6 September 2019

Dear Ms Wood-Griffiths

**THAMES TIDEWAY TUNNEL: KING EDWARD MEMORIAL PARK FORESHORE
(KEMPF) REF : 2530-TDWAY-TTTUN-990-ZZ-CO-700173**

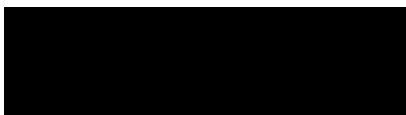

Application for a non-material change to realign the main tunnel in the vicinity of the King Edward Memorial Park Foreshore worksite and to provide consent for the construction of a connection tunnel between the KEMPF CSO drop shaft and the main tunnel.

Thank you for notifying us in respect of the proposed non-material amendment at the above site. We are aware of the issues raised by the ground conditions and the necessary revisions to the made ground and foreshore structures. We are content with the arguments as set out for the proposed amendment and do not consider that the proposed change to the main tunnel alignment presents specific issues in respect of the potential for wider impacts on the historic environment than previously considered.

We would however expect to see appropriate adjustment to monitoring arrangements for historic structures where there is potential for revised settlement parameters and assessment of proposed impacts by your specialist engineers and appointed heritage consultants.

Should you require specific advice on any specific heritage concerns raised by the proposed change of works please do not hesitate to contact us.

Yours sincerely

Richard Parish
