Environmental Statement Volume 2: Appendices

Appendix 5 - ES Appendix 11.2: Public Rights of Way Appraisal and Strategy

Document reference: 6.2.11.2~~ED~~

Revision: 0~~7~~10

December~~February~~2024

Planning Act 2008

The Infrastructure Planning (Applications: Prescribed Forms and Procedure) Regulations 2009
Regulation 5(2)(a)

The Infrastructure Planning (Environmental Impact Assessment) Regulations 2017
Regulation 14

This document forms a part of the Environmental Statement for the Hinckley National Rail Freight Interchange project.

Tritax Symmetry (Hinckley) Limited (TSH) has applied to the Secretary of State for Transport for a Development Consent Order (DCO) for the Hinckley National Rail Freight Interchange (HNRFI).

To help inform the determination of the DCO application, TSH has undertaken an environmental impact assessment (EIA) of its proposals. EIA is a process that aims to improve the environmental design of a development proposal, and to provide the decision maker with sufficient information about the environmental effects of the project to make a decision.

The findings of an EIA are described in a written report known as an Environmental Statement (ES). An ES provides environmental information about the scheme, including a description of the development, its predicted environmental effects and the measures proposed to ameliorate any adverse effects.

Further details about the proposed Hinckley National Rail Freight Interchange are available on the project website:

<http://www.hinckleynrfi.co.uk/>

The DCO application and documents relating to the examination of the proposed development can be viewed on the Planning Inspectorate's National Infrastructure Planning website:

<https://infrastructure.planninginspectorate.gov.uk/projects/east-midlands/hinckley-national-rail-freight-interchange/>

Appendix 11.2 ◆ Public Rights of Way Appraisal and Strategy

INTRODUCTION

- 1.1. This Public Rights of Way Appraisal and Strategy has been prepared by the Environmental Dimension Partnership Ltd (EDP), on behalf of Tritax Symmetry (Hinckley) Limited. The Proposed Development, which would provide a National Rail Freight Interchange, employment and community uses, landscaping and supporting infrastructure provision is the subject of a Development Consent Order (DCO) application for a Nationally Significant Infrastructure Project (NSIP).
- 1.2. This appraisal sets out the findings of a baseline assessment which considers the impacts resulting from development of the DCO Site on existing Public Rights of Way (PRoW) and Informal Open Space (IOS). The appraisal considers the impacts on PRoWs and IOS both within the DCO Site and in its immediate vicinity. Specifically, EDP's work reports on the methodology, planning policy, baseline conditions, and likely impacts resulting from the Proposed Development and any mitigation measures that may be required to prevent, reduce or offset any negative impacts arising from it.
- 1.3. It is important to note that this appraisal deals with matters related to informal recreation only (e.g. walking and other recreational pursuits such as bird watching or picnicking). It does not include an assessment of the requirements for, and accessibility of, formal open space or the activities associated with this, such as organised football practice or matches on marked out football pitches.
- 1.4. The objectives of this assessment are to:
 - Review the existing PRoWs and IOS network within and adjacent to the DCO Site;
 - Predict the likely effects of the Proposed Development on the use of PRoWs and IOS, within and adjacent to the DCO Site;
 - Assess the condition and use of PRoW that would be affected by the Proposed Development; and
 - Suggest proposals to mitigate impact on, or otherwise enhance, the PRoW and IOS network within the DCO Site.
- 1.5. This Appendix should be read in conjunction with the following Annexes:
 - Annex 1 - Definitive Map and Statement;
 - Annex 2 - Public Rights of Way Survey Notes; and

- Annex 3 - Public Right of Way Use Surveys.

METHODOLOGY

- 1.6. There is no recognised approach or accepted industry guidance relating to the assessment of PRoWs and IOS and, as such, the methodologies employed by EDP in undertaking this assessment are based upon professional experience and judgement in this field.

Desk Study and Scope of Work

- 1.7. Definitive Map and Statement information was obtained from Leicestershire County Council (LCC) on 03 May 2018 together with information on permissive and promoted routes within and adjacent to the DCO Site. Further information was sought on promoted routes from the internet, which was searched for detailed reference material (see Annex 1). The Definitive Map and Statement Information was obtained again from LCC on 25th October 2022 to check for any amends. This confirmed the data had not changed since 2018.
- 1.8. Figure 11.3 (document reference 6.3.11.3) details the PRoW within and adjacent to the DCO Site, including the reference numbers given on the definitive map. Also noted on Figure 11.3 are areas of Open Access Land (CRoW Act 2000) and Burbage Common and Woods Country Park.
- 1.9. The Proposed Development was considered against the PRoW baseline to identify where likely effects may occur.
- 1.10. It was noted that the limited nature of the off-site highways works within the DCO Site would have no impact on PRoW in the vicinity beyond what would normally be encountered in terms of crossing the highway, negotiating traffic and associated noise. It was also noted that the nature of the off-site railway works within the DCO boundary specifically related to the closure of pedestrian level crossings over the railway line, and impacts on PRoW at and connecting to these two specific locations could be considered in isolation.
- 1.11. A study area of 500m from the boundary of the Main HNRFI Site and the A47 Link Road was therefore established to assess potential effects on PRoW and IOS within and adjacent to the boundaries of the Main HNRFI Site and the A47 Link Road. A walking condition survey of all PRoW within this Study Area was completed as part of the assessment. In addition, a User Survey of all PRoW to be stopped up, diverted or altered by the Proposed Development was carried out as part of the assessment. This does not include the offsite pedestrian level rail crossings to be diverted as they were not part of the DCO Limits at the time of the user surveys. User surveys were not subsequently extended to these routes as they were understood to have been commissioned by LCC. To date, it is not known if these surveys have taken place. Condition surveys of these routes have given an indication of use and the nature of the diversion to be implemented, and in both cases accommodates a high number of daily users.

Survey Work

Condition Survey

1.12. PRow walkover condition surveys were undertaken on 17 January 2018 and 20 June 2018 during which all PRowS within 500m of the Main HNRFI Site were assessed. In addition, promoted routes and IOS within the 500m 'zone of influence' were also assessed. Update surveys to check for any changes in the routes surveyed to date and to include PRow within 500m of the A47 Link Road were undertaken in February 2021, February 2022 and September 2022. In February and September 2022, the additional routes crossing the railway within the wider Order Limits were also assessed.

1.13. During the surveys, information relating to the following points were recorded:

- PRow number;
- General condition;
- Management and context of the route (pastoral, arable, woodland or urban/non-agricultural);
- User evidence (erosion, prints, dog faeces, litter, etc.);
- Links/connectivity to other PRowS;
- Whether or not the route is promoted;
- Obstructions; and
- Users noted during the survey.

1.14. The full notes of the survey are provided at Annex 2.

PRow User Survey

1.15. To gain a fuller understanding of the number of users that would be affected by changes in the PRow network, a series of Non-Motorised User (NMU) surveys were undertaken of PRow that are proposed to be stopped up, diverted or altered by the Proposed Development.

1.16. Surveys were undertaken at the locations marked on Figure 11.3 (document reference 6.3.11.3) in July 2019, October 2019 and June 2021.

1.17. Surveys involved the erection of a camera on a telescopic mast at each location orientated to capture movements on all PRow in all directions at that location. The video footage from the cameras was then manually 'watched' to count the number of users passing the location. Users were grouped according to type – pedestrian, runner, cyclist, equestrian and direction – north, south, east or west as relevant.

- 1.18. There were some practical difficulties setting out the cameras which led to two locations not being used, Location 1 being used only once and Location 10 being used only twice. Where it was clear that locations had been missed, an additional week of surveys were undertaken in October 2019 to collect missing data. However, this was undertaken by a different provider which led to some further inconsistencies in data collection. For example, the October provider only counted users on footpath U50 at Location 5 whereas the previous provider also included users on Burbage Common Road. Similarly, the October provider only counted users at an obstructed location on footpath V35 at Location 10, whereas the previous provider included users of V29/8 and the B4669.
- 1.19. Whilst there are clearly some shortcomings in the PRoW user data collected, the data does indicate clear trends and is therefore considered to be sufficient for the purposes of this assessment.
- 1.20. To supplement the user survey, data was also obtained from Network Rail with regard to use of the pedestrian level crossings within the DCO Site.

Inter-relationship with other Masterplan Considerations

- 1.21. To ensure that the PRoW proposals are consistent with landscape, visual amenity and nature conservation aspirations which have informed the evolution of the Masterplan, consideration was given to other aspects of the environment that are closely related to PRoWs and include:
- Green Infrastructure – which considers the wider green links in the landscape and natural history context;
 - Landscape and Visual Amenity – where the visual impact of the development proposals on PRoWs may be particularly important;
 - Transport Infrastructure and Utilities – where on-site provision, particularly related to public transport and cycling, may affect off-site movement on the PRoW network; and
 - Ecology – where the movement of people, and particularly the disturbance they create, may affect wildlife.

RELEVANT PLANNING POLICY

- 1.22. This section summarises the current planning policy that is relevant to the Proposed Development. It focusses on planning policy at the district and local levels, which guides the approach and management of PRoWs and IOS.
- 1.23. PRoW are maintained and managed at a County Level by LCC. In line with National Policy to promote sustainable transport and active travel, LCC have developed a Cycling and Walking Strategy to promote active travel in the county and an update to the PRoW Improvement Plan is an action within the Transport Action Plan.

- 1.24. LCC is also in the process of developing a Local Cycling and Walking Infrastructure Plan (LCWIP). This is being consulted on in sections and includes the development of a draft LCWIP for the South of Leicester Area which includes Blaby District.

Leicestershire Rights of Way Improvement Plan (2011–2016)

- 1.25. Under section 60 of the Countryside and Rights of Way Act 2000 (CROW), LCC is required to develop and produce a revised Rights of Way Improvement Plan (ROWIP) which is to be adopted within the Local Transport Plan (LTP3). It is noted that the current ROWIP is now out of date but that some of the key principles set out remain valid, including the need to provide urban links into the PRow network, forming part of the wider highway network, the standards expected to ensure ease of use and the promotion of the ‘Leicestershire Round’ promoted Route.

Development and Public Rights of Way Guidance Note for Designers, Developers and Planners, Rights of Way Service, Travel Choice and Access Team, Leicestershire County Council

- 1.26. This guidance note was produced in August 2011 and would also be regarded as being out of date in terms of a response to current planning policy. However, many of the principles remain valid. Design considerations such as suggested widths of diverted footpaths and bridleways are considered as part of the PRow Strategy:

- The Blaby District Core Strategy (adopted February 2013); and
- Blaby District Local Plan (Delivery) Development Plan (Adopted February 2019).

- 1.27. In addition, the Leicestershire Rights of Way Improvement Plan¹, which provides a policy framework for issues relating to access and informal recreation within Leicestershire, was reviewed, as was the Development and Public Rights of Way (DPRoW), which includes a section dealing with accommodation of PRow's during development. The Blaby Green Spaces Strategy is also considered below.

- 1.28. At a local level, Blaby District Council's Core Strategy considers PRow's as part of Policy CS10 – Transport Infrastructure.

Blaby Local Plan Core Strategy – Adopted (February 2013)

- 1.29. With regard to walking, cycling and bridleway networks, the policy CS10 states:

“Walking, cycling and bridleway networks

Opportunities to work with partners to provide new and improved safe cycling, walking and bridleway routes will be explored. Improved conditions for cyclists, pedestrians and horse-riders generally across the District will be encouraged, including adequate cycle parking and associated facilities.

Links between proposed areas of new development and new and existing key services and

¹ https://www.leicestershire.gov.uk/sites/default/files/field/pdf/2015/12/8/leics_rowip2.pdf

facilities (including employment, retail, leisure and education centres) will be provided as part of Masterplans (in the case of the SUE and other strategic scale proposals) and Design and Access Statements in all other cases.”

Hinckley and Bosworth Borough Council Core Strategy – Adopted December 2009

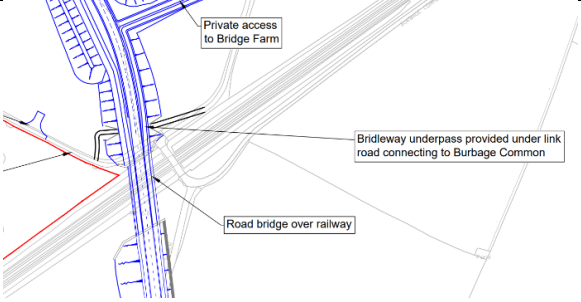

- 1.30. The Hinckley and Bosworth Core Strategy doesn't specifically refer to the PRoW network in policy terms but there are references to enhancements to the network within Policy 6: Hinckley/Barwell/Earl Shilton/Burbage Green Wedge.
- 1.31. Also of relevance to this report is Policy 20: Green Infrastructure which includes the Strategic Intervention of Increasing the Size of the Burbage Common and Woods Country Park.

CONSULTATION

- 1.32. LCC Highways and the PRoW officer at LCC have been consulted in relation to the Proposed PRoW Strategy. Recent correspondence and meetings include:
- 26.02.21 - Telephone correspondence with PRoW officer at LCC to discuss potential blocking back of rail/PRoW crossings and alternative options;
 - 26.02.21 - Follow up email to PRoW officer at LCC to confirm matters discussed;
 - 22.06.21 – Latest PRoW Strategy issued to LCC PRoW officer by email;
 - 19.07.21 – No issues raised by LCC PRoW officer on intended strategy. Recommendations made by LCC on widths and construction of PRoW;
 - 23.05.22 – PRoW Strategy in relation to the Pedestrian Level Crossing over the railway near The Outwoods issued to LCC PRoW Officer for Comment; and
 - 28.09.22 – Meeting with LCC Highways to discuss PRoW Matters raised as part of PEIR Consultation.
- 1.33. As part of the pre-application consultation, a number of other statutory and non-statutory consultees were also consulted in relation to the PRoW Strategy as set out in the Consultation Report.
- 1.34. A meeting was held with the British Horse Society on 07.02.22 to discuss concerns in relation to disruption to the bridleway network as set out below.

Table 1.1 British Horse Society Consultation

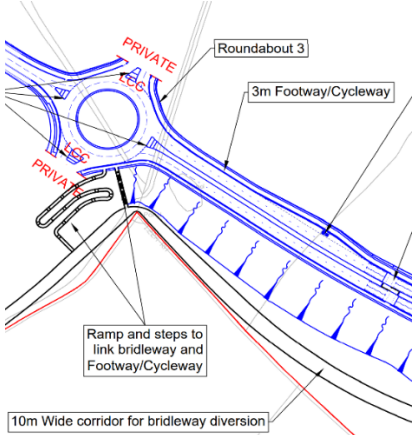

British Horse Society Comment	EDP Response
<p>Possible re-location eastwards of the BW V29 crossing so that it is away from junction manoeuvres. Currently the crossing involves stopping in the triangle between the two slip roads to the roundabout.</p>	<p>Crossing incorporated into signalised junction See Highways Plan Sheet 4 of 8 (document reference 2.18.5).</p>
<p>Provision of a Pegasus crossing for BW V29 as it crosses this road.</p>	<p>A Pegasus crossing is included in the V29 crossing on the B4669 westbound junction as well as at the signalised crossing on the A47 Link Road north west of M69 Junction 2.</p>
<p>Re-location of the western arm of BW V29 to its permanent line before construction starts.</p>	<p>PRoW diversions are included as part of the early enabling works proposals to ensure safe access during construction and early establishment of planting along green routes.</p>
<p>MAJOR ISSUE identified by riders based at the livery yards in Elmesthorpe and on Burbage Common Road. They rely on BW U52 and Burbage Common Road to reach (and return from) Burbage Common with its BW (U51) and additional riding routes. There is a significant risk that the livery yard businesses could fail if customers move elsewhere during an extended construction period.</p>	<p>Route around east of site to be provided as early as possible during enabling works to minimise disruption.</p>
<p>BW U52 uses the drive of Bridge Farm to reach Burbage Common Road. Alongside indicated provision for the farm access, facilities are needed for users of BW U52 (riders, walkers, cyclists, possibly the disabled) to also reach Burbage Common Road and the Common.</p>	<p>A bridleway underpass is included under the A47 link north of the railway line to provide access from U52 to Burbage Common Road and Burbage Common – see Highways Plans Sheet 1 of 8 (document reference 2.18.2)</p>

British Horse Society Comment	EDP Response
	
<p>Where multi-user tracks are installed, our advice is that they should be given a minimum width of 5 metres if they are to be fenced on both sides. The surface should be split 50/50 down the middle – half grass and half with a firm or sealed surface. Grass is the preferred surface for horses and is kinder to human feet than asphalt.</p>	<p>A minimum of 10m has been allowed for a green access corridor around the site, giving ample space for multi-users and planting to ensure the amenity of the route. Full consideration will be given to the design detail in the detailed landscape design proposals which will be a requirement of the DCO if approved.</p>
<p>If a ‘sealed’ surface is preferred, we recommend bound rubber crumb type surfaces as these self-drain, so do not puddle or ice and contribute to essential SUDS. Being inherently flexible they adapt to beneath-the-surface entities such as roots and large stones without cracking, so do not need so much maintenance.</p>	<p>Full consideration will be given to the surfacing options suggested as part of the detailed landscape design proposals which will be a requirement of the DCO if approved.</p>

1.35. Also of note were comments by The Open Spaces Society relating to the connection between Footpath U50 and the proposed bridleway along the western boundary of the Main HNRFI Site. These have been addressed as set out in the table below:

Table 1.2 Open Spaces Society Consultation

Open Spaces Society	EDP Response
<p>The PRoW Strategy Plan does, however, appear to show no connection between the proposed new bridleway, running through the western side of the site, and</p>	<p>The new bridleway connects to Footpath U50. There is also a link to the footpath/cycleway along the</p>

Open Spaces Society	EDP Response
<p>footpath U50 at the eastern edge of Burbage Common and Woods. Footpath U50 is shown to be closed eastwards from the perimeter of Burbage Common and Woods, leaving a gap between the remaining footpath and the proposed new bridleway, thereby creating a cul-de-sac footpath and no formal access to the Common at this point. It is not clear if this is intentional or an error on the plan.</p>	<p>A47 Link Road as shown in the extract from Highways Plan Sheet 4 of 8 below (document reference 2.18.5):</p> 

EXISTING BASELINE CONDITIONS

Site Context and Influences on Character of PRoWs

- 1.36. The Main HNRFI Site is located c.5km to the north-east of Hinckley town centre, in a level area of mixed farmland to the north-west of M69 Junction 2.
- 1.37. To the south-west of the Main HNRFI Site are blocks of deciduous woodland, including Burbage Wood, Aston Firs and Freeholt Wood, and two private residential caravan sites. The village of Elmesthorpe is located to the north and the recreational area of Burbage Common and Woods Country Park, lies to the south and south-west.
- 1.38. The Main HNRFI Site comprises a predominantly agricultural landscape, and most of the PRoWs pass through or adjacent to arable field hedgerow boundaries which provide a rural character.
- 1.39. The M69 motorway which bounds the Main HNRFI Site to the east and the Hinckley to Leicester railway which bounds the Main HNRFI Site to the west and north-west have an urbanising influence on the character of some of the paths at the fringes of the Main HNRFI Site. This is most pronounced for Bridleway sections V29/8, V29/7, V29/6, V29/5 and V29/4 which run in close proximity to the M69 and pass over and adjacent to it. Similar urbanising influences are experienced along the north-western boundary which is formed by the Hinckley to Leicester railway line, of which three on-site PRoWs cross via a bridge or pedestrian crossing. Due to gently undulating landform, the railway line runs through a series of embankments and railway cuttings, creating a variable visual influence along

parts of this boundary over the Main HNRFI Site. Passing trains are less frequent than the constant passage of cars along the M69. Related to this is the differentiation in noise disturbance, passing trains producing short bursts of noise of less than a minute, while traffic on the M69 creates a continuous noise disturbance, but generally at a lower decibel level.

The Definitive Map

- 1.40. An extract of the Definitive Map, illustrating all PRowS within the Main HNRFI Site and study area, is illustrated on Figure 11.3 (document reference 6.3.11.3). This has been re-drawn from information supplied by LCC online mapping resource. Where Definitive Statements accompanying PRowS exist, these are included at Annex 1 for the routes within the study area. The map also illustrates the presence of permissive routes, other routes with public access, and other routes as defined below.
- 1.41. Permissive routes do not form part of the Definitive Map, as the general public does not have a 'right' to use them. The landowner can close or deny access at their discretion. There are no known permissive routes within the study area.
- 1.42. Other Routes with Public Access (ORPA) is a classification taken from the Ordnance Survey (OS) Explorer Series. These routes are described by the OS as:
- “Purely a generic title for routes that have at least a minimum right of public access on foot but are not included on the Rights of Way Definitive Map or related Amending/Modification Orders. ORPA's have no legal status in themselves but are a graphic representation as public routes held on LA records.”*
- 1.43. From the study of OS maps, a number of ORPAs have been identified within and around the Main HNRFI Site and connect with the existing network of rights of way and roadside access. Of particular relevance to the Main HNRFI Site is the route along the western boundary, which provides a connection between Hinckley Road and Burbage Common and Woods via Smithy Lane.
- 1.44. Other routes on the ground that do not form part of the Definitive Map or OS mapping include the publicly maintained highway network and adjacent footways which form important linkages to PRowS. The rights associated with these routes are beyond the scope of this assessment.
- 1.45. In addition, there is the potential for trespass from people walking onto land without permission; evidence of such routes was found during the Main HNRFI Site survey, principally as a result of gaining access onto existing rights of way.

Public Rights of Way and Informal Open Space Network

PRow within the Main HNRFI Site and A47 Link Road

- 1.46. There are sections of five footpaths (U50, U52, U53, V23 and V35) and one bridleway (V29) within the Main HNRFI Site. These are illustrated on Figure 11.3 (document reference

6.3.11.3). Bridleway U51 is also present along the south-western site boundary.

- 1.47. On-site PRowS facilitate access in most directions. Six of these paths extend or have connections beyond the boundary of the Main HNRFI Site and include:
- To the north – T89 and U50, U51, U52 and V23;
 - To the south – V35 and V29;
 - To the east – V29 and U53; and
 - To the west – U50, U51 and U52.
- 1.48. There are no formal equestrian facilities on site although Woodhouse Farm offer an Off-Road Horse Ride within their ownership. Surrounding liveries and stables use Burbage Common Road, Bridleway U52/9 and Burbage Common to the west for commuting and exercising horses.
- 1.49. There are no PRow within the A47 Link Road Corridor with the exception of bridleway U52/9 which connects with Burbage Common Road, north of the railway line.

PRow within the 500m Study Area beyond the Main HNRFI Site and A47 Link Road boundary

- 1.50. To the east there is good connectivity (U53 and V29) between the Main HNRFI Site and residential areas of Stoney Stanton and Sapcote, with access via highway footpaths continuing into the centres. To the north-east, U17 provides footpath access from Stoney Stanton heading north-west towards Earl Shilton.
- 1.51. Four connections (T89, U50, U52 and V23) link into the wider landscape, Billington Rough and Elmesthorpe from the northern site boundary. The route of U50 which links the Main HNRFI Site to Elmesthorpe to the north becomes very unclear upon entering the 'Fish Ponds' with what appears to be a diversion and stopping up (sections U50/4 and U50a/1), whilst section U50/5 did not appear to exist at all. Bridleway U52, which links the Main HNRFI Site to Bridge Farm, Billington Rough and terminating at Elmesthorpe, seems better used as a result. Footpath U52 connects Burbage Common Road to Bridleway U52 which heads north to Billington Rough and Elmesthorpe. Footpath V23 heads west from Bridleway U52 near Billington Rough and terminates at the B4668 (Leicester Road) which has a combined pedestrian and cycle path that runs north-east to Barwell and Earl Shilton, and south-west to Hinckley. T89 connects the B581 (Station Road) to the northern parts of Elmesthorpe and beyond to Earl Shilton.
- 1.52. To the west Footpath U52 exits the Main HNRFI Site and enters Burbage Common and Woods Country Park. The route also links to other offsite PRowS, such as Bridleway U51, which travels north from Footpath U52, through the Country Park towards Leicester Road. This bridleway, for a short duration forms part of the network of PRowS, which make up the promoted Leicestershire Round long-distance route.

- 1.53. Footpath U52 itself continues west into Sheepy Wood and links to a number of offsite PRoWs within the Country Park (U49, U54, U55 and the Leicestershire Round). Footpath U50 similarly exits the Main HNRFI Site to the west into the Country Park, passing through Aston Firs and linking to Smithy Lane ORPA (which in turn links to Bridleway U51 to the north) and U49 and the Leicestershire Round within Burbage Wood, part of the Country Park.
- 1.54. South of the Main HNRFI Site, the PRoW network is relatively sparse. Bridleway V29 exits the Main HNRFI Site southwards at M69 Junction 2 and heads east, connecting to Bridleway V34 and Footpath V39. Footpath V35 exits the Main HNRFI Site at Freeholt Wood before re-entering to adjoin Bridleway V29.

Condition of the Network within the 500m Study Area

Winter Condition and Survey Observations on Use

- 1.55. At the time of the PRoW surveys, access to routes was generally good. However, a number of factors were encountered that prevented or could deter use. These included:
- Poor signposting and/or way-marking;
 - Partial obstructions such as overgrown vegetation and fallen fences;
 - Waterlogging; and
 - Poorly maintained stiles/gates.
- 1.56. The location of each PRoW is shown on Figure 11.13 (document reference 6.3.11.13), with further details regarding the nature of any obstructions provided within the survey notes at Annex 2.
- 1.57. Conditions on the ground generally indicated good use of the PRoW network, which is considered to reflect:
- Good connections to surrounding residential areas; and
 - A significant population of users to the west of the Main HNRFI Site and A47 Link Road, primarily using the recreational resource of Burbage Common Country Park.
- 1.58. None of the PRoWs appeared to be near capacity (which would be indicated through excessive erosion, vegetation loss and/or encroachment), although the accessibility of sections U50/1 and U52/6 was significantly restricted due to heavy waterlogging.
- 1.59. In respect of horse riding, there was no evidence for the use of Bridleway V29 between Free Holt Campsite and the footbridge over the M69 on the eastern boundary.
- 1.60. Within the Main HNRFI Site there are links to open access land and Burbage Common and Woods Country Park to the west.

Summer Condition and Survey Observations on Use

- 1.61. Similar to the winter survey, access to routes was generally good. However, there were a number of factors that prevented or could deter access which were encountered: These included:
- Poor signposting and/or way-marking;
 - Partial obstructions such as overgrown vegetation and fallen fences;
 - Complete obstructions by agricultural crops; and
 - Poorly maintained stiles/gates.
- 1.62. As in winter, none of the PRoWs appeared to be near capacity (which would be indicated through excessive erosion, vegetation loss and/or encroachment). In respect of horse riding, again there was no evidence for the use of Bridleway V29 between Free Holt Campsite and the footbridge over the M69 on the eastern boundary.
- 1.63. More users were observed on the network during the summer field survey with most observed using the network sections U50/1, U52/6 and V35/2.

Informal Open Space within the Study Area

- 1.64. There are no publicly accessible IOS within the Main HNRFI Site nor the A47 Link Road. IOS beyond the boundary of the Main HNRFI Site and A47 Link Road includes the Open Access Land of Burbage Common as well as the wider Burbage Common and Woods Country Park.

Promoted Routes within the Study Area

- 1.65. In addition to the above, Figure 11.3 (document reference 6.3.11.3). illustrates the location of promoted trail/route, the Leicestershire Round, which crosses the study area and passes in close proximity to the Main HNRFI Site.
- 1.66. The Leicestershire Round is a circuit of the county devised by the Leicestershire Footpath Association (LFA) to celebrate their centenary. The Round encircles Leicester and is within easy reach of the market towns of Oakham, Melton Mowbray, Loughborough, Hinckley and Lutterworth, and passes through some of the most beautiful and historically interesting parts of the county including Burrough Hill, Foxton Locks, High Cross, Bosworth Battlefield and Charnwood Forest.

Public Rights of Way Use Survey

- 1.67. A summary of the results of the PRoW Use Survey is contained in the tables in Annex 3 and an analysis of the findings is contained below. The analysis provides a broad average daily use guide at each location, based on the average number of users across the number of days surveyed at each location. As each of the 4 surveys were undertaken across the course of 7 days, increased recreational use on weekends is consistently accounted for. As noted in the general increase in numbers between the 2019 and 2021 summer surveys,

this analysis does also take account of the rise in users since the onset of the Covid 19 Pandemic and is considered to include the current 'best case' scenario in this regard.

- 1.68. With regard to the spread of user types, the majority were walkers with occasional runners. Certain routes only attracted users on foot such as V23 which crosses the railway on a level crossing and V29/6 the bridleway which crosses the M69 which had already been identified in the condition survey as having very low use. Although the amalgam of routes within some of the counts do not allow a detailed understanding of numbers on each route, the data below suggests that the majority of users are using Burbage Common Road as a means of crossing the site and the footpaths and bridleways are used considerably less. Location 6 has the highest use for an off-road location and it is considered that this location is being used as part of a loop out and back from the Country Park via the road bridge at Location 2.

Table 1.3 PRoW Use Survey Analysis

PRoW	Average Daily Use by Pedestrians/Cyclists and Equestrians
U52/6 (Location 1)	4/day
Burbage Common Road and Users of U52/7 and U52/9 Combined (Location 2)	71/day
V23 (Location 4)	1/day Pedestrians only
U50/2 U50/3 (Location 5)	<1/day
V35/1, V35/2, U50/1 and U50/2 (Location 6)	21/day
V29/3 and V29/4 and M69 Junction 2 East (Location 8)	3.5/day
V29/6 (Location 9)	1.5/day – pedestrians only
M69 Junction 2 West (Location 10)	21/day

Table 1.3 Network Rail Use Survey Data on Pedestrian Level Crossings

Level Crossing/PRoW	Average Daily Use by Pedestrians (Survey understood to have been undertaken in 2018 unless shown otherwise)
The Outwoods / U8/1	71/day (August 2020)
Barwell / V23/1	7/day
Earl Shilton / U50/3	1/day
Elmesthorpe / T89/1	1/day
Thorneyfields / U17/2	3/day

POTENTIAL IMPACTS ON PROW AND IOS

- 1.69. Table 1.3 summarises the potential impacts that are likely to occur as a result of the development on PRoW within the Main HNRFI Site and A47 Link Road and at rail crossings within the wider DCO Limits. Routes to be stopped up and diversions are illustrated on Figure 11.14 (document reference 6.3.11.14) and Figure 11.15 (document reference 6.3.11.15).
- 1.70. The main interruption to the PRoW network would occur at the start of the construction phase when routes within the Main HNRFI Site would be closed and diverted to allow for site clearance and earthworks to proceed safely. During the Enabling Works, existing routes within the Main HNRFI Site including the well-used Burbage Common Road would be subject to permanent closure. These routes would remain stopped up through the remainder of the construction and the operational phases.
- 1.71. For bridleway users north of the railway line on U52, the development of the A47 Link Road will sever the link with Burbage Common and Woods Country Park via Burbage Common Road. This connection will be lost once construction works start on the section of the A47 Link Road that crosses the railway.
- 1.72. Similarly, the closures and diversions of PRoW associated with rail crossings within the wider DCO Limits would take place during the enabling works and Phase 1 of construction with all routes stopped up and diverted in advance of the operational use of the railport.

- 1.73. In terms of broader impacts on the PRoW network, there would be visual and noise disturbance to users of routes on and beyond the boundaries of the DCO Site, routes within 1km likely experiencing the greatest impact. This is assessed within the main Landscape and Visual ES Chapter 11 (document reference 6.1.11) and Noise and Vibration Chapter 10 (document reference 6.1.10).
- 1.74. Similarly, there would be visual and noise disturbance to users of the IOS at Burbage Common and Woods Country Park which is also assessed within the Landscape and Visual ES Chapter and Noise and Vibration ES Chapter 10.

Table 1.4: PRoW within the Main DCO Site and at Rail Crossings within the wider DCO Limits

Route Number	Potential Impact During Construction	Potential Impact During Operation
U50/1	Footpath stopped up while bridleway is created.	Footpath stopped up and reinstated as a bridleway on similar alignment with improved surface provision.
U50/2	Footpath stopped up. Users diverted on new routes to be established during early stages of construction.	Footpath stopped up. Users diverted on new routes within and around the development.
U50/3	Permanent closure of level crossing and section of footpath to the south of the railway line. Pedestrian traffic wishing to cross the railway would be diverted to the railway bridge proposed for the A47 Link Road, c.750 metres to the south-west.	Diversion to be put in place along northern side of railway line to connect to diverted U52/8 at new bridge crossing.
U53/1	Footpath stopped up. Users diverted via new bridleway and footpaths broadly around outside edge of Main HNRFI Site.	Footpath stopped up. Users diverted on new routes within and around the development.

Route Number	Potential Impact During Construction	Potential Impact During Operation
V23/1	Permanent closure of level crossing and section of footpath to the south of the railway line. Pedestrian traffic wishing to cross the railway would be diverted to the railway bridge proposed for the A47 Link Road, c.400 metres to the south-west.	Permanent diversion to be put in place along northern side of railway line to connect to U52/8 at new bridge crossing.
V35/1	Localised diversion may be required during construction period to maintain safe working practices.	Minor diversion of route to new alignment with improved surface provision. Route upgraded to bridleway with improved surfacing.
V35/2	Footpath stopped up. Users diverted via new bridleway and Burbage Common.	Footpath stopped up. Users to be diverted along A47 link road corridor within the development.
U52/6	Footpath stopped up. Users diverted via new bridleway and Burbage Common.	Footpath stopped up. Users diverted via new bridleway and Burbage Common.
U52/7	Footpath stopped up.	Footpath stopped up.
U52/8	Temporary closure required during construction of new bridge. Footpath to be diverted along new road corridor/bridge.	Footpath diverted along new bridge within the development.
V29/6	Western section of bridleway beyond motorway overbridge to be stopped up. Users diverted along new route to be incorporated within new green corridor at the eastern boundary of the Main HNRFI Site.	Western section of bridleway beyond motorway overbridge to be stopped up. Users diverted along new route to be incorporated within new green corridor at the eastern boundary of the Main HNRFI Site. Bridleway diverted along new route within the

Route Number	Potential Impact During Construction	Potential Impact During Operation
	Temporary closure of eastern section of bridleway over M69 during certain construction activities for health and safety purposes.	development.
V29/7	Bridleway to be stopped up. Users diverted along new route incorporated within new green corridor at the eastern boundary of the Main HNRFI Site.	Bridleway to be stopped up. Users diverted along new route incorporated within new green corridor at the eastern boundary of the Main HNRFI Site.
V29/8	Temporary closure required during construction of new site access. Minor diversion to the alignment of the bridleway required due to new access arrangements into the Main HNRFI Site.	Bridleway diverted along new route.
U51/2	None. However, Localised measures may be required during construction period at new access point to maintain safe working practices.	None.
T89/1 & 2	Permanent closure. Pedestrians diverted cross the railway using the existing Station Road bridge, 75m to the south-west.	Footpath to be closed. Alternative pedestrian route available.
U17/2	The level crossing would be closed and the existing PRow diverted with pedestrians rerouted to an existing bridge over the railway south of Thorney Fields Farm.	Footpath to be diverted along new route, utilising the bridge access to Thorneyfields Farm.
U8/1	Replacement of the level crossing with a pedestrian footbridge, with associated PRow diversions connecting to this footbridge.	Replacement of the level crossing with a pedestrian footbridge.

PUBLIC RIGHTS OF WAY AND INFORMAL OPEN SPACE STRATEGY RECOMMENDATIONS

- 1.75. EDP's baseline appraisal has enabled recommendations to be made with regard to a strategy for PRoWs within the Main HNRFI Site and A47 Link Road and at rail crossings within the wider DCO Limits. Connections to IOS have also been considered as part of this strategy. The suggested PRoW strategy is illustrated in Figures 11.14 and 11.15 (document references 6.3.11.14 and 6.3.11.15) and the DCO Access and Rights of Way Plans – Sheets 1-4 (document references 2.17.2, 2.17.3, 2.17.4 and 2.17.5).
- 1.76. This strategy has informed the development of and should be viewed in conjunction with the Illustrative Masterplan (document reference 2.3) and Illustrative Landscape Strategy (document reference 6.3.11.20).
- 1.77. The core principles guiding the PRoW strategy (Figures 11.14 and 11.15, document references 6.3.11.14 and 6.3.11.15) are as follows:
- Under normal planning circumstances, efforts would be made at the design stage to maintain the alignment of PRoW and allow continued connectivity across the Main HNRFI Site. However, in this instance, the nature of the development makes this a less desirable outcome and instead alternative routes are proposed;
 - As it is not possible to achieve both direct connectivity and natural amenity in the same ~~alternative~~ routes, a mix of new PRoW within green routes on the boundaries are proposed as well as more direct permissive routes and one dedicated PRoW through the Proposed Development;
 - New connections have been designed to form an integrated network that connects with key destinations, leisure routes, IOS, PRoWs and promoted routes. The Leicestershire Round promoted route, Bridleways V29 and U51 and Burbage Common and Woods Country Park are noteworthy in this regard;
 - Existing and proposed rights of way are incorporated within green links and public open spaces in accordance with ecological, landscape and visual amenity aspirations, to combine experiences and create active and multifunctional open spaces, both within the Main HNRFI Site and on its periphery;
 - Permissive footpath and cycle routes are provided through the Main HNRFI Site to allow as much permeability through the site as possible for those who desire a more direct route. One proposed public footpath will also be provided through the Main HNRFI Site to ensure there is a continuous direct public route through the site at all times once construction is complete. This is proposed as a public footpath and not a bridleway as the route is not considered a safe option for equestrian use; and
 - Alternatives to rail level crossings are provided in four locations to improve public safety.

Construction Phase Considerations

- 1.78. It is planned to establish permanent alternatives to stopped up PRoW as early as possible to allow safe access throughout the construction period.
- 1.79. The new shared access route around the south-eastern and southern boundaries will likely need to be closed for short periods during certain construction activities for health and safety purposes. This should be restricted to essential works where the new routes cross the proposed A47 Link Road. Works will be managed to keep these periods as short as possible and minimise disruption for users.
- 1.80. Where users are required to cross the construction site access road before it is fully constructed, a banksman/site security personnel will be available to ensure safe passage.
- 1.81. For bridleway users north of the railway line on U52, the construction of the A47 Link Road will sever the link with Burbage Common and Woods Country Park via Burbage Common Road. A temporary link will be provided if possible during the construction of the A47 Link Road and underpass but due to the proximity of the works to this route, there is likely to be a period of temporary stopping for health and safety purposes.
- 1.82. There will be a period of temporary closure of PRoW U8/1 during the construction of the new pedestrian footbridge over the railway at The Outwoods, where neither the existing level crossing nor the new footbridge will be available for use. Continuous access will be provided at the Elmesthorpe Crossing and Thorneyfields as the diversion can be established prior to the stopping up of the level crossings.
- 1.83. Access along retained PRoWs will be protected using Heras fencing, hoardings or similar. Many routes across the Site will be closed up or diverted in order to deliver the Proposed Development. Construction works that create dust will be kept to a minimum close to the PRoWs, and dust prevention measures, such as damping, will be undertaken to reduce the impact on users of the PRoW network.
- 1.84. The exact route of the proposed public footpath through the Main HNRFI Site will be established as part of the detailed design. Whilst every attempt will be made to allow safe permissive routes through the site throughout the construction period, there will inevitably be periods when these need to be closed or diverted for public safety reasons during construction. Therefore, the new public footpath will not be dedicated until the site is fully operational.
- 1.85. The exact PRoW that will be affected and the measures employed to ensure they can be used safely, or diverted/closed if not practicable, will be detailed in the phase specific CEMPs.

Operational Considerations

- 1.86. On completion, existing routes within the Main HNRFI Site including the well-used Burbage Common Road would be subject to permanent closure. Alternative shared user routes will be provided within the development allowing access provision to continue through the development although it is noted that the character of these routes would change. These shared user routes are illustrated in pale blue on Figure 11.14 (document reference

6.3.11.14) and would be delivered as permissive routes.

- 1.87. A public footpath will be dedicated through the Main HNRFI Site once it is fully operational, ensuring continued access via a direct route between the Elmsthorpe end of Burbage Common Road and Burbage Common to accommodate those who prioritise speed of access. This route is indicated as a dashed dark blue line on Figure 11.14 (document reference 6.3.11.14).
- 1.88. With regard to bridleway provision, as there is no opportunity for safe access across the railway line to replace the existing use and crossing point on Burbage Common Road, a new route is to be created around the eastern and southern boundaries, located within a broad green corridor up to 70m wide. This route indicated as a dashed green line on Figure 11.14 (document reference 6.3.11.14) will also allow for shared use within a core 10m wide pathway. Surfacing for bridleway use will remain as grass wherever possible as the preferred surface with a more robust surface to accommodate cyclists to be detailed as a DCO requirement.

Strategic PRow Proposals

Provision for Walkers

- 1.89. The local network of footpaths are key assets for existing and future users in the area. Together, they present a number of recreational opportunities, including access to Burbage Common and Wood Country Park and the wider countryside to the north, south, east and west.
- 1.90. The PRow assessment has identified that the majority of footpaths within the Main HNRFI Site are only lightly used and there is considered to be significant capacity to support new users on the existing network. Whilst re-routing will be required as part of the development with shared use permissive paths through the Proposed Development and an alternative shared route within a greenway around the south-eastern and southern boundaries, additional access will also be provided in the form of new routes within the Western Amenity Area to the south of the A47 Link Road.
- 1.91. Enhanced safety for walkers would be delivered in terms of the four rail pedestrian crossings to be stopped up. In each case, safer, alternative routes would be provided over the railway using pedestrian footways on the proposed A47 link Road and Station Road in Elmesthorpe, the existing Thorney Fields Farm Access Overbridge and a new pedestrian overbridge near The Outwoods. The latter is provided as a response to the daily usage of the route which includes journeys to school.

Provision for Cyclists

- 1.92. There are opportunities to improve cycle provision via alternative, traffic-free or improved routes. These include a grade-separated path adjacent to all traffic routes within the Main HNRFI Site, thereby providing a north-east to west and south connectivity and a valuable link between Burbage Common, Hinckley and Burbage to Elmesthorpe (see Figure 11.14 document reference 6.3.11.14). Also proposed is specific surface provision for cyclists

using the proposed bridleway within the green route around the south-eastern and southern boundaries of the Main HNRFI Site. This will provide a recreational option for those wishing to connect to routes within Burbage Common and Woods Country Park or to the offsite road and bridleway network beyond the DCO Limits.

Provision for Horseriders

- 1.93. The baseline assessment has identified limited equestrian use of the existing bridleway network within the study area and Burbage Common Road as a means of accessing Burbage Common and Woods Country Park.
- 1.94. Whilst part of Burbage Common Road will be lost through the Main HNRFI Site, the proposals represent an opportunity to create a traffic free, dedicated shared surface route for equestrian use around the perimeter of the Main HNRFI Site as illustrated by the green dashed line on Figure 11.14 (document reference 6.3.11.14).
- 1.95. The proposed route will be located within a broad green corridor up to 70m wide with a shared use pathway within a 10m wide core. The route would connect the remaining northern section of Burbage Common Road with Burbage Common and Woods Country Park and Bridleway U51 in the south, linking up with Bridleway V29 to provide onward connections to the east. A Pegasus crossing would facilitate access across the A47 Link Road. Surfacing for bridleway use will remain as grass wherever possible as the preferred surface with a more robust surface to accommodate cyclists to be detailed as a DCO requirement.
- 1.96. The feasibility of an additional proposed bridleway route around the north-west of the Main HNRFI Site was explored through the design process. The route considered was proposed to provide access north from the retained section of Burbage Common Road, crossing the railway over a bridge, before heading south-west along the north-west boundary of the Main HNRFI Site to link up with Footpath U50, V23 and Bridleway U52. However, the feasibility process highlighted that there would be an unjustifiable significant impact on ecology and mature woodland to provide such a route, given alternatives were already being made available as part of the proposals.

Public Right of Way Design and Enhancement

- 1.97. The new bridleway and footpaths will be enhanced for access with the removal of stiles, provision of new access gates and installation of signage to assist with navigation of the new routes. Detailed design of routes including surfacing and access arrangements will be in accordance with the most up to date version of the Rights of Way Section of LCC's Highway Design Guide (noting the 2022 version is an interim guide). This will be secured through Requirement 4 (Detailed Design Approval) and Requirement 21 (Landscape Scheme).

Strategic IOS Proposals

- 1.98. Noting Hinckley and Bosworth Borough Council's Core Strategy policy requirements to enhance Green Infrastructure through Policy CS20 and the strategic intervention of

increasing the size of the Burbage Common and Woods Country Park, the Development Proposals include over 22ha of publicly accessible natural green space adjacent to the Country Park. As well as providing a visual and spatial buffer to the existing Country Park, the new area of parkland will provide a significant enhancement to the existing IOS, extending the range of users and providing additional opportunities for recreation in the area. Initial proposals for this land are illustrated on Figure 11.22 – Burbage Common and Woods Country Park Extension Land (document reference 6.3.11.22). Landscape proposals will include public access on clearly defined paths rather than free roaming access to protect grassland habitat and promote the biodiversity of the area. Paths will incorporate nature/activity trails to engage users in the establishment and management of the habitats and the range of species and wildlife opportunities in the area.

- 1.99. The detailed design and management of this area will be worked up in consultation with the existing Burbage Common and Woods Country Park Managers to ensure complementary public access provision can be provided. Design details will be agreed as part of Requirement 21 (Landscape Scheme) and Requirement 19 (Landscape and Ecological Management Plan) and Requirement 29 (Biodiversity Net Gain).

SUMMARY AND CONCLUSIONS

- 1.100. A wide range of PRoWs are present within and around the DCO Site and there is good provision of IOS within the vicinity of the Order Limits due to the presence of Burbage Common and Woods Country Park. With the exception of PRoWs within Burbage Common and Burbage Wood and Burbage Common Road which is generally well used, the existing PRoW network, would appear to be subject to low usage only with increased activity associated with access extending out from the Country Park. This report has identified that there is capacity for improvement in terms of connectivity and maintenance of PRoW.
- 1.101. Impacts on the PRoW network as a result of the Proposed Development are notable with a number of PRoW being stopped up including U50/2, U50/3, U53/1, V23/1, V35/2, U52/6, U52/7, V29/6, V29/7, T89/1, T89/2, U17/2.
- 1.102. Diversions and alternative routes have been established as part of a PRoW Strategy illustrated on Figures 11.14 and 11.15 (document references 6.3.11.14 and 6.3.11.15).
- 1.103. The key recommendations within the PRoW Strategy are summarised below:
- Provide new permissive cycle and footpath routes to create direct access across the Proposed Development on the Main HNRFI Site. Footpaths and cyclepaths to be separated for ease and safety of use where practical. Detail of permissive routes to be subject to agreement as part of the relevant DCO requirement. This will include securing availability of access. It is the intention that all permissive routes will remain open for access at all times with limited exceptions such as closures for maintenance or safety considerations;
 - Provide one dedicated public footpath through the Main HNRFI Site to provide secured

continuous access across the site at all times. Detail of the public footpath route is to be subject to agreement as part of the relevant DCO requirement;

- Provide a shared use green route connection between Burbage Common Road North and Burbage Common and Woods Country Park, around the eastern and southern boundaries of the Main HNRFI Site, connecting to the Bridleway network in the eastern area of the Main HNRFI Site;
- Strategically upgrade a number of footpath routes to bridleway status to allow a connection between the bridleway networks north-west, south-west and south-east of the Main HNRFI Site;
- Close four pedestrian level crossings on the railway and provide safer alternative routes over the railway line as part of a new network of upgraded routes; and
- Create a new area of IOS (referred to as Burbage Common and Woods Country Park Extension Land and illustrated on Figure 11.22 (document reference 6.3.11.22)) within the Main HNRFI Site and A47 Link Road, connected to Burbage Common and Woods Country Park to provide additional recreational provision.

1.104. Considering all matters and recommendations set out above, EDP's overall conclusion is that PRoWs and IOS matters do not represent an 'in principle' constraint to development of the DCO Site. Whilst there is a notable closure of routes within the Main HNRFI Site, loss of amenity on diverted routes, and reduced amenity, particularly during the construction period on PRoW beyond the Order Limits, the overall PRoW Strategy which includes a 22ha extension of IOS adjacent to Burbage Common and Woods Country Park is considered to provide a proportionate mitigation package.

Annex 2 ◆ Public Rights of Way Survey Notes

Route Number	Type	Condition Score	Notes on Winter Condition	Notes on Summer Condition
T89/1	Footpath	Good	Well-used and signed. Steps to access Rail Crossing degraded.	Well-used and signed. Steps to access Rail Crossing degraded.
T89/2	Footpath	Poor	Overgrown vegetation make steps from Station Road almost impassable. Very little sign of use.	Overgrown vegetation make steps from Station Road almost impassable. Very little sign of use.
T89/3	Footpath	Good	Well used and signed, southern section tarmacked and lit	Well used and signed, southern section tarmacked and lit
U8/2	Footpath	Good	Well defined route on path through golf course.	Well defined route on path through golf course.
U8/3	Footpath	Good	Well-worn route.	Well-worn route.
U8/4	Footpath	Good	Well signposted and defined path.	Well signposted and defined path.
U8/5	Footpath	Good	Well-worn route along edge of fields.	Well-worn route along edge of fields.

Route Number	Type	Condition Score	Notes on Winter Condition	Notes on Summer Condition
U8a/1	Footpath	Moderate	Route not immediately obvious in context of golf course.	Route not immediately obvious in context of golf course.
U8b/1	Footpath	Good	Signposted route – need to be aware of golfers using course.	Signposted route – need to be aware of golfers using course.
U8b/2	Footpath	Good	Well used route through wood.	Well used route through wood.
U8b/3	Footpath	Good	Well used route through wood.	Well used route through wood.
U9/1	Bridleway	Good	Well signposted on the Leicester Road. Well-worn route along field edge.	Well signposted on the Leicester Road. Well-worn route along field edge.
U17/1	Footpath	Good	Route clearly defined through field – well worn.	Route clearly defined through field – well worn.
U17/2	Footpath	Good	Route clearly defined through field – well worn.	Route clearly defined through field – well worn.

Route Number	Type	Condition Score	Notes on Winter Condition	Notes on Summer Condition
U50/1	Footpath	Moderate	Well-used and signed. Very waterlogged in fields, well-drained within Aston Firs. Clear path within Aston Firs, numerous dog walkers.	Well-used and signed. Clear path within Aston Firs, numerous dog walkers.
U50/2	Footpath	Moderate	Partially signposted. No obvious route other than stiles and yellow post markers. Route defined by hedgerow and poorly worn desire line/vegetation suppression. Large section waterlogged.	Partially signposted. No obvious route other than stiles and yellow post markers. Route defined by hedgerow. Absence of desire line/vegetation suppression suggests not used or very rarely used.
U50/3	Footpath	Poor	Metal steps either side of level crossing. Partially signposted. No obvious route other than stiles and yellow post markers. Route defined by poorly worn desire line/vegetation suppression. Closed field gate with no signage.	No obvious route other than stiles and yellow post markers. Absence of desire line/vegetation suppression suggests not used or very rarely used. Closed field gate with no signage.
U50/4	Footpath	Poor	Appears to have been diverted around fish ponds.	A path around the fish ponds to the east, appears to provide a diversion although this is not indicated on the definitive map.
U50/5	Footpath	Poor	Appears to be blocked up. No signage or obvious route through.	Appears to be blocked up. No signage or obvious route through.

Route Number	Type	Condition Score	Notes on Winter Condition	Notes on Summer Condition
U50a/1	Footpath	Poor	Blocked up. Signage on ground directs people to U50/4 only.	Blocked up. Signage on ground directs people to U50/4 only.
U51/1	Bridleway	Good	Well-used. Surfaced.	Well-used.
U51/2	Bridleway	Good	Well-used. Surfaced.	Well-used.
U51/3	Bridleway	Good	Wide open path funnelled by trees either side.	Well-used.
U51/4	Bridleway	Good	Wide open path funnelled by trees either side.	Well-used.
U52/5	Footpath			
U52/4	Footpath			
U52/5	Footpath	Good	Short, well signposted section.	Short, well signposted section.

Route Number	Type	Condition Score	Notes on Winter Condition	Notes on Summer Condition
U52/6	Footpath	Moderate	Waterlogged at western end. Two walkers and one dog walker. Clear route, well-used and worn path.	Kissing gate at connection with U51/1, bypassed by users who appear to gain access to field and U52/6 via adjacent gap in hedgerow. Well-worn path around field.
U52/7	Footpath	Good	Well-used and signed.	Well-worn path, signage at junction with V35/2 hidden in hedgerow.
U52/8	Footpath/ Bridleway	Good	Well-surfaced and signed.	Follows Burbage Common Road over railway bridge.
U52/9	Bridleway	Moderate	Well-signed. Very waterlogged.	Well-signed at southern and northern ends of route but lack of/indistinct waymarking through Bridge Farm. Shoe dip at entrances to farm suggest it is reasonably well-used.
U53/1	Footpath	Poor	Appears very underused. Obvious route with hedgerow along one side and farm debris on the other. Fallen down fences, pallets and other junk obstructs much of the route around Woodhouse	Absence of desire line/vegetation suppression suggests route not used or very rarely used. Section to south of farm impassable with nettle

Route Number	Type	Condition Score	Notes on Winter Condition	Notes on Summer Condition
			<p>Farm. Poorly worn desire line/vegetation suppression defines some of the route. Parts entirely waterlogged.</p> <p>South-east of Woodhouse Farm, very narrow worn path against barb wire fence on the southern side and reeds and a ditch on the north side.</p>	with no sign of any previous passage in recent weeks.
U53/2	Footpath	Moderate	Very little use or evidence of a desire line/vegetation suppression. No obvious route through Red Hill Farm. Path through farm is between a narrow gap between two large farm buildings. Well-signposted, save for Red Hill Farm.	Absence of desire line/vegetation suppression suggests route not used or very rarely used.
U53/3	Footpath	Moderate	Not assessed.	Stile and signpost lost in overgrown hedgerow on Stanton Road.
U54/1	Footpath	Good	Well used and signposted route through wood.	Well used and signposted route through wood.

Route Number	Type	Condition Score	Notes on Winter Condition	Notes on Summer Condition
U55/1	Footpath	Good	Well used and signposted route through wood.	Well used and signposted route through wood.
V22/1	Footpath	Poor	Footpath not signposted or evident from Hinckley Road at northern end and not accessible at southern end as no public access linkages.	Footpath not signposted or evident from Hinckley Road at northern end and not accessible at southern end as no public access linkages.
V23/1	Footpath	Moderate	Poorly worn desire line/vegetation suppression defines some of the route. Parts entirely waterlogged at time of survey. Steps to access Rail Crossing degraded.	At time of survey, no evidence of any route through rape seed oil crop which was 1.5m tall and dense at time of visit. Update site visits in February 2022 and September 2022 found PRow marked and useable.
V23/2	Footpath	Good	Route defined by worn desire line.	Route defined by worn desire line.
V23/3	Footpath	Good	Route defined by series of stiles through paddocks and along eastern edge of property.	Route defined by series of stiles through paddocks and along eastern edge of property.

Route Number	Type	Condition Score	Notes on Winter Condition	Notes on Summer Condition
V29/3	Bridleway	Good	Route defined by worn desire line/vegetation suppression. Signs of horse usage. Waterlogged in parts. Good signage. Not very tranquil due to motorway noise.	Route defined by worn desire line/vegetation suppression.
V29/4	Bridleway	Moderate	Route defined by worn desire line/vegetation suppression. No signs of horse usage. Not very tranquil due to motorway noise.	Absence of desire line/suppression suggests route not used or very rarely used in summer.
V29/5	Bridleway	Moderate	Signage overgrown by hedgerow at junction with V29/6. Route defined by worn desire line/vegetation suppression. No signs of horse usage. Not very tranquil due to motorway noise.	Signage overgrown by hedgerow at junction with V29/6. Absence of desire line/suppression suggests route not used or very rarely used in summer.
V29/6	Bridleway	Good	Path well-used, obvious worn muddy path. Waterlogged in parts. Footbridge over motorway concrete surfaced but overgrown with vegetation – still passable. No signs of horse usage. Not very tranquil due to motorway noise.	No obvious signs of use at the time of the site visit, with 1m high dense nettle growth on southern section of bridge and no sign of vegetation suppression.

Route Number	Type	Condition Score	Notes on Winter Condition	Notes on Summer Condition
V29/7	Bridleway	Good	Most of route is a surfaced track. North of Hobbs Hayes, route travels north through an agricultural field on a worn path with a hedgerow aligning alongside the western side of the route. Route clearly signposted. Route defined by worn desire line/vegetation suppression. No signs of horse usage.	Most of route is a surfaced track. North of Hobbs Hayes, route travels north through an agricultural field on a worn path with a hedgerow aligning alongside the western side of the route. Route clearly signposted. Route defined by worn desire line/vegetation suppression.
V29/8	Bridleway	Good	Not very tranquil due to motorway noise. Well-surfaced farm track.	Not very tranquil due to motorway noise. Well-surfaced farm track.
V29/9	Bridleway	Good	Clearly signposted. Route defined by poorly worn desire line/vegetation suppression. Not very tranquil due to motorway noise.	Absence of desire line/suppression suggests route not used or very rarely used in summer.
V29/10	Bridleway	Good	Clearly signposted. Route defined by poorly worn desire line/vegetation suppression. Not very tranquil due to motorway noise	Absence of desire line/suppression suggests route not used or very rarely used in summer.
V29/11	Bridleway	Good	Route signposted at road crossing. Poorly worn desire line	Route signposted at road crossing. Poorly worn desire line

Route Number	Type	Condition Score	Notes on Winter Condition	Notes on Summer Condition
V34/2	Bridleway	Good	Well-worn route along field edge.	Well-worn route along field edge.
V34/3	Bridleway	Good	Clearly signposted on Hinckley Road. Tarmacked drive	Clearly signposted on Hinckley Road. Tarmacked drive.
V35/1	Footpath	Good	Route defined by poorly worn desire line/vegetation suppression. Well-signed. Route through Freeholt Wood partially obstructed by recent fallen tree and branches.	Clear route through wood.
V35/2	Footpath	Good	Well-worn path. Well-signed. Two walkers present at time of survey.	Well-worn path. Well-signed.

Route Number	Type	Condition Score	Notes on Winter Condition	Notes on Summer Condition
V49/1	Footpath	Moderate	Ploughed fields with no clear route in parts.	Route defined by worn desire line/vegetation suppression suggests greater summer use. Well-signed.
V49/2	Footpath	Moderate	Ploughed field with no clear route in parts.	Route defined by worn desire line/vegetation suppression suggests greater summer use. Well-signed.
V50/1	Footpath	Moderate	Not assessed	No obvious desire line or maintained path through field. Yellow marker post knocked to the ground.
Smithy Lane	OPM	Good	Tarmac surface.	Tarmac Surface

Notes (Refer to Survey Note numbers on Figure 11.13 (document reference 6.3.11.13))

Note Number	Notes
1	Waterlogged Route – Restricting Access.
2	Fallen over fences, farmyard debris obstructing much of path restricting access.
3	Overgrown Vegetation – Restricting Access.
4	No network linage or safe route.
5	Overgrown Vegetation – Restricting Access.
6	No clear direction of travel indicated.
7	No clear signage or worn path indicating direction of travel.
8	Narrow gap in hedgerow – overgrown vegetation restricting access.

9	Farm gate, no signage but clear direction of travel.
10	No clear direction of travel across ploughed field.
11	Waterlogged Route – Restricting Access.
12	Waterlogged Route – Restricting Access.
13	Waterlogged Route – Restricting Access.
14	Overgrown yellow post marker.
15	No clear direction of travel indicated.
16	No clear route through Farm. Path through narrow passage between buildings and farm equipment.
17	Gate, restricting access on horseback.
18	Gate, restricting access on horseback.
19	Gate, restricting access on horseback.

20	Gate, restricting access on horseback.
21	Ploughed field, restricting access.
22	Ploughed field, restricting access.
23	Farm Gate, no signage or clear direction of travel.
24	Fallen trees, restricting access into Freeholt Wood.
25	Ploughed field, restricting access.
26	Ploughed field, restricting access.
27	Fallen Marker Post.
28	No clear direction of travel indicated due to fallen marker post and absence of a marked path or desire line.
29	No marker post/sign or evidence of a PRow.
30	Route no longer follows definitive map alignment – difficult to navigate from southern end as original route blocked up by a walled boundary to the Gypsy and Travellers Site.

Annex 3 ◆ Public Right of Way Use Surveys

Notes:

1. Total number of users is given for each day at each location;
2. Numbers in brackets refer to cyclists (c) and equestrian users (e) that form a part of that total;
3. Where no numbers appear in brackets, all users have accessed on foot either by walking or running;
4. A zero indicates the route was surveyed but not used; and
5. N/S indicates there was no survey at that location on that day

Results of PRow Survey 8-17 June 2021
