To whom it may concern. We haven't the road infrastructure for this . We are over populated in our village's. No main road infrastructure being put in place to accommodate this project. Noise, pollution, loss of wildlife, loss of freedom for walking down a very old common which dates back to the dooms day book and the common land was bequeathed I believe to the people of the surrounding villages. Let the people of this beautiful land mark make the decision as to whether a rail hub should be dumped in our back yards . All the villages are in very close proximity of this project and it will impact on everyone who lives within this area with heavy traffic pollution noise etc. It's not the right place to put this rail hub It's too close to surrounding villages. It will impact greatly on everything. Don't let this company make the choice. Let the people make the choice. We have to live here . It's our right to fight and have a vote . Thank you . Dawn Bennett. (Lady Maud) Let's on have a Blot on The Landscape !!!!
