Response to updates by Tritax Symmetry ;

I am against this development, the updates cannot guarantee anything for local residents of this huge development.

The agricultural land it will cover , instead of being used for food production, it will be covered in more warehouses and containers that aren't needed in this area, we already have Magna park , Daventry. No amount of acoustic barriers will stop the noise pollution, and the HGVs will still be polluting and going down roads that were never built for them .

Burbage common will not be the sanctuary for peoples well being that it is now , along with the loss of local wild life , that these fields and common is home to .
