[REDACTED]

Hello my name is Anthony peters I own the land that is directly alongside the fields that they want to build on so I am the closest neighbour I am building a dream home for my family and the impact from these monster buildings will destroy my beautiful views it will devastate the landscape and close me in and devalue my property can you please let me know ok how I get to say my points as I am the person and family that's have to live with the noise pollution and the views I have not signed any perching opinion to tritax as I have full planning permission to convert my barn into a family home which we are doing
