

Looking east out from the site from the improved access towards Stamford Road

Looking west into the site from Stamford Road

Looking west towards the left hand turn lane of the improved access

Key / Notes

As stated in Paragraph 19.3.9 of the Environmental Statement (PINS document reference 5.2) (APP-049) approval has been gained for widening of the site entrance including the associated design. The improvement works include increasing the radius on the northern kerb line to widen the junction. The scheme also includes removal of some vegetation to improve visibility and a new site entrance gate. Drainage will be improved to prevent ponding in the site entrance. The improvement works to the site access have now been completed. This plan provides the details of the improved access.

PINS document reference: 8.3

Note:
Drawing based on survey reference AU-US-16205.LSS

Access details taken from Jones Bros plan (drawing reference C0211-GW-290921-01 278F dated 29 September 2021

The survey data is based on the ENRMF site control 'KINGSCONTROL' created using the co-ordinates of 6 survey points supplied by Augean PLC. The co-ordinate system was established and transformed via a OneStep transformation using a Leica GPS system in February 2007.
