Dear Sir/Madam,

regarding the application for the building of a rail freight hub. If this is allowed to go ahead, this huge project will destroy hectares of beautiful countryside, and will have a massive negative impact on surrounding villages. Lives will be blighted and wildlife life too will be greatly affected.

This project is simply not needed. That has been proven. It is a project driven by greed. If allowed it will be a great white elephant. So ask those who will have the final decision to make, to use common sense and not let this be a huge mistake if planning is allowed. Please don't let it be said in hindsight, "Oh dear that was a big mistake". Because it will be.

Yours sincerely,
Guy Mellor.
