

Harborough District Council

Registration ID Number: 20040134

8th March 2024

Officers at Harborough District Council would like to make the following comments:

Harborough District Council has consistently highlighted the importance of transport impacts being appropriately understood and mitigated to the satisfaction of the transport authorities and National Highways. We understand there remains significant issues relating to the applicant's transport modelling and mitigation proposed, including in relation to the Cross-in-Hands and Gibbet Hill roundabouts on the A5. These matters must be addressed, and appropriate mitigation proposed by the applicant to the satisfaction of the local transport authorities and National Highways, to ensure the development is sustainable.
