1.1 Listed Buildings

Table 1-1: Listed buildings within the 1km study area

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
HE005	1331295	Church of St Peter	I	549284	262647	Medieval	Religious, Ritual and Funerary	Church	Church	A Grade I listed early 12th century parish church. It is composed of Barnack limestone and limestone ashlar, flint and clunch rubble and red brick repairs, covered with cement rendering. The four stage tower dates to the 13th century.	The asset is situated within its churchyard on St John's Lane, within which are located a number of graves. It is surrounded by mature trees to the north, south and east. There are a range of agricultural buildings to the north and the churchyard boundary is more open to the west and south, however, it has no long views due to its vegetated boundary and buildings on the High Street.	High	It is of high heritage value due to its historic and architectural interest, derived from its early architectural form and fabric. The churchyard and surrounding village are key element of the asset's setting which also contribute to its heritage value. In particular, the church's location on St John's Lane references the historic interest of the route to the River Cam. The dense residential development, tall hedgerows and narrow lanes in the vicinity impede long views towards the asset. This is an important element to the asset's value which has been negatively impacted.
HE006	1127351	Milton House	II*	547945	262697	Post Medieval	Domestic	House	House	A Grade II* listed 17th century house situated in Milton, with 18th century alterations by William Cole, Rector of Milton. It is composed of plaster, reused medieval limestone, local 18th century red brick and a plain tile roof.	The asset is located on Fen Road, surrounded by modern houses, which limits the relationship between the asset and other historic buildings in the area. This is exacerbated by large mature trees which prevent long views in any direction. As such, setting does not make a substantial contribution to	High	It is of high heritage value due to its architectural and historic interest as a dwelling with a long history. The modern development in the vicinity of the asset diminishes the contribution the asset's setting makes to its value.

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
HE007	1127366	Church of St John	II*	549737	265099	Medieval	Religious, Ritual and Funerary	Church	Church	A Grade II* listed parish church, partially dating to the 13th century. It was extended during the 15th and 17th centuries and partially rebuilt in the 19th century following the collapse of the tower and spire.	the heritage value of the asset. The asset's setting is the edge of Waterbeach, with some agricultural buildings situated to the south. The surrounding residential development is relatively spacious, with the properties featuring brick boundary walls of a variety of heights. Despite the relatively low church tower, the asset has some visual prominence within the surrounding area, particularly due to its location on a curve on Station Road, making it a landmark en-route from the village to the station.	High	It is of high heritage value due to its architectural interest, derived from its early architectural form and fabric. The village setting contributes significantly to the value of the church.
HE008	1127399	Ditton Hall	II*	548183	260292	Post Medieval	Domestic	House	House	A red-brick hall dating to c.1635 incorporating remains from an early 15th century building. It features a fine 17th century staircase. It was altered during the 19th century, including partial demolition.	The setting of the Hall is characterised by a number of outbuildings situated to the west of the Hall, its substantial grounds and its proximity to the River Cam and Ditton Meadows. It is located on the edge of Fen Ditton and set back from the High Street.	High	It is of high heritage value due to its architectural and historic interest as an important historic building within Fen Ditton. The surrounding farm buildings within the asset's setting make a positive contribution to its value, as they facilitate understanding of it as a rural Hall. Due to its location on the edge of Fen Ditton and set back from the High Street, it has a limited visual relationship with the rest of the village, though it is a key part of the history of the village.
HE009	1127430	Parish Church of St Mary the Virgin	II*	548267	260371	Medieval	Religious, Ritual and Funerary	Church	Church	A Grade II* listed 14th century parish church, situated within the historic village of Fen Ditton. It is	The asset's setting is the centre of Fen Ditton village maintained by the wide grassy verges, mature vegetation and low-rise buildings. The church is	High	It is of high heritage value due to its architectural and historic interest, derived from its early architectural form and fabric, and setting within a rural village. The

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
										composed of flint and limestone walls, with some reused medieval Barnack limestone and clunch dressings and lead roofs. The church was restored during the 1880s, including rebuilding the church tower, reproducing the 13th detailing.	situated within a large churchyard, surrounded by a brick wall and some large trees.		historic village setting contributes significantly to the value of the church.
HE010	1127431	The Old Rectory, Fen Ditton	II*	548237	260417	Post Medieval	Domestic	Clergy House	House	A much-altered Grade II* listed 16th century house, composed of red and painted gault brick. The principal elevation of the main range is 2.5 storeys and symmetrical, possibly refronted during the 17th century. The scale of the building reflects its prestige within the village, where most buildings are 1.5 storeys.	The asset's setting comprises the historic centre of Fen Ditton and close proximity to the Parish Church of St Mary the Virgin. The asset is also characterised by its extensive grounds which extend to the River Cam. It has no long views to the north, south or east.	High	It is of high heritage value due to its architectural and historic interest as an early example of a rectory building. Its setting, in close proximity to the Parish Church of St Mary the Virgin, and its prominence within Fen Ditton contribute to this. The asset's extensive grounds, extending to the River Cam, provides a close relationship with the surrounding natural landscape and emphasises the rural character of the building.
HE011	1178408	Biggin Abbey	II*	548738	261757	Medieval	Domestic	Agricultural Dwelling	House	A Grade II* listed 14th century farmhouse, a surviving part of the residence of the Bishops of Ely, which was visited by three Kings, now much-altered.	The setting of the building is predominantly agricultural, as it is set back from the B1047 Horningsea Road and surrounded by arable fields, across which it has long views. This is evidenced by ridge and furrow across the surrounding fields, which is indicative of medieval and post-medieval farming.	High	It is of high heritage value due to its architectural and historic interest, derived from its surviving historic fabric and historic value through its association with the Bishops of Ely. Its agricultural setting is a key element of the asset's value, as it facilitates understanding of the building's historic relationship with the

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
											It is approached from the B1047 Horningsea Road via a tree-lined avenue that is evident on historic mapping and creates directed views towards the asset, and from it across the surrounding farmland.		surrounding farmland that once served the Abbey.
HE005	1331303	Home Farmhouse	II*	548762.2	260165	Post Medieval	Domestic	Agricultural Dwelling	House	A Grade II* listed timber-framed farmhouse dating to the early 17th century, cased in 19th century gault brick. The eastern end of the building features an advanced gabled bay which abuts the street. There is also a 19th century extension to the rear.	The asset is located on the northern edge of Fen Ditton, and has a strong relationship with the surrounding countryside. One gable of the farmhouse directly abuts its boundary wall, which follows the building line along High Ditch Road, contributing to the historic linear nature of the village. The striped polychromatic brickwork of the boundary wall to the west reflects the prestige and wealth of the farmhouse, contributing to the value of the asset. There is modern development and historic buildings in the vicinity of the asset, most notably Manor Farmhouse to the south-west.	High	It is of high heritage value due to its architectural and historic interest as an example of a substantial farmhouse situated prominently within Fen Ditton. Its setting with other agricultural buildings in the vicinity emphasises the asset's location in an historic, rural village, which contributes to its value. Additionally, despite modern development within the setting of the asset, it retains a visual relationship with the other historic buildings in the area, like Manor Farmhouse to the south-west.
HE006	1331305	Musgrave Farmhouse	II*	548498	260268	Post Medieval	Domestic	Agricultural Dwelling	House	A Grade II* listed late 16th century and early 17th century farmhouse, with 19th century alterations. It is an L-plan with a cross wing directly abutting the pavement, jettied above. The asset was initially plastered, with	The asset is situated on, and directly abuts to the pavement of, Fen Ditton High Street making it a prominent building within the village. The asset has a strong relationship with other heritage assets situated in the vicinity, due to their location close to the High Street. There is dense vegetation to the	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric, which allow for an understanding of the historic prominence of agriculture within the village. The asset's setting, close to other heritage assets, makes a positive contribution to its value, as

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
										17th century local brick interventions and painted 19th century gault brick casing.	north, which limits its views in this direction.		it allows for an understanding of the village's development. However, it has a limited relationship with the surrounding countryside, due to extensive development in its backlands. The changed setting, therefore, diminishes the contribution setting makes to the value of the asset.
HE007	1331306	Barn to the North West of Ditton Hall	II*	548174	260338	Post Medieval	Agriculture and Subsistence	Agricultural Building	Agricultural Building	A late 15th or early 16th century barn, which may have operated as a merchants' trading hall or warehouse prior to being used as a barn. It is two storeys, with the upper floor jettied at the northern end.	The asset is situated at the western end of Fen Ditton High Street, close to the River Cam and Stourbridge Common. Ditton Hall and other ancillary buildings historically associated with the Hall are located close by.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic fabric and agricultural heritage. The asset's setting, close to Ditton Hall and other ancillary buildings preserves the ability to understand the asset as part of an historic estate, which makes a positive contribution to its value.
HE008	1331325	Quy Hall	II*	551536	261135	Post Medieval	Domestic	Country House	Country House	A country house, likely dating to the late 15th century, extended throughout the 17th and 18th centuries, and remodelled between 1869-1871 to the designs of W. White, including refacing the house with red and yellow brick. The southern (garden) elevation features alternating bands of red and yellow brick, with diapered detailing	The Hall is situated within substantial grounds, including formal gardens and extensive parkland. It is situated adjacently to a number of ancillary estate buildings which form part of the Quy Hall estate.	High	It is of high heritage value due to its historic interest, provided by its age, and architectural interest, with its high-quality design and craftsmanship, evident along the garden façade in particular. The asset's setting within parkland and with ancillary buildings in the vicinity makes a positive contribution to its value, as it preserves the ability to understand the asset as part of an historic estate.

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
										on the gables. It is located within its own substantial grounds and is surrounded by a number of ancillary estate buildings.			
HE010	1302033	3 High Street	II	547578	262727	Post Medieval	Domestic	House	House	A 17th century timber-framed and plastered cottage with a plain tile roof. It features a decorative frieze just below the eaves.	The asset is located in the centre of Milton on the High Street, an area with a dense village character. The asset's front garden is presently densely vegetated, with large shrubs minimising its relationship with the surrounding streetscape.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. It has group value with the other heritage assets in Milton. However, the character has been altered by extensive modern development in Milton, which has increased the density of the settlement and reduced the intervisibility between Milton's historic environment.
HE011	1331323	White Horse Public House	II	547679	262763	Post Medieval	Recreational	Public House	Public House	A 17th century two storey public house, encased in local brick during the 19th century and painted. The building comprises modern tiled roofing and is a four unit plan with a lobby entrance.	The asset is located in the centre of Milton on the High Street, an area with a busy, dense village character.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. It has group value with the other heritage assets in Milton. However, the character has been altered by extensive modern development in Milton, which has increased the density of the settlement and reduced the intervisibility between Milton's historic environment.
HE013	1127353	Lion and Lamb Public House	II	547700	262825	Post Medieval	Recreational	Public House	Public House	A 17th century public house, encased in local brick during the	The asset is located in the centre of Milton on the High Street, an area with a	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
										19th century and painted. The building has an extended 19th century gable and is laid out in a L-plan.	busy, dense village character.		surviving historic fabric. The character has been altered by extensive modern development in Milton, which has increased the density of the settlement and reduced the intervisibility between any remaining historic assets.
HE015	1127352	32 Fen Road	II	548004	262668	Post Medieval	Domestic	House	House	A late 18th century painted brick house with a plain tile straight mansard roof with dormers to the street and pantiled gabled roof above.	This asset is situated on Fen Road, surrounded by predominantly late 20th century housing which limit the building's relationship with other built heritage assets in the vicinity.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. It has group value with the other heritage assets in Milton. Late 20th- early 21st century housing located along Fen Road has changed and negatively contributed to the setting of the asset which historically was largely rural.
HE016	1331322	Strangeways	II	548116.6	262624	Post Medieval	Domestic	Cottage Home	House	A 17th century timber-framed and plastered one-and-a-half storey cottage with a thatched roof and three dormers.	This asset is situated on Fen Road at the edge of Fen Ditton. It is surrounded by mature trees, interspersed with late 20th and early 21st century housing.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. It has group value with the other heritage assets in Milton. Late 20th- early 21st century housing located along Fen Road has changed and negatively contributed to the setting of the asset which historically was largely rural.
HE017	1127391	Riverside Cottage	II	548174	260586	Medieval	Domestic	Cottage Home	House	An early 14th century timber-framed and plastered cottage with alterations dating to the 16th, 18th and 20th centuries. The	This asset is surrounded by high hedgerows and mature trees which line the River Cam west of the cottage. It is set back from the road with few other houses located nearby,	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. Set away from Green End, the formed relationship of the river has not been

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
										cottage comprises a long straw thatch and plain tiled roof.	contributing to its rural character.		interrupted and the trees inhibit intervisibility with the few other historic buildings located nearby.
HE018	1157255	Garden and Boundary Wall to Ditton Hall	II	548198	260346	Post Medieval	Gardens, Parks and Urban Spaces	Garden Wall	Garden Wall	A 19th century stone with brick rubble boundary wall flanking the gardens of Ditton Hall.	The wall is located within the grounds of Ditton Hall, at the eastern end of the High Street.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. The wall has a limited presence within the village, overshadowed by mature trees. Its setting comprises the grounds of Ditton Hall which is contained by another outer boundary wall.
HE019	1127392	Grassey Cottage	II	548204	260753	Post Medieval	Domestic	Cottage Home	House	A 17th century timber-framed cottage with gault brickwork to the front (west) elevation and weatherboarding on the southern elevation. The cottage also has a hipped corrugated iron roof and horizontal sliding sashed windows.	This asset is situated halfway along Green End which is lined with trees. South of the country lane is historic compared to the modern housing located north. Greens End and Grassy Cottage are two historic assets located north.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. South of the country lane displays little change, compared to the modern housing located north. This disrupts the historic relationship of Greens End and Grassy Cottage.
HE020	1127393	4 Green End	II	548259	260821	Post Medieval	Domestic	House	House	A rectangular 17th century timber-framed rough-cast rendered cottage with pantile roofing.	This asset is situated along Green End which is lined with trees. New residential development is situated close to the asset to the east and south, with mature vegetation also contributing to limited long views from the asset. Green End has a suburban character in this area due to the density of development in the vicinity.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. South of the country lane displays little change, compared to the modern housing located north. This disrupts the historic relationship of Greens End and the listed building.

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
HE021	1127390	20 and 22 Church Street	II	548270	260438	Post Medieval	Domestic	House	House	A 17th century timber-framed and plastered pair of cottages that follow the curve of the street. These cottages have continuous jetties and detail slate and tile roofing.	This asset is located along Church Street in Fen Ditton. The cottages follow curve of Church Street and the housing along this street is sympathetic, continuing to line the road. The nearby listed buildings comprises the Grade II* listed Old Rectory opposite, the Parish Church of St Mary the Virgin's (Grade II* listed) boundary wall and Church Street.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. The position of the cottages provides evidence of the historic and original settlement pattern which was predominantly linear. The housing along this street is sympathetic, continuing to line the road. The Grade II* listed Old Rectory opposite, the Parish Church of St Mary the Virgin's (Grade II* listed) boundary wall and Church Street make a positive contribution to its setting.
HE022	1127433	16 Church Street	II	548297	260383	Post Medieval	Domestic	House	House	A 19th century painted gault brick house. This building comprises three bays and six 12-paned hung sash windows. The original entry door centred on the west façade has been replaced with a central ground floor window.	This asset's setting comprises the listed buildings along Church Street which contributes to its group value. This includes the Parish Church of St Mary the Virgin opposite and the listed wrought iron gates of 4, 6 and 8 to the south.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. It has group value with the other heritage assets in Fen Ditton.
HE023	1331301	Lode Cottage	II	548301	260936	Post Medieval	Domestic	Cottage Home	House	A pair of early 19th century timber-framed and plastered cottages. These cottages feature long straw and combed wheat thatch with three dormer windows and seven ground floor casement windows.	The setting of this asset comprises the north-western edge of Green End, Fen Ditton. There is modern development in the area surrounded by trees and hedgerows.	High	It is of high heritage value due to its architectural and historic interest, derived from its use of traditional materials in a rural setting. Modern development has increased the density of the surrounding area and diminished its historic character, however, the mature trees and hedgerows in the vicinity of

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
													the asset retain the area's rural character to an extent. Overall, setting makes a positive contribution to the value of this asset.
HE024	1428633	Fen Ditton War Memorial	II	548305.5	260332	20th century	Commemorative	War memorial	War memorial	A Portland stone tapered obelisk on a plinth, erected in 1921. The square monument comprises a stepped base with a painted inscription commemorating WWI and WWII. The obelisk is protected by four Portland stone posts linked by a metal chain.	The setting of this asset comprises Church Street and High Street and the listed buildings along these streets which contributes to its group value including Parish Church of St Mary the Virgin located to the north west and King's Head, north east.	High	It is of high heritage value due to its architectural and historic interest, derived from its prominence within the village and has group value with the rest of the heritage assets in Fen Ditton.
HE025	1127432	Numbers 4, 6 and 8 and Four Original Wrought Iron Garden Gates	II	548310	260361	Post Medieval	Domestic	House	House	A row of six 19th century former almshouses, converted into three cottages during the 20th century. These one storey buildings are of gault brick with red brick dressings and detail pantile roofs.	The asset's setting comprises the listed buildings along Church Street which contributes to its group value.	High	This row of assets is of high heritage value due to their architectural and historic interest, derived from their former use as almshouses. This asset has group value with other heritage assets emphasising the relationship with the Parish Church of St Mary the Virgin, opposite, and the listed 16 Church Street, north.
HE026	1178378	King's Head Public House	II	548312	260349	Post Medieval	Recreational	Public House	Public House	A 17th century timber-framed and plastered public house. It has a corrugated iron hipped roof, and three horizontal sliding sash windows on the first floor.	The asset directly abuts Fen Ditton's High Street, making it a prominent building within the village. It is surrounded by other historic buildings, contributing to its historic, village character.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. Its setting also contributes to its value, including its prominence within the village and its group value with the rest of the heritage assets in Fen Ditton, with which it has a strong relationship.

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
HE027	1157197	Wall to East of Number 16 (The Rectory)	II	548379	260305	Post Medieval	Gardens, Parks and Urban Spaces	Garden Wall	Garden Wall	An 18th century red brick boundary wall to the Rectory with plinth and gault brick half round copings.	The asset directly abuts Fen Ditton's High Street, making it a prominent building within the village. It is surrounded by other historic buildings, contributing to its historic, village character.	High	It is of high heritage value due to its architectural and historic interest, derived from its surviving historic form and fabric. Additionally, its setting makes a positive contribution to its value, due to its continued relationship with other heritage assets close by.
HE028	1127397	19 and 21 High Street	II	548413	260276	Postmedieval	Domestic	House	House	A semi-detached pair of early 19th century timber framed and plastered cottages. This asset comprises long straw thatched roofing with east and west red pantiled and painted brick gable lean tos.	The asset directly abuts Fen Ditton's High Street, making it a prominent building within the village. It is surrounded by other historic buildings, contributing to its historic, village character.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and fabric, and its relationship with other heritage assets close by. The building is not dominated by its surroundings and remains a prominent building which positively contributes to its historic value.
HE029	1127398	The Rectory, Fen Ditton	II	548431	260297	Post Medieval	Domestic	Clergy House	House	A late 17th century red and yellow local brick dwelling with 18th and 19th century alterations and a plain tiled roof. The L-plan features two storeys with attics and cellars.	The asset is located along Fen Ditton's High Street with other close by heritage assets.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and fabric, and its setting on Fen Ditton's High Street where many historic assets still reside.
HE030	1157174	Wall to the West of Numbers 16, 20 and 22	II	548442	260282	Post Medieval	Gardens, Parks and Urban Spaces	Garden Wall	Garden Wall	An 17th century local yellow and red brick boundary wall to the Rectory.	The asset has group value with The Rectory and forms part of a wall extending the length of the High Street.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and fabric. The asset's setting, which is largely unaltered, makes a positive contribution to its value.
HE031	1223654	K6 Kiosk	II	548448	260269	20th century	Gardens, Parks and Urban Spaces	Telephone Box	Telephone Box	A K6 Telephone Kiosk, designed in 1935 by Sir Giles Gilbert Scott. It	The asset is located along Fen Ditton's High Street with other close by heritage assets.	High	It is of high heritage value derived from its historic interest as a 20th century feature of village life and

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
										consists of cast iron and is square in layout with a domed roof. There are decorated crowns to the top panels.			association with Giles Gilbert Scott. It also has architectural interest as an iconic structure of the period. The setting of the asset allows for an understanding of it as a village telephone box.
HE032	1157152	The Ancient Shepherd	II	548503	260243	Post Medieval	Recreational	Public House	Public House	A late 18th century plastered timber-framed and painted brick public house with a tile hipped roof.	The asset is located along Fen Ditton's High Street with other close by heritage assets.	High	It is of high heritage value due to its architectural and historic interest, which is derived from its historic form and appearance. Additionally, the asset's setting makes a positive contribution to its heritage value, due to the intervisibility between it and other heritage assets along Fen Ditton's High Street.
HE033	1127400	Poplar Hall	II	548518	261368	Post Medieval	Domestic	Agricultural Dwelling	House	A 17th century timber framed farmhouse with rough cast panels and a plain tiled roof. Its consists of a hall and cross-wing plan with a central façade gable.	The asset is situated within a farmyard, with barns and other ancillary buildings in its vicinity. The arable fields, which surround the farm, help to convey a strong agricultural character. The A14 is situated in an elevated position on an embankment to the north and a viaduct to the west. This segments the landscape and prevents long views from the asset to the north.	High	It is of high heritage value due to its architectural and historic interest, which is derived from its historic form and fabric, and the continued use of the farmhouse. The arable fields, ancillary barns and other buildings in the vicinity of the Hall help to understand its agricultural function and heritage. This makes a positive contribution to the value of the asset. However, the asset is situated close to the A14, which restricts its long views across the countryside to the north, negatively contributing to the value of the asset.
HE034	1127396	6 High Ditch Road	II	548608	260199	Medieval	Domestic	House	House	A 17th century timber framed cottage with a long	The asset's gable end faces on to High Ditch Road, with other dwellings from a range of phases in close	High	It is of high heritage value due to its architectural and historic interest, which is derived from its historic

										straw thatched roof.	proximity. The field adjacent to the asset to the west facilitates understanding of the asset as part of a rural village.		form and built fabric. Additionally, the asset's setting with other historic buildings located nearby positively contributes to the value of the asset, as it allows for an understanding of the history of the area.
HE035	1390672	Wildfowl Cottage	II	548613.8	262000	Post Medieval	Domestic	Cottage Home	Cottage Home	A late 17th century cottage with some 19th century alterations. It is composed of a timber frame with whitewashed brick walls and a red and brown striped plain-tile roof.	The setting comprises Baits Bite Lock, the bridge over the river, and the River Cam. The open fields to the south, east and south west also form part of its setting.	High	It is of high heritage value due to its historic interest, created through its possible association with Biggin Abbey, use in conjunction with the river and historic use as a public house from the 19th to early 20th centuries. Additionally, the asset's historic form and fabric contributes to its architectural interest, and its setting positively contributes to the asset's value as it is largely unchanged from its rural historic setting.
HE036	1331302	15 and 17, High Ditch Road	II	548644	260207	Post Medieval	Domestic	House	House	A pair of 18th century cottages with long straw thatched roofing, now converted into a single dwelling. It is timber framed and plastered with painted local brick foundations.	The asset is located on High Ditch Road in close proximity to a number of other historic buildings, contributing to the historic character of the area.	High	It is of high heritage value due its architectural and historic interest, which is derived from its historic form and fabric. The asset's setting also makes a positive contribution to the value of the asset, due to the number of historic buildings in the area.
HE037	1157132	14 and 16, High Ditch Road	II	548664	260167	Post Medieval	Domestic	House	House	A pair of semi-detached 19th century timber framed cottages, oriented with the gable end facing the street. The building consists of long straw thatched roofing.	The asset is located on High Ditch Road in close proximity to a number of other historic buildings, contributing to the historic character of the area.	High	It is of high heritage value due to its architectural and historic interest, which is derived from the asset's historic form and fabric. The asset's setting also makes a positive contribution to the asset's value, as the number of historic buildings in the

The barn and associated Eye Hall provides a historic relationship with the asset as they collectively formed part of the farmstead. It has group value with Eye Hall, and the Barn to East of Eye Hall, forming one side of the farmyard.
HE076	1331327	31 Burgess Road	II	550039	265341	Post Medieval	Domestic	House	House	A late 17th century thatched timber-framed cottage, one storey plus attic. Historically split into three dwellings.	This asset is located along Burgess Road surrounded by modern development, limiting the ability to understand the heritage value of the asset.	Medium	It is of medium heritage value due to its architectural and historic interest, derived from its surviving historic fabric and character. However, modern housing situated very close to the asset has negatively impacted the ability to appreciate its historic and architectural interest.
HE077	1127370	The Conservators House	II	550222	264433	Post Medieval	Transport	Toll House	Toll House	A gault brick Tudor style former toll house dating to 1842, situated on the bank of the River Cam in Clayhithe. It was constructed for the Conservators of the River Cam, the navigation authority for the river.	This asset is located off the corner of Clayhithe Road and next to the River Cam. Its location and original function as a toll house forms an important historic context.	High	It is of high heritage value due to its architectural and historic interest, derived from its association with the Conservators of the River Cam, and its high-quality, decorative design. Clayhithe Road remains unchanged and continues to positively contribute to the value of the asset as a former turnpiked road controlled from the toll house.
HE078	1331307	Milestone South West of	II	550553	259439	Post Medieval	Gardens, Parks and	Milestone	Unknown	A late 18th century Grade II listed milestone situated	The asset is located close to the A1303 Newmarket Road, high Ditch Road,	High	It is of high heritage value due to its historic interest as a once important structure

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
		Quy Hall at NGR 505 594					Urban Spaces			on the southern side of the A1303 Newmarket Road, to the west of Quy Waters. It is engraved with 'IV' denoting its distance in miles from Cambridge.	A14 and the River Cam . It is surrounded by a number of farms and other agricultural buildings, which emphasise its rural location.		on the roadside. The asset's setting makes a positive contribution to its value, in particular its surviving relationship with the A1303 Newmarket Road which helps understanding of the building's historic purpose.
HE079	1179436	Barn to North of Lock Farm	II	550761	265831	Post Medieval	Agriculture and Subsistence	Agricultural Building	Unknown	A 17th century timber-framed and weather-boarded barn. It has a corrugated iron half-hipped roof. It is part of a small complex of farm buildings to the east of Waterbeach, close to the River Cam.	The asset is located off Long Drove and resides within Lock Farm. The farm is surrounded by rural agricultural fields.	High	It is of high heritage value, due to its architectural and historic interest, which is derived from its historic form and fabric. Additionally, its well-preserved rural setting, alongside buildings within Lock Farm, positively impacts the value of the asset as an agricultural asset.
HE080	1127356	Quy Water Mill	II	550861	259820	Post Medieval	Industrial	Water mill	Hotel	A 19th century watermill composed of gault brick and a hipped slate roof. An arched basement still resides over the mill stream and the watermill is still in-situ. The asset was in use as a mill until 1950.	The asset's setting comprises the mill stream and rural fields which relate to the asset's original use. It is now incorporated into a Great Western Hotel where the mill wheel is a focal feature. The modern parts of the hotel are composed of sympathetic materials.	High	It is of high heritage value due to its architectural and historic interest as a former mill which has retained its relationship with the adjacent mill stream. The adaptive reuse use of the asset and modern extensions of the hotel has negatively impacted its value, though the preserved historic fabric and features allows for a continued understanding of the original use of the asset. The setting is still predominantly rural which positively contributes to the historic value of the former watermill.
HE081	1301986	Garden Wall to Quy Mill House	II	550918	259816	Post Medieval	Gardens, Parks and Urban Spaces	Garden Wall	Garden Wall	An 18th century garden wall adjacent to Quy Water Mill	The asset's setting comprises Quy Water Mill, the private road and rural fields which originally	High	It is of high heritage value due to its historic interest as a wall to the former mill which has retained its

										composed of diagonally coursed brick and clunch, with soldier brick coping and substantial buttresses.	provided a boundary wall to Quy Water Mill. It is now forms a boundary to the Great Western Hotel where the mill wheel is a focal feature.		relationship with the adjacent mill stream. The adaptive reuse use of the mill and modern extension of the hotel has negatively impacted the setting of the wall which historically formed part of the boundary to the mill. The setting is still predominantly rural which positively contributes to the historic value of the former watermill boundary wall.
HE082	1127357	Bridge Spanning Quy Water to South of Quy Hall	II	551538	260857	Post Medieval	Gardens, Parks and Urban Spaces	Ornamental Bridge	Ornamental Bridge	A cast iron ornamental bridge dating to 1823. It forms part of the historic approach to the house from the south via a tree-lined avenue.	This asset spans Quy Water and is located nearby rural landscape and open fields. Quy Hall forms part of the asset's setting.	High	It is of high heritage value due to its architectural and historic interest as an 19th century ornament bridge. Quy Hall forms part of the asset's setting which positively contributes to the value of the bridge as the hall's former historic entrance . The bridge has group value with the rest of the Quy Hall estate.
HE083	1179383	Lodges to Quy Hall	II	551548	261253	Post Medieval	Domestic	Lodge	House	A lodge of gault brick dating to c. 1870, situated adjacent to the northern entrance to the estate.	The asset's setting comprises the entrance and private road to the Quy Hall estate off Station Road. Open fields surround these lodges.	High	It is of high heritage value due to its historic and architectural interest, derived from its historic form and fabric. The relationship to Quy Hall, the private road and these lodges are still understood and there is little change in the setting of these assets which is rural and open fields. Therefore the setting positively contributes to the value of the asset. The lodges have group value with the rest of the Quy Hall estate.
HE084	1389468	Ha-Ha to South of Quy Hall	II	551563	261135	Post Medieval	Gardens, Parks and	Ha-Ha	Ha-Ha	A mid-19th century ha-ha located to the south of Quy Hall	The asset is a garden feature associated with the Quy Estate located down	High	It is of high heritage value due to its historic and architectural value, derived

							Urban Spaces			marking the edge of the formal gardens of the grounds, with parkland beyond.	the private road of Quy Hall. The Stable Block to Quy Hall is located to the south and many trees surrounding the estate. The setting comprises open fields.		from its historic form and fabric. The relationship to Quy Hall, and the associated buildings, are still understood and there is little change in the setting of these assets which is rural and open fields. Therefore the setting positively contributes to the value of the asset. This garden feature has group value with the rest of the Quy Hall estate.
HE085	1389467	Coach House, Stables, Bothies and Garden Walls at Quy Hall	II	551566	261163	Post Medieval	Transport	Coach House	Unknown	An early 19th century coach house which forms part of a stable yard.	The asset is located along a private road belonging to the Quy Estate and, therefore, has a historic relationship with the buildings associated with the Quy Hall.	High	It is of high heritage value due to its historic and architectural value, derived from its historic form and fabric. The relationship to Quy Hall, and the associated buildings, are still understood and there is little change in the setting of these assets which is rural and open fields. Therefore the setting positively contributes to the value of the asset. This collective asset has group value with the rest of the Quy Hall estate.
HE086	1389466	Stable Block at Quy Hall	II	551574	261145	Post Medieval	Transport	Stable	Unknown	An early 19th century stable block which forms part of a stable yard with the coach house.	The asset is associated with the Quy Estate and is located down the private road of Quy Hall. The Ha-Ha to Quy Hall is located to the north and many trees surrounding the estate. The setting comprises open fields.	High	It is of high heritage value due to its historic and architectural value, derived from its historic form and fabric. The relationship to Quy Hall, and the associated buildings, are still understood and there is little change in the setting of these assets which is rural and open fields. Therefore the setting positively contributes to the value of the asset. This asset has

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
													group value with the rest of the Quay Hall estate.
HE087	1301974	55, 57 and 59 Station Road	II	551902	260817	Post Medieval	Domestic	House	House	A row of early 19th century thatched cottages dating to the early 19th century. They are 1.5 storeys high, with dormer windows to the rear.	The asset is surrounded by a disparate array of properties, including many modern dwellings, all of either one or two storeys. Wide grassy verges, hedgerows and mature trees are located nearby and to the rear are open fields which emphasise the asset's rural setting.	High	This row of assets is of high heritage value due to their architectural and artistic interest as a row of rural cottages still closely associated with the surrounding countryside. Wide grassy verges, hedgerows and mature trees help to reflect the historic, rural character of the village, which is otherwise diminished by the extent of modern development.
HE088	1331295	Church of St Peter	I	549284	262647	Medieval	Religious, Ritual and Funerary	Church	Church	A Grade I listed early 12th century parish church. It is composed of Barnack limestone and limestone ashlar, flint and clunch rubble and red brick repairs, covered with cement rendering. The four stage tower dates to the 13th century.	The asset is situated within its churchyard on St John's Lane, within which are located a number of graves. It is surrounded by mature trees to the north, south and east. There are a range of agricultural buildings to the north and the churchyard boundary is more open to the west and south, however, it has no long views due to its vegetated boundary and buildings on the High Street.	High	It is of high heritage value due to its historic and architectural interest, derived from its early architectural form and fabric. The churchyard and surrounding village are key element of the asset's setting which also contribute to its heritage value. In particular, the church's location on St John's Lane references the historic interest of the route to the River Cam. The dense residential development, tall hedgerows and narrow lanes in the vicinity impede long views towards the asset. This is an important element to the asset's value which has been negatively impacted.
HE089	1127351	Milton House	II*	547945	262697	Post Medieval	Domestic	House	House	A Grade II* listed 17th century house situated in Milton, with 18th century alterations by	The asset is located on Fen Road, surrounded by modern houses, which limits the relationship between the asset and	High	It is of high heritage value due to its architectural and historic interest as a dwelling with a long history. The modern development in

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
										William Cole, Rector of Milton. It is composed of plaster, reused medieval limestone, local 18th century red brick and a plain tile roof.	other historic buildings in the area. This is exacerbated by large mature trees which prevent long views in any direction. As such, setting does not make a substantial contribution to the heritage value of the asset.		the vicinity of the asset diminishes the contribution the asset's setting makes to its value.
HE090	1127366	Church of St John	II*	549737	265099	Medieval	Religious, Ritual and Funerary	Church	Church	A Grade II* listed parish church, partially dating to the 13th century. It was extended during the 15th and 17th centuries and partially rebuilt in the 19th century following the collapse of the tower and spire.	The asset's setting is the edge of Waterbeach, with some agricultural buildings situated to the south. The surrounding residential development is relatively spacious, with the properties featuring brick boundary walls of a variety of heights. Despite the relatively low church tower, the asset has some visual prominence within the surrounding area, particularly due to its location on a curve on Station Road, making it a landmark en-route from the village to the station.	High	It is of high heritage value due to its architectural interest, derived from its early architectural form and fabric. The village setting contributes significantly to the value of the church.
HE091	1127399	Ditton Hall	II*	548183	260292	Post Medieval	Domestic	House	House	A red-brick hall dating to c.1635 incorporating remains from an early 15th century building. It features a fine 17th century staircase. It was altered during the 19th century, including partial demolition.	The setting of the Hall is characterised by a number of outbuildings situated to the west of the Hall, its substantial grounds and its proximity to the River Cam and Ditton Meadows. It is located on the edge of Fen Ditton and set back from the High Street.	High	It is of high heritage value due to its architectural and historic interest as an important historic building within Fen Ditton. The surrounding farm buildings within the asset's setting make a positive contribution to its value, as they facilitate understanding of it as a rural Hall. Due to its location on the edge of Fen Ditton and set back from the High Street, it has a limited visual relationship with the rest of the village, though it

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
HE092	1127430	Parish Church of St Mary the Virgin	II*	548267	260371	Medieval	Religious, Ritual and Funerary	Church	Church	A Grade II* listed 14th century parish church, situated within the historic village of Fen Ditton. It is composed of flint and limestone walls, with some reused medieval Barnack limestone and clunch dressings and lead roofs. The church was restored during the 1880s, including rebuilding the church tower, reproducing the 13th detailing.	The asset's setting is the centre of Fen Ditton village maintained by the wide grassy verges, mature vegetation and low-rise buildings. The church is situated within a large churchyard, surrounded by a brick wall and some large trees.	High	is a key part of the history of the village. It is of high heritage value due to its architectural and historic interest, derived from its early architectural form and fabric, and setting within a rural village. The historic village setting contributes significantly to the value of the church.
HE093	1127431	The Old Rectory, Fen Ditton	II*	548237	260417	Post Medieval	Domestic	Clergy House	House	A much-altered Grade II* listed 16th century house, composed of red and painted gault brick. The principal elevation of the main range is 2.5 storeys and symmetrical, possibly refronted during the 17th century. The scale of the building reflects its prestige within the village, where most buildings are 1.5 storeys.	The asset's setting comprises the historic centre of Fen Ditton and close proximity to the Parish Church of St Mary the Virgin. The asset is also characterised by its extensive grounds which extend to the River Cam. It has no long views to the north, south or east.	High	It is of high heritage value due to its architectural and historic interest as an early example of a rectory building. Its setting, in close proximity to the Parish Church of St Mary the Virgin, and its prominence within Fen Ditton contribute to this. The asset's extensive grounds, extending to the River Cam, provides a close relationship with the surrounding natural landscape and emphasises the rural character of the building.
HE094	1178408	Biggin Abbey	II*	548738	261757	Medieval	Domestic	Agricultural Dwelling	House	A Grade II* listed 14th century farmhouse, a surviving part of the residence of the	The setting of the building is predominantly agricultural, as it is set back from the B1047 Horningsea Road and	High	It is of high heritage value due to its architectural and historic interest, derived from its surviving historic fabric and historic value

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
										Bishops of Ely, which was visited by three Kings, now much-altered.	surrounded by arable fields, across which it has long views. This is evidenced by ridge and furrow across the surrounding fields, which is indicative of medieval and post-medieval farming. It is approached from the B1047 Horningsea Road via a tree-lined avenue that is evident on historic mapping and creates directed views towards the asset, and from it across the surrounding farmland.		through its association with the Bishops of Ely. Its agricultural setting is a key element of the asset's value, as it facilitates understanding of the building's historic relationship with the surrounding farmland that once served the Abbey.
HE067	1331303	Home Farmhouse	II*	548762.2	260165	Post Medieval	Domestic	Agricultural Dwelling	House	A Grade II* listed timber-framed farmhouse dating to the early 17th century, cased in 19th century gault brick. The eastern end of the building features an advanced gabled bay which abuts the street. There is also a 19th century extension to the rear.	The asset is located on the northern edge of Fen Ditton, and has a strong relationship with the surrounding countryside. One gable of the farmhouse directly abuts its boundary wall, which follows the building line along High Ditch Road, contributing to the historic linear nature of the village. The striped polychromatic brickwork of the boundary wall to the west reflects the prestige and wealth of the farmhouse, contributing to the value of the asset. There is modern development and historic buildings in the vicinity of the asset, most notably Manor Farmhouse to the south-west.	High	It is of high heritage value due to its architectural and historic interest as an example of a substantial farmhouse situated prominently within Fen Ditton. Its setting with other agricultural buildings in the vicinity emphasises the asset's location in an historic, rural village, which contributes to its value. Additionally, despite modern development within the setting of the asset, it retains a visual relationship with the other historic buildings in the area, like Manor Farmhouse to the south-west.
HE068	1331305	Musgrave Farmhouse	II*	548498	260268	Post Medieval	Domestic	Agricultural Dwelling	House	A Grade II* listed late 16th century and early 17th century farmhouse, with 19th century	The asset is situated on, and directly abuts to the pavement of, Fen Ditton High Street making it a prominent building within	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric,

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
										alterations. It is an L-plan with a cross wing directly abutting the pavement, jettied above. The asset was initially plastered, with 17th century local brick interventions and painted 19th century gault brick casing.	the village. The asset has a strong relationship with other heritage assets situated in the vicinity, due to their location close to the High Street. There is dense vegetation to the north, which limits its views in this direction.		which allow for an understanding of the historic prominence of agriculture within the village. The asset's setting, close to other heritage assets, makes a positive contribution to its value, as it allows for an understanding of the village's development. However, it has a limited relationship with the surrounding countryside, due to extensive development in its backlands. The changed setting, therefore, diminishes the contribution setting makes to the value of the asset.
HE069	1331306	Barn to the North West of Ditton Hall	II*	548174	260338	Post Medieval	Agriculture and Subsistence	Agricultural Building	Agricultural Building	A late 15th or early 16th century barn, which may have operated as a merchants' trading hall or warehouse prior to being used as a barn. It is two storeys, with the upper floor jettied at the northern end.	The asset is situated at the western end of Fen Ditton High Street, close to the River Cam and Stourbridge Common. Ditton Hall and other ancillary buildings historically associated with the Hall are located close by.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic fabric and agricultural heritage. The asset's setting, close to Ditton Hall and other ancillary buildings preserves the ability to understand the asset as part of an historic estate, which makes a positive contribution to its value.
HE070	1331325	Quy Hall	II*	551536	261135	Post Medieval	Domestic	Country House	Country House	A country house, likely dating to the late 15th century, extended throughout the 17th and 18th centuries, and remodelled between 1869-1871 to the designs of W. White, including	The Hall is situated within substantial grounds, including formal gardens and extensive parkland. It is situated adjacently to a number of ancillary estate buildings which form part of the Quy Hall estate.	High	It is of high heritage value due to its historic interest, provided by its age, and architectural interest, with its high-quality design and craftsmanship, evident along the garden façade in particular. The asset's setting within parkland and with ancillary buildings in the vicinity makes a positive

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
										refacing the house with red and yellow brick. The southern (garden) elevation features alternating bands of red and yellow brick, with diapered detailing on the gables. It is located within its own substantial grounds and is surrounded by a number of ancillary estate buildings.			contribution to its value, as it preserves the ability to understand the asset as part of an historic estate.
HE071	1245573	Church of St George	II	546442	260611	Post Medieval	Religious, Ritual and Funerary	Church	Church	A Grade II listed church dating to 1937-8, composed of brown brick with stone dressings. The large tower is located in the north-west of the building, topped with a ogee copper roof and spirelet. The nave roof is steeply pitched with flat-roofed side aisles to either side.	The asset is located within an early 20th century development in Chesterton, to the north-east of Cambridge.	High	It is of high heritage value due to its architectural and historic interest as an example of a 20th century suburban church. The residential, suburban setting of the church reflects the 20th century growth of this area of Cambridge, therefore contributing to the ability to understand the age and cause of the church's development. and despite its large tower, has a limited visual presence within the surrounding area.
HE072	1302033	3 High Street	II	547578	262727	Post Medieval	Domestic	House	House	A 17th century timber-framed and plastered cottage with a plain tile roof. It features a decorative frieze just below the eaves.	The asset is located in the centre of Milton on the High Street, an area with a dense village character. The asset's front garden is presently densely vegetated, with large shrubs minimising its relationship with the surrounding streetscape.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. It has group value with the other heritage assets in Milton. However, the character has been altered by extensive modern development in Milton, which has increased the density of the settlement and reduced the

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
													intervisibility between Milton's historic environment.
HE073	1331323	White Horse Public House	II	547679	262763	Post Medieval	Recreational	Public House	Public House	A 17th century two storey public house, encased in local brick during the 19th century and painted. The building comprises modern tiled roofing and is a four unit plan with a lobby entrance.	The asset is located in the centre of Milton on the High Street, an area with a busy, dense village character.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. It has group value with the other heritage assets in Milton. However, the character has been altered by extensive modern development in Milton, which has increased the density of the settlement and reduced the intervisibility between Milton's historic environment.
HE074	1127353	Lion and Lamb Public House	II	547700	262825	Post Medieval	Recreational	Public House	Public House	A 17th century public house, encased in local brick during the 19th century and painted. The building has an extended 19th century gable and is laid out in a L-plan.	The asset is located in the centre of Milton on the High Street, an area with a busy, dense village character.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. The character has been altered by extensive modern development in Milton, which has increased the density of the settlement and reduced the intervisibility between any remaining historic assets.
HE075	1428634	Milton War Memorial	II	547856.5	262838	20th century	Commemorative	War memorial	War memorial	A 20th century stone obelisk that is square in plan and is located upon a tapered plinth. The dates of the First World War and the names of sixteen local men who fell in the conflict are inscribed on the plinth.	This asset is set back and surrounded by a landscaped area at the northern end of Coles Road. Another landscaped area is situated directly opposite Coles Road. The Jolly Brewers Public House is located east of the war memorial. Further south of Coles Road comprises modern houses and flats.	High	It is of high heritage value due to its architectural and historic interest, derived from its prominence within the village depicting the local war effort. Only the public house, east, holds a historic relationship to the heritage asset, with the modern development setting diminishing the value and setting of the memorial.

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
HE076	1127352	32 Fen Road	II	548004	262668	Post Medieval	Domestic	House	House	A late 18th century painted brick house with a plain tile straight mansard roof with dormers to the street and pantiled gabled roof above.	This asset is situated on Fen Road, surrounded by predominantly late 20th century housing which limit the building's relationship with other built heritage assets in the vicinity.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. It has group value with the other heritage assets in Milton. Late 20th- early 21st century housing located along Fen Road has changed and negatively contributed to the setting of the asset which historically was largely rural.
HE077	1331322	Strangeways	II	548116.6	262624	Post Medieval	Domestic	Cottage Home	House	A 17th century timber-framed and plastered one-and-a-half storey cottage with a thatched roof and three dormers.	This asset is situated on Fen Road at the edge of Fen Ditton. It is surrounded by mature trees, interspersed with late 20th and early 21st century housing.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. It has group value with the other heritage assets in Milton. Late 20th- early 21st century housing located along Fen Road has changed and negatively contributed to the setting of the asset which historically was largely rural.
HE078	1127391	Riverside Cottage	II	548174	260586	Medieval	Domestic	Cottage Home	House	An early 14th century timber-framed and plastered cottage with alterations dating to the 16th, 18th and 20th centuries. The cottage comprises a long straw thatch and plain tiled roof.	This asset is surrounded by high hedgerows and mature trees which line the River Cam west of the cottage. It is set back from the road with few other houses located nearby, contributing to its rural character.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. Set away from Green End, the formed relationship of the river has not been interrupted and the trees inhibit intervisibility with the few other historic buildings located nearby.
HE079	1157255	Garden and Boundary Wall to	II	548198	260346	Post Medieval	Gardens, Parks and Urban Spaces	Garden Wall	Garden Wall	A 19th century stone with brick rubble boundary wall flanking the	The wall is located within the grounds of Ditton Hall, at the eastern end of the High Street.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. The

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
		Ditton Hall								gardens of Ditton Hall.			wall has a limited presence within the village, overshadowed by mature trees. Its setting comprises the grounds of Ditton Hall which is contained by another outer boundary wall.
HE080	1127392	Grassey Cottage	II	548204	260753	Post Medieval	Domestic	Cottage Home	House	A 17th century timber-framed cottage with gault brickwork to the front (west) elevation and weatherboarding on the southern elevation. The cottage also has a hipped corrugated iron roof and horizontal sliding sashed windows.	This asset is situated halfway along Green End which is lined with trees. South of the country lane is historic compared to the modern housing located north. Greens End and Grassy Cottage are two historic assets located north.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. South of the country lane displays little change, compared to the modern housing located north. This disrupts the historic relationship of Greens End and Grassy Cottage.
HE081	1127393	4 Green End	II	548259	260821	Post Medieval	Domestic	House	House	A rectangular 17th century timber-framed rough-cast rendered cottage with pantile roofing.	This asset is situated along Green End which is lined with trees. New residential development is situated close to the asset to the east and south, with mature vegetation also contributing to limited long views from the asset. Green End has a suburban character in this area due to the density of development in the vicinity.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. South of the country lane displays little change, compared to the modern housing located north. This disrupts the historic relationship of Greens End and the listed building.
HE082	1127390	20 and 22 Church Street	II	548270	260438	Post Medieval	Domestic	House	House	A 17th century timber-framed and plastered pair of cottages that follow the curve of the street. These cottages have continuous jetties	This asset is located along Church Street in Fen Ditton. The cottages follow curve of Church Street and the housing along this street is sympathetic, continuing to line the road. The nearby listed buildings comprises the Grade II*	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. The position of the cottages provides evidence of the historic and original settlement pattern which

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
										and detail slate and tile roofing.	listed Old Rectory opposite, the Parish Church of St Mary the Virgin's (Grade II* listed) boundary wall and Church Street.		was predominantly linear. The housing along this street is sympathetic, continuing to line the road. The Grade II* listed Old Rectory opposite, the Parish Church of St Mary the Virgin's (Grade II* listed) boundary wall and Church Street make a positive contribution to its setting.
HE083	1127433	16 Church Street	II	548297	260383	Post Medieval	Domestic	House	House	A 19th century painted gault brick house. This building comprises three bays and six 12-paned hung sash windows. The original entry door centred on the west façade has been replaced with a central ground floor window.	This asset's setting comprises the listed buildings along Church Street which contributes to its group value. This includes the Parish Church of St Mary the Virgin opposite and the listed wrought iron gates of 4, 6 and 8 to the south.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. It has group value with the other heritage assets in Fen Ditton.
HE084	1331301	Lode Cottage	II	548301	260936	Post Medieval	Domestic	Cottage Home	House	A pair of early 19th century timber-framed and plastered cottages. These cottages feature long straw and combed wheat thatch with three dormer windows and seven ground floor casement windows.	The setting of this asset comprises the north-western edge of Green End, Fen Ditton. There is modern development in the area surrounded by trees and hedgerows.	High	It is of high heritage value due to its architectural and historic interest, derived from its use of traditional materials in a rural setting. Modern development has increased the density of the surrounding area and diminished its historic character, however, the mature trees and hedgerows in the vicinity of the asset retain the area's rural character to an extent. Overall, setting makes a positive contribution to the value of this asset.
HE085	1428633	Fen Ditton War Memorial	II	548305.5	260332	20th century	Commemorative	War memorial	War memorial	A Portland stone tapered obelisk on a plinth, erected in 1921. 										monument comprises a stepped base with a painted inscription commemorating WWI and WWII. The obelisk is protected by four Portland stone posts linked by a metal chain.	streets which contributes to its group value including Parish Church of St Mary the Virgin located to the north west and King's Head, north east.		the village and has group value with the rest of the heritage assets in Fen Ditton.
HE086	1127432	Numbers 4, 6 and 8 and Four Original Wrought Iron Garden Gates	II	548310	260361	Post Medieval	Domestic	House	House	A row of six 19th century former almshouses, converted into three cottages during the 20th century. These one storey buildings are of gault brick with red brick dressings and detail pantile roofs.	The asset's setting comprises the listed buildings along Church Street which contributes to its group value.	High	This row of assets is of high heritage value due to their architectural and historic interest, derived from their former use as almshouses. This asset has group value with other heritage assets emphasising the relationship with the Parish Church of St Mary the Virgin, opposite, and the listed 16 Church Street, north.
HE087	1178378	King's Head Public House	II	548312	260349	Post Medieval	Recreational	Public House	Public House	A 17th century timber-framed and plastered public house. It has a corrugated iron hipped roof, and three horizontal sliding sash windows on the first floor.	The asset directly abuts Fen Ditton's High Street, making it a prominent building within the village. It is surrounded by other historic buildings, contributing to its historic, village character.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. Its setting also contributes to its value, including its prominence within the village and its group value with the rest of the heritage assets in Fen Ditton, with which it has a strong relationship.
HE088	1157197	Wall to East of Number 16 (The Rectory)	II	548379	260305	Post Medieval	Gardens, Parks and Urban Spaces	Garden Wall	Garden Wall	An 18th century red brick boundary wall to the Rectory with plinth and gault brick half round copings.	The asset directly abuts Fen Ditton's High Street, making it a prominent building within the village. It is surrounded by other historic buildings, contributing to its historic, village character.	High	It is of high heritage value due to its architectural and historic interest, derived from its surviving historic form and fabric. Additionally, its setting makes a positive contribution to its value, due to its continued

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Type	Current Use	Description	Setting Description	Value	Value Description
HE089	1127397	19 and 21 High Street	II	548413	260276	Postmedieval	Domestic	House	House	A semi-detached pair of early 19th century timber framed and plastered cottages. This asset comprises long straw thatched roofing with east and west red pantiled and painted brick gable lean tos.	The asset directly abuts Fen Ditton's High Street, making it a prominent building within the village. It is surrounded by other historic buildings, contributing to its historic, village character.	High	relationship with other heritage assets close by. It is of high heritage value due to its architectural and historic interest, derived from its historic form and fabric, and its relationship with other heritage assets close by. The building is not dominated by its surroundings and remains a prominent building which positively contributes to its historic value.
HE090	1127398	The Rectory, Fen Ditton	II	548431	260297	Post Medieval	Domestic	Clergy House	House	A late 17th century red and yellow local brick dwelling with 18th and 19th century alterations and a plain tiled roof. The L-plan features two storeys with attics and cellars.	The asset is located along Fen Ditton's High Street with other close by heritage assets.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and fabric, and its setting on Fen Ditton's High Street where many historic assets still reside.
HE091	1157174	Wall to the West of Numbers 16, 20 and 22	II	548442	260282	Post Medieval	Gardens, Parks and Urban Spaces	Garden Wall	Garden Wall	An 17th century local yellow and red brick boundary wall to the Rectory.	The asset has group value with The Rectory and forms part of a wall extending the length of the High Street.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and fabric. The asset's setting, which is largely unaltered, makes a positive contribution to its value.

1.2 Scheduled Monuments

Table 1-3: Scheduled Monuments within the 1km study area

UID	NHLE Reference	Name	Date	Class	Type	Description	Setting Description	Value	Value Description
HE001	1457437	Multi-phased settlement east of Milton	Bronze Age to Medieval	Monument <by form>	Settlement	Multi-phased settlement showing almost continuous occupation from the late Iron Age to 13th century.	The remains are set within fields at the eastern end of the village of Milton. This asset survives as buried archaeological remains, therefore setting does not contribute to value.	High	Heritage value is derived from the archaeological remains and their ability to inform on nationally important archaeological deposits, especially relating to the evolution of settled sites over time.
HE002	1006895	Horningsea kilns, site of	Roman	Industrial	Pottery kiln	Roman settlement and kilns. Evidence of Roman occupation has been recorded over an area of about 40 acres. Finds show that in addition to extensive pottery-making activity there was a domestic settlement of considerable size.	The archaeological remains are buried and therefore their setting does not contribute to their value.	High	Heritage value is derived from the archaeological remains and their ability to inform on Roman occupation of the fens and the industrial use of this area during the period.
HE003	1006930	Car Dyke	Roman	Water supply and drainage	Canal	Section of the Roman canal known as the Car Dyke. Date of the cutting shown to be as early as 1st century and its abandonment shown to have occurred in the latter half of the 2nd century.	The remains are set within the flat agricultural landscape extending south from the southern periphery of Waterbeach. The setting is contained to the western banks of the Cam and fens extending north-west of this.	High	Heritage value is derived from the archaeological remains and their ability to inform on the construction, management and use of an inland waterway during the Roman period.
HE004	1006888	Waterbeach Abbey (site of)	Medieval	Religious ritual and funerary	Abbey	Substantial building excavated by Mary Craster. Above ground earthworks survive well, including evidence of a moat and trackway.	The remains are set within the flat agricultural landscape on the southern periphery of Waterbeach. They are separated from the roads by the church and its yard and overlook the Cam.	High	Heritage value is derived from the archaeological remains and their ability to inform on the religious history of the area and medieval occupation of the Fens. The asset's setting contributes to its rural character, but does not aid understanding of the asset's heritage value. As such, setting is considered to make a neutral contribution to the asset's heritage value.

1.3 Conservation Areas

Table 1-5: Conservation Areas within the 1km study area

UID	Name	Date	Class	Type	Summary Description	Setting Description	Value	Value Description
HE095	Baits Bite Lock	Medieval, Post Medieval, modern	Transport	Lock	The Baits Bite Lock Conservation Area was designated on 8 November 1990. It incorporates an area running from the A14 in the south to the junction of Fen Road in the north, running along the tow path on the western side and including some fields adjacent to the river in the east. The Character Appraisal notes that Baits Bite Lock is the centrepiece of the conservation area, with the few buildings surrounding it contributing to the character of the area. The lock is the focal point of views up and down the river in this area, with the trees lining the banks of the river guiding views towards it. Biggin Abbey is also included within the conservation area and is visible throughout most of it.	The setting of the conservation area is the surrounding flat, fenland landscape with scattered trees, the Cam as it extends north and south of the lock and the A14 which borders the conservation areas to the south. The river is lined with dense vegetation in places, limiting long views of the surrounding countryside.	Moderate	Value is derived from the architectural interest of buildings like Biggin Abbey, located within the Conservation Area. The engineering of the lock itself provides historic interest, and archaeological interest is derived from medieval and Post Medieval agricultural remains. The surrounding landscape contributes to the rural character of the asset.

UID	Name	Date	Class	Type	Summary Description	Setting Description	Value	Value Description
HE096	Fen Ditton	Early medieval, medieval, Post Medieval, modern	Domestic	Village	The Fen Ditton Conservation Area was designated on 2 March 1973 and extended on 24 September 1991. It incorporates an area from the A14 in the north, running along the River Cam to the west to Ditton Meadows in the south and along to the edge of the village on High Ditch Road in the east. It therefore includes not only the village, but also some of the surrounding countryside. The Conservation Area Character Appraisal recognises the village's rural character, and the number of historic buildings situated along the High Street. The village extends in a westward linear fashion from the Church at the east, with a number of historic farmhouses interspersed with more modern development. The village's close association with the River Cam to the west and the surrounding countryside are key elements of its value. Fen Ditton High Street is situated on top of the remains of Fleam Dyke. Medieval and modern agriculture and road works mean that the dyke is in very poor condition within Fen Ditton, and therefore this area of the Dyke is not a Scheduled Monument, unlike the stretch south-east of Fulbourn.	The agricultural semi-rural Fen edge landscape where it meets the edge of Cambridge forms the setting of the asset. It has a strong relationship with the River Cam in the west. To the north is the A14.	Moderate	Value is derived from the architectural interest of the buildings in the village centre, as well as the archaeological interest of ridge and furrow in surrounding fields and of Fleam Dyke. The agricultural, semi-rural Fen edge landscape makes a positive contribution to the value of the asset.
HE097	Horningsea	Medieval, Post Medieval, modern	Domestic	Village	Horningsea Conservation Area was designated on 17 May 1990. It incorporates the buildings situated either side of the High Street and their backlands and stretches to the River Cam in the west. It excludes an area of mid-20th century residential development to the east of the High Street on Priory Road and Abbots Way. The Conservation Area Character Appraisal states that the southern part of village is characterised by cottages and public houses, while the northern part features predominantly agricultural buildings in gault brick. The village has a linear character, with buildings predominantly situated along the High Street. A notable exception is the Church of St Peter, which is situated along St John's Lane to the west, an historic road which led to hithes and wharves on the River Cam. The High Street is characterised by low-rise buildings, predominantly of two storeys, composed in brick or painted render. The glimpses of the	The setting of the conservation area comprises the surrounding flat, fenland landscape with scattered trees, the Cam as it extends north and the railway line.	Moderate	Value is derived from the buildings in the village centre, which provide architectural interest. Historic interest is derived from the historic street pattern of the village. The surrounding rural landscape makes a positive contribution to the asset's value.

UID	Name	Date	Class	Type	Summary Description	Setting Description	Value	Value Description
					surrounding countryside and of the River Cam that are offered throughout the village are a key element of the village's character.			
HE098	Milton	Medieval, Post Medieval, modern	Domestic	Village	Milton Conservation Area was designated on 5 November 1981. The conservation area encompasses a small area in the north-east of Milton, notable for its mature tree cover and low-density of development. The Conservation Area is centred on All Saints Church and Milton Hall.	The setting of the conservation area is principally characterised by the sprawling 20th century suburban development to the west of the asset, and the flat, Fen landscape to the north and east.	Moderate	Value is derived from the historic buildings in the village centre, which provide architectural interest. The surrounding suburban development makes a negative contribution to the value of the asset.
HE099	Waterbeach	Medieval, Post Medieval, modern	Domestic	Village	Waterbeach Conservation Area was designated on 2 March 1973 and amended on 4 April 1983. The conservation area is linear in form, running along from the High Street in the north southwards along Chapel Street and Station Road, also incorporating some of the side streets. The character of the Conservation Area is informed by the relatively low height of buildings, predominantly one and a half to two storeys. The buildings themselves are disparate in style, ranging from rendered timber frame cottages to large brick villas. They are typically situated close to the street, some with small front gardens. The areas of greenspace and mature trees along this linear route through the village also contribute to its character, the village green in the centre in particular. The conservation area is flanked on both sides by areas of modern development.	The setting of the conservation area is 20th century development situated to the north, east and west of the asset. To the south, the asset's setting comprises the flat, fenland landscape with scattered trees.	Moderate	Value is derived from the buildings in the village centre, which provide architectural interest. The surrounding flat, Fenland landscape makes a positive contribution to the value of the asset.

1.5 Non-Designated Built Heritage Assets

Table 1-8: Non-Designated Built Heritage Assets within the 500m study area

Project UID	3 rd Party Reference	Name	Easting	Northing	Date	Class	Type	Current Use	Description	Setting	Value	Value Description
HE1074	MCB26894	Inn at Clayhythe	550160	264480	Post Medieval	Commercial	Public House	Public House	A 19th century Public House renamed as The Bridge.	The asset is located in Clayhithe south-east of Waterbeach just off Clayhithe Road. East of the asset is the River Cam with a bridge spanning the river to the south-east of the Public House.	Low	It is of medium heritage value due to its historic form and fabric. Its largely unchanged rural setting provides historical context for the asset as a 19th rural inn situated along the country road, and therefore makes a positive contribution to its value.
HE1141	MCB26895	Clayhythe Farm, Horningsea	550130	264310	Post Medieval	Domestic	Dwelling	Dwelling	A 19th century farmhouse situated within Clayhythe Farm.	The asset is located off the northern part of Clayhithe Road with the River Cam to the north-west of the asset. It is surrounded by open fields.	Low	It is of medium heritage value as a 19th century farmhouse, which provides architectural and historic interest. The asset's rural setting largely unchanged, providing continuity in the historic relationship showing the agricultural practices and farms which still reside along Clayhythe Road. Its setting therefore makes a positive contribution to its value.
HE1186	MCB16404	Pillbox, Waterbeach sailing club	550300	264800	Modern	Defence	Pillbox (Type Fw3/24)	None	A World War II type 24 thick-walled shell proof pillbox is built from wood shuttering and is	The asset is located north of Clayhithe and to the west of the River Cam, within the grounds of the Cam Sailing Club. Open	Low	It is of medium heritage value due to its historic form and architectural interest as a defensive World War II structure. Its river setting makes a

Project UID	3 rd Party Reference	Name	Easting	Northing	Date	Class	Type	Current Use	Description	Setting	Value	Value Description
									of irregular hexagon shape. The pillbox has five faces of equal length and a longer face along the side where the entrance is located.	fields surround the setting of this asset.		positive contribution to its value, as it allows for an understanding of its function.
HE1196	MCB23871	Toll House	550840	265760	Post Medieval	Domestic	Transport Worker's House	Dwelling	A 20th century toll house.	The asset is located on the eastern corner of Bannold Road to the east of Waterbeach. The River Cam is located to the south-east with Bottisham Lock to the south-west.	Low	It is of medium heritage value due to its architectural interest. The relationship between Bannold Road and the River Cam is still understood. This is important to the asset's original function which improved roads by controlling road access. Its setting therefore makes a positive contribution to its value.
HE1303	-	305-307 Milton Road	546413	260790	Modern	Domestic	Dwelling	Dwelling	A pair of early 20th century semi-detached dwellings.	This asset is located on Milton Road, a busy route in and out of Cambridge that is lined with similar semi-detached dwellings.	Low	It is of medium heritage value as an early pair of semi-detached houses dating to the 1920s, which hold architectural and historic interest as part of the suburban expansion of Cambridge during this period. Its setting, surrounded by other similar suburban housing, makes a positive contribution to its value.
HE1304	-	The Golden Hind	546643	261023	Modern	Commercial	Public House	Public House	An early 20th century public house.	This asset is prominently located on the corner of Milton Road, Kings Hedges Road and Green End Road. The wide road and the 20th century semi-detached housing in	Low	It is of medium heritage value as a 1930s public house, though it retains almost none of its original interior, which diminishes its architectural interest. Its suburban setting contributes to its value, as it allows for an

Project UID	3 rd Party Reference	Name	Easting	Northing	Date	Class	Type	Current Use	Description	Setting	Value	Value Description
										this area contribute to its 20th century suburban character.		understanding of the asset as a suburban public house.
HE1056	MCB20578	Plough Inn, Green End, Cambridge	548190	260630	Post Medieval	Commercial	Public House	Public House	A 19th century to late 20th century Public House.	This asset is located to the south of Green End that is lined with trees and hedgerows. The River Cam is located to the west of the public house. There are open fields to the east of the asset with a caravan park and parcels of fields, west.	Low	It is of medium heritage value due to its historic interest and current use as a rural public house. Though there is modern development surrounding the asset, trees and hedgerows have helped the asset retain a rural character. As such, the asset's setting makes a positive contribution to the value of the asset.
HE1173	MCB27451	Former school, Horningsea	549330	262440	Post Medieval	Education	School	Dwelling	A 19th century former school.	This asset is located along Horningsea High Street with a line of trees to the south.	Low	It is of medium heritage value due to its historic and architectural interest. Its historic function is still understood as it is located alongside the road where houses of the same period still reside, continuing the historic relationship in Horningsea. As such, the asset's setting makes a positive contribution to the value of the asset.
HE1166	MCB16403	Pillbox, Waterbeach station yard	549900	264800	Modern	Defence	Pillbox (Type Fw3/22)	None	A type 22 pillbox featuring stepped loops. It is built from wood shuttering.	This asset is located in the south-eastern corner of a field south of Station Road in Waterbeach. A railway line is located to the south east of the asset, and forms a key part of the asset's setting. Many open fields surround the asset.	Low	It is of medium heritage value due to its historic form and architectural interest as a defensive World War II structure. The asset's setting, close to the adjacent railway, makes a positive contribution to the value of the asset, as it allows for an understanding of the building's function.
HE1201	MCB27454	Baits Bite lock, Milton	548580	262040	Post Medieval	Transport	Canal Transport Site	Canal Lock	A 19th century lock along the River Cam.	This asset spans the River Cam and is located to the east of Milton and south-west	Medium	It is of medium heritage value due to its historic form as a river feature from the 19th century that

Project UID	3 rd Party Reference	Name	Easting	Northing	Date	Class	Type	Current Use	Description	Setting	Value	Value Description
										of Horningsea. It has a strong rural character due to the lack of development in close proximity to the asset, and the dense vegetation which prevents long views from the asset to east or west. There are relatively long views both north and south along the River Cam.		is still in use today. Its river setting makes a positive contribution to the value of the asset, as it aids in understanding its function.
HE1221	MCB15214	Pillbox, River Cam, Milton	549444	263799	Modern	Defence	Pillbox (Type Fw3/24)	None	A World War II pillbox shell proof and hexagonal in shape.	This asset is located along the western bank of the River Cam, surrounded by rural fields.	Low	It is of medium heritage value due to its historic form and architectural interest as a defensive World War II structure. The asset's setting makes a positive contribution to the value of the asset, as it allows for an understanding of the building's function.
HE1231	MCB27487	17-19 Burgess Road, Waterbeach	549980	265330	Post Medieval	Domestic	Domestic	Dwelling	An 18th-19th century house.	This asset is located on Burgess Road, surrounded by modern residential development.	Low	It is of medium heritage value due to its historic and architectural interest as a Post Medieval house. The asset's modern setting makes a negative contribution to its value, as it prevents understanding of its original historic context surrounded by farmland.
HE1232	-	24 Green End	548334	260949	Post Medieval	Domestic	Domestic	Dwelling	A 19th century dwelling.	This asset is located on the edge of Fen Ditton surrounded by a range of historic and modern dwellings. Its setting has a strong rural village character due to the low density of buildings and open	Low	It is of medium heritage value due to its historic and architectural interest as a Post Medieval house. The asset's setting on the edge of Fen Ditton with low density development and open views to the west contributes to the ability to understand it as a typical

Project UID	3 rd Party Reference	Name	Easting	Northing	Date	Class	Type	Current Use	Description	Setting	Value	Value Description
										views westwards towards the River Cam.		domestic village building, and therefore makes a positive contribution to its value.
HE1233	-	Osier Cottage	548291	260917	Modern	Domestic	Domestic	Dwelling	A mid-twentieth century dwelling	This asset is located on the edge of Fen Ditton surrounded by a range of historic and modern dwellings. The low density of dwellings and extent of vegetation in the vicinity contributes to the rural character of the area.	Low	It is of low heritage value as it features traditional design and proportions but dates to the mid-20th century and as such has limited historic interest. Its rural village setting surrounded by vegetation makes a positive contribution to the value of the asset.
HE1234	-	Red House Close	548381	261287	Post Medieval	Domestic	Agricultural Dwelling	House	A 19th century farmhouse.	The asset is surrounded by arable fields close to the River Cam, which helps to convey a strong agricultural and rural character. The A14 is situated on an embankment to the north and a viaduct to the west, giving it an elevated position in the landscape. This segments the landscape and prevents long views from the asset to the north.	Low	It is of low heritage value as a late 19th century farmhouse which has architectural interest as a landmark within the rural landscape north of Fen Ditton. Its rural setting makes a positive contribution to the value of the asset.
HE1235	-	48 Cowley Road	547296	261906	Post Medieval	Domestic	Waterworks Cottage	Office	A pair of late 19th century semi-detached dwellings associated with the historic Sewage Farm on this site.	This asset is located set back from Cowley Road in close proximity to the existing Cambridge Waste Water Treatment Plant, which aids an understanding of the history of the asset. Its setting includes the movement of large vehicles.	Low	It is of low heritage value as a late 19th century dwelling associated with the Cambridge Sewage Farm, and more recently the Waste Water Treatment Plant, which contributes to its historic interest.

Project UID	3 rd Party Reference	Name	Easting	Northing	Date	Class	Type	Current Use	Description	Setting	Value	Value Description
HE1236	-	20 Cowley Road	547188	261702	Post Medieval	Domestic	Waterworks Cottage	Office	A late 19th century dwelling associated with the historic Sewage Farm on this site.	This asset is located set back from Cowley Road in close proximity to the existing Cambridge Waste Water Treatment Plant, which aids an understanding of the history of the asset. Its setting includes the movement of large vehicles.	Low	It is of low heritage value as a late 19th century dwelling associated with the Cambridge Sewage Farm, and more recently the Waste Water Treatment Plant, which contributes to its historic interest.
HE1237	-	Lock Keeper's Cottage, Baits Bite Lock	548588	262065	Post Medieval	Domestic	Lock Keeper's Cottage	Unknown	The C19 lock keeper's cottage is a small single storey gault brick property with a slate roof and small chimneystack. It is raised up above ground level on a plinth, with steps up to the front door.	The asset is located close to Baits Bite Lock and the River Cam. It has a strong rural character due to the lack of development in close proximity to the asset, and the dense vegetation which prevents long views from the asset to east or west. There are relatively long views both north and south along the River Cam.	Low	It is of medium heritage value as a 19th century dwelling associated with the historically manually operated Baits Bite Lock, which contributes to its historic interest. It also has architectural interest, derived from its raised position, which reflects its proximity to the river. Its setting makes a positive contribution to its value, as it aids understanding of the building's former purpose.
HE1238	-	Sergeant Yard.	549342	262546	Post Medieval	Domestic	Cottage Home	Cottage Home	A row of C18 brick cottages with mansard roofs and a carriage arch through to the rear.	This asset is located north of Horningsea High Street alongside other historic buildings. There is a landscaped green public area to the south.	Low	It is of medium heritage value due to its architectural and historic interest, which is derived from its surviving historic form and fabric as a row of cottages which allow for an appreciation of the village's rural origins. Its village setting contributes positively to its historic and architectural interest.

1.6 Non-Designated Archaeology

Table 1-9: Non-Designated Archaeology within the 500m study area

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
HE1001	MCB28 303	Site of former tramway, Hornings ea	54998 0	262630	Post Medieval	Transport	Tramway	The route of a post-medieval tramway as identified on historic aerial photographs. Evaluation revealed no remains within the route of the Waterbeach pipeline.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on transport constructed to support the extractive industries in the fens.
HE1003	11557	Roman pottery and cropmarks, Hornings ea	54887 0	261860	Roman	Domestic	House	A probable farmstead, identified from cropmarks visible on historic aerial photography. Dated by form.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the archaeological interest and the ability to inform on the early agricultural exploitation of the fen edge by isolated Roman farmsteads.
HE1005	05615	Earthwork remains Ridge and furrow, N and NW of Hornings ea village	54940 0	262900	Medieval	Monument <by form>	Earthwork	Medieval ridge and furrow remains, identified as earthworks in 1972 and visible on LiDAR but since ploughed out and not easily visible at ground level.	The remains are set within the agricultural fields north of Hornings ea, in the flat, agricultural fenland landscape.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE1006	11555	Roman cropmark system, Hornings ea	54915 0	261090	Roman	Monument <by form>	Earthwork	Cropmarks of a possible Roman farmstead were observed on historic aerial photos. Investigation has confirmed that any remains were removed by a borrow pit for the construction of the A14.	As the remains have been removed they are not considered to have a setting..	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1009	MCB17 527	WWII vehicle depot, Trinity Farm, Milton	54653 0	261930	Modern	Defence	Military Transport Site	The former extent of a second world war tank storage and servicing depot. The former extent is no longer apparent and the southern half has been redeveloped.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1016	MCB12 150	High Dyke/northern section of Fleam Dyke	54950 0	259800	Early Medieval	Monument <by form>	Linear earthwork	A linear bank and ditch monument, believed to be early medieval and defensive. Within the study area a road now follows this route and earthworks are shallow.	The setting of the asset comprises High Ditch Road and the farmland south of the A14.	Moderate	Heritage value is derived from the archaeological interest and the ability to inform on early medieval use of the area, about which very little is known.

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
HE1017	MCB21 583	Former tramway, Milton parish	54790 0	260900	Post Medieval	Transport	Tramway	The route of a post-medieval tramway was recorded perpendicular to Fen Road on historic mapping, this area has now been redeveloped.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1018	MCB19 162	Possible Roman kiln flue or gully, Hornings ea	54964 0	263590	Roman	Industrial	Kiln	A possible flue, kiln and gully were identified through geophysical survey. A limited excavation identified Roman coins and pottery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the ability to inform on the archaeology of pottery production during the Roman period alongside the larger industry in the area.
HE1020	05470	Ridge and furrow, Abbots Ditch Field, Fen Ditton	54930 0	260400	Post Medieval	Agriculture and Subsistence	Ridge and furrow	Ridge and furrow was identified between surviving furlongs in this field during survey in 1972. The field is ploughed and earthworks are not visible.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE1021	MCB27 494	Searchlight battery, Cowley Road, Cambridge	54704 0	261140	Modern	Defence	Searchlight battery	The site of a second world war searchlight battery, no DXO 742, now redeveloped into an industrial estate.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1023	08327	Cropmark site, Fen Ditton	54860 0	261600	Post Medieval	Industrial	Extractive Pit	A likely coprolite mine, identified from cropmarks and soil marks on historic aerial photography. Its presence was confirmed by archaeological evaluation.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post-medieval period.
HE1024	MCB28 320	Coprolite workings, Hornings ea	55029 0	262940	Post Medieval	Industrial	Extractive Pit	Coprolite workings east of Clayhithe Road were identified from aerial photographs in 2007.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post-medieval period.
HE1025	05308	Roman pottery and ditches, Milton	54800 0	261900	Roman	Monument <by form>	Earthwork	Several ditches, dated to the Roman period by associated pottery, which were identified within Milton Country Park in the 1950s.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the archaeological interest and the ability to inform on the early agricultural exploitation of the fen edge by isolated Roman farmsteads.
HE1026	05613	Ridge and furrow, E	54970 0	262300	Medieval, Post	Agriculture and	Ridge and furrow	Medieval or post-medieval ridge and furrow as well as coprolite	The archaeological remains are buried and	Low	Heritage value is derived from archaeological remains and

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
		of Hornings ea Village			Medieva l	Subsistenc e		workings, which were identified as cropmark west of Horningsea in the 20th century.	therefore setting does not contribute to their value.		the ability to inform on the widescale draining of the fens and its transformation to a predominantly agricultural landscape, as well as post- medieval extractive industries.
HE1027	MCB19 671	Possible Roman kiln at Cambridg e Plants Nursery	54967 0	263570	Roman	Industrial	Kiln	A kiln and shelf of fired clay, identified through geophysical survey and trial trenching. Dated through the present of Horningsea wares and metal finds.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the ability to inform on the archaeology of pottery production of Horningsea Wares, including possible drying or storage associated with the fired clay shelf.
HE1029	05407	Wharves, St. John's Lane and Dock Lane, Hornings ea	54921 0	262770	Post Medieva l	Maritime	Wharf	Two, largely infilled, wharves at the end of Dock Lane and St John's Lane where Horningsea meets the Cam.	setting primarily relates to the River Cam, the topography and vegetation around the River otherwise encloses the wharves. Horningsea is to the east, but few buildings are visible.	Low	Heritage value is derived from archaeological remains and the ability to inform on the exploitation of the Cam by fenland villages, including how this has changed over time.
HE1030	05442	Roman settleme nt site, Hornings ea	54880 0	261900	Roman	Monument <by form>	Farmstead	A probable Roman farmstead lying on low gravel, visible as cropmarks on historic aerial photography.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the archaeological interest and the ability to inform on the early agricultural exploitation of the fen edge by isolated Roman farmsteads.
HE1032	MCB25 354	Public air raid shelters, Fen Ditton	54870 0	260670	Modern	Defence	Air raid shelter	The site of public air raid shelters on Horningsea Road, Fen Ditton.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1034	05555	Medieval moat, Eye Hall Farm, Hornings ea	54985 0	263600	Medieva l, Post Medieva l	Transport	Trackway	An area of trackways, building platforms and boundary ditches of medieval/post medieval date, which was visible on historic aerial photographs as earthworks.	The surviving earthworks are set in the park and gardens of Eye Hall, in an area which also contains earthworks form roman industrial activity.	Moderate	Heritage value is derived from archaeological remains and the ability to inform on medieval settlement, especially deserted settlement which has not continued into the present, and associated activity.
HE1036	05402	Roman settleme nt,	54965 0	262140	Roman	Monument <by form>	Earthwork	Some possible roman cropmarks and earthworks were identified in this location in 1972, however	The archaeological remains are buried and	Low	Heritage value is derived from the archaeological interest and the ability to inform on

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
		Hornings ea						later evaluation has not been able to identify any roman features.	therefore setting does not contribute to their value.		roman occupation of the fens, however this is limited by their poor survival.
HE1041	CB1507 6	Spigot mortar base, Waterbea ch	55010 0	264200	Modern	Defence	Anti tank gunnery range	Two mortar bases for with standard spigot (anti-tank gun) thimbles mounted in the top.	The mortar bases are located on the Tow Path of the River Cam (location incorrectly recorded in HER). This setting provides context to their defensive use against river invasion.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the history of the defence of the Fens during the Second World War.
HE1044	11202B	Linear earthwor ks, A45 fieldwalki ng survey field 15, Stow cum Quy	55090 0	260000	Post Medieva l	Monument <by form>	Linear earthwork	Three linear earthworks, which appear to relate to the ploughing of the field in the post-medieval period.	The earthworks lie in a heavily ploughed agricultural field.	Low	Heritage value is derived from the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE1046	06303	Anglo- Saxon inhumati on, Fleam Dyke at junction of Fen Ditton and Newmark et Roads	55057 0	259480	Early Medieva l	Religious ritual and funerary	Burial	An early medieval group of burials with grave goods were excavated from the junction between High Ditch Road and the A1303 Newmarket Road in the mid-20th century.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1047	MCB21 575	Pumping windmill, Waterbea ch	55000 0	264800	Post Medieva l	Industrial	Windmill	The site of a post-medieval pumping windmill, now lying underneath the car park for Waterbeach Station.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1049	MCB27 452	Former kiln, Hornings ea	54902 0	262270	Post Medieva l	Industrial	Brickworks	The site of a post-medieval brickworks, which is shown on historic mapping.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post-medieval period.
HE1050	05310	Windmill Hill, Fen Ditton	54880 0	260900	Post Medieva l	Industrial	Windmill mound	The remains of a windmill mound, although the earthworks have been ploughed out evaluation	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability to inform on the widescale draining of the fens and its transformation to an

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
								identified a surviving circular feature.			intensely farmed agricultural landscape.
HE1053	MCB24 676	Benet Farm, Milton	54738 0	262270	Post Medieval	Agriculture and Subsistence	Farm	The site of a post-medieval farm, in an area which has now been developed into housing on the outskirts of Milton.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1054	05305	Possible site of medieval wharf, Fen Ditton	54817 0	260600	Medieval	Maritime	Wharf	A rectangular open area of land which has been identified as a possible former wharf.	The asset is set on the banks of the Cam in an area of common land.	Low	Heritage value is derived from archaeological remains and the ability to inform on the exploitation of the Cam by fenland villages, including how this has changed over time.
HE1055	MCB27 455	Former clay pit, Fen Ditton	54862 0	261470	Post Medieval	Industrial	Clay pit	The site of a former claypit, now underneath the B1047 junction of the A14.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1058	MCB25 357	Public air raid shelters, Fen Ditton	54828 0	260880	Modern	Defence	Air raid shelter	The site of public air raid shelters on Green End, Fen Ditton.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1062	MCB27 485	Destroyed pillbox, N of Milton	54938 0	263470	Modern	Defence	Pillbox	The site of a type 24 concrete pillbox, all above ground remains are destroyed.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is due to the evidence provided by the archaeological remains of the pillbox. The asset has been demolished and there is limited potential for below ground archaeological remains to survive.
HE1064	MCB21 578	Waterbeach railway station	55000 0	264900	Post Medieval	Transport	Railway station	The original Waterbeach railway station is first shown on historic mapping from 1885, a modern station is now present at the location.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1066	MCB25 208	ARP Wardens Siren, King's Hedges	54660 0	261000	Modern	Defence	Air raid warning siren	The site of an air raid warning siren, which is no longer present.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
		Road, Cambridge									cannot inform on past human practices.
HE1070	05554	Medieval settlement S of Eye Hall, Horningsea	549800	263600	Medieval	Domestic	Deserted settlement	A possible deserted village, indicated by a series of earthworks around eye hall. The remains were excavated in the early 20th century. LiDAR has identified trackways and building platforms.	The surviving earthworks are set in the park and gardens of Eye Hall, in an area which also contains earthworks from industrial activity.	Moderate	Heritage value is derived from archaeological remains and the ability to inform on medieval settlement, especially deserted settlement which has not continued into the present, and associated activity.
HE1071	MCB21576	Sluice, Waterbeach	550200	264700	Post Medieval	Water supply and drainage	Sluice	A sluice is shown here on 1st edition Ordnance Survey mapping. The river bank has since been remodeled to create a dock for the sailing club.	Any surviving archaeological remains are buried and therefore do not have a setting.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1073	MCB23454	Roman and undated features, Bannold Road, Waterbeach	550190	265980	Roman, Undated	Monument <by form>	Ditch	A series of Roman and undated pits, ditches and trackways identified by geophysical survey and excavation. Levelled ridge and furrow was also identified.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from archaeological remains and the ability to inform on Roman occupation of the fens.
HE1076	MCB19894	Iron Age features at Greenhouse Farm, Fen Ditton	549210	259830	Prehistoric	Monument <by form>	Ditch	A series of ditches and post holes, dated by associated pottery and lithics. Several postholes indicate a possible structure and ditches show a field system.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the archaeological interest and the ability to inform on the prehistoric occupation of the fen edge.
HE1078	MCB16405	Pillbox, Waterbeach rail crossing	550400	265800	Modern	Defence	Pillbox	The site of a hexagonal pillbox, likely type 24, was formerly located at the rail crossing but has since been destroyed.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	Heritage value is due to the evidence provided by the archaeological remains of the pillbox. The asset has been demolished and there is limited potential for below ground archaeological remains to survive.
HE1083	00326a	Saxon minster, Saint Peter's Church,	549280	262640	Early Medieval	Religious ritual and funerary	Monastery	The possible site of a 9th and 10th century minister (monastery) at the location of the present parish church. No remains are known but may survive buried.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the religious history of the area prior to being overtaken by the Bishops of Ely.

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
		Hornings ea									
HE1084	10515	Mounds, Fen Ditton	54840 0	261400	Post Medieval	Industrial	Spoil Heap	A series of low, conjoined mounds which are believed to be spoil heaps from coprolite digging.	The remains are set within the farmyard and gardens of Poplar Hall Farm, surrounded by agricultural fields on the eastern bank of the Cam.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post-medieval period.
HE1086	MCB20 562	Extractive Pit, Off Green End	54826 0	260760	Post Medieval	Industrial	Extractive Pit	The site of a coprolite pit, identified on historic maps and as cropmarks on aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post-medieval period.
HE1087	05471	Ridge and furrow, High Ditch Field, Fen Ditton	55010 0	259700	Medieval	Agriculture and Subsistence	Ridge and furrow	Poorly surviving remains of medieval ridge and furrow.	The remains are set in an agricultural field between High Ditch Road and the A14.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE1088	05551	Roman pottery and Post Medieval features, Eye Hall, Hornings ea	54984 0	263470	Roman, Post Medieval	Agriculture and Subsistence	Ridge and furrow	A likely post-medieval mound and ditch, which may relate to extraction. Roman pottery was found nearby. The site was excavated in 1900.	The surviving earthworks are set in the park and gardens of Eye Hall, in an area which also contains earthworks from medieval occupation.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post-medieval period.
HE1090	05459	Roman pottery manufact uring site, Hornings ea	54900 0	262000	Roman	Industrial	Spoil Heap	The site of a waste heap of pottery and associated finds, dated to the Roman period in 1885 but which may actually relate to the adjacent post-medieval pottery works.	The remains are set in an agricultural field between High Ditch Road and the A14.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post-medieval period.
HE1091	05741	Roman pottery kiln, Hornings ea	54945 0	263250	Roman	Industrial	Pottery Kiln	A distinct soil mark identified as a probable roman kiln.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the ability to inform on the archaeology of pottery production of Horningsea Wares, especially the scale and extent of this production.
HE1092	11206	Mound, Fen Ditton	54840 0	261400	Post Medieval	Industrial	Spoil Heap	A large spoil heap, associated with HE1084, likely from extraction.	The remains are set within the farmyard and gardens of Poplar Hall Farm, surrounded by	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
									agricultural fields on the eastern bank of the Cam.		industries in the fens during the post-medieval period.
HE1093	MCB20 318	Cropmarks before Cambridge Science Park, Milton	54652 0	261540	Undated	Monument <by form>	Ditch	The site of linear cropmarks, identified from historic aerial photographs, now part of the Cambridge Science Park development.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1094	MCB19 916	Medieval ditches at Eye Hall Farm, Horningsea	54993 0	263640	Medieval	Monument <by form>	Ditch	A series of medieval and post-medieval ditches identified through archaeological evaluation at Eye Hall.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from archaeological remains and the ability to inform on medieval settlement, especially deserted settlement which has not continued into the present, and associated activity.
HE1099	MCB15 907	Prehistoric to postmedieval remains, Nuffield Road	54725 1	260821	Prehistoric, Medieval, Post Medieval	Monument <by form>	Pit	The site of a pit, dated to the late prehistoric or roman period by associated finds. The area has now been developed into a housing estate.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1100	07818	Roman kiln, Horningsea	54981 0	263450	Roman	Industrial	Pottery Kiln	A possible roman kiln, excavated alongside the nearby scheduled monument in 1911 but not included within the scheduled area.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the ability to inform on the archaeology of pottery production of Horningsea Wares, especially the scale and extent of this production.
HE1102	MCB15 916	Post Medieval boundary ditch, St John's Innovation Park, Cambridge	54720 6	261975	Post Medieval	Monument <by form>	Boundary Ditch	The site of a possible post-medieval boundary ditch and post hole, identified through evaluation, now within an industrial development.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1105	05281	Roman settlement, Milton	54791 0	261720	Roman	Religious ritual and funerary	Cemetery	A series of Roman burials and other finds identified during the 1901-3 construction of the original Cambridge Corporation Sewerage Beds, now in the route of the A14.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
HE1113	09037	Enclosures, Fen Ditton	550500	259500	Undated	Monument	Curvilinear Enclosure	Cropmarks visible on historic aerial photography which appear to indicate some curvilinear and rectilinear enclosures.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from archaeological remains and the ability to inform on historic agricultural practices.
HE1114	MCB18558	Coprolite survey hole, near Horningsea	550070	262160	Post Medieval	Industrial	Extractive Pit	A 3 ft wide, 5 ft deep hole, likely dug by coprolite surveyors. Reopened in 2009 after rainfall but subsequently backfilled.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post-medieval period.
HE1117	MCB27453	Former clay pit, Horningsea	549080	262160	Post Medieval	Industrial	Clay Mine	The site of a post-medieval brickworks, which has been identified from historic aerial photography and mapping. The clay pits survive as a ponds.	The remains are set within agricultural fields on the east bank of the Cam, south of Horningsea.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post-medieval period.
HE1121	05535	Medieval settlement remains, Fen Ditton	548290	260780	Medieval	Monument	House Platform	Two housing platform cropmarks within an area which has been levelled to form a cricket field.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from archaeological remains and the ability to inform on medieval settlement, especially deserted settlement which has not continued into the present, and associated activity.
HE1122	MCB27456	Former coprolite pit, Horningsea	548450	261050	Post Medieval	Industrial	Extractive Pit	A post-medieval rectangular pit, likely from former coprolite extraction, which survives as an overgrown area of vegetation.	The remains are set within agricultural fields north of Fen Ditton.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post-medieval period.
HE1124	05440	Roman remains, Horningsea	548800	261900	Roman	Agriculture and Subsistence	Enclosure	An area of Roman remains comprising an enclosure and several ditches, dated by associated pottery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the archaeological interest and the ability to inform on the Roman settlement of the fen edge.
HE1126	05468	Cultivation remains, Fen Ditton	549500	260000	Post Medieval	Monument	Field Boundary	Cultivation remains and field boundaries relating to the 1807 enclosure of Fen Ditton.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE1127	06449	Roman rectangular settlement	550350	260080	Roman	Agriculture and Subsistence	Rectangular Enclosure	A series of cropmarks identified on historic aerial photography, comprising a rectangular enclosure and linear ditches. Dated by its form.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the archaeological interest and the ability to inform on the early agricultural exploitation of the fen edge

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
		enclosure, Fen Ditton									by isolated Roman farmsteads.
HE1130	MCB15 918	Ridge and Furrow and Post Medieval features, Cowley Park	54720 6	261083	Post Medieval	Agriculture and Subsistence	Ridge and furrow	An area of former ridge and furrow and field boundaries, now an industrial estate.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1131	MCB24 204	Undated ditch, St John's Innovation Park Cambridge	54702 0	261690	Undated	Monument <by form>	Ditch	The site of an undated ditch identified during evaluation, now part of an industrial park.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1135	5611	Ridge and furrow, Horningsea	54950 0	260900	Medieval	Agriculture and Subsistence	Ridge and furrow	The remains of likely medieval ridge and furrow cultivation marks. The field has been heavily ploughed and any above-ground remains are difficult to distinguish.	The remains are set on a slight hill within a large field in the broader agricultural landscape of the Fen edge.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE1137	8141	Clayhithe deserted settlement, Horningsea	55030 0	264400	Medieval	Domestic	Deserted Settlement	A settlement here is first recorded as 'Celie' in AD 975, and with 'hythe' by 1268. The original medieval settlement was deserted, its exact location is unknown.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the potential archaeological remains of the former settlement. These have the ability to help explain the medieval history of occupation of the Fens and the banks of the Cam, especially on the nature of occupation at Clayhithe.
HE1140	05550	Roman cemetery, Horningsea	54980 0	263300	Roman	Religious ritual and funerary	Cemetery	Disturbed skeletons and roman pottery were recovered in ploughed fields south of eye hall, which may indicate a former cemetery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the archaeological interest and the ability to inform on the burial practices and society within the fen edge during the Roman period.
HE1142	08326	Ring ditch cropmark, Milton	54700 0	261700	Undated	Monument <by form>	Ring Ditch	The site of crop marks relating to a ring ditch, now an industrial park.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
											cannot inform on past human practices.
HE1146	05798	Ridge and furrow, Horningsea	550100	261100	Medieval	Agriculture and Subsistence	Ridge and furrow	The remains of likely medieval ridge and furrow cultivation marks. Furlongs were recorded in 1972 as up to 30 ft wide. The field has been heavily ploughed and any above-ground remains are difficult to distinguish.	The remains are set on a slight hill within a large field in the broader agricultural landscape of the Fen edge.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE1147	05614	Ridge and furrow, Horningsea	549500	262600	Medieval	Agriculture and Subsistence	Ridge and furrow	The remains of likely medieval ridge and furrow cultivation marks. Furlongs were recorded in 1972 as up to 30 ft wide. The field has been heavily ploughed and any above-ground remains are difficult to distinguish.	The remains are set on a slight hill within a large field in the broader agricultural landscape of the Fen edge. This makes a positive contribution to value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE1148	08319	Rectangular enclosure, Eye Hall Farm, Horningsea	549600	263500	Roman	Monument <by form>	Square Enclosure	Cropmarks of a square, ditched enclosure. They may relate to the adjacent Roman industrial activity or medieval settlement, but most likely the former given its form.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the archaeological interest and the ability to inform on the industrial use of the fens during the Roman period.
HE1150	MCB20137	Post Medieval ditch and finds at 418a Milton Road, Cambridge	546690	260980	Post Medieval	Monument <by form>	Ditch	The site of a single post-medieval ditch identified during construction of land at Milton Road.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1153	MCB25355	Public air raid shelters, Fen Ditton	548730	260750	Modern	Defence	Air raid shelter	The site of public air raid shelters on Horningsea Road, Fen Ditton.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the history of the Fens during the Second World War.
HE1154	MCB25108	Undated enclosures, 500m north of Prospect Farm, Fen Ditton	550180	259970	Undated	Monument <by form>	Curvilinear Enclosure	A series of faint cropmarks forming a curvilinear enclosure, which were identified from historic aerial photography.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on past human practices.

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
HE1157	MCB27 486	Possible prehistoric earthwork, Horningsea	54973 0	263950	Iron Age	Monument <by form>	Defended Enclosure	A large almond-shaped enclosure, possibly Iron Age, was identified on Aerial Photography from 2008. It was not visible on LiDAR data in 2017. A linear feature, possibly a Roddon, was also observed in remote sensing survey.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the rare archaeological remains and possible prehistoric occupation. It is also possible that geoarchaeological and palaeoenvironmental information may be derived from the former routes of watercourses (Roddons).
HE1158	05554a	Earthworks W of Eye Hall (post medieval)	54980 0	263600	Post Medieval	Transport	Road	Earthworks of post medieval road and evidence of a house which continued from the medieval settlement (HE1070).	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the continuation of settlement from the medieval.
HE1160	CB1468 2	Bronze Age features, Milton recreation ground	54756 4	262347	Bronze Age	Monument <by form>	Pit	The site of pits and ditches from throughout the Bronze Age period, now developed into an industrial estate and housing.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1162	MCB23 262	Fen End, Waterbeach	55006 0	265270	Post Medieval	Domestic	House	Site of a house shown on the first edition Ordnance Survey mapping, 1885. The area is now gardens for modern housing.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from archaeological remains and the ability to inform on post-medieval occupation of the fen edge.
HE1167	08329	Ring ditch cropmark, Benet Farm	54750 0	262300	Undated	Monument <by form>	Ring Ditch	A probable ring ditch and other marks are visible here on historic aerial photography. Monitoring at Coles Hill recreation ground, however, identified no remains.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on past human practices.
HE1170	6372	Roman pottery, Eye Hall Farm, Horningsea	55030 0	263700	Undated	Industrial	Extractive Pit	Undated soil marks and a coprolite quarry have been identified here from aerial photography. A few sherds of Roman pottery were also found.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Value is derived from the potential to inform on Roman activity in this area. This had been reduced by later coprolite mining.
HE1172	05459a	Earthworks near Eye Hall, Horningsea	54900 0	262000	Medieval	Domestic	Moat	Earthworks were recorded near Eye Hall in the late 19th century, they were probably part of the identified deserted medieval settlement here (HE1070).	The remains are set within agricultural fields on the east bank of the Cam, south of Horningsea and to the south of Eye Hall an area which also contains earthworks from medieval occupation.	Moderate	Heritage value is derived from archaeological remains and the ability to inform on medieval settlement, especially deserted settlement which has not continued into the present, and associated activity.

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
HE1175	05799	Ridge and furrow, Horningsea	550200	262700	Medieval	Agriculture and Subsistence	Ridge and furrow	broad ridge and furrow surviving from before the 1810 enclosure of the parish, it has been heavily affected by later extraction.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE1180	MCB25356	Public air raid shelters, Fen Ditton	548310	260950	Modern	Defence	Air raid shelter	The site of public air raid shelters on Green End, Fen Ditton.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the history of the Fens during the Second World War.
HE1184	05229	Site of cross, Cambridge	547110	261400	Post Medieval	Religious ritual and funerary	Cross	The site of a cross, recorded on historic mapping c.1840. Now an area of hard standing within the Existing CWWTP.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1187	09005	Enclosure complex, Fen Ditton	550500	259800	Undated	Monument <by form>	Enclosure	Cropmarks of a rectangular enclosure with internal divisions which indicate the site of a possible Roman settlement.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the archaeological interest and the ability to inform on roman occupation of the fens
HE1189	MCB6772	Deserted settlement and building remains, Eye Hall	549950	263470	Post Medieval	Domestic	Deserted Settlement	Cropmarks showing a deserted settlement and building remains founded in 1911, these are likely associated with the recorded medieval and post-medieval settlement (HE1158).	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from archaeological remains and the ability to inform on medieval settlement, especially deserted settlement which has not continued into the present, and associated activity.
HE1191	MCB22615	Rectory Farm, Milton	546730	261830	Post Medieval	Domestic	Farm	The site of a farm, labelled 'Rectory Farm' on the 1st edition Ordnance Survey Map (1885). The asset has been demolished and the area is now Cambridge Science Park.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1194	05548	Roman pottery kiln, Horningsea	549500	263340	Roman	Industrial	Pottery Kiln	Earthmarks likely representing a pottery kiln are visible as a discrete dark area. Loose sherds included in the fill date to the Roman period.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the ability to inform on the archaeology of pottery production of Horningsea Wares, especially the scale and extent of this production.
HE1198	MCB28319	Earthwork	549220	262490	Medieval, Post	Agriculture and	Burgage Plot	Linear earthworks marking the boundaries of the former gardens	Set on the periphery of the village of Horningsea,	Low	Heritage value is derived from archaeological remains and

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
		enclosures, Horningsea			Medieval	Subsistence		at Horningsea, given their long narrow form they may have been burgage plots.	towards the banks of the River Cam and relative to the buildings lining the High Street.		the ability to inform on medieval settlement and agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE1200	MCB27435	Later prehistoric enclosures, Fen Ditton	549090	260140	Late Prehistoric	Agriculture and Subsistence	Enclosure	Cropmarks relating to a series of enclosures, including a rectilinear, sub rectangular and two double-ditched enclosures as well as a trackway. Dated by their form.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the rarity of archaeological remains and the ability to inform on possible prehistoric settlement and activity within the fens.
HE1206	MCB20105	Furrows and Undated Ditch at St Johns Innovation Park, Cowley Road, Cambridge	547030	261580	Undated	Agriculture and Subsistence	Ridge and furrow	Six trial trenches excavated at St John's innovation park identified two furrows and a ditch which pre-dated these. The features were not dated.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1207	05324a	Medieval earthworks, Horningsea	549140	261130	Medieval	Agriculture and Subsistence	Ridge and furrow	Earthworks relating to broad ridge and furrow were identified south of Horningsea in 1972. The area has since been ploughed, affecting survival, but the earthworks can still be made out in places.	The remains are set in agricultural fields north of the A14 and south of Horningsea.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE1209	05612	Ridge and furrow, Horningsea	549100	261100	Medieval	Agriculture and Subsistence	Ridge and furrow	Likely a continuation of HE1207, broad ridge and furrow earthworks have been recorded north of the A14. Their survival has been affected by ploughing.	The remains are set in agricultural fields north of the A14 and south of Horningsea.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE1210	05393	C19th kiln and clay quarry, Horningsea	549050	261860	Post Medieval	Industrial	Pottery Kiln	A kiln and clay pit is recorded in this location in 1809, evidence of a coprolite quarry has also been identified.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post-medieval period.

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
HE1211	05324	Roman artefact scatter, Hornings ea	549150	261130	Roman	Monument <by form>	Artefact Scatter	The Fenland Survey Project identified a scatter of roman artefacts likely relating to HE1006. No features were identified and it is likely the site was removed by a borrow pit.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the archaeological interest and the ability to inform on Roman activity in this area. This had been reduced by later mining.
HE1212	MCB20561	Site of Former Gravel Pit, Sandy Park Road, Milton	547770	261050	Post Medieval	Industrial	Extractive Pit	A gravel pit is recorded here on the 1st edition Ordnance Survey Map, however the remains lie underneath a housing estate and have largely been removed.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1222	MCB16400	Destroyed pillbox, Baits Bite Lock	548800	262100	Modern	Defence	Pillbox	The site of a former hexagonal pillbox on the west bank of the Cam, which was first recorded as destroyed in 2001. The foundations may remain, buried.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is due to the evidence provided by the archaeological remains of the pillbox. The asset has been demolished but there is potential for below ground archaeological remains to survive.
HE1223	MCB16402	Pillbox, River Cam, Waterbeach	549300	264000	Modern	Defence	Pillbox (Air Ministry Pattern)	A Type-24 thick-walled pillbox is recorded here, however there is no structure currently present at the location and it appears to have been destroyed.	Any surviving archaeological remains are buried and therefore do not have a setting.	Negligible	The asset has been removed and there is limited potential for below ground archaeological remains to survive.
HE1225	MCB19562	Features at 12 Pieces Lane, Waterbeach, Cambridgeshire	549950	265620	Late Prehistoric, Roman	Monument <by form>	Pit	A series of pits and ditches dating to the Iron Age to Roman transition were identified in archaeological evaluation in 2010. The area is now a housing estate.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1226	MCB25299	Public air raid shelters, Waterbeach	549950	265040	Modern	Defence	Air raid shelter	The site of an air raid shelter built on public land. Remains may survive below ground of this and the other nearby shelters (HE1227, HE1228 and HE1229).	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the history of the Fens during the Second World War. The asset has been demolished but there is potential for below ground archaeological remains to survive.
HE1227	MCB25301	Public air raid shelters,	549930	265290	Modern	Defence	Air raid shelter	The site of an air raid shelter built on public land. Remains may survive below ground of this and	The archaeological remains are buried and	Low	Heritage value is derived from the archaeological interest and the ability to inform on

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
		Waterbeach						the other nearby shelters (HE1226, HE1228 and HE1229).	therefore setting does not contribute to their value.		the history of the Fens during the Second World War. The asset has been demolished but there is potential for below ground archaeological remains to survive.
HE1228	MCB25 302	Public air raid shelters, Waterbeach	550050	265310	Modern	Defence	Air raid shelter	The site of an air raid shelter built on public land. Remains may survive below ground of this and the other nearby shelters. (HE1226, HE1227 and HE1229).	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the history of the Fens during the Second World War. The asset has been demolished but there is potential for below ground archaeological remains to survive.
HE1229	MCB25 308	Public air raid shelters, Waterbeach	549930	265510	Modern	Defence	Air raid shelter	The site of an air raid shelter built on public land. Remains may survive below ground of this and the other nearby shelters. (HE1227, HE1228 and HE1226).	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the history of the Fens during the Second World War. The asset has been demolished but there is potential for below ground archaeological remains to survive.
HE1230	MCB27 345	Rectilinear enclosure of an unknown date, Dean Plantation, Quy	551210	261100	Undated	Monument <by form>	Subrectangular enclosure	Cropmarks of a small subrectangular or rectilinear enclosure have been observed on historic aerial imagery from dry seasons. The form indicates a prehistoric date.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the archaeological interest and the ability to inform on the prehistoric occupation of the fen edge.
HE1232	MCB30 154	River Cam Navigation	549230	266330	Post Medieval	Transport	River Navigation	The Cam is believed to have been navigated since at least the Roman period. This record relates to the post-medieval use of the river and 18th century improvements to aid navigation.	The navigated stretch of the river leads from the Great Ouse, three miles above Ely, to Cambridge. The setting is broadly the flat agricultural land of the fens, interspersed with small settlements, but is urban near its southern end.	Low	Heritage value is derived from the archaeological interest and the ability to inform on navigational improvements to the River Cam during the post-medieval period.
HE1235	MCB30 463	Ditches and enclosure	550350	260540	Medieval, Post	Agriculture and	Subrectangular enclosure	Earthworks of a subrectangular enclosure and series of drainage ditches, one aligning with the	Set in agricultural fields west of Quy Hall, on the	Low	Heritage value is derived from the archaeological interest and the ability to inform on

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
		, Fen Ditton			Medieval	Subsistence		parish boundary, were identified on historic aerial imagery.	Horningsea/Fen Ditton Parish Boundary.		the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE1236	MCB30 557	Field boundary south of Clayhithe Road, Horningsea/Fen Ditton	54975 0	262780	Medieval, Post Medieval	Agriculture and Subsistence	Field Boundary	Soilmarks of a probable field boundary, which survived as earthworks in 1947 but have since been ploughed out.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE1237	MCB30 502	Linear feature 200m west of Station House, Stow cum Quy	55114 0	261560	Undated	Monument <by form>	Linear feature	Cropmarks of a linear feature of unknown date, possibly of geological origin.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the potential archaeological remains and the ability to inform on past human practices.
HE1238	MCB30 585	Former extractive pits at Biggin Abbey, Fen Ditton	54874 0	261670	Post Medieval	Industrial	Extractive Pit	Cropmarks on historic aerial photography were interpreted as the remains of extractive pits south of Biggin Abbey. This is supported by evaluation undertaken for the Proposed Development.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post-medieval period.
HE1239	MCB30 477	Irregular shaped cropmark north west of Quy Hall	55101 0	261640	Undated	Monument <by form>	Linear feature	Two sets of cropmarks, one of a linear feature and one possible irregular enclosure, which were identified from historic aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the potential archaeological remains and the ability to inform on past human practices.
HE1240	MCB30 469	Ditch, west of Quy Park, Stow cum Quy	55095 0	261020	Post Medieval	Agriculture and Subsistence	Drainage ditch	A cropmark of a probable drainage ditch, identified from historic aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE1242	MCB30 566	Linear features east of the River Cam, Horningsea	54910 0	262370	Undated	Transport	Trackway	Earthworks of a linear feature and probable trackway identified on historic aerial imagery. They may relate to an adjacent former brickworks or to HE1302.	Any surviving earthworks are set on the western periphery of Horningsea, in fields towards the bank of the River Cam.	Low	Heritage value is derived from the potential archaeological remains and the ability to inform on past human practices.

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
HE1243	MCB30 554	Linear earthworks south of Eye Hall, Hornings ea	54973 0	263060	Undated	Transport	Trackway	Earthworks of a linear feature and probable trackway identified on historic aerial imagery. These are undated, but similar to others in the area such as HE1242 and HE1302.	Any surviving earthworks are set within a pastoral agricultural field south-west of Eye Hall and East of Clayhithe Road.	Low	Heritage value is derived from the archaeological interest and the ability to inform on past human practices.
HE1244	MCB30 572	Possible trackway near the River Cam, Fen Ditton	54833 0	261120	Post Medieval	Transport	Trackway	A linear earthwork which was identified historic aerial imagery. It may represent a trackway to the Cam or to the nearby extractive pits.	The earthworks are set on the northern edge of Fen Ditton, on a stretch of common land on the eastern bank of the Cam.	Low	Heritage value is derived from archaeological remains and the ability to inform on the extensive extraction industries in the fens during the post-medieval period.
HE1245	MCB31 063	A probable Second World War pillbox	55070 0	265490	Modern	Defence	Pillbox	A probable, square pillbox can be seen on aerial photography from 1944. It has since been destroyed.	Any surviving archaeological remains are buried and therefore do not have a setting.	Negligible	The asset has been demolished and there is limited potential for below ground remains to survive.
HE1246	MCB30 505	Linear feature 200m south-west of Station House, Stow cum Quay	55117 0	261430	Undated, Medieval, Post Medieval	Agriculture and Subsistence	Field Boundary	Part of an earlier field system, visible as cropmarks, comprising two linear features at a right-angle. They pre-date available historic mapping of the area.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE1247	MCB30 588	Parallel ditches, west of Baits Bite Lock Cottages, Milton	54838 0	262120	Medieval, Post Medieval	Transport	Trackway	Cropmarks relating to a pair of parallel ditches, which probably represent a trackway, west of Baits Bite Lock.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Remains have been partially removed by the construction of the railway. Heritage value is derived from archaeological remains and the ability to inform on Medieval/post-medieval occupation of the fens.
HE1248	MCB30 582	L shaped pond, Poplar Hall, Fen Ditton	54847 0	261510	Post Medieval	Industrial	Extractive Pit	An L-shaped pond, which was likely the remains of a former coprolite extraction pit, was previously recorded here. This is now the route of the A14.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1249	MCB30 569	Possible water meadow, west of	54813 0	260890	Medieval, Post Medieval	Agriculture and Subsistence	Water meadow	Historic Aerial imagery indicates a water meadow (periodically flooded meadow) may have been located west of Green End.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from archaeological remains and the ability to inform on irrigation techniques and

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
		Green End, Fen Ditton									management during the Medieval/post-medieval period.
HE1250	MCB30 574	Linear feature south west of Poplar Hall, Fen Ditton	54836 0	261250	Undated	Monument <by form>	Linear Feature	Historic aerial imagery shows earthworks of a linear feature which is no longer evident. The remains are sinuous, and could be a trackway or water channel from the River Cam and a beer house.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the potential archaeological remains and the ability to inform on past human practices.
HE1251	MCB30 541	Cropmarks of possible roads, 500m north west of Mulberry House Farm, Waterbeach	54964 0	264370	Roman	Transport	road	A possible roman road, surviving as cropmarks and earthworks, has been identified from aerial imagery on the western bank of the Cam. It appears to pre-date Car Dyke (HE003).	The archaeological remains are set in agricultural fields south of Waterbeach and west of the Cam. They are cut by both Car Dyke (HE003) and the Fen Line Railway.	Moderate	Remains have been partially removed by Car Dyke and the railway. Heritage value is derived from the archaeological interest and the ability to inform on the Roman occupation of the fen edge.
HE1252	MCB30 589	Parallel ditches, south west of Baits Bite Lock Cottages, Milton	54831 0	262000	Medieval, Post Medieval	Transport	Trackway	The cropmark remains of two parallel ditches, which may represent a trackway, are present west of Baits Bite Lock. The railway appears to post-date the trackway.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from archaeological remains and the ability to inform on medieval/post-medieval occupation of the fens.
HE1253	MCB30 583	Trackway north of Poplar Hall, Fen Ditton	54840 0	261500	Post Medieval	Transport	Trackway	The eroded earthworks of two parallel ditches, visible on LiDAR Imagery, which likely represent a trackway.	The remains of the trackway are set in a large agricultural field west of Baits Bite Lock, adjacent to the Fen Line Railway.	Low	Heritage value is derived from archaeological remains and the ability to inform on post-medieval occupation of the fens.
HE1254	MCB30 534	Gravel pit, north of Biggin Abbey, Fen Ditton	54884 0	261930	Post Medieval	Industrial	Extractive Pit	Earthworks of extractive pits were formerly visible here, as shown on historic aerial imagery, but are no longer evident. They are located in an area of medieval and roman activity.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post-medieval period.
HE1255	MCB30 560	Extractive pit, south of Gayton Farm,	54951 0	262650	Post Medieval	Industrial	Extractive Pit	The site of earthworks relating to an extractive pit, likely for coprolite, which are no longer evident.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
		Hornings ea									industries in the fens during the post-medieval period.
HE1256	MCB30 503	Linear feature 200m south of Station House, Stow cum Quy	55125 0	261410	Undated	Monument <by form>	Linear feature	A cropmark of a short linear feature, which runs parallel to a possible field boundary.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on past human practices.
HE1257	MCB30 494	Linear feature to the north- west of Quy Hall, Stow cum Quy	55084 0	261370	Medieval, Post Medieval	Agriculture and Subsistence	Field Boundary	Cropmarks of a linear feature, which is most likely a field boundary or drainage ditch. The line is not shown on the first edition ordnance survey map, so may predate it.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE1258	MCB30 932	A Second World War Royal Air Force satellite camp	55036 0	265950	Modern	Defence	Royal Air Force Camp	The site of a Second World War Royal Air Force satellite camp, which included barracks, officers quarters and a mess hall. The built infrastructure has been removed.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Remains have been partially removed by the construction of Midload Farm. However, heritage value may still be derived from archaeological remains and the ability to inform on the infrastructure associated with RAF Waterbeach during WWII.
HE1259	MCB30 586	Cropmarks south of Biggin Abbey, Fen Ditton	54872 0	261640	Undated	Monument <by form>	Ring Ditch	Cropmarks of a ring ditch, macula (discoloured area) and probable enclosure. They are amongst the medieval and post-medieval activity here, but appear to relate to a separate phase of settlement.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on past human practices.
HE1260	MCB30 544	T shaped ditch at the south end of Car Dyke, Waterbeach	54961 0	264070	Undated	Monument <by form>	Ditch	A T-Shaped ditch was identified through remote sensing survey. It may be contemporary with a later ditch excavated to compliment the earlier Car Dyke.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and their ability to help understand either Roman activity relating to Car Dyke or later medieval landscape divisions.
HE1261	MCB30 500	Linear feature north west of Quy Hall,	55099 0	261540	Undated	Monument <by form>	Linear feature	A cropmark of a linear feature, possibly a medieval or post-medieval boundary, which has been identified from historic aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
		Stow cum Quy									
HE1262	MCB30 567	Rectangular features, 250m east of Horningsea Road, Horningsea	549510	262150	Undated, Roman	Agriculture and Subsistence	Subrectangular enclosure	Cropmarks and soilmarks of a subrectangular enclosure and linear feature which have been identified from historic aerial imagery. They have been identified as possibly Roman from their form.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the archaeological interest and the ability to inform on the Roman settlement of the fen edge.
HE1263	MCB30 555	Linear features south of Clayhithe Road, Horningsea	549810	262760	Medieval, Post Medieval	Transport	Trackway	The ploughed out remains of a trackway and field boundary, still visible as a soilmark in aerial imagery from 1999. The features form a right angle, and the trackway may join with others identified west of Clayhithe Road.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from archaeological remains and the ability to inform on medieval/post-medieval occupation of the fens.
HE1264	MCB30 573	WWII bombing craters, Chesterton Fen, Milton	548050	261400	Modern	Unassigned	Bomb crater	Surviving subtle earthworks of one crater, visible on LiDAR, and the site of two further craters which have been removed by later development. They would have formed a straight line, each approximately 250m apart.	The remains are set in agricultural fields between Fen Road and the A14, on the western bank of the Cam. The existing WWTP is to the west.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the bombing of the fens during WWII.
HE1265	MCB31 062	A Second World War type 24 pillbox	550770	265680	Modern	Defence	Pillbox	A type 24 pillbox, shaped as an irregular hexagon, is visible on aerial photography taken in 1944. It has since been destroyed.	Any surviving archaeological remains are buried and therefore do not have a setting.	Negligible	The asset has been demolished and there is limited potential for below ground remains to survive.
HE1266	MCB30 536	Cropmarks along a possible Roman road, 500m west of Mulberry House Farm, Waterbeach	549430	264020	Roman	Monument <by form>	Linear Feature	Cropmarks of a ring ditch and a long linear feature which continues both sides of Car Dyke and both sides of the Railway. The remains were identified on 1940s aerial photography as earthworks but appear now levelled.	The archaeological remains are buried and therefore setting does not contribute to their value.	Medium	Heritage value is derived from the archaeological interest and the ability to inform on prehistoric monuments, trackways and crossings within the Fens, likely predating the Roman channel of Car Dyke.
HE1267	MCB30 288	Searchlight battery, Waterbeach	550240	266140	Modern	Defence	Searchlight battery	The site of a searchlight battery. The search light was removed by 1946 and by 1960 the aerial imagery no longer shows	Any surviving archaeological remains are buried and therefore do not have a setting.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
								earthworks of the emplacement. The area is now a housing estate.			cannot inform on past human practices.
HE1268	MCB30 933	A Second World War Royal Air Force sewage works	55027 0	266480	Modern	Water supply and drainage	Waterworks	Waterbeach WWTW was constructed for the nearby RAF Waterbeach. The site remains a waterworks but has been heavily altered and the military buildings removed.	The remains are set in agricultural fields north of Waterbeach, surrounded by mature hedgerows. The remains of the RAF site are approximately 700m to the west.	Low	Heritage value is derived from the extant sewage works and its ability to inform on the infrastructure associated with RAF Waterbeach during WWII.
HE1269	MCB30 637	Furlong boundaries and ridge and furrow in the parish of Fen Ditton	54886 0	260300	Medieval, Post Medieval	Agriculture and Subsistence	Furlong Boundary	Levelled earthworks of furlong boundaries and ridge and furrow. They are not readily visible but can be identified on LiDAR surveys. Some of the boundaries may date to the former open field system from the 18th century.	The remains are set in agricultural fields to the north-east of Fen Ditton.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE1270	MCB30 495	Linear cropmarks to 500m west of Quy Hall	55101 0	261340	Medieval, Post Medieval	Monument <by form>	Linear feature	A cropmark of two L-shaped features, possibly field boundaries or drainage ditches, which were identified from historic aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE1271	MCB30 545	Parallel drainage ditches south west of Mulberry House Farm, Hornings ea	54965 0	263820	Post Medieval, Modern	Water supply and drainage	Drainage System	Earthworks of three parallel drainage ditches were identified by remote sensing. They are parallel to post medieval and modern field boundaries.	The earthworks lie in a heavily ploughed agricultural field.	Low	Heritage value is derived from the ability of the archaeological remains to inform on the drainage of the Fens for agriculture in the post-medieval and modern periods and how this has influenced the field pattern.
HE1272	MCB30 561	Trackway, east of Kings Farm, Hornings ea	54955 0	262570	Medieval, Post Medieval	Transport	Trackway	Levelled earthworks of two parallel features forming a short trackway, which can be seen on historic aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on medieval/post-medieval occupation of the fens.
HE1273	MCB30 570	Linear feature west of Green	54814 0	260780	Medieval, Post Medieval	Monument <by form>	Linear feature	Levelled Earth Bank of a linear feature, visible on historic aerial imagery. It may be a former water channel related to the	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on irrigation techniques and management during the

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
		End, Fen Ditton						watermeadow to the north (HE1249).			medieval/post-medieval period.
HE1274	MCB30 467	Drainage ditches, west of Quy Park, Stow cum Quy	55094 0	260670	Post Medieval	Water supply and drainage	Drainage ditch	Cropmarks of drainage ditches, probably post-medieval in date, which have been identified from historic aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE1275	CB1451 3	Wooden structure and kilns, Car Dyke/River Cam junction	54960 0	264000	Roman	Industrial	Pottery manufacturing site	Excavations in 1997 identified a series of features likely associated with Car Dyke. These included pottery kilns and a substantial timber building. The remains were heavily truncated. Horningsea and Samian wares were found associated with the building.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the ability of the archaeological remains to inform on the production, storage and distribution of pottery in the Roman period. This ability is reduced by the truncation of the remains.
HE1276	MCB30 640	Furlong boundaries and ridge and furrow in the parish of Horningsea	54975 0	262180	Medieval, Post Medieval	Agriculture and Subsistence	Ridge and furrow	Ploughed out earthworks of ridge and furrow, as well as furlong boundaries, which have been levelled and filled in. They can be seen on historic aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE1277	MCB30 509	Ridge and furrow earthworks at Clayhithe Farm, Horningsea	55024 0	264260	Medieval, Post Medieval	Agriculture and Subsistence	Ridge and furrow	Earthwork remains of ridge and furrow, parallel to existing field boundaries, which were identified through remote sensing.	The earthworks lie in a heavily ploughed agricultural field.	Low	Heritage value is derived from the ability of the archaeological remains to inform on medieval and post-medieval agricultural activity in the Fens and especially the development of the field pattern around Clayhithe.
HE1278	MCB30 558	Trackway, south of Clayhithe Road, Horningsea/Fen Ditton	54977 0	262690	Medieval, Post Medieval	Transport	Trackway	Cropmarks of two parallel ditches which curve slightly have been interpreted as a probable trackway. The marks were identified from historic aerial imagery and the remains may relate to other similar trackways nearby.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on Medieval/post-medieval occupation of the fens.
HE1279	MCB30 581	Area of features from coprolite	54849 0	261360	Post Medieval	Industrial	Extractive Pit	Levelled earthworks of probable coprolite extraction features, as well as a pit which survives as a pond and a spoil heap forming a	The remains are set within the farmyard and gardens of Poplar Hall Farm, surrounded by	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction

		extractio n, Poplar Hall, Fen Ditton						rectangular mound. Also related to HE1084 and HE1092.	agricultural fields on the eastern bank of the Cam.		industries in the fens during the post-medieval period.
HE1280	MCB30 542	Linear features to the southern end of Car Dyke, Waterbea ch	54956 0	264310	Roman	Monument <by form>	Linear feature	Linears and small sub-circular features which survive as cropmarks, they have been tentatively associated with the nearby roman pottery working sites.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability to inform on the archaeology of pottery production within the fen edge.
HE1281	MCB30 476	Linear ditch north west of Quy Hall	55097 0	261580	Undated	Monument <by form>	Linear ditch	A linear cropmark which is visible on historic aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from archaeological remains and the ability to inform on historic agricultural practices.
HE1282	MCB30 498	Field boundari es south of Allicky Farm, Stow cum Quy	55098 0	261940	Medieva l, Post Medieva l	Agriculture and Subsistenc e	Field Boundary	Cropmarks of several field boundaries which align with boundaries shown on historic mapping.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE1283	MCB30 584	Linear features, east of Biggin Abbey, Hornings ea	54984 0	261460	Post Medieva l	Agriculture and Subsistenc e	Ridge and furrow	Linear cropmarks which likely relate to drainage ditches, as well as the possible remains of ridge and furrow. A hop ground building was also historically recorded here, therefore the features may be associated with hop growing.	The drainage ditches are buried and therefore setting does not contribute to their value. The ridge and furrow is set within mixed-use agricultural fields on the slight slope of Honey Hill.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE1284	MCB30 470	Ditches, west of Quy Park, Stow cum Quy	55093 0	261080	Post Medieva l	Water supply and drainage	Drainage ditch	Cropmark remains of two straight ditches, cut perpendicular to one another and likely for drainage.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE1286	MCB30 510	Site of a brickwork s south of Clayhithe Farm, Hornings ea	55018 0	264160	Post Medieva l	Industrial	Brick and Tilemaking Site	A pond which is likely a former brick or clay pit was identified on aerial imagery. Historic mapping shows a brickworks in this location.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability of the archaeological remains to inform on the process of brickmaking and the prevalent open-cast mining in

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
HE1287	MCB31060	A Second World War type 22 pillbox	550270	265870	Modern	Defence	Pillbox	The site of a type 22 hexagonal pillbox, the upstanding structure was removed by 1968 and the area has been redeveloped into housing. No remains are expected to survive.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	the Fens in the post-medieval period. The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1288	MCB30559	Site of a pump, Hornings ea	549560	262650	Post Medieval	Water supply and drainage	Pump	The site of a pump, marked as a demolished structure on historic mapping. No above-ground remains survive, but they can be seen on historic aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post-medieval period.
HE1289	MCB30493	Linear feature to the north of Quy Hall, Stow cum Quy	551170	261210	Medieval, Post Medieval	Monument <by form>	Linear feature	A linear cropmark, which is visible on historic aerial imagery, possibly representing a field boundary or drainage ditch. Another cropmark runs perpendicular, supporting this interpretation.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE1290	MCB30543	Linear features on the west side of Car Dyke, Waterbeach	549500	264270	Roman	Monument <by form>	Linear feature	A series of cropmarks identified on historic aerial imagery comprising a linear feature, small sub-circular features and a possible subrectangular enclosure. They have been interpreted as associated with Car Dyke.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the early industrial and agricultural exploitation of the fen edge by isolated Roman farmsteads.
HE1291	MCB30587	Linear feature, west of the River Cam, Milton	548830	262220	Undated	Monument <by form>	Linear feature	levelled earthworks of a ditch and bank, which were observed on historic aerial imagery but ploughed out by 2017 when LiDAR survey of the area was undertaken.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE1292	MCB30931	A Second World War Royal Air Force satellite camp	550040	265740	Modern	Defence	Royal Air Force Camp	The site of a Second World War Royal Air Force satellite camp. The building have been levelled and housing constructed, but some remains may survive to the east.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the use of the fen edge during WWII.
HE1293	MCB31216	Ridge and Furrow and	549400	265970	Medieval, Post	Agriculture and	Ridge and furrow	Ridge and Furrow and furlong field boundaries which survive as earthworks and cropmarks.	The earthworks and cropmarks are set within agricultural fields around	Low	Heritage value is derived from the ability of the archaeological remains to

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
		Furlong Boundaries in the parish of Waterbeach			Medieval	Subsistence			the settlement of Waterbeach.		inform on the medieval and post-medieval exploitation of the fens for agriculture.
HE1294	MCB30 501	Linear feature west of Station House, Stow cum Quy	551140	261540	Undated	Monument <by form>	Linear feature	A cropmark of a linear feature which has been identified on historic aerial imagery. Another feature crosses this.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE1295	MCB30 556	Drainage ditches/field boundaries south of Clayhithe Road, Horningsea	549890	262830	Medieval, Post Medieval	Agriculture and Subsistence	Field Boundary	A series of levelled earthworks and soilmarks representing field boundaries and drainage ditches. They may relate to the trackway at HE1263.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE1296	MCB30 289	pillbox, Milton	548550	262050	Modern	Defence	Pillbox	The site of a second world war pillbox. No above-ground remains survive, however there may be buried remains.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the history of the Fens during the Second World War. The asset has been demolished but there is potential for below ground archaeological remains to survive.
HE1297	MCB30 490	Linear feature to the north of Quy Hall, Stow cum Quy	551230	261340	Medieval, Post Medieval	Agriculture and Subsistence	Field Boundary	The cropmark remains of a probable field boundary which have been identified from historic aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE1298	MCB30 437	Purported Roman road, Waterbeach	549500	263950	Roman	Transport	Road	A road of unknown date extending north-east to south-west between the railway and river. Reported to be Roman, however excavation has revealed this is not necessarily the case.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability of the archaeological remains to inform on transport within the Fens likely pre-dating the railway. The asset may also

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
HE1299	MCB30 562	Trackway north of Biggin Abbey, Fen Ditton	54875 0	261970	Medieval, Post Medieval	Transport	Trackway	The ploughed out earthworks of a former trackway, which can be seen on historic aerial imagery and appear to align with mapping from 1808.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	inform on historic use of or crossings of the River Cam. Heritage value is derived from the archaeological interest and the ability to inform on Medieval/post-medieval occupation of the fens.
HE1300	MCB30 571	Former extractive pit, at Green End, Fen Ditton	54837 0	261070	Post Medieval	Industrial	Extractive Pit	An oval shape extractive pit, likely for coprolite, was formerly located here. There are no earthworks visible above ground, however below ground remains may survive.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post-medieval period.
HE1301	MCB30 468	Drainage ditches, west of Quy Park, Stow cum Quy	55113 0	260910	Post Medieval	Water supply and drainage	Drainage ditch	A linear cropmark likely representing a former drainage ditch, which has been identified from historic aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE1302	MCB30 565	Possible trackways, east of the River Cam, Horningssea	54894 0	262210	Medieval, Post Medieval	Transport	Trackway	earthworks of two linear features, which may be a former trackway. They most likely relate to nearby medieval and post-medieval activity.	The remains are set within agricultural fields on the eastern bank of the Cam, parallel to a field boundary.	Low	Heritage value is derived from the archaeological interest and the ability to inform on Medieval/post-medieval occupation of the fens.
HE1303	N/A	Area of coprolite mining			Post Medieval	Industrial	Extractive Pit	An area of extensive coprolite mining, defined through survey and map regression, surrounding Horningssea to the south, east and north-east.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post-medieval period.
HE1304	N/A	Trackway			Roman, Medieval	Transport	Trackway	A likely Roman trackway and associated pits. It likely led to Roman cropmarks at HE1006. The trackway was recut in the medieval period.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on Roman activity in the chalk lowlands, as well as medieval re-use of earlier features.
HE1305	N/A	Palaeochannel			Prehistoric, Neolithic	Monument <by form>	Palaeochannel	Trial trenching identified this Palaeochannel, from within which a struck Neolithic flint was recovered.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the geoarchaeological development of the area as well as Neolithic activity.

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
HE1306	N/A	Enclosure Ditches			medieval, Post Medieval	Agriculture and Subsistence	Field system	A series of medieval and post-medieval ditches, likely relating to the historic agricultural use of the area, were identified near Fen Ditton within the waste water transfer tunnel.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the development of the agricultural landscape around Fen Ditton and past field systems.
HE1307	N/A	Area of Settlement Activity			Bronze Age, Iron Age	Domestic	Settlement	An area of potential settlement activity was identified from a series of pits and postholes during trial trenching. Finds included a significant assembly of animal bones from multiple pits.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the archaeological interest and the ability to inform on early permanent settlements in the chalk lowlands and the continuation of sites through prehistoric periods.
HE1308	N/A	Area of Settlement Activity			Mesolithic, Neolithic, Bronze Age, Iron Age	Domestic	Settlement	A pit continuing in situ Mesolithic or Neolithic deposits, which has been overlain by settlement activity similar to HE1308.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the archaeological interest and the ability to inform on late stone age flint working, early permanent settlements in the chalk lowlands and the continuation of sites through prehistoric periods.
HE1309	N/A	Urned Cremation			Bronze Age, Iron Age	Religious ritual and funerary	Cremation Burial	An urned cremation was recovered in trench 46, believed to be late Bronze Age or early Iron Age. The surroundings have the potential to contain additional cremations.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the archaeological interest and the ability to inform on late Bronze Age to early Iron Age funerary practices.
HE1310	N/A	Urned Cremation			Bronze Age, Iron Age	Religious ritual and funerary	Cremation Burial	An urned cremation was recovered in trench 69, believed to be late Bronze Age or early Iron Age. The surroundings have the potential to contain additional cremations.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moderate	Heritage value is derived from the archaeological interest and the ability to inform on late Bronze Age to early Iron Age funerary practices.
HE1311	08322	Cropmark Enclosures, Milton			Undated	Monument <by form>	Earthwork	Cropmark system of enclosures possibly dating to the Romano-British period.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the potential archaeological remains and the ability to inform on past human practices.
HE1313	08330	Post- Medieval and undated features, St. John's Innovation			Post Medieval	Monument <by form>	Boundary Ditch	Nine trenches produced a single definite feature, possibly a boundary ditch, which contained one sherd of 17th-18th century pottery, and an undated dubious posthole-sized feature.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
HE1043	05678	n Park, Cowley Roman ditch, Milton			Roman	Monument <by form>	Ditch	Gravel pit with ditches containing Roman Sherds.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE1317	05408	Wharf, Hornings ea			Medieval, Post Medieval	Maritime	Wharf	Two, largely infilled, wharves at the end of Dock Lane and St John's Lane where Horningsea meets the Cam.	Setting primarily relates to the River Cam, the topography and vegetation around the River otherwise encloses the wharves. Horningsea is to the east, but few buildings are visible.	Low	Heritage value is derived from archaeological remains and the ability to inform on the exploitation of the Cam by fenland villages, including how this has changed over time.
HE1318	11207	Soilmarks and earthworks, A45 Quy fieldwalking survey field 20, Hornings ea			Undated	Monument <by form>	Earthwork	Fieldwalking produced no finds. Band of gravels may indicate encroachment of the field on the earlier monument by ploughing. Slight earthworks around Abbey appear to be largely the result of garden activities.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the potential archaeological remains and the ability to inform on past human practices.
HE1319	06341	Site of wind pump, Hornings ea			Post Medieval	Industrial	Wind Pump	Site of a wind pump, south-west of Bottisham Lode. Built in 1821-1822 to drain land to the south-west of Bottisham Lode.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE1321	MCB30 590	Linear cropmarks 350m north west of Manor House, Milton			Undated	Monument <by form>	Subrectangular Enclosure	Linear cropmarks, parallel to a drainage ditch, forming subrectangular enclosures. Mapped as part of the East Cambridgeshire Aerial Investigation and Mapping project.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the potential archaeological remains and the ability to inform on past human practices.
HE1322	MCB30 591	Possible watermeadow, west of Hornings ea Manor			Medieval, Post Medieval	Agriculture and Subsistence	Water Meadow	A possible watermeadow medieval/post medieval date is visible on historic aerial photographs as earthworks and was mapped as part of the East	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on irrigation techniques and management during the

UID	CHER	Name	Easting	Northing	Date	Class	Type	Description	Setting Description	Value	Value Description
		House, Milton						Cambridgeshire Aerial Investigation and Mapping project.			medieval/post-medieval period.
HE1202	MCB27 457	Cemetery , Fen Ditton			Post Medieval	Religious ritual and funerary	Cemetery	Cemetery first recorded on Ordnance Survey First Edition maps from 1885.	Set on the periphery of the village of Fen Ditton, with a recreation ground to the north and agricultural fields to the north-east.	Low	Heritage value is derived from the archaeological remains and the ability to inform on post-medieval burial practices and the continuity of site use into the modern period.
HE1139	MCB21 577	Bank Cottage, Waterbeach			Post Medieval	Domestic	Cottage Home	The site of 'Bank Cottage', which is shown on 1st edition OS mapping. The cottage is not shown on later maps.	Any surviving archaeological remains are buried and therefore do not have a setting.	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.

Table 3-5: Impact to Conservation Areas

UID	Value	Value Description	Construction phase - temporary					Construction Phase - permanent					Operation Phase						
			Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Construction Phase Permanent Impact	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Operation Phase Impact	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type
HE095	Moderate	Value is derived from the architectural interest of buildings like Biggin Abbey, located within the Conservation Area. The engineering of the lock itself provides historic interest, and archaeological interest is derived from medieval and post-medieval agricultural remains. The surrounding landscape contributes to the rural character of the asset.	The existing rural, river character of the conservation area will be altered by a construction compound located within the conservation area, the construction of a treated effluent discharge outfall structure and changes to the PRoW on the eastern side of the river. A PRoW through the conservation area is likely to be temporarily diverted during the construction phase, altering the way people engage with and appreciate the heritage asset.	Minor	Adverse	Moderate	Adverse	Yes	There will be a permanent, physical impact due to the construction of river bank protection works and outfall structure. Additionally, the Conservation Area Appraisal notes that Biggin Abbey is particularly prominent in views east from the river. These views (see viewpoint 11, Landscape Information paper) will be altered by the introduction of the Proposed Development into the landscape beyond Biggin Abbey, altering the character of the conservation area's setting.	Moderate	Adverse	Moderate	Adverse	Yes	The Proposed Development will require sensor-activated lighting within the site and will introduce moving vehicles into the landscape. Both the lighting and movement have the potential to alter the rural setting of the conservation area, diminishing the contribution it makes to the value of the heritage asset. However, the A14 is situated in close proximity, creating existing noise, light and movement. As such, the impact caused by the operation of the Proposed Development is diminished slightly.	Negligible	Adverse	Slight	Adverse

HE096	Moderate	Value is derived from the architectural interest of the buildings in the village centre, as well as the archaeological interest of ridge and furrow in surrounding fields and of Fleam Dyke. The agricultural, semi-rural Fen edge landscape makes a positive contribution to the value of the asset.	The existing village setting will be altered by the temporary presence of construction works in the north of the conservation area, and to the north-east of the conservation area. This will slightly alter the character of the countryside that forms the setting of the asset. This will affect the ability to understand its historic interest as an historic, rural village.	Minor	Adverse	Slight	Adverse	Yes	The construction of the ventilation column in the north of the conservation area will alter the character of this part of the heritage asset. There will also be a permanent construction impact caused by the land access route to Ventilation Shaft 4. The presence of the A14 and associated screening, which has severed the conservation area from farmland to the north and east, reduces the extent of the impact from the main site on the setting of the conservation area. However, the scheme will be visible from the eastern end of the Conservation Area.	Minor	Adverse	Slight	Adverse	Yes	The Proposed Development will require sensor-activated lighting within the site and will introduce moving vehicles into the landscape. Both the lighting and movement have the potential to alter the rural setting of the conservation area, diminishing the contribution it makes to the value of the heritage asset. However, the A14 is situated between the proposed development and the asset, creating existing noise, light and movement. As such, the impact caused by the operation of the Proposed Development is diminished slightly.	Negligible	Adverse	Slight	Adverse
HE097	Moderate	Value is derived from the buildings in the village centre, which provide architectural interest. Historic interest is derived from the historic street pattern of the village. The surrounding rural landscape makes a	The existing village setting will be altered by the temporary presence of construction works in the countryside to the east of the village. This will slightly alter the character of the countryside that forms	Negligible	Adverse	Slight	Adverse	Yes	The Proposed Development will result in a change to the farmland setting of the conservation area to its south-east.	Negligible	Adverse	Slight	Adverse	Yes	The Proposed Development will require sensor-activated lighting within the site and will introduce moving vehicles into the landscape. Both the lighting and movement have the potential to alter the rural	Negligible	Adverse	Slight	Adverse

		positive contribution to the asset's value.	the setting of the conservation area. This will affect the ability to understand the historic interest of the asset as an historic, rural village.												setting of the conservation area slightly, diminishing the contribution it makes to the value of the heritage asset.				
HE098	Moderate	Value is derived from the historic buildings in the village centre, which provide architectural interest. The surrounding suburban development makes a negative contribution to the value of the asset.	No impact. The asset's village setting will not be altered by the construction proposed scheme, and the asset has no long views in the direction of the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. The asset's built-up village setting will not be altered by the construction proposed scheme, and the asset has no long views in the direction of the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. Due to the distance between the asset and the Proposed Development, there will be no change in the asset's setting or character.	No change	Neutral	Neutral	Neutral
HE099	Moderate	Value is derived from the buildings in the village centre, which provide architectural interest. The surrounding flat, Fenland landscape makes a positive contribution to the value of the asset.	The existing village setting will be altered by the temporary presence of construction traffic within the asset. This will adversely impact the heritage value of the asset, as it will temporarily alter the character of the quiet village that forms the asset's setting. This will affect the ability to understand the historic interest of the asset as an historic, rural village.	Negligible	Adverse	Slight	Adverse	No	No impact. The asset will not be altered by the construction proposed scheme, and it has no long views in the direction of the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. Due to the distance between the asset and the Proposed Development, there will be no change in the asset's setting or character.	No change	Neutral	Neutral	Neutral

		defensive World War II structure. The asset's setting, close to the adjacent railway, makes a positive contribution to the value of the asset, as it allows for an understanding of the building's function.		associated with the Proposed Development. Additional traffic within the asset's setting will not alter the ability to understand or appreciate it.																Development, and therefore the asset's setting will not be altered by the construction of the scheme.					Development, no impact is expected during operation, as the character of the asset and its setting will be entirely preserved.
HE1201	Medium	It is of medium heritage value due to its historic form as a river feature from the 19th century that is still in use today. Its river setting makes a positive contribution to the value of the asset, as it aids in understanding its function.	There will be a temporary construction impact on the asset's heritage value due to its proximity to the proposed Outfall Structure on the River Cam. The additional noise, light and movement caused during construction will alter the quiet river setting of the river lock, however, not to the extent that it inhibits the ability to understand the asset as an historic rural cottage. This impact is minimised to an extent by the mature vegetation that surrounds the asset.	Negligible	Adverse	Minor	Adverse	No impact. Once constructed, the lock will have very little intervisibility with the Outfall Structure and the Proposed Development. As such, the asset's rural, river setting will not be affected by the Proposed Development.	No change	Neutral	No effect	Neutral	No	Due to the distance and vegetation situated between the asset and the Proposed Development, no impact is expected during operation, as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral

			Construction Phase Temporary Impact	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Construction Phase Permanent Impact	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Operation Phase Impact	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect type
HE1232	Medium	It is of medium heritage value due to its historic and architectural interest as a post-medieval house. The asset's setting on the edge of Fen Ditton with low density development and open views to the west contributes to the ability to understand it as a typical domestic village building, and therefore makes a positive contribution to its value.	Yes	Construction activity, including additional noise and light within the Waterbeach Pipeline Construction Area and Shaft 4 compound have the potential to alter the rural character of the asset's setting to the north. However, due to the asset's location within a village with vegetation to the east, there is limited intervisibility between the asset and the Proposed Development, with only small glimpses of activity likely. As such, any impacts are unlikely to affect the character of the asset's setting, and therefore the asset's value.	Negligible	Adverse	Slight	Adverse	No	The Intermediate Shaft 4 will potentially be visible to the north within the setting of this asset. This will alter the rural setting of the asset slightly by introducing large construction machinery into the landscape. However, despite this insertion, the asset's village edge setting will remain recognisably rural.	Negligible	Adverse	Slight	Adverse	No impact	Due to the distance and vegetation situated between the asset and the Proposed Development, no impact is expected during operation, as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1233	Low	It is of low heritage value as it features traditional design and proportions but dates to the mid-20th century and as such has limited historic interest. Its rural village	Yes	Construction activity, including additional noise and light created by the Waterbeach Pipeline Construction Area and Shaft 4 compound have the potential to alter the rural	Negligible	Adverse	Slight	Adverse	No	The Intermediate Shaft 4 will potentially be visible to the north within the setting of this asset.
