Dear Sir Madam

I strongly oppose your plans for the rail project. The infrastructure is not in place to support your plans. The road through our village is already struggling with the amount of HGV's that cut through the village. You will in addition be destroying more green belt land. HS2 has already destroyed so much of the countryside and you want to build this monstrous site near several small villages. There must be more appropriate sites. Your studies have not allowed for the impact a huge increase of vehicles using narrow roads through small villages.

Regards

Steven land
