Dear Sir/Madam

I cannot fathom the thinking behind this application other than financial gain for those at the top if the food chain at the expense of the local community.

Tritax state that this application involves investing in the environment, how is that, given that it intends to decimate an area of rural beauty enjoyed by thousands of the local community Tritax suggests its helping?

I have to ask, how is a rail hub going to remove HGV's from local roads, another comment from Tritax, it won't, it will obviously increase HGV traffic immensely.

This whole planning application is little more than a slap in the face for all the communities affected, it's disgraceful that it's been allowed to progress at all.

I trust that the general feeling of the local population, that this monstrosity cannot be allowed to happen, will succeed.

Yours sincerely
Michael Edwards.
