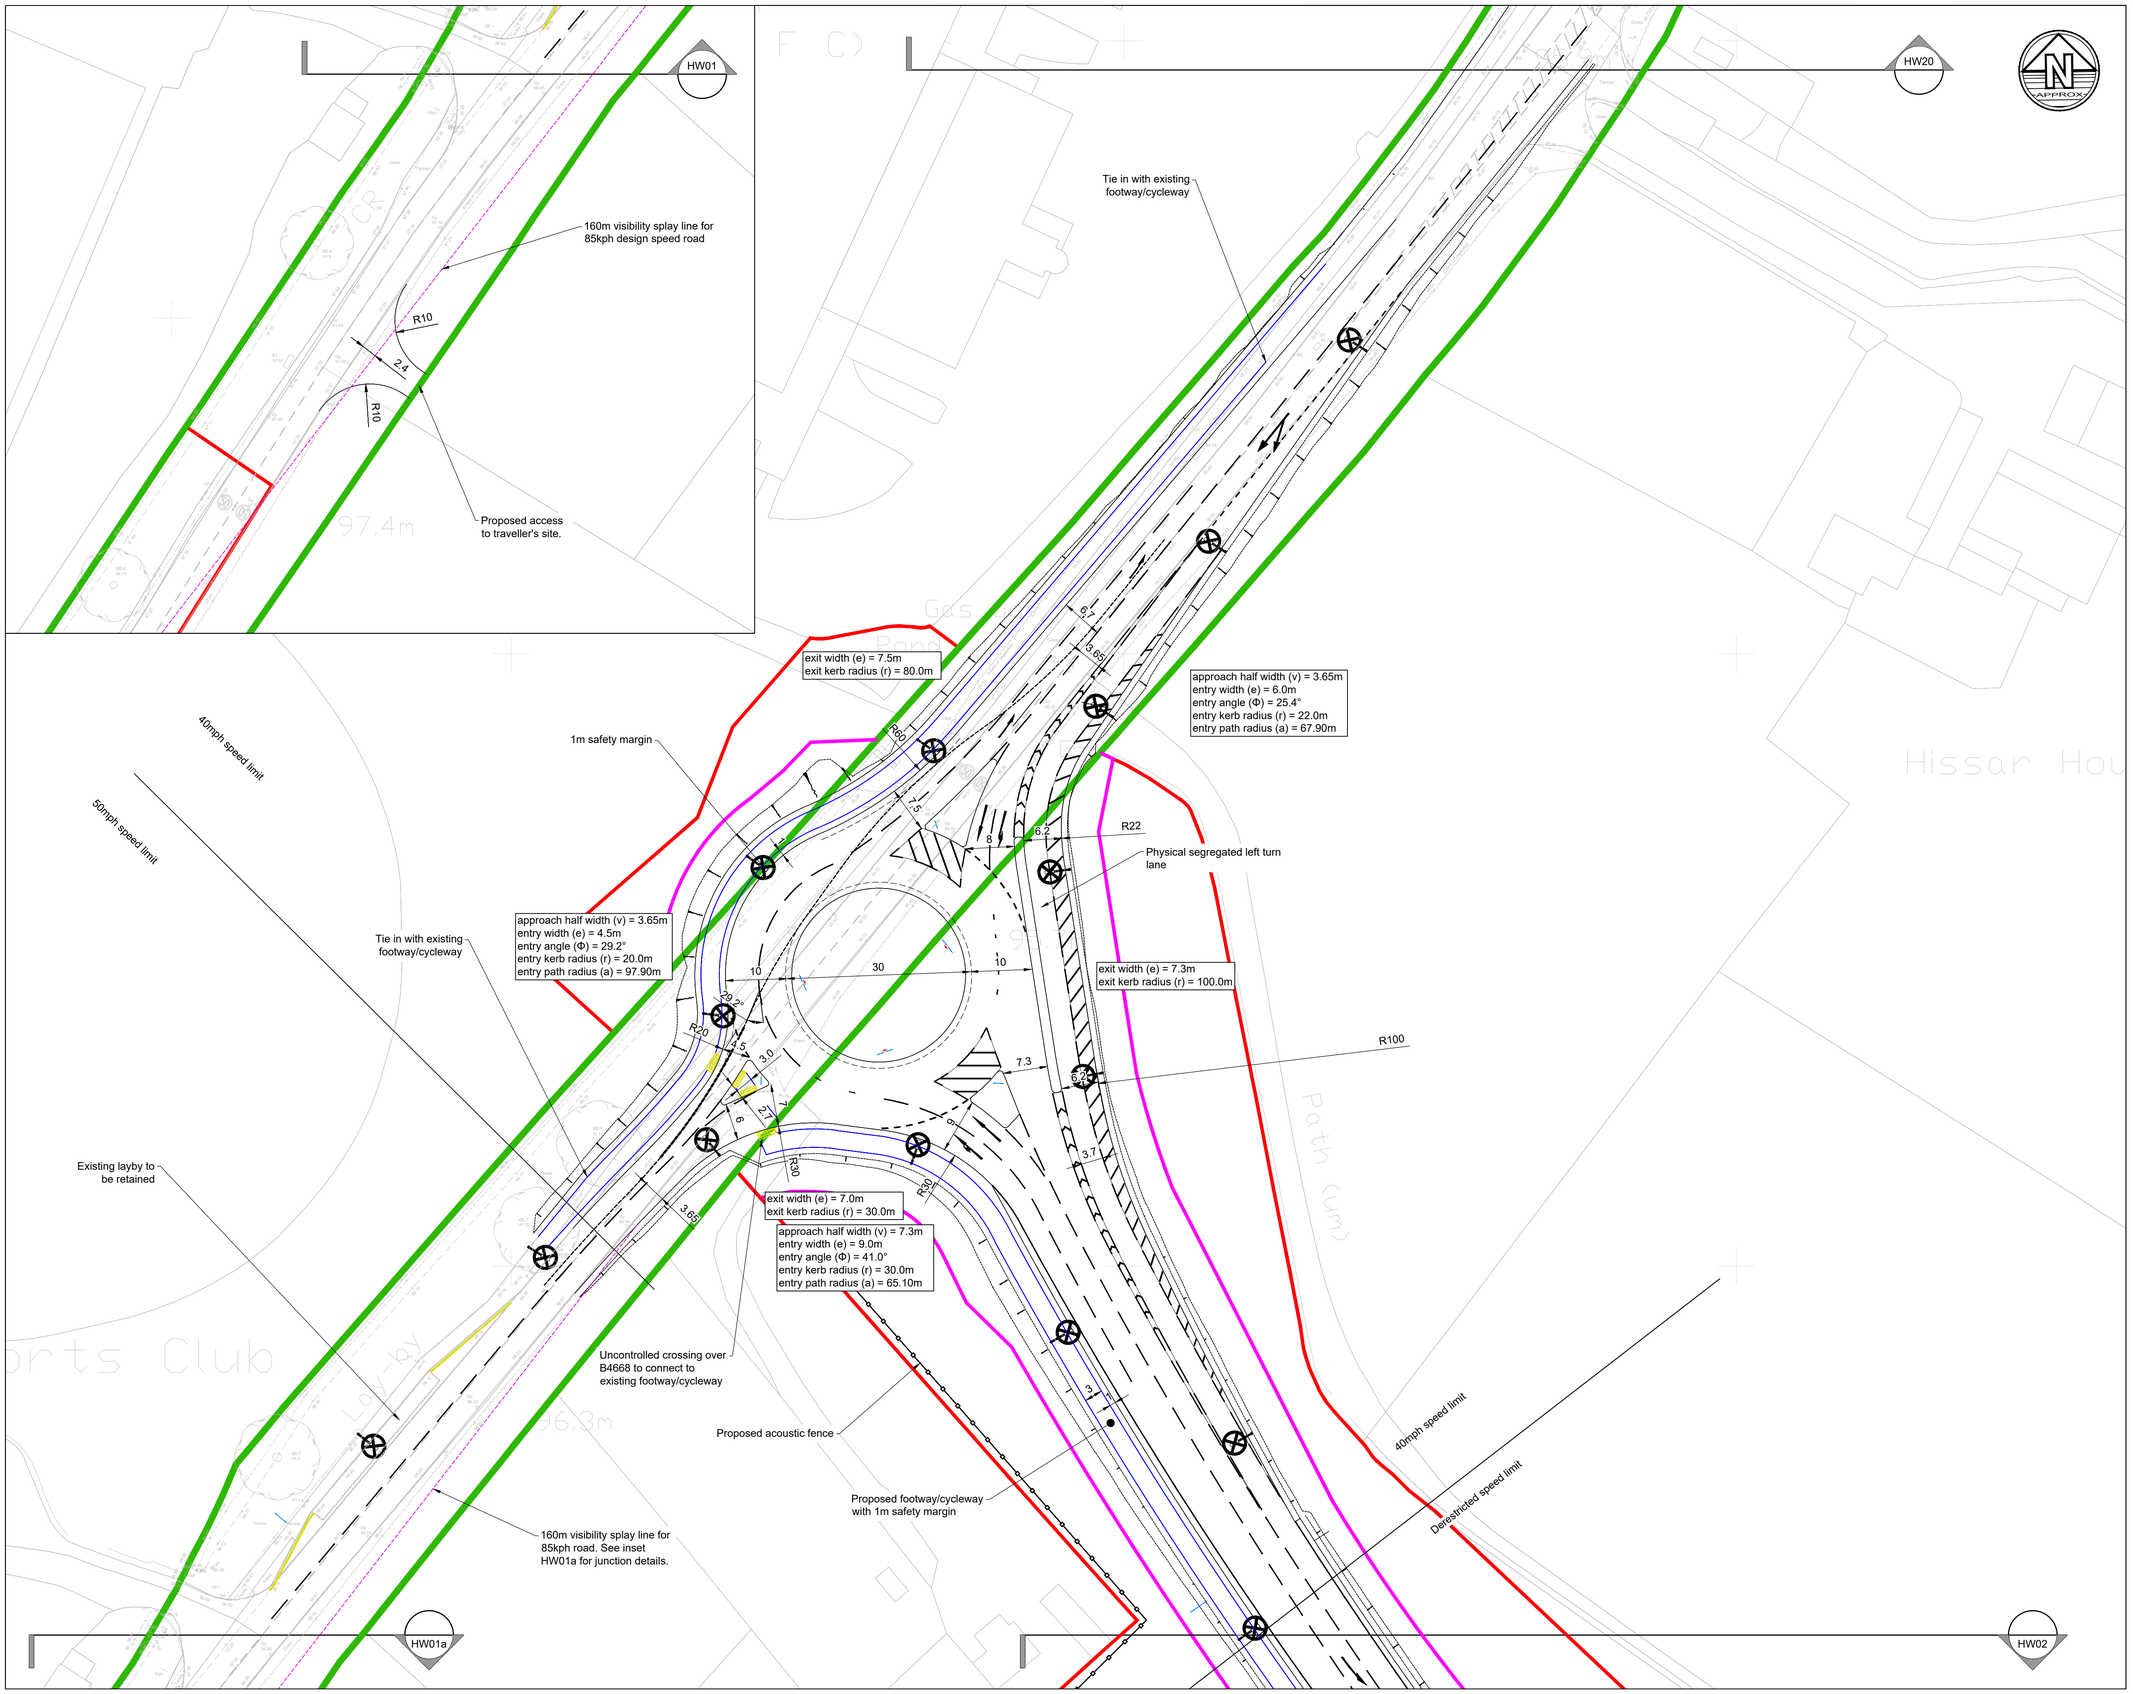
8. REMOTE JUNCTION MITIGATION

8.1 The geometric design of the remote junction mitigation works is driven predominantly by vehicle tracking. Drawings showing these are appended to this report.

8.2 Key geometric features, footway/cycleways, traffic signals, crossing points and other details are labelled on the layout plans.

APPENDICES

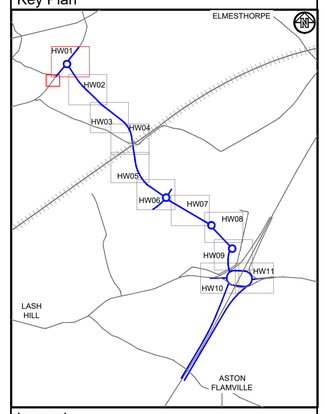
APPENDIX A: Scheme Layout Drawings and Long Sections



Notes

1. Do not scale from this drawing. All dimensions must be checked/verified on site. If in doubt, ask.
2. This drawing is to be read in conjunction with all relevant architects, engineers and specialists drawings and specifications
3. All dimensions in metres unless noted otherwise. All levels in metres unless noted otherwise
4. Any discrepancies noted on site are to be reported to the engineer immediately
5. For further details on specific areas of works, see the relevant SHW series drawings and appedices
6. All works must be carried out to the requirements of the overseeing organisation.

Key Plan



Legend

- DCO Land boundary limit
- Primary Signal Head

Carriageway widened to allowed two lane flare for dedicated left and right turn movements

Advanced cycle stop line provided

Splitter island reduces in length to allow through movements to two lanes

Ties into existing carriageway on Coventry Road

Kerb radii amended to accomodate spliter islands on minor arm

Proposed signalisation of the existing ghost island right turn junction

Street furniture within this verge to be assessed and relocated if required.

Ties into existing kerbline

Ties into existing ghost island right turn lane
