[REDACTED]  
Thank you for the information

My reference is 20038423

Having read the additional information presented by TRITAX, it seems that the landowners have withdrawn their objections to the proposals but we are not told on what grounds! It appears also, that the costs of the development have increased by an enormous amount.....(is this pure coincidence )

To cover these increased costs are there going to be cutbacks on the project design !

The major objection I have ,is the volume of traffic that would be adding to the already heavily used M69. The rail link would give minimal relief to this extra congestion ! Anyone who knows this area would recognise the problem!!! I was led to believe that a proposed development such as the HNRI should add to the area in which it is developed! I cannot see ANY help it would give to the area! We already have large industrial developments in the area...at Magna Park and Coventry Gateway....!, In addition , we have a proposed housing development of over 5000 houses on the opposite side of the M69 ... directly opposite the proposed HNRFI....5000 houses means 10,000 extra cars!!!!!! DOES ANYONE COORDINATE THESE PROPOSALS?????

I suggest that the only people to benefit from these TWO major proposals are the developers..... big bosses bullying again!

Sadly , once the go ahead is given it will be too late to reverse any of these poor decisions!

I hope the Secretary of State confirms the decision of being 'mindful to refuse'

Elaine Blaney
