Hello , this development is not really needed , there are plenty of other solutions for this , IE , stop buying so much from abroad, make it ourselves, Also the impact in the environment and local area will be devastating. Pollution for the area to will be awful. This is the same as HS2 that's not needed, we can't run trains at 250 mph , due to lack of open space ,and wrong type of rain and snow . This Country has it all wrong , we need to Wake up . We waste so much time and money on stupid projects . This is not needed , We have Hundreds of Empty Warehouse infrastructure around the Country to cope with this need .
