This document describes all designated and non-designated assets within the 500m, 1km and ZTV study areas, as outlined in section 2 of the Historic Environment Baseline Report Application document reference 5.4.13.1. This includes: listed buildings, scheduled monuments, registered Pparks and Gardens, conservation areas, non-designated built heritage assets such as locally listed buildings and non-Designated Aarchaeological assets both identified by the CHER and by surveys undertaken for the proposed development. Historic landscape character areas are separately described and assessed in Historic Environment Characterisation and Impact Assessment (Application document reference 5.4.13.4).

Also provided is an assessment of heritage value for each of these assets, in accordance with the methodology described in section 2 of the Historic Environment Baseline Report Application document reference 5.4.13.1. In accordance with this methodology and national guidance the description and heritage value assessment of each asset is proportional to understand the potential for impact from the proposed development.

Gazetteer

1.1 **Listed Buildings**

The below, Table 1.1, provides a proportional description and assessment of heritage value for listed buildings within the 1km study area. Baseline data has been collected from the National Heritage List for England and supplemented by asset and setting surveys (see EVT048 in Gazetteer of Events (Application document reference 5.4.13.7)). The methodology for collating this baseline information is provided in Sections 2.4 and 2.5 of the Historic Environment Baseline Report

	Application doc	ument reference 5.4.13.1, the	methodolo	ogy for assess	ing heritage v	alue is described ir	Section 2.7 of the sam	e document. Th	ese assets are show	n spatially on figures 5.3.	13.1-9.		
Table 1	4: Listed buildir	ngs within the 1km study area Name	Grade	Easting	Northing	Date	Class	Туре	Current Use	Description	Setting Description	<u>Heritage</u> Value	Value Description
HE005	1331295	Church of St Peter		549284	262647	Medieval	Religious, -Ritual and Funerary	Church	Church	A Grade I listed early 12th century parish church. It is composed of Barnack limestone and limestone ashlar, flint and clunch rubble and red brick repairs, covered with cement rendering. The four stage tower dates to the 13th century.	The asset is situated within its churchyard on St John's Lane, within which are located a number of graves. It is surrounded by mature trees to the north, south and east. There are a range of agricultural buildings to the north and the churchyard boundary is more open to the west and south; however, -it has no long views due to its vegetated boundary and buildings on the High Street.	High	It is of high heritage value due to its historic and architectural interest, derived from its early architectural form and fabric. The churchyard and surrounding village are key element of the asset's setting, which also contribute to its heritage value. In particular, -the church's location on St John's Lane references the historic interest of the route to the River Cam. The dense residential development, -tall hedgerows and narrow lanes in the vicinity impede long views towards the asset. This is an important element to the asset's value which has been negatively impacted.
HE006	1127351	Milton House	II*	547945	262697	Post Medieval	Domestic	House	House	A Grade II* listed 17th century house situated in Milton, with 18th century alterations by William Cole, Rector of Milton. It is composed of plaster, -reused medieval limestone, local 18th century	The asset is located on Fen Road, and is surrounded by modern houses, which limits the relationship between the asset and other historic buildings in the area. This	High	It is of high heritage value due to its architectural and historic interest as a dwelling with a long history. The modern development in the vicinity of the asset diminishes the contribution the

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Туре	Current Use	Description	Setting Description	<u>Heritage</u> Value	Value Description
										red brick and a plain tile roof.	is exacerbated by large mature trees which prevent long views in any direction. As such, -setting does not make a substantial contribution to the heritage value of the asset.		asset's setting makes to its value.
HE007	1127366	Church of St John	*	549737	265099	Medieval	Religious, -Ritual and Funerary	Church	Church	A Grade II* listed parish church, partially dating to the 13th century. It was extended during the 15th and 17th centuries and partially rebuilt in the 19th century following the collapse of the tower and spire.	The asset's setting is the edge of Waterbeach, with some agricultural buildings situated to the south. The surrounding residential development is relatively spacious, -with the properties featuring brick boundary walls of a variety of heights. Despite the relatively low church tower, the asset has some visual prominence within the surrounding area, -particularly due to its location on a curve on Station Road, -making it a landmark enroute from the village to the station.	High	It is of high heritage value due to its architectural interest, derived from its early architectural form and fabric. The village setting contributes significantly to the value of the church.
HE008	1127399	Ditton Hall	II*	548183	260292	Post Medieval	Domestic	House	House	A red-brick hall dating to c.1635	The setting of the Hall is	High	It is of high heritage value due to its
										incorporating remains from an early 15th century building. It features a fine 17th century	characterised by a number of outbuildings situated to the west of the Hall,		architectural and historic interest as an important historic building within Fen Ditton. The

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Туре	Current Use	Description	Setting Description	<u>Heritage</u> Value	Value Description
										staircase. It was altered during the 19th century, including partial demolition.	its substantial grounds and its proximity to the River Cam and Ditton Meadows. It is located on the edge of Fen Ditton and set back from the High Street.		surrounding farm buildings within the asset's setting make a positive contribution to its value, -as they facilitate understanding of it as a rural Hall. Due to its location on the edge of Fen Ditton and set back from the High Street, -it has a limited visual relationship with the rest of the village, though it is a key part of the history of the village.
HE009	1127430	Parish Church of St Mary the Virgin	II*	548267	260371	Medieval	Religious, -Ritual and Funerary	Church	Church	A Grade II* listed 14th century parish church, situated within the historic village of Fen Ditton. It is composed of flint and limestone walls, -with some reused medieval Barnack limestone and clunch dressings and lead roofs. The church was restored during the 1880s, including rebuilding the church tower, and reproducing the 13th medieval detailing.	The asset's setting is the centre of Fen Ditton village maintained by the wide grassy verges, -mature vegetation and low-rise buildings. The church is situated within a large churchyard, surrounded by a brick wall and some large trees.	High	It is of high heritage value due to its architectural and historic interest, derived from its early architectural form and fabric, -and setting within a rural village. The historic village setting contributes significantly to the value of the church.
HE010	1127431	The Old Rectory, -Fen Ditton	II*	548237	260417	Post Medieval	Domestic	Clergy House	House	A much-altered Grade II* listed 16th century house, composed of red and painted gault brick. The principal elevation of the main range is 2.5 storeys and symmetrical ₇ . It was possibly refronted during the 17th century. The scale of the building reflects its prestige within the village, -where	The asset's setting comprises the historic centre of Fen Ditton and close proximity to the Parish Church of St Mary the Virgin. The asset is also characterised by its extensive grounds which extend to the River Cam. It has no long views to	High	It is of high heritage value due to its architectural and historic interest as an early example of a rectory building. Its setting, -in close proximity to the Parish Church of St Mary the Virgin, -and its prominence within Fen Ditton contribute to this. The asset's extensive grounds, extending to the River Cam, -provides

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Туре	Current Use	Description	Setting Description	Heritage Value	Value Description
										most buildings are 1.5 storeys.	the north, -south or east.		a close relationship with the surrounding natural landscape and emphasises the rural character of the building.
HE011	1178408	Biggin Abbey	*	548738	261757	Medieval	Domestic	Agricultural Dwelling	House	A Grade II* listed 14th century farmhouse, -a surviving part of the residence of the Bishops of Ely, which was visited by three Kings, -now much-altered.	The setting of the building is predominantly agricultural, -as it is set back from the B1047 Horningsea Road and surrounded by arable fields, across which it has long views. This is evidenced byThe ridge and furrow across the surrounding fields, which is indicative of medieval and post-medieval farming. It is approached from the B1047 Horningsea Road via a tree-lined avenue that is evident on historic mapping and which creates directed views towards the asset, -and from it across the surrounding farmland.	High	It is of high heritage value due to its architectural and historic interest, derived from its surviving historic fabric and historic value through its association with the Bishops of Ely. Its agricultural setting is a key element of the asset's value, -as it facilitates understanding of the building's historic relationship with the surrounding farmland that once served the Abbey.
HE0 05 <u>13</u>	1331303	Home Farmhouse	II*	548762.2	260165	Post Medieval	Domestic	Agricultural Dwelling	House	A Grade II* listed timber-framed farmhouse dating to the early 17th century, -cased in 19th century gault brick. The eastern end of the building features an advanced gabled bay which abuts the street. There is also	The asset is located on the northern edge of Fen Ditton, -and has a strong relationship with the surrounding countryside. One gable of the farmhouse directly abuts its boundary wall,	High	It is of high heritage value due to its architectural and historic interest as an example of a substantial farmhouse situated prominently within Fen Ditton. Its setting with other agricultural buildings in the vicinity

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Туре	Current Use	Description	Setting Description	<u>Heritage</u> Value	Value Description
										a 19th century extension to the rear.	which follows the building line along High Ditch Road, contributing to the historic linear nature of the village. The striped polychromatic brickwork of the boundary wall to the west reflects the prestige and wealth of the farmhouse, contributing to the value of the asset. There is modern development and historic buildings in the vicinity of the asset, -most notably Manor Farmhouse to the south-west.		emphasises the asset's location in an historic, -rural village, which contributes to its value. Additionally, -despite modern development within the setting of the asset, -it retains a visual relationship with the other historic buildings in the area, -like Manor Farmhouse to the south-west.
HE0 06 14	1331305	Musgrave Farmhouse	*	548498	260268	Post Medieval	Domestic	Agricultural Dwelling	House	A Grade II* listed late 16th century and early 17th century farmhouse, with 19th century alterations. It is an L-plan with a cross wing directly abutting the pavement, -jettied above. The asset was initially plastered, -with 17th century local brick interventions and painted 19th century gault brick casing.	The asset is situated on, -and directly abuts toonto the pavement of, Fen Ditton High Street making it a prominent building within the village. The asset has a strong relationship with other heritage assets situated in the vicinity, -due to their location close to the High Street. There is dense vegetation to the north, which limits its views in this direction.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric, -which allow for an understanding of the historic prominence of agriculture within the village. The asset's setting, -close to other heritage assets, makes a positive contribution to its value, -as it allows for an understanding of the village's development. However, -it has a limited relationship with the surrounding countryside, -due to extensive development in its

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Туре	Current Use	Description	Setting Description	Heritage Value	Value Description
													backlands. The changed setting, therefore, diminishes the contribution that setting makes to the value of the asset.
HE0 07 15	1331306	Barn to the North West of Ditton Hall	*	548174	260338	Post Medieval	Agriculture and Subsistence	Agricultural Building	Agricultural Building	A late 15th or early 16th century barn, which may have operated as a merchants' trading hall or warehouse prior to being used as a barn. It is two storeys, -with the upper floor jettied at the northern end.	The asset is situated at the western end of Fen Ditton High Street, -close to the River Cam and Stourbridge Common. Ditton Hall and other ancillary buildings historically associated with the Hall are located close by.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic fabric and agricultural heritage. The asset's setting, close to Ditton Hall and other ancillary buildings preserves the ability to understand the asset as part of an historic estate, -which makes a positive contribution to its value.
HEO OS 16	1331325	Quy Hall	*	551536	261135	Post Medieval	Domestic	Country House	Country House	A country house, likely dating to the late 15th century, extended throughout the 17th and 18th centuries, and remodelled between 1869-1871 to the designs of W. White, -including refacing the house with red and yellow brick. The southern (garden) elevation features alternating bands of red and yellow brick, -with diapered detailing on the gables. It is located within its own substantial grounds and is surrounded by a number of ancillary estate buildings.	The Hall is situated within substantial grounds, including formal gardens and extensive parkland. It is situated adjacently to a number of ancillary estate buildings which form part of the Quy Hall estate.	High	It is of high heritage value due to its historic interest, provided by its age, and architectural interest, -with its high-quality design and craftsmanship, evident along the garden façade in particular. The asset's setting within parkland and with ancillary buildings in the vicinity makes a positive contribution to its value, -as it preserves the ability to understand the asset as part of an historic estate.
HE01 0 8	1302033	3 High Street	II	547578	262727	Post Medieval	Domestic	House	House	A 17th century timber-framed and plastered cottage with a plain tile roof.	The asset is located in the centre of Milton on the High	High	It is of high heritage value due to its architectural and historic interest,

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Туре	Current Use	Description	Setting Description	<u>Heritage</u> Value	Value Description
										It features a decorative frieze just below the eaves.	Street, -an area with a dense village character. The asset's front garden is presently densely vegetated, -with large shrubs minimising its relationship with the surrounding streetscape.		derived from its historic form and surviving historic fabric. It has group value with the other heritage assets in Milton. However, the character has been altered by extensive modern development in Milton, -which has increased the density of the settlement and reduced the intervisibility betweenwith Milton's historic environment.
HE01 1 9	1331323	White Horse Public House	II	547679	262763	Post Medieval	Recreational	Public House	Public House	A 17th century two storey public house, encased in local brick during the 19th century and painted. The building comprises modern tiled roofing and is -a four unit plan with a lobby entrance.	The asset is located in the centre of Milton on the High Street, an area with a busy, dense village character.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. It has group value with the other heritage assets in Milton. However, the character has been altered by extensive modern development in Milton, —which has increased the density of the settlement and reduced the intervisibility betweenwith Milton's historic environment.
HE0 13 20	1127353	Lion and Lamb Public House	II	547700	262825	Post Medieval	Recreational	Public House	Public House	A 17th century public house, encased in local brick during the 19th century and painted. The building has an extended 19th century gable and is laid out in a L-plan.	The asset is located in the centre of Milton on the High Street, -an area with a busy, dense village character.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. The character has been altered by extensive modern development in Milton, -which has

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Туре	Current Use	Description	Setting Description	<u>Heritage</u> Value	Value Description
													increased the density of the settlement and reduced the intervisibility between with any remaining historic assets.
HE0 15 22	1127352	32 Fen Road	II	548004	262668	Post Medieval	Domestic	House	House	A late 18th century painted brick house with a plain tile straight mansard roof with dormers to the street and pantiled gabled roof above.	This asset is situated on Fen Road, surrounded by predominantly late 20th century housing which limit the building's relationship with other built heritage assets in the vicinity.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric It has group value with the other heritage assets in Milton. Late 20thearly 21st century housing -located along Fen Road has changed and negatively contributed to the setting of the asset which historically was largely rural.
HE0 16 23	1331322	Strangeways	II	548116.6	262624	Post Medieval	Domestic	Cottage Home	House	A 17th century timber-framed and plastered one-and- a-half storey cottage with a thatched roof and three dormers.	This asset is situated on Fen Road at the edge of Fen Ditton. It is surrounded by mature trees, interspersed with late 20th and early 21st century housing.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric.—It has group value with the other heritage assets in Milton. Late 20th-early 21st century housing located along Fen Road has changed, and negatively contributed to, the setting of the asset which historically was largely rural.
HE0 1.7 <u>24</u>	1127391	Riverside Cottage	II	548174	260586	Medieval	Domestic	Cottage Home	House	An early 14th century timber-framed and plastered cottage with alterations dating to the 16th, 18th and 20th	This asset is surrounded by high hedgerows and mature trees which line the River Cam west of the cottage. It	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Туре	Current Use	Description	Setting Description	<u>Heritage</u> Value	Value Description
										centuries. The cottage comprises a long straw thatch and plain tiled roof.	is set back from the road with few other houses located nearby, contributing to its rural character.		fabric. Set away from Green End, -the formed relationship of the river has not been interrupted and the trees inhibit intervisibility with the few other historic buildings located nearby.
HE0 18 25	1157255	Garden and Boundary Wall to Ditton Hall	II	548198	260346	Post Medieval	Gardens, -Parks and Urban Spaces	Garden Wall	Garden Wall	A 19th century stone with brick rubble boundary wall flanking the gardens of Ditton Hall.	The wall is located within the grounds of Ditton Hall, -at the eastern end of the High Street.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. The wall has a limited presence within the village, overshadowed by mature trees. Its setting comprises the grounds of Ditton Hall which is contained by another outer boundary wall.
HE0 19 26	1127392	Grassey Cottage	II	548204	260753	Post Medieval	Domestic	Cottage Home	House	A 17th century timber-framed cottage with -gault brickwork to the front (west) elevation and weatherboarding on the southern elevation. The cottage also has a hipped corrugated iron roof and horizontal sliding sashed windows.	This asset is situated halfway along Green End which is lined with trees. South of the country lane is historic compared to the modern housing located north. Greens End and Grassey Cottage are two historic assets located to the north.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. South of the country lane displays little change, compared to the modern housing located to the north. This disrupts the historic relationship of Greens End and Grassey Cottage.
HE02 0 7	1127393	4 Green End	II	548259	260821	Post Medieval	Domestic	House	House	A rectangular 17th century timber-framed rough-cast rendered cottage with pantile roofing.	-This asset is situated along Green End, which is lined with trees. New residential development is situated close to the asset to the east and south,	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric South of the country lane displays little change,

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Туре	Current Use	Description	Setting Description	Heritage Value	Value Description
											with mature vegetation also contributing to limited long views from the asset. Green End has a suburban character in this area due to the density of development in the vicinity.		compared to the modern housing located to the north. This disrupts the historic relationship of Greens End and the listed building.
HE02±8	1127390	20 and 22 Church Street	II	548270	260438	Post Medieval	Domestic	House	House	A 17th century timber-framed and plastered pair of cottages that follow the curve of the street. These cottages have continuous jetties and detail slate and tile roofing.	This asset is located along Church Street in Fen Ditton. The cottages follow the curve of Church Street and the housing along this street is sympathetic, continuing to line the road. The nearby listed buildings comprises the Grade II* listed Old Rectory opposite, -the Parish Church of St Mary the Virgin's (Grade II* listed) boundary wall and Church Street.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. The position of the cottages provides evidence of the historic and original settlement pattern which was predominantly linear. The housing along this street is sympathetic, continuing to line the road. The Grade II* listed Old Rectory opposite, -the Parish Church of St Mary the Virgin's (Grade II* listed) boundary wall and Church Street make a positive contribution to its setting.
HE02 2 9	1127433	16 Church Street	II	548297	260383	Post Medieval	Domestic	House	House	A 19th century painted gault brick house. This building comprises three bays and six 12-paned hung sash windows. The original entry door centred on the west façade has been replaced with a central ground floor window.	This asset's setting comprises the listed buildings along Church Street which contributes to its group value. This includes the Parish Church of St Mary the Virgin opposite and the listed wrought iron	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. It has group value with the other heritage assets in Fen Ditton.

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Туре	Current Use	Description	Setting Description	<u>Heritage</u> Value	Value Description
											gates of 4, -6 and 8 to the south.		
HE0230	1331301	Lode Cottage	II	548301	260936	Post Medieval	Domestic	Cottage Home	House	A pair of early 19th century timber-framed and plastered cottages. These cottages feature long straw and combed wheat thatch with three dormer windows and seven ground floor casement windows.	The setting of this asset comprises the north-western edge of Green End, -Fen Ditton. There is modern development in the area that is surrounded by trees and hedgerows.	High	It is of high heritage value due to its architectural and historic interest, derived from its use of traditional materials in a rural setting. Modern development has increased the density of the surrounding area and diminished its historic character ₇₂ . However, the mature trees and hedgerows in the vicinity of the asset retain the area's rural character to an extent. Overall, setting makes a positive contribution to the value of this asset.
HE0 2 4 <u>31</u>	1428633	Fen Ditton War Memorial	II	548305.5	260332	20th century	Commemorative	War memorial	War memorial	A Portland stone tapered obelisk on a plinth, -erected in 1921. The square monument comprises a stepped base with a painted inscription commemorating WWI and WWII. The obelisk is protected by four Portland stone posts linked by a metal chain.	The setting of this asset comprises Church Street and High Street and the listed buildings along these streets which contributes to its group value including the Parish Church of St Mary the Virgin located to the north—west and King's Head, to the north—east.	High	It is of high heritage value due to its architectural and historic interest, derived from its prominence within the village, and it has group value with the rest of the heritage assets in Fen Ditton.
HE0 <u>3</u> 2 5	1127432	Numbers 4, -6 and 8 and Four Original Wrought Iron Garden Gates	II	548310	260361	Post Medieval	Domestic	House	House	A row of six 19th century former almshouses, converted into three cottages during the 20th century. These one storey buildings are of gault brick with red brick	The asset's setting comprises the listed buildings along Church Street, which contributes to its group value.	High	This row of assets isare of high heritage value due to their architectural and historic interest, derived from their former use as almshouses. This

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Туре	Current Use	Description	Setting Description	<u>Heritage</u> Value	Value Description
										dressings and detail pantile roofs.			asset has group value with other heritage assets, emphasising the relationship with the Parish Church of St Mary the Virgin, opposite, -and the listed 16 Church Street, to the north.
HE0 26 33	1178378	King's Head Public House	II	548312	260349	Post Medieval	Recreational	Public House	Public House	A 17th century timber-framed and plastered public house. It has a corrugated iron hipped roof, -and three horizontal sliding sash windows on the first floor.	The asset directly abuts Fen Ditton's High Street, -making it a prominent building within the village. It is surrounded by other historic buildings, contributing to its historic, village character.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. Its setting also contributes to its value, -including its prominence within the village and its group value with the rest of the heritage assets in Fen Ditton, with which it has a strong relationship.
HE0 27 34	1157197	Wall to East of Number 16 (The Rectory)	II	548379	260305	Post Medieval	Gardens, -Parks and Urban Spaces	Garden Wall	Garden Wall	An 18th century red brick boundary wall to the Rectory with plinth and gault brick half round copings.	The asset directly abuts Fen Ditton's High Street, -making it a prominent building within the village. It is surrounded by other historic buildings, contributing to its historic, village character.	High	It is of high heritage value due to its architectural and historic interest, derived from its surviving historic form and fabric. Additionally, -its setting makes a positive contribution to its value, due to its continued relationship with other nearby heritage assets close by.

											its historic, village character.		remains a prominent building which positively contributes to its historic value.
HE0 29 36	1127398	The Rectory, -Fen Ditton	II	548431	260297	Post Medieval	Domestic	Clergy House	House	A late 17th century red and yellow local brick dwelling with 18th and 19th century alterations and a plain tiled roof. The L-plan features two storeys with attics and cellars.	The asset is located along Fen Ditton's High Street with other close by heritage assets.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and fabric, -and its setting on Fen Ditton's High Street where many historic assets still reside.
HE03 <mark>0</mark> 7	1157174	Wall to the West of Numbers 16, -20 and 22	II	548442	260282	Post Medieval	Gardens, -Parks and Urban Spaces	Garden Wall	Garden Wall	An 17th century local yellow and red brick boundary wall to the Rectory.	The asset has group value with The Rectory and forms part of a wall extending the length of the High Street.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and fabric. The asset's setting, -which is largely unaltered, makes a positive contribution to its value.
HE03 <u>4</u> <u>8</u>	1223654	K6 Kiosk	II	548448	260269	20th century	Gardens, -Parks and Urban Spaces	Telephone Box	Telephone Box	A K6 Telephone Kiosk, -designed in 1935 by Sir Giles Gilbert Scott. It consists of cast iron and is square in layout with a domed roof. There are decorated crowns to the top panels.	The asset is located along Fen Ditton's High Street with other close by heritage assets.	High	It is of high heritage value, derived from its historic interest as a 20th century feature of village life and association with Giles Gilbert Scott. It also has architectural interest as an iconic structure of the period. The setting of the asset allows for an understanding of it as a village telephone box.
HE03 2 9	1157152	The Ancient Shepherd	II	548503	260243	Post Medieval	Recreational	Public House	Public House	A late 18th century plastered timber-framed and painted brick public house with a tile hipped roof.	The asset is located along Fen Ditton's High Street with other close by heritage assets.	High	It is of high heritage value due to its architectural and historic interest, which is derived from its historic form and appearance. Additionally, -the asset's setting makes a positive contribution to its heritage value, -due

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Туре	Current Use	Description	Setting Description	<u>Heritage</u> Value	Value Description
													to the intervisibility between it and other heritage assets along Fen Ditton's High Street.
HE0 33 40	1127400	Poplar Hall		548518	261368	Post Medieval	Domestic	Agricultural Dwelling	House	A 17th century timber framed farmhouse with rough cast panels and a plain tiled roof. Its consists of a hall and crosswing plan with a central façade gable.	The asset is situated within a farmyard, -with barns and other ancillary buildings in its vicinity. The arable fields, which surround the farm, help to convey a strong agricultural character. The A14 is situated in an elevated position on an embankment to the north and a viaduct to the west. This segments the landscape and prevents long views from the asset to the north.	High	It is of high heritage value due to its architectural and historic interest, which is derived from its historic form and fabric, -and the continued use of the farmhouse. The arable fields, ancillary barns and other buildings in the vicinity of the Hall help to understand its agricultural function and heritage. This makes a positive contribution to the value of the asset. However, the asset is situated close to the A14, -which restricts its long views across the countryside to the north, negatively contributing to the value of the asset.
HE0341	1127396	6 High Ditch Road	II	548608	260199	Post_Medieval	Domestic	House	House	A 17th century timber framed cottage with a long straw thatched roof.	The asset's gable end faces on to High Ditch Road, with other dwellings from a range of phases in close proximity. The field adjacent to the asset to the west facilitates understanding of the asset as part of -a rural village.	High	It is of high heritage value due to its architectural and historic interest, which is derived from its historic form and built fabric. Additionally, -the asset's setting with other historic buildings located nearby positively contributes to the value of the asset, -as it allows for an understanding of the history of the area.

											associated with The Rookery.		understanding of the building's historic use. Its rural village setting contributes positively to this value. Modern housing contributes negatively towards its setting and the value of the asset.
HE0 6 7 <u>4</u>	1179631	Barn to South West of Number 2 (Orchard House)	II	549639	265205	Post Medieval	Agriculture and Subsistence	Agricultural Building	Barn	A 17th century timber-framed and weatherboarded barn with a thatched roof.	The asset is located along Chapel Close, adjacent to Waterbeach High Street, -giving it a strong rural village character. Its proximity to Orchard House contributes to the heritage value of the asset.	High	It is of high heritage value due to its architectural and historic interest, derived from it being an early historic barn and itswith surviving timber-framed and thatch construction. It retains its rural village setting—and has a historic relationship with Orchard House, which contributes positively to its heritage value.
HE0 68 75	1127365	Orchard House	II	549658.8	265219	Post Medieval	Domestic	House	House	A 17th century brick and timber framed cottage, -cased in 19th century gault brick. It is situated with its gable end facing the street.	The asset is located along Chapel Close, adjacent to Waterbeach High Street Its proximity to the adjacent listed barn and listed barn contributes to the heritage value of the asset.	High	It is of high heritage value due to its architectural and historic interest ₇ . This is derived from its historic use as a rural cottage and from its surviving brick construction. Its rural village setting contributes positively to its heritage value.
HE0 <u>7</u> 6 9	1179612	Barn to North West of the Hall	II	549712	265145	Post Medieval	Agriculture and Subsistence	Agricultural Building	Unknown	A late 15th or early 16th century barn or warehouse. It is composed of a-19th century gault bricks at ground floor level, -with timber weatherboarding above and a plain tile roof.	The asset is located off the junction of Station Road where there is a cluster of listed buildings to its south and east. There is an open area of land to the north—east of the asset.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. This allows for an understanding of the agricultural heritage of Waterbeach. The rural setting also

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Туре	Current Use	Description	Setting Description	Heritage Value	Value Description
													positively contributes to <u>understanding</u> its original agricultural use and value.
HE07 0 7	1127364	The Hall	II	549726.2	265143	Post Medieval	Domestic	Agricultural Dwelling	House	A former timber framed farmhouse in a hall and cross wing layout dating to the 17th century with 19th century alterations. It is set back from the road and largely obscured by a tall hedge.	The asset is located within a private garden screened by a large hedge opposite the Church of St John, Waterbeach. It is located on Station Road to the south of the village, -with a number of other historic buildings in the vicinity.	High	It is of high heritage value is-due to its architectural and historic interest, derived from its architectural design and surviving historic fabric. This allows for an understanding of the agricultural heritage of Waterbeach. The garden and orchard setting of the asset positively contributes to its heritage value.
HE07 <u>48</u>	1445133	Waterbeach War Memorial	II	549733.8	265114	20th century	Commemorative	War Memorial	War Memorial	A war memorial, comprising a limestone octagonal shaft topped with a cross.	The asset is located within the grounds of the Ggrade II* listed St John's Church and overlooks other listed buildings.	High	It is of high heritage value due to its historic interest as a monument of importance to the local community. The setting positively contributes to its value as a memorial to the lost lives of the WWI.
HE07 2 9	1179660	Box Tree Cottage	II	549775.9	265401	Post Medieval	Domestic	House	House	A late 18th century one storey and attic cottage with an adjoining timber barn. It is situated with its narrow gable end facing the street, with a prominent gault brick chimneystack located centrally on this elevation.	This asset is located along Way Lane where a mix of modern and historic buildings reside. There is a tall hedge and varied vegetation along the road.	High	It is of high heritage value due to its architectural and historic interest, derived from its surviving architectural form and character. The modern development along Way Lane has somewhat negatively impacted the setting of the asset, -though trees and hedges near the asset have limited intervisibility between the modern buildings and the heritage asset.

										ancillary estate buildings.			
HE071	1245573	Church of St George	#	546442	260611	Post Medieval	Religious, Ritual and Funerary	Church	Church	A Grade II listed church dating to 1937-8, composed of brown brick with stone dressings. The large tower is located in the north-west of the building, topped with a ogee copper roof and spirelet. The nave roof is steeply pitched with flat-roofed side aisles to either side.	The asset is located within an early 20th century development in Chesterton, to the northeast of Cambridge.	High	It is of high heritage value due to its architectural and historic interest as an example of a 20th century suburban church. The residential, suburban setting of the church reflects the 20th century growth of this area of Cambridge, therefore contributing to the ability to understand the age and cause of the church's development. and despite its large tower, has a limited visual presence within the surrounding area.
HE072	1302033	3-High Street	H	547578	262727	Post Medieval	Domestic	House	House	A 17th century timber-framed and plastered cottage with a plain tile roof. It features a decorative frieze just below the eaves.	The asset is located in the centre of Milton on the High Street, an area with a dense village character. The asset's front garden is presently densely vegetated, with large shrubs	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. It has group value with the other heritage assets in Milton. However, the character has been altered by

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Туре	Current Use	Description	Setting Description	<u>Heritage</u> Value	Value Description
											minimising its relationship with the surrounding streetscape.		extensive modern development in Milton, which has increased the density of the settlement and reduced the intervisibility between Milton's historic environment.
HE073	1331323	White Horse Public House	#	547679	262763	Post Medieval	Recreational	Public House	Public House	A 17th century two storey public house, encased in local brick during the 19th century and painted. The building comprises modern tiled roofing and is a four unit plan with a lobby entrance.	The asset is located in the centre of Milton on the High Street, an area with a busy, dense village character.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. It has group value with the other heritage assets in Milton. However, the character has been altered by extensive modern development in Milton, which has increased the density of the settlement and reduced the intervisibility between Milton's historic environment.
HE074	1127353	Lion and Lamb Public House	H	547700	262825	Post Medieval	Recreational	Public House	Public House	A 17th century public house, encased in local brick during the 19th century and painted. The building has an extended 19th	The asset is located in the centre of Milton on the High Street, an area with a busy, dense	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic

										century gable and is laid out in a L-plan.	village character.		fabric. The character has been altered by extensive modern development in Milton, which has increased the density of the settlement and reduced the intervisibility between any remaining historic assets.
HEO75	1428634	Milton War Memorial	#	547856.5	262838	20th century	Commemorative	War memorial	War memorial	A 20th century stone obelisk that is square in plan and is located upon a tapered plinth. The dates of the First World War and the names of sixteen local men who fell in the conflict are Inscribed on the plinth.	This asset is set back and surrounded by a landscaped area at the northern end of Coles Road. Another landscaped area is situated directly opposite Coles Road. The Jolly Brewers Public House is located east of the war memorial. Further south of Coles Road comprises modern houses and flats.	High	It is of high heritage value due to its architectural and historic interest, derived from its prominence within the village depicting the local war effort. Only the public house, east, holds a historic relationship to the heritage asset, with the modern development setting diminishing the value and setting of the memorial.
HEO76	1127352	32 Fen Road	#	548004	262668	Post Medieval	Domestic	House	House	A late 18th century painted brick house with a plain tile straight mansard roof with	This asset is situated on Fen Road, surrounded by predominantly late 20th	High	It is of high heritage value due to its architectural and historic interest, derived from its

										dormers to the street and pantiled gabled roof above.	century housing which limit the building's relationship with other built heritage assets in the vicinity.		historic form and surviving historic fabric. It has group value with the other heritage assets in Milton. Late 20thearly 21st century housing located along Fen Road has changed and negatively contributed to the setting of the asset which historically was largely rural.
HE077	1331322	Strangeways	#	548116.6	26262 4	Post Medieval	Domestic	Cottage Home	House	A 17th century timber-framed and plastered one-and-a-half storey cottage with a thatched roof and three dormers.	This asset is situated on Fen Road at the edge of Fen Ditton. It is surrounded by mature trees, interspersed with late 20th and early 21st century housing.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. It has group value with the other heritage assets in Milton. Late 20th early 21st century housing located along Fen Road has changed and negatively contributed to the setting of the asset which historically was largely rural.
HE078	1127391	Riverside Cottage	#	548174	260586	Medieval	Domestic	Cottage Home	House	An early 14th century timber- framed and plastered	This asset is surrounded by high hedgerows	High	It is of high heritage value due to its architectural and
										cottage with	and mature		historic interest,

										alterations dating to the 16th, 18th and 20th centuries. The cottage comprises a long straw thatch and plain tiled roof.	trees which line the River Cam west of the cottage. It is set back from the road with few other houses located nearby, contributing to its rural character.		derived from its historic form and surviving historic fabric. Set away from Green End, the formed relationship of the river has not been interrupted and the trees inhibit intervisibility with the few other historic buildings located nearby.
HE079	1157255	Garden and Boundary Wall to Ditton Hall	#	548198	260346	Post Medieval	Gardens, Parks and Urban Spaces	Garden Wall	Garden Wall	A 19th century stone with brick rubble boundary wall flanking the gardens of Ditton Hall.	The wall is located within the grounds of Ditton Hall, at the eastern end of the High Street.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. The wall has a limited presence within the village, overshadowed by mature trees. Its setting comprises the grounds of Ditton Hall which is contained by another outer boundary wall.
HE080	1127392	Grassey Cottage	#	548204	260753	Post Medieval	Domestic	Cottage Home	House	A 17th century timber-framed cottage with gault brickwork to the front (west) elevation and weatherboarding on the southern elevation. The	This asset is situated halfway along Green End which is lined with trees. South of the country lane is historic compared to	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. South of the country lane

										cottage also has a hipped corrugated iron roof and horizontal sliding sashed windows.	the modern housing located north. Greens End and Grassy Cottage are two historic assets located north.		displays little change, compared to the modern housing located north. This disrupts the historic relationship of Greens End and Grassy Cottage.
HE081	1127393	4 Green End	#	548259	260821	Post Medieval	Domestic	House	House	A rectangular 17th century timber-framed rough-cast rendered cottage with pantile roofing.	This asset is situated along Green End which is lined with trees. New residential development is situated close to the asset to the east and south, with mature vegetation also contributing to limited long views from the asset. Green End has a suburban character in this area due to the density of development in the vicinity.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. South of the country lane displays little change, compared to the modern housing located north. This disrupts the historic relationship of Greens End and the listed building.
HE082	1127390	20 and 22 Church Street	#	548270	260438	Post Medieval	Domestic	House	House	A 17th century timber-framed and plastered pair of cottages that follow the curve of the street. These	This asset is located along Church Street in Fen Ditton. The cottages follow curve of Church	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and

UID	NHLE	Name	Grade	Easting	Northing	Date	Class	Туре	Current Use	Description	Setting Description	Heritage Value	Value Description
										cottages have continuous jetties and detail slate and tile roofing.	Street and the housing along this street is sympathetic, continuing to line the road. The nearby listed buildings comprises the Grade II* listed Old Rectory opposite, the Parish Church of St Mary the Virgin's (Grade II* listed) boundary wall and Church Street.		surviving historic fabric. The position of the cottages provides evidence of the historic and original settlement pattern which was predominantly linear. The housing along this street is sympathetic, continuing to line the road. The Grade II* listed Old Rectory opposite, the Parish Church of St Mary the Virgin's (Grade II* listed) boundary wall and Church Street make a positive contribution to its setting.
HE083	1127433	16 Church Street	#	548297	260383	Post Medieval	Domestic	House	House	A 19th century painted gault brick house. This building comprises three bays and six 12-paned hung sash windows. The original entry door centred on the west façade has been replaced with a central ground floor window.	This asset's setting comprises the listed buildings along Church Street which contributes to its group value. This includes the Parish Church of St Mary the Virgin opposite and the listed	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. It has group value with the other heritage assets in Fen Ditton.

											wrought iron gates of 4, 6 and 8 to the south.		
HE084	1331301	Lode Cottage	#	548301	260936	Post Medieval	Domestic	Cottage Home	House	A pair of early 19th century timber-framed and plastered cottages. These cottages feature long straw and combed wheat thatch with three dormer windows and seven ground floor casement windows.	The setting of this asset comprises the north-western edge of Green End, Fen Ditton. There is modern development in the area surrounded by trees and hedgerows.	High	It is of high heritage value due to its architectural and historic interest, derived from its use of traditional materials in a rural setting. Modern development has increased the density of the surrounding area and diminished its historic character, however, the mature trees and hedgerows in the vicinity of the asset retain the area's rural character to an extent. Overall, setting makes a positive contribution to the value of this asset.
HE085	1428633	Fen Ditton War Memorial	#	548305.5	260332	20th century	Commemorative	War memorial	War memorial	A Portland stone tapered obelisk on a plinth, erected in 1921. The square monument comprises a stepped base with a painted inscription commemorating	The setting of this asset comprises Church Street and High Street and the listed buildings along these streets which contributes to	High	It is of high heritage value due to its architectural and historic interest, derived from its prominence within the village and has group value with the rest of the

										WWI and WWII. The obelisk is protected by four Portland stone posts linked by a metal chain.	its group value including Parish Church of St Mary the Virgin located to the north west and King's Head, north east.		heritage assets in Fen Ditton.
HE086	1127432	Numbers 4, 6 and 8 and Four Original Wrought Iron Garden Gates	#	548310	260361	Post Medieval	Domestic	House	House	A row of six 19th century former almshouses, converted into three cottages during the 20th century. These one storey buildings are of gault brick with red brick dressings and detail pantile roofs.	The asset's setting comprises the listed buildings along Church Street which contributes to its group value.	High	This row of assets is of high heritage value due to their architectural and historic interest, derived from their former use as almshouses. This asset has group value with other heritage assets emphasising the relationship with the Parish Church of St Mary the Virgin, opposite, and the listed 16 Church Street, north.
HE087	1178378	King's Head Public House	#	548312	260349	Post Medieval	Recreational	Public House	Public House	A 17th century timber-framed and plastered public house. It has a corrugated iron hipped roof, and three horizontal sliding sash windows on the first floor.	The asset directly abuts Fen Ditton's High Street, making it a prominent building within the village. It is surrounded by other historic buildings, contributing to its historic, village character.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. Its setting also contributes to its value, including its prominence within the village and its group value with the

													rest of the heritage assets in Fen Ditton, with which it has a strong relationship.
HE088	1157197	Wall to East of Number 16 (The Rectory)	#	548379	260305	Post Medieval	Gardens, Parks and Urban Spaces	Garden Wall	Garden Wall	An 18th century red brick boundary wall to the Rectory with plinth and gault brick half round copings.	The asset directly abuts Fen Ditton's High Street, making it a prominent building within the village. It is surrounded by other historic buildings, contributing to its historic, village character.	High	It is of high heritage value due to its architectural and historic interest, derived from its surviving historic form and fabric. Additionally, its setting makes a positive contribution to its value, due to its continued relationship with other heritage assets close by.
HE089	1127397	19 and 21 High Street	#	548413	260276	Postmedieval	Domestic	House	House	A semi-detached pair of early 19th century timber framed and plastered cottages. This asset comprises long straw thatched roofing with east and west red pantiled and painted brick gable lean tos.	The asset directly abuts Fen Ditton's High Street, making it a prominent building within the village. It is surrounded by other historic buildings, contributing to its historic, village character.	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and fabric, and its relationship with other heritage assets close by. The building is not dominated by its surroundings and remains a prominent building which positively contributes to its historic value.

1.1.2 The below, Table 1.2, provides a proportional description and assessment of heritage value for listed buildings within the ZTV study area. Baseline data has been collected from the National Heritage List for England and supplemented by asset and setting surveys (see EVT048 in Gazetteer of Events (Application document reference 5.4.13.7)). The methodology for collating this baseline information is provided in Sections 2.4 and 2.5 of the Historic Environment Baseline Report (Application document reference 5.4.13.1). The methodology for assessing heritage value is described in Section 2.7 of the same document.

1.2 Scheduled Monuments

1.2.1 The below, Table 1.3, provides a proportional description and assessment of heritage value for scheduled monuments within the 1km study area. Baseline data has been collected from the National Heritage List for England and supplemented by asset and setting surveys (see EVT048 in Gazetteer of Events (Application document reference 5.4.13.7)). The methodology for collating this baseline information is provided in Sections 2.4 and 2.5 of the Historic Environment Baseline Report Application document reference 5.4.13.1, the methodology for assessing heritage value is described in Section 2.7 of the same document. These assets are shown spatially on figure 5.3.13.9.

UID	NHLE Reference	Name	Date	Class	Туре	Description	Setting Description	<u>Heritage</u> Value	Value Description
HE001	1457437	Multi-phased settlement east of Milton	Bronze Age to Medieval	Monument <by form=""></by>	Settlement	Multi-phased settlement showing almost continuous occupation from the late Iron Age to 13th century.	The remains are set within fields at the eastern end of the village of Milton. This asset survives as buried archaeological remains, therefore setting does not contribute to value.	High	Heritage value is derived from the archaeological remains and their ability to inform on nationally important archaeological deposits, especially relating to the evolution of settled sites over time.
HE002	1006895	Horningsea kilns, site of	Roman	Industrial	Pottery kiln	Roman settlement and kilns. Evidence of Roman occupation has been recorded over an area of about 40 acres. Finds show that in addition to extensive potterymaking activity there was a domestic settlement of considerable size.	The archaeological remains are buried and therefore their setting does not contribute to their value.	High	Heritage value is derived from the archaeological remains and their ability to inform on Roman occupation of the fens and the industrial use of this area during the period.
HE003	1006930	Car Dyke	Roman	Water supply and drainage	Canal	Section of the Roman canal known as the Car Dyke. Date of the cutting shown to be as early as 1st century and its abandonment shown to have occurred in the latter half of the 2nd century.	The remains are set within the flat agricultural landscape extending south from the southern periphery of Waterbeach. The setting is contagined to the western banks of the Cam and fens extending north-west of this.	High	Heritage value is derived from the archaeological remains and their ability to inform on the construction, management and use of an inland waterway during the Roman period.
HE004	1006888	Waterbeach Abbey (site of)	Medieval	Religious ritual and funerary	Abbey	Substantial building excavated by Mary Craster. Above ground earthworks survive well, including evidence of a moat and trackway.	The remains are set within the flat agricultural landscape on the southern periphery of Waterbeach. They are separated from the roads by the church and its yard and overlook the Cam.	High	Heritage value is derived from the archaeological remains and their ability to inform on the religious history of the area and medieval occupation of the Fens. The asset's setting contributes to its rural

character, but does not aid understanding of the asset's heritage value. As such, setting is considered to make a neutral contribution to the asset's heritage value.

1.3 Conservation Areas

1.3.1 The below, Table 1.5, provides a proportional description and assessment of heritage value for conservation areas within the 1km study area. Baseline data has been collected from South Cambridgeshire District Council and Cambridge City Council and supplemented by asset and setting surveys (see EVT048 in Gazetteer of Events (Application document reference 5.4.13.7)). The methodology for collating this baseline information is provided in Sections 2.4 and 2.5 of the Historic Environment Baseline Report Application document reference 5.4.13.1, the methodology for assessing heritage value is described in Section 2.7 of the same document. These assets are shown spatially on 5.3.13.7.

Table 155: Conservation Areas within the 1km study area

UID	Name	Date	Class	Type	Summary Description	Setting Description	Heritage	Value Description
							Value	
НЕ095	Baits Bite Lock	Medieval, Post Medieval, modern	Transport	Lock	The Baits Bite Lock Conservation Area was designated on 8 November 1990. It incorporates an area running from the A14 in the south to the junction of Fen Road in the north, running along the tow path on the western side and including some fields adjacent to the river in the east. The Character Appraisal notes that Baits Bite Lock is the centrepiece of the conservation area, with the few	The setting of the conservation area is the surrounding flat, fenland landscape with scattered trees, the Cam as it extends north and south of the lock and the A14 which borders the conservation areas to the south. The river is	Moderate	Value is derived from the architectural interest of buildings like Biggin Abbey, located within the Conservation Aarea. The engineering of the lock itself provides historic interest, and archaeological interest is derived from medieval and Ppost—mMedieval agricultural remains.

UID	Name	Date	Class	Туре	Summary Description	Setting Description	<u>Heritage</u> Value	Value Description
					buildings surrounding it contributing to the character of the area. The lock is the focal point of views up and down the river in this area, with the trees lining the banks of the river guiding views towards it. Biggin Abbey is also included within the conservation area and is visible throughout most of it.	lined with dense vegetation in places, limiting long views of the surrounding countryside.		The surrounding landscape contributes to the rural character of the asset.
HE096	Fen Ditton	Early medieval, medieval, Post Medieval, modern	Domestic	Village	The Fen Ditton Conservation Area was designated on 2 March 1973 and extended on 24 September 1991. It incorporates an area from the A14 in the north, running along the River Cam to the west to Ditton Meadows in the south and along to the edge of the village on High Ditch Road in the east. It therefore includes not only the village, but also some of the surrounding countryside. The Conservation Area Character Appraisal recognises the village's rural character, and the number of historic buildings situated along the High Street. The village extends in a westward linear fashion from the Church at the east, with a number of historic farmhouses interspersed with more modern development. The village's close association with the River Cam to the west and the surrounding countryside are key elements of its value. Fen Ditton High Street is situated on top of the remains of Fleam Dyke. Medieval and modern agriculture and road works mean that the dyke is in very poor condition within Fen Ditton, and therefore this area of the Dyke is not a Scheduled Mmonument, unlike the stretch south-east of Fulbourn.	The agricultural semi-rural Fen edge landscape where it meets the edge of Cambridge forms the setting of the asset. It has a strong relationship with the River Cam in the west. To the north is the A14.	Moderate	Value is derived from the architectural interest of the buildings in the village centre, as well as the archaeological interest of ridge and furrow in surrounding fields and of Fleam Dyke. The agricultural, semi-rural Fen edge landscape makes a positive contribution to the value of the asset.
HE097	Horningsea	Medieval, Post Medieval, modern	Domestic	Village	Horningsea Conservation Area was designated on 17 May 1990. It incorporates the buildings situated either side of the High Street and their backlands and stretches to the River Cam in the west. It excludes an area of mid-20th century residential development to the east of the High Street on Priory Road and Abbots Way. The Conservation Area Character Appraisal states that the southern part of village is characterised by cottages and public houses, while the northern part features predominantly agricultural buildings in gault brick. The village has a linear character, with buildings predominantly situated along the High Street. A notable exception is the Church of St Peter, which is situated along St John's Lane to the west ₇ an historic road which led to hithes and wharves on the River Cam. The High Street is characterised by low-rise buildings, predominantly of two storeys, composed in brick or painted render. The glimpses of the surrounding countryside and of the River Cam that are offered throughout the village are a key element of the village's character.	The setting of the conservation area comprises the surrounding flat, fenland landscape with scattered trees, the Cam as it extends to the north, and the railway line.	Moderate	Value is derived from the buildings in the village centre, which provide architectural interest. Historic interest is derived from the historic street pattern of the village. The surrounding rural landscape makes a positive contribution to the asset's value.
HE098	Milton	Medieval, Post Medieval, modern	Domestic	Village	Milton Conservation Area was designated on 5 November 1981. The conservation area encompasses a small area in the north-east of Milton, notable for its mature tree cover and low-density of development. The Conservation Agrea is centred on All Saints Church and Milton Hall.	The setting of the conservation area is principally characterised by the sprawling 20th century suburban development to the west of the asset, and the flat, Fen landscape to the north and east.	Moderate	Value is derived from the historic buildings in the village centre, which provide architectural interest. The surrounding suburban development makes a negative contribution to the value of the asset.

UID	Name	Date	Class	Type	Summary Description	Setting Description	<u>Heritage</u> Value	Value Description
HE099	Waterbeach	Medieval, Post Medieval, modern	Domestic	Village	Waterbeach Conservation Area was designated on 2 March 1973 and amended on 4 April 1983. The conservation area is linear in form, running along from the High Street in the north southwards along Chapel Street and Station Road, also incorporating some of the side streets. The character of the Conservation Aarea is informed by the relatively low height of buildings, predominantly one and a half to two storeys. The buildings themselves are disparate in style, ranging from rendered timber frame cottages to large brick villas. They are typically situated close to the street, some with small front gardens. The areas of greenspace and mature trees along this linear route through the village also contribute to its character, the village green in the centre in particular. The conservation area is flanked on both sides by areas of modern development.	The setting of the conservation area is between 20th century development situated to the north, east and west of the asset. To the south, the asset's setting comprises the flat, fenland landscape with scattered trees.	Moderate	Value is derived from the buildings in the village centre, which provide architectural interest. The surrounding flat, Fenlandfen landscape makes a positive contribution to the value of the asset.

1.3.2 The below, Table 1.6, provides a proportional description and assessment of heritage value for conservation areas within the ZTV study area. Baseline data has been collected from South Cambridgeshire District Council and Cambridge City Council, supplemented by asset and setting surveys (see EVT048 in Gazetteer of Events (Application document reference 5.4.13.7)). The methodology for collating this baseline information is provided in Sections 2.4 and 2.5 of the Historic Environment Baseline Report Application document reference 5.4.13.1. The methodology for assessing heritage value is described in Section 2.7 of the same document.

1.4 Registered Parks and Gardens

1.4.1 The below, Table 1.7, provides a proportional description and assessment of heritage value for registered parks and gardens within the 1km study area. The nearest is Anglesey Abbey Registered Park and Garden (HE181), which is approximately 1.2km north-east of the Scheme Order Limits and is further described in paragraph 7.3.2 of the Historic Environment Baseline Report Application document reference 5.4.13.1. Baseline data has been collected from the National Heritage List for England and is supplemented by asset and setting surveys (see EVT048 in Gazetteer of Events (Application document reference 5.4.13.7)). The methodology for collating this baseline information is provided in Sections 2.4 and 2.5 of the Historic Environment Baseline Report Application document reference 5.4.13.1, the methodology for assessing heritage value is described in Section 2.7 of the same document.

1.5 Non-Designated Built Heritage Assets

1.5.1 The below, Table 1.8, provides a proportional description and assessment of heritage value for non-designated built heritage assets within the 500m study area. Baseline data has been collected from the Cambridgeshire Historic Environment Record (CHER), South Cambridgeshire District Council and Cambridge City Council, supplemented by asset and setting surveys (see EVT048 in Gazetteer of Events (Application document reference 5.4.13.7)). The methodology for collating this baseline information is provided in Sections 2.4 and 2.5 of the Historic Environment Baseline Report Application document reference 5.4.13.1. The methodology for assessing heritage value is described in Section 2.7 of the same document.

Project UID	3 rd Party Reference eCHER	d Built Heritage <i>i</i> Name	Easting		Date	Class	Туре	Current Use	Description	Setting	Heritage Value	Value Description
HE1074	MCB26894	Inn at Clayhyt y he	550160	264480	Post Medieval	Commercial	Public House	Public House	A 19th century Public House renamed as The Bridge.	The asset is located in Clayhithe, south-east of Waterbeach, just off Clayhithe Road. East of the asset is the River Cam with a bridge spanning the river to the south-east of the Public House.	Low	It is of medium heritage value due to its historic form and fabric. Its largely unchanged rural setting provides historical context for the asset as a 19th rural inn situated along the country road, and therefore, makes a positive contribution to its value.
HE1141	MCB26895	Clayhythe Farm, Horningsea	550130	264310	Post Medieval	Domestic	Dwelling	Dwelling	A 19th century farmhouse situated within Clayhythe Farm.	The asset is located off the northern part of Clayhithe Road, with the River Cam to the north-west of the asset. It is surrounded by open fields.	Low	It is of medium heritage value as a 19th century farmhouse, which provides architectural and historic interest. The asset's rural setting is largely unchanged, providing continuity in the historic relationship showing the agricultural practices and farms which still reside along Clayhythe Road. Its setting therefore makes a positive contribution to its value.

Project UID	3 rd Party Referenc eCHER	Name	Easting	Northin g	Date	Class	Туре	Current Use	Description	Setting	<u>Heritage</u> Value	Value Description
HE1186	MCB16404	Pillbox, Waterbeach sailing club	550300	264800	Modern	Defence	Pillbox (Type Fw3/24)	None	A World War II type 24 thick-walled shell proof pillbox is built from wood shuttering and is of irregular hexagon shape. The pillbox has five faces of equal length and a longer face along the side where the entrance is located.	The asset is located north of Clayhithe and to the west of the River Cam, within the grounds of the Cam Sailing Club. Open fields surround the setting of this asset.	Low	It is of medium heritage value due to its historic form and architectural interest as a defensive World War II structure. Its river setting makes a positive contribution to its value, as it allows for an understanding of its function.
HE1196	MCB23871	Toll House	550840	265760	Post Medieval	Domestic	Transport Worker's House	Dwelling	A 20th century toll house.	The asset is located on the eastern corner of Bannold Road to the east of Waterbeach. The River Cam is located to the south-east with Bottisham Lock to the south-west.	Low	It is of medium heritage value due to its architectural interest. The relationship between Bannold Road and the River Cam is still understood. This is important to the asset's original function which improved roads by controlling road access. Its setting therefore makes a positive contribution to its value.
HE130 3HE140 0	_	305-307 Milton Road	546413	260790	Modern	Domestic	Dwelling	Dwelling	A pair of early 20th century semi-detached dwellings.	This asset is located on Milton Road, a busy route in and out of Cambridge that is lined with similar semidetached dwellings.	Low	It is of medium heritage value as an early pair of semi-detached houses dating to the 1920s, which hold architectural and historic interest as part of the suburban expansion of Cambridge during this period. Its setting, surrounded by other similar suburban housing, makes a positive contribution to its value.
HE1 30 4 <u>01</u>	-	The Golden Hind	546643	261023	Modern	Commercial	Public House	Public House	An early 20th century public house.	This asset is prominently located on the corner of Milton Road, Kings Hedges Road and Green End Road. The wide road and the 20th century semi-detached housing in this area contribute to its 20th century suburban character.	Low	It is of medium heritage value as a 1930s public house, though it retains almost none of its original interior, which diminishes its architectural interest. Its suburban setting contributes to its value, as it allows for an understanding of the asset as a suburban public house.
HE1056	MCB20578	Plough Inn, Green End, Cambridge	548190	260630	Post Medieval	Commercial	Public House	Public House	A 19th century to late 20th century Public House.	This asset is located to the south of Green End, within a section that is lined with trees and hedgerows. The River Cam is located to the west of the public house. There are open fields to the east of the asset with a caravan park and parcels of fields, west.	Low	It is of medium heritage value due to its historic interest and current use as a rural public house. Though there is modern development surrounding the asset, trees and hedgerows have helped the asset retain a rural character. As such, the asset's setting makes a positive contribution to the value of the asset.
HE1173	MCB27451	Former school, Horningsea	549330	262440	Post Medieval	Education	School	Dwelling	A 19th century former school.	This asset is located along Horningsea High Street with a line of trees to the south.	Low	It is of medium heritage value due to its historic and architectural interest. Its historic function is still understood as it is located alongside the road where houses of the same period still reside, continuing the

Project UID	3 rd -Party Referenc eCHER	Name	Easting	Northin g	Date	Class	Туре	Current Use	Description	Setting	Heritage Value	Value Description
												historic relationship in Horningsea. As such, the asset's setting makes a positive contribution to the value of the asset.
HE1166	MCB16403	Pillbox, Waterbeach station yard	549900	264800	Modern	Defence	Pillbox (Type Fw3/22)	None	A type 22 pillbox featuring stepped loops. It is built from wood shuttering.	This asset is located in the south-eastern corner of a field south of Station Road in Waterbeach. A railway line is located to the south-east of the asset, and forms a key part of the asset's setting. Many open fields surround the asset.	Low	It is of medium heritage value due to its historic form and architectural interest as a defensive World War II structure. The asset's setting, close to the adjacent railway, makes a positive contribution to the value of the asset, as it allows for an understanding of the building's function.
HE1201	MCB27454	Baits Bite lock, Milton	548580	262040	Post Medieval	Transport	Canal Transport Site	Canal Lock	A 19th century lock along the River Cam.	This asset spans the River Cam and is located to the east of Milton and south- west of Horningsea. It has a strong rural character due to the lack of development in close proximity to the asset, and the dense vegetation which prevents long views from the asset to the east or west. There are relatively long views both to the north and south along the River Cam.	Medium	It is of medium heritage value due to its historic form as a river feature from the 19th century that is still in use today. Its river setting makes a positive contribution to the value of the asset, as it aids in understanding its function.
HE1221	MCB15214	Pillbox, River Cam, Milton	549444	263799	Modern	Defence	Pillbox (Type Fw3/24)	None	A World War II pillbox. Shell proof and hexagonal in shape.	This asset is located along the western bank of the River Cam, surrounded by rural fields.	Low	It is of medium heritage value due to its historic form and architectural interest as a defensive World War II structure. The asset's setting makes a positive contribution to the value of the asset, as it allows for an understanding of the building's function.
HE1231	MCB27487	17-19 Burgess Road, Waterbeach	549980	265330	Post Medieval	Domestic	Domestic	Dwelling	An 18th-19th century house.	This asset is located on Burgess Road, surrounded by modern residential development.	Low	It is of medium heritage value due to its historic and architectural interest as a Ppost—mMedieval house. The asset's modern setting makes a negative contribution to its value, as it prevents understanding of its original historic context surrounded by farmland.
HE1 23 4 <u>0</u> 2	-	24 Green End	548334	260949	Post Medieval	Domestic	Domestic	Dwelling	A 19th century dwelling.	This asset is located on the edge of Fen Ditton, surrounded by a range of historic and modern dwellings. Its setting has a strong rural village character due to the low density of buildings, and open views westwards towards the River Cam.	Low	It is of medium heritage value due to its historic and architectural interest as a Post—mMedieval house. The asset's setting on the edge of Fen Ditton, with low density development and open views to the west, contributes to the ability to understand it as a typical domestic village building, and therefore makes a positive contribution to its value.
HE1 23 4 <u>0</u> 3	-	Osier Cottage	548291	260917	Modern	Domestic	Domestic	Dwelling	A mid-twentieth century dwelling	This asset is located on the edge of Fen Ditton,	Low	It is of low heritage value as it features traditional design and proportions but

Project UID	3 rd -Party Referenc eCHER	Name	Easting	Northin g	Date	Class	Туре	Current Use	Description	Setting	Heritage Value	Value Description
										surrounded by a range of historic and modern dwellings. The low density of dwellings and extent of vegetation in the vicinity contributes to the rural character of the area.		dates to the mid-20th century and as such has limited historic interest. Its rural village setting, surrounded by vegetation, makes a positive contribution to the value of the asset.
HE1 23 4 <u>0</u> 4	-	Red House Close	548381	261287	Post Medieval	Domestic	Agricultur al Dwelling	House	A 19th century farmhouse.	The asset is surrounded by arable fields close to the River Cam, -which helps to convey a strong agricultural and rural character. The A14 is situated on an embankment to the north and a viaduct to the west, giving it an elevated position in the landscape. This segments the landscape and prevents long views from the asset to the north.	Low	It is of low heritage value as a late 19th century farmhouse which has architectural interest as a landmark within the rural landscape north of Fen Ditton. Its rural setting makes a positive contribution to the value of the asset.
HE1 23 4 <u>0</u> 5	-	48 Cowley Road	547296	261906	Post Medieval	Domestic	Waterwor ks Cottage	Office	A pair of late 19th century semi- detached dwellings associated with the historic Sewage Farm on this site.	This asset is located set back from Cowley Road in close proximity to the existing Cambridge Waste Water Treatment Plant, which aids an understanding of the history of the asset. Its setting includes the movement of large vehicles.	Low	It is of low heritage value as a late 19th century dwelling associated with the Cambridge Sewage Farm, and more recently the Waste Water Treatment Plant, which contributes to its historic interest.
HE1 23 4 06	-	20 Cowley Road	547188	261702	Post Medieval	Domestic	Waterwor ks Cottage	Office	A late 19th century dwelling associated with the historic Sewage Farm on this site.	This asset is located set back from Cowley Road in close proximity to the existing Cambridge Waste Water Treatment Plant, which aids an understanding of the history of the asset. Its setting includes the movement of large vehicles.	Low	It is of low heritage value as a late 19th century dwelling associated with the Cambridge Sewage Farm, and more recently the Waste Water Treatment Plant, which contributes to its historic interest.
HE1 23 4 <u>0</u> 7	-	Lock Keeper's Cottage, Baits Bite Lock	548588	262065	Post Medieval	Domestic	Lock Keeper's Cottage	Unknown	The C19 lock keeper's cottage is a small single storey gault brick property with a slate roof and small chimneystack. It is raised up above ground level on a plinth, with steps up to the front door.	The asset is located close to Baits Bite Lock and the River Cam. It has a strong rural character due to the lack of development in close proximity to the asset, and the dense vegetation which prevents long views from the asset to the east or west. There are relatively long views both to the north and south along the River Cam.	Low	It is of medium heritage value as a 19th century dwelling associated with the historically manually operated Baits Bite Lock, which contributes to its historic interest. It also has architectural interest, derived from its raised position, which reflects its proximity to the river. Its setting makes a positive contribution to its value, as it aids understanding of the building's former purpose.
HE1 23 4 08	-	Sergeant Yard.	549342	262546	Post Medieval	Domestic	Cottage Home	Cottage Home	A row of C18 brick cottages with mansard roofs and a	This asset is located north of Horningsea High Street alongside other historic	Low	It is of medium heritage value due to its architectural and historic interest _{7.}

Project UID	3 rd Party Referenc eCHER	Name	Easting	Northin g	Date	Class	Туре	Current Use	Description	Setting	Heritage Value	Value Description
									carriage arch through to the rear.	buildings. There is a landscaped green public area to the south.		which This is derived from its surviving historic form and fabric as a row of cottages, which allow for an appreciation of the village's rural origins. Its village setting contributes positively to its historic and architectural interest.

1.6 Non-Designated Archaeology

1.6.1 The below, Table 1.8, provides a proportional description and assessment of heritage value for non-designated archaeological assets within the 500m study area. Baseline data has been collected from the Cambridgeshire Historic Environment Record (CHER), supplemented by archaeological walkover and geophysical surveys and evaluation (see EVT048 in Gazetteer of Events (Application document reference 5.4.13.7)). The methodology for collating this baseline information is provided in Sections 2.4 and 2.5 of the Historic Environment Baseline Report Application document reference 5.4.13.1. The methodology for assessing heritage value is described in Section 2.7 of the same document.

Table 1- <u>.9</u>	9: Non-Designa	ated Archaeology	within the 500	m study area
UID	CHER	Name	Easting	Northing

UID	CHER	Name	Easting	Northing	Date	Class	Туре	Description	Setting Description	Value	Value Description
HE100 1	MCB2830 3	Site of former tramway, Horningsea	54998 0	262630	Post Medieva I	Transport	Tramway	The route of a post-medieval tramway as identified on historic aerial photographs. Evaluation revealed no remains within the route of the Waterbeach pipeline.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on transport constructed to support the extractive industries in the fens.
HE100 3	11557	Roman pottery and cropmarks, Horningsea	54887 0	261860	Roman	Domestic	House	A probable farmstead, identified from cropmarks visible on historic aerial photography. Dated by form.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the archaeological interest and the ability to inform on the early agricultural exploitation of the fen edge by isolated Roman farmsteads.
HE100 5	05615	Earthwork remains Ridge and furrow, N and NW of Horningsea village	54940 0	262900	Medieva I	Monument 	Earthwor k	Medieval ridge and furrow remains, identified as earthworks in 1972 and visible on LiDAR but since ploughed out and not easily visible at ground level.	The remains are set within the agricultural fields north of Horningsea, in the flat, agricultural fenland landscape.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE100 6	11555	Roman cropmark system, Horningsea	54915 0	261090	Roman	Monument <by form=""></by>	Earthwor k	Cropmarks of a possible Roman farmstead were observed on historic aerial photos. Investigation has confirmed that any remains were removed by a borrow pit for the construction of the A14.	As the remains have been removed, they are not considered to have a setting.	Negligi ble	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.

UID	CHER	Name	Easting	Northing	Date	Class	Туре	Description	Setting Description	Value	Value Description
HE100 9	MCB1752 7	WWII vehicle depot, Trinity Farm, Milton	54653 0	261930	Modern	Defence	Military Transport Site	The former extent of a second world war tank storage and servicing depot. The former extent is no longer apparent, and the southern half has been redeveloped.	The archaeological remains are buried and, therefore, setting does not contribute to their value.	Negligi ble	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE101 6	MCB1215 0	High Dyke/ northern section of Fleam Dyke	54950 0	259800	Early Medieva I	Monument form>	Linear earthwor k	A linear bank and ditch monument, believed to be early medieval and defensive. Within the study area a road now follows this route, and the earthworks are shallow.	The setting of the asset comprises High Ditch Road and the farmland south of the A14.	Moder ate	Heritage value is derived from the archaeological interest and the ability to inform on early medieval use of the area, about which very little is known.
HE101 7	MCB2158 3	Former tramway, Milton parish	54790 0	260900	Post Medieva I	Transport	Tramway	The route of a post-medieval tramway was record perpendicular to Fen Road on historic mapping, this area has now been redeveloped.	The archaeological remains are buried or removed and therefore setting does not contribute to their value.	Negligi ble	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE101 8	MCB1916 2	Possible Roman kiln flue or gully, Horningsea	54964 0	263590	Roman	Industrial	Kiln	A possible flue, kiln and gully were identified through geophysical survey. A limited excavation identified Roman coins and pottery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the ability to inform on the archaeology of pottery production during the Roman period alongside the larger industry in the area.
HE102 0	05470	Ridge and furrow, Abbots Ditch Field, Fen Ditton	54930 0	260400	Post Medieva I	Agriculture and Subsistenc e	Ridge and furrow	Ridge and furrow was identified between surviving furlongs in this field during survey in 1972. The field is ploughed and earthworks are not visible.	The archaeological remains are buried <u>or levelled</u> and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE102 1	MCB2749 4	Searchlight battery, Cowley Road, Cambridge	54704 0	261140	Modern	Defence	Searchlig ht battery	The site of a second world war searchlight battery, no DXO 7427; now redeveloped into an industrial estate.	The archaeological remains are buried or removed and therefore setting does not contribute to their value.	Negligi ble	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE102 3	08327	Cropmark site, Fen Ditton	54860 0	261600	Post Medieva I	Industrial	Extractive Pit	A likely coprolite mine, identified from cropmarks and soil marks on historic aerial photography. Its presence was confirmed by archaeological evaluation.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the postmedieval period.
HE102 4	MCB2832 0	Coprolite workings, Horningsea	55029 0	262940	Post Medieva I	Industrial	Extractive Pit	Coprolite workings east of Clayhithe Road were identified from aerial photographs in 2007.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries

UID	CHER	Name	Easting	Northing	Date	Class	Туре	Description	Setting Description	Value	Value Description
											in the fens during the post- medieval period.
HE102 5	05308	Roman pottery and ditches, Milton	54800 0	261900	Roman	Monument <by form=""></by>	Earthwor k	Several ditches, dated to the Roman period by associated pottery, which were identified within Milton Country Park in the 1950s.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the archaeological interest and the ability to inform on the early agricultural exploitation of the fen edge by isolated Roman farmsteads.
HE102 6	05613	Ridge and furrow, E of Horningsea Village	54970 0	262300	Medieva I, Post Medieva I	Agriculture and Subsistenc e	Ridge and furrow	Medieval or post-medieval ridge and furrow as well as coprolite workings, which were identified as cropmark west of Horningsea in the 20th century.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from archaeological remains and the ability to inform on the widescale draining of the fens and its transformation to a predominantly agricultural landscape, as well as postmedieval extractive industries.
HE102 7	MCB1967 1	Possible Roman kiln at Cambridge Plants Nursery	54967 0	263570	Roman	Industrial	Kiln	A kiln and shelf of fired clay, identified through geophysical survey and trial trenching. Dated through the present of Horningsea wares and metal finds.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the ability to inform on the archaeology of pottery production of Horningsea Wares, including possible drying or storage associated with the fired clay shelf.
HE102 9	05407	Wharves, St. John's Lane and Dock Lane, Horningsea	54921 0	262770	Post Medieva I	Maritime	Wharf	Two, largely infilled, wharves at the end of Dock Lane and St John's Lane where Horningsea meets the Cam.	setting primarily relates to the River Cam, the topography and vegetation around the River otherwise encloses the wharves. Horningsea is to the east, but few buildings are visible.	Low	Heritage value is derived from archaeological remains and the ability to inform on the exploitation of the Cam by fenland villages, including how this has changed over time.
HE103 0	05442	Roman settlement site, Horningsea	54880 0	261900	Roman	Monument <by form=""></by>	Farmstea d	A probable Roman farmstead lying on low gravel, visible as cropmarks on historic aerial photography.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the archaeological interest and the ability to inform on the early agricultural exploitation of the fen edge by isolated Roman farmsteads.
HE103 2	MCB2535 4	Public air raid shelters, Fen Ditton	54870 0	260670	Modern	Defence	Air raid shelter	The site of public air raid shelters on Horningsea Road, Fen Ditton.	The archaeological remains are buried <u>or removed</u> and, therefore, setting does not contribute to their value.	Negligi ble	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE103 4	05555	Medieval moat, Eye Hall Farm, Horningsea	54985 0	263600	Medieva I, Post Medieva I	Transport	Trackway	An area of trackways, building platforms and boundary ditches of medieval/post-medieval date, which waswere visible on	The surviving earthworks are set in the park and gardens of Eye Hall, in an area which also contains earthworks	Moder ate	Heritage value is derived from archaeological remains and the ability to inform on medieval settlement and associated

UID	CHER	Name	Easting	Northing	Date	Class	Туре	Description	Setting Description	Value	Value Description
								historic aerial photographs as earthworks.	ferom roman industrial activity.		activity, especially of a deserted settlement which that has not continued into the present, and associated activity.
HE103 6	05402	Roman settlement, Horningsea	54965 0	262140	Roman	Monument <by form=""></by>	Earthwor k	Some possible FRoman cropmarks and earthworks were identified in this location in 1972, hHowever, later evaluation has not been able to identify any roman features.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on roman occupation of the fens _{7.} <u>h</u> However, this is limited by their poor survival.
HE104 1	CB15076	Spigot mortar base, Waterbeac h	55010 0	264200	Modern	Defence	Anti-tank gunnery range	Two mortar bases for with standard spigot (anti-tank gun) thimbles mounted in the top.	The mortar bases are located on the Ttow Ppath of the River Cam (location incorrectly recorded in HER). This setting provides context to their defensive use against river invasion.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the history of the defence of the Fens during the Second World War.
HE104 4	11202B	Linear earthworks , A45 fieldwalkin g survey field 15, Stow cum Quy	55090 0	260000	Post Medieva I	Monument 	Linear earthwor k	Three linear earthworks, which appear to relate to the ploughing of the field in the post-medieval period.	The earthworks lie in a heavily ploughed agricultural field.	Low	Heritage value is derived from the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE104 6	06303	Anglo- Saxon inhumation , Fleam Dyke at junction of Fen Ditton and Newmarke t Roads	55057 0	259480	Early Medieva I	Religious ritual and funerary	Burial	An early medieval group of burials with grave goods were excavated from the junction between High Ditch Road and the A1303 Newmarket Road in the mid-20th century.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligi ble	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE104 7	MCB2157 5	Pumping windmill, Waterbeac h	55000 0	264800	Post Medieva I	Industrial	Windmill	The site of a post-medieval pumping windmill, now lying underneath the car park for Waterbeach Station.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligi ble	The remains have been buried or removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE104 9	MCB2745 2	Former kiln, Horningsea	54902 0	262270	Post Medieva I	Industrial	Brickwork s	The site of a post-medieval brickworks, which is shown on historic mapping.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries

UID	CHER	Name	Easting	Northing	Date	Class	Туре	Description	Setting Description	Value	Value Description
											in the fens during the post- medieval period.
HE105 0	05310	Windmill Hill, Fen Ditton	54880 0	260900	Post Medieva I	Industrial	Windmill mound	The remains of a windmill mound, aAlthough the earthworks have been ploughed out, evaluation identified a surviving circular feature.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE105 3	MCB2467 6	Benet Farm, Milton	54738 0	262270	Post Medieva I	Agriculture and Subsistenc e	Farm	The site of a post-medieval farm, in an area which has now been developed into housing on the outskirts of Milton.	The archaeological remains are buried <u>or removed</u> and therefore setting does not contribute to their value.	Negligi ble	The remains have been <u>buried</u> or removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE105 4	05305	Possible site of medieval wharf, Fen Ditton	54817 0	260600	Medieva 	Maritime	Wharf	A rectangular open area of land which has been identified as a possible former wharf.	The asset is set on the banks of the Cam in an area of common land.	Low	Heritage value is derived from archaeological remains and the ability to inform on the exploitation of the Cam by fenland villages, including how this has changed over time.
HE105 5	MCB2745 5	Former clay pit, Fen Ditton	54862 0	261470	Post Medieva I	Industrial	Clay pit	The site of a former claypit, now underneath the B1047 junction of the A14.	The archaeological remains are buried <u>or removed</u> and, therefore, setting does not contribute to their value.	Negligi ble	The remains have been <u>buried</u> or removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE105 8	MCB2535 7	Public air raid shelters, Fen Ditton	54828 0	260880	Modern	Defence	Air raid shelter	The site of public air raid shelters on Green End, Fen Ditton.	The archaeological remains are buried or removed and therefore setting does not contribute to their value.	Negligi ble	The remains have been <u>buried</u> or removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE106 2	MCB2748 5	Destroyed pillbox, N of Milton	54938 0	263470	Modern	Defence	Pillbox	The site of a type 24 concrete pillbox, all above ground remains are destroyed.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is due to the evidence provided by the archaeological remains of the pillbox. The asset has been demolished and there is limited potential for below ground archaeological remains to survive.
HE106 4	MCB2157 8	Waterbeac h railway station	55000 0	264900	Post Medieva I	Transport	Railway station	The original Waterbeach railway station is first shown on historic mapping from 1885 ₇₂ . aA modern station is now present at the location.	The archaeological remains are buried or removed and therefore setting does not contribute to their value.	Negligi ble	The remains have been buried or removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.

UID	CHER	Name	Easting	Northing	Date	Class	Туре	Description	Setting Description	Value	Value Description
HE106 6	MCB2520 8	ARP Wardens Siren, King's Hedges Road, Cambridge	54660 0	261000	Modern	Defence	Air raid warning siren	The site of an air raid warning siren, which is no longer present.	The archaeological remains are buried <u>or removed</u> and therefore setting does not contribute to their value.	Negligi ble	The remains have been buried or removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE107 0	05554	Medieval settlement S of Eye Hall, Horningsea	54980 0	263600	Medieva I	Domestic	Deserted settlemen t	A possible deserted village, indicated by a series of earthworks around eye hall. The remains were excavated in the early 20th century. LiDAR has identified trackways and building platforms.	The surviving earthworks are set in the park and gardens of Eye Hall, in an area whichthat also contains earthworks from industrial activity.	Moder ate	Heritage value is derived from archaeological remains and the ability to inform on medieval settlement, especially deserted settlement which has not continued into the present, and associated activity.
HE107 1	MCB2157 6	Sluice, Waterbeac h	55020 0	264700	Post Medieva I	Water supply and drainage	Sluice	A sluice is shown here on 1st edition -Ordnance Survey mapping. The river-bank has since been remodelled to create a dock for the sailing club.	Any surviving archaeological remains are buried or removed and therefore do not have a setting.	Negligi ble	The remains have been <u>buried</u> or removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE107 3	MCB2345 4	Roman and undated features, Bannold Road, Waterbeac h	55019 0	265980	Roman, Undated	Monument <by form=""></by>	Ditch	A series of Roman and undated pits, ditches and trackways identified by geophysical survey and excavation. Levelled ridge and furrow was also identified.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from archaeological remains and the ability to inform on Roman occupation of the fens.
HE107 6	MCB1989 4	Iron Age features at Greenhous e Farm, Fen Ditton	54921 0	259830	Prehisto ric	Monument <by form=""></by>	Ditch	A series of ditches and post holes, dated by associated pottery and lithics. Several postholes indicate a possible structure and ditches show a field system.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the archaeological interest and the ability to inform on the prehistoric occupation of the fen edge.
HE107 8	MCB1640 5	Pillbox, Waterbeac h rail crossing	55040 0	265800	Modern	Defence	Pillbox	The site of a hexagonal pillbox, likely type 24, was formerly located at the rail crossing but has since been destroyed.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligi ble	Heritage value is due to the evidence provided by the archaeological remains of the pillbox. The asset has been demolished and there is limited potential for below ground archaeological remains to survive.
HE108 3	00326a	Saxon minster, Saint Peter's	54928 0	262640	Early Medieva I	Religious ritual and funerary	Monaster y	The possible site of a 9th and 10th century minister (monastery) at the location of the present parish church. No	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the religious history of the area

UID	CHER	Name	Easting	Northing	Date	Class	Туре	Description	Setting Description	Value	Value Description
		Church, Horningsea						remains are known but may survive buried.			prior to being overtaken by the Bishops of Ely.
HE108 4	10515	Mounds, Fen Ditton	54840 0	261400	Post Medieva I	Industrial	Spoil Heap	A series of low, conjoined mounds which are believed to be spoil heaps from coprolite digging.	The remains are set within the farmyard and gardens of Poplar Hall Farm, surrounded by agricultural fields on the eastern bank of the Cam.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post- medieval period.
HE108 6	MCB2056 2	Extractive Pit, Off Green End	54826 0	260760	Post Medieva I	Industrial	Extractive Pit	The site of a coprolite pit, identified on historic maps and as cropmarks on aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the postmedieval period.
HE108 7	05471	Ridge and furrow, High Ditch Field, Fen Ditton	55010 0	259700	Medieva I	Agriculture and Subsistenc e	Ridge and furrow	Poorly surviving remains of medieval ridge and furrow.	The remains are set in an agricultural field between High Ditch Road and the A14.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE108 8	05551	Roman pottery and Post Medieval features, Eye Hall, Horningsea	54984 0	263470	Roman, Post Medieva I	Agriculture and Subsistenc e	Ridge and furrow	A likely post-medieval mound and ditch, which may relate to extraction. Roman pottery was found nearby. The site was excavated in 1900.	The surviving earthworks are set in the park and gardens of Eye Hall, in an area which also contains earthworks from medieval occupation.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post- medieval period.
HE109 0	05459	Roman pottery manufactur ing site, Horningsea	54900 0	262000	Roman	Industrial	Spoil Heap	The site of a waste heap of pottery and associated finds, dated to the Roman period in 1885 but which may actually relate to the adjacent postmedieval pottery works.	The remains are set in an agricultural field between High Ditch Road and the A14.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post- medieval period.
HE109 1	05741	Roman pottery kiln, Horningsea	54945 0	263250	Roman	Industrial	Pottery Kiln	A distinct soil mark identified as a probable FRoman kiln.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the ability to inform on the archaeology of pottery production of Horningsea Wares, especially the scale and extent of this production.
HE109 2	11206	Mound, Fen Ditton	54840 0	261400	Post Medieva I	Industrial	Spoil Heap	A large spoil heap, associated with HE1084, likely from extraction.	The remains are set within the farmyard and gardens of Poplar Hall Farm, surrounded by agricultural fields on the eastern bank of the Cam.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post- medieval period.

UID	CHER	Name	Easting	Northing	Date	Class	Туре	Description	Setting Description	Value	Value Description
HE109 3	MCB2031 8	Cropmarks before Cambridge Science Park, Milton	54652 0	261540	Undated	Monument <by form=""></by>	Ditch	The site of linear cropmarks, identified from historic aerial photographs, now part of the Cambridge Science Park development.	The archaeological remains are buried or removed and therefore setting does not contribute to their value.	Negligi ble	The remains have been buried or removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE109 4	MCB1991 6	Medieval ditches at Eye Hall Farm, Horningsea	54993 0	263640	Medieva I	Monument 	Ditch	A series of medieval and post- medieval ditches identified through archaeological evaluation at Eye Hall.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from archaeological remains and the ability to inform on medieval settlement and associated activity, especially deserted settlement whichthat has not continued into the present, and associated activity.
HE109 9	MCB1590 7	Prehistoric to postmedie val remains, Nuffield Road	54725 1	260821	Prehisto ric, Medieva I, -Post Medieva I	Monument <by form=""></by>	Pit	The site of a pit, dated to the late prehistoric or FRoman period by associated finds. The area has now been developed into a housing estate.	The archaeological remains are buried <u>or removed</u> and therefore setting does not contribute to their value.	Negligi ble	The remains have been <u>buried</u> or removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE110 0	07818	Roman kiln, Horningsea	54981 0	263450	Roman	Industrial	Pottery Kiln	A possible FRoman kiln, excavated alongside the nearby scheduled monument in 1911 but not included within the scheduled area.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the ability to inform on the archaeology of pottery production of Horningsea Wares, especially the scale and extent of this production.
HE110 2	MCB1591 6	Post Medieval boundary ditch, St John's Innovation Park, Cambridge	54720 6	261975	Post Medieva I	Monument <by form=""></by>	Boundary Ditch	The site of a possible post- medieval boundary ditch and post hole, identified -through evaluation, now within an industrial development.	The archaeological remains are buried <u>or removed</u> and therefore setting does not contribute to their value.	Negligi ble	The remains have been buried or removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE110 5	05281	Roman settlement, Milton	54791 0	261720	Roman	Religious ritual and funerary	Cemetery	A series of Roman burials and other finds identified during the 1901-3 construction of the original Cambridge Corporation Sewerage Beds, now in the route of the A14.	The archaeological remains are buried or removed and therefore setting does not contribute to their value.	Negligi ble	The remains have been buried or removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE111 3	09037	Enclosures, Fen Ditton	55050 0	259500	Undated	Monument <by form=""></by>	Curvilinea r Enclosure	Cropmarks visible on historic aerial photography which appear to indicate some curvilinear and rectilinear enclosures.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from archaeological remains and the ability to inform on historic agricultural practices.

UID	CHER	Name	Easting	Northing	Date	Class	Туре	Description	Setting Description	Value	Value Description
HE111 4	MCB1855 8	Coprolite survey hole, near Horningsea	55007 0	262160	Post Medieva I	Industrial	Extractive Pit	A 3 ft wide, 5 ft deep hole, likely dug by coprolite surveyors. Reopened in 2009 after rainfall but subsequently backfilled.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the postmedieval period.
HE111 7	MCB2745 3	Former clay pit, Horningsea	54908 0	262160	Post Medieva I	Industrial	Clay Mine	The site of a post-medieval brickworks, which has been identified from historic aerial photography and mapping. The clay pits survive as a ponds.	The remains are set within agricultural fields on the east bank of the Cam, south of Horningsea.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the postmedieval period.
HE112 1	05535	Medieval settlement remains, Fen Ditton	54829 0	260780	Medieva I	Monument <by form=""></by>	House Platform	Two housing platform cropmarks within an area which has been levelled to form a cricket field.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from archaeological remains and the ability to inform on medieval settlement and associated activity, especially deserted settlement which has not continued into the present, and associated activity.
HE112 2	MCB2745 6	Former coprolite pit, Horningsea	54845 0	261050	Post Medieva I	Industrial	Extractive Pit	A post-medieval rectangular pit, likely from former coprolite extraction, which survives as an overgrown area of vegetation.	The remains are set within agricultural fields north of Fen Ditton.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the postmedieval period.
HE112 4	05440	Roman remains, Horningsea	54880 0	261900	Roman	Agriculture and Subsistenc e	Enclosure	An area of Roman remains comprising an enclosure and severval ditches, dated by associated pottery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the archaeological interest and the ability to inform on the Roman settlement of the fen edge.
HE112 6	05468	Cultivation remains, Fen Ditton	54950 0	260000	Post Medieva I	Monument <by form=""></by>	Field Boundary	Cultivation remains and field boundaries relating to the 1807 enclosure of Fen Ditton.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE112 7	06449	Roman rectangular settlement enclosure, Fen Ditton	55035 0	260080	Roman	Agriculture and Subsistenc e	Rectangul ar Enclosure	A series of cropmarks identified on historic aerial photography, comprising a rectangular enclosure and linear ditches. Dated by its form.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the archaeological interest and the ability to inform on the early agricultural exploitation of the fen edge by isolated Roman farmsteads.
HE113 0	MCB1591 8	Ridge and Furrow and Post	54720 6	261083	Post Medieva I	Agriculture and	Ridge and furrow	An area of former ridge and furrow and field boundaries, now an industrial estate.	The archaeological remains are buried and therefore	Negligi ble	The remains have been removed by later construction and therefore hold no

UID	CHER	Name	Easting	Northing	Date	Class	Туре	Description	Setting Description	Value	Value Description
		Medieval features, Cowley Park				Subsistenc e			setting does not contribute to their value.		archaeological value, as they cannot inform on past human practices.
HE113 1	MCB2420 4	Undated ditch, St John's Innovation Park Cambridge	54702 0	261690	Undated	Monument <by form=""></by>	Ditch	The site of an undated ditch identified during evaluation, now part of an industrial park.	The archaeological remains are buried or removed and therefore setting does not contribute to their value.	Negligi ble	The remains have been <u>buried</u> or removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE113 5	5611	Ridge and furrow, Horningsea	54950 0	260900	Medieva I	Agriculture and Subsistenc e	Ridge and furrow	The remains of likely medieval ridge and furrow cultivation marks. The field has been heavily ploughed and any above-ground remains are difficult to distinguish.	The remains are set on a slight hill within a large field in the broader agricultural landscape of the Fen edge.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE113 7	8141	Clayhithe deserted settlement, Horningsea	55030 0	264400	Medieva I	Domestic	Deserted Settlemen t	A settlement here is first recorded as 'Celie' in AD 975, and with 'hythe' by 1268. The original medieval settlement was deserted, its exact location is unknown.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the potential archaeological remains of the former settlement. These have the ability to help explain the medieval history of occupation of the Fens and the banks of the Cam, especially on the nature of occupation at Clayhithe.
HE114 0	05550	Roman cemetery, Horningsea	54980 0	263300	Roman	Religious ritual and funerary	Cemetery	Disturbed skeletons and FRoman pottery were recovered in ploughed fields south of eEye hHall, which may indicate a former cemetery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the archaeological interest and the ability to inform on the burial practices and society within the fen edge during the Roman period.
HE114 2	08326	Ring ditch cropmark, Milton	54700 0	261700	Undated	Monument <by form=""></by>	Ring Ditch	The site of crop marks relating to a ring ditch, now an industrial park.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligi ble	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE114 6	05798	Ridge and furrow, Horningsea	55010 0	261100	Medieva I	Agriculture and Subsistenc e	Ridge and furrow	The remains of likely medieval ridge and furrow cultivation marks. Furlongs were recorded in 1972 as up to 30 ft wide. The field has been heavily ploughed and any above-ground remains are difficult to distinguish.	The remains are set on a slight hill within a large field in the broader agricultural landscape of the Fen edge.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.

UID	CHER	Name	Easting	Northing	Date	Class	Туре	Description	Setting Description	Value	Value Description
HE114 7	05614	Ridge and furrow, Horningsea	54950 0	262600	Medieva I	Agriculture and Subsistenc e	Ridge and furrow	The remains of likely medieval ridge and furrow cultivation marks. Furlongs were recorded in 1972 as up to 30 ft wide. The field has been heavily ploughed and any above-ground remains are difficult to distinguish.	The remains are set on a slight hill within a large field in the broader agricultural landscape of the Fen edge. This makes a positive contribution to value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE114 8	08319	Rectangula r enclosure, Eye Hall Farm, Horningsea	54960 0	263500	Roman	Monument <by form=""></by>	Square Enclosure	Cropmarks of a square, ditched enclosure. They may relate to the adjacent Roman industrial activity or medieval settlement, but most likely the former given its form.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the archaeological interest and the ability to inform on the industrial use of the fens during the Roman period.
HE115 0	MCB2013 7	Post Medieval ditch and finds at 418a Milton Road, Cambridge	54669 0	260980	Post Medieva I	Monument <by form=""></by>	Ditch	The site of a single post- medieval ditch identified during construction of land at Milton Road.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligi ble	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE115 3	MCB2535 5	Public air raid shelters, Fen Ditton	54873 0	260750	Modern	Defence	Air raid shelter	The site of public air raid shelters on Horningsea Road, Fen Ditton.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the history of the Fens during the Second World War.
HE115 4	MCB2510 8	Undated enclosures, 500m north of Prospect Farm, Fen Ditton	55018 0	259970	Undated	Monument <by form=""></by>	Curvilinea r Enclosure	A series of faint cropmarks forming a curvilinear enclosure, which were identified from historic aerial photography.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on past human practices.
HE115 7	MCB2748 6	Possible prehistoric earthwork, Horningsea	54973 0	263950	Iron Age	Monument <by form=""></by>	Defended Enclosure	A large almond-shaped enclosure, possibly Iron Age, was identified on Agerial Pohotography from 2008. It was not visible on LiDAR data in 2017. A linear feature, possibly a Roddon, was also observed in the remote sensing survey.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the rare archaeological remains and possible prehistoric occupation. It is also possible that geoarchaeological and palaeoenvironmental information may be derived from the former routes of watercourses (Rroddons).
HE115 8	05554a	Earthworks W of Eye Hall (post medieval)	54980 0	263600	Post Medieva I	Transport	Road	Earthworks of post-medieval road and evidence of a house which continued from the medieval settlement (HE1070).	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the

UID	CHER	Name	Easting	Northing	Date	Class	Туре	Description	Setting Description	Value	Value Description
											continuation of settlement from the medieval <u>period</u> .
HE116 0	CB14682	Bronze Age features, Milton recreation ground	54756 4	262347	Bronze Age	Monument <by form=""></by>	Pit	The site of pits and ditches from throughout the Bronze Age period, now developed into an industrial estate and housing.	The archaeological remains are buried or removed and therefore setting does not contribute to their value.	Negligi ble	The remains have been <u>buried</u> or removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE116 2	MCB2326 2	Fen End, Waterbeac h	55006 0	265270	Post Medieva I	Domestic	House	Site of a house shown on the first edition Ordnance Survey mapping, 1885. The area is now gardens for modern housing.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from archaeological remains and the ability to inform on postmedieval occupation of the fenedge.
HE116 7	08329	Ring ditch cropmark, Benet Farm	54750 0	262300	Undated	Monument form>	Ring Ditch	A probable ring ditch and other marks are visible here on historic aerial photography. Monitoring at Coles Hill recreation ground, however, identified no remains.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on past human practices.
HE117 0	6372	Roman pottery, Eye Hall Farm, Horningsea	55030 0	263700	Undated , Roman, Post Medieva I	Industrial	Extractive Pit	Undated soil marks and a coprolite quarry have been identified here from aerial photography. A few sherds of Roman pottery were also found.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Value is derived from the potential to inform on Roman activity in this area. This hads been reduced by later coprolite mining.
HE117 2	05459a	Earthworks near Eye Hall, Horningsea	54900 0	262000	Medieva I	Domestic	Moat	Earthworks were recorded near Eye Hall in the late 19th century, *They were probably part of the identified deserted medieval settlement here (HE1070).	The remains are set within agricultural fields on the east bank of the Cam, south of Horningsea and to the south of Eye Hall. This is an area which also contains earthworks from medieval occupation.	Moder ate	Heritage value is derived from archaeological remains and the ability to inform on medieval settlement and associated activity, especially of a deserted settlement whichthat has not continued into the present, and associated activity.
HE117 5	05799	Ridge and furrow, Horningsea	55020 0	262700	Medieva I	Agriculture and Subsistenc e	Ridge and furrow	bBroad ridge and furrow surviving from before the 1810 enclosure of the parish, it has been heavily affected by later extraction.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE118 0	MCB2535 6	Public air raid shelters, Fen Ditton	54831 0	260950	Modern	Defence	Air raid shelter	The site of public air raid shelters on Green End, Fen Ditton.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the history of the Fens during the Second World War.

UID	CHER	Name	Easting	Northing	Date	Class	Туре	Description	Setting Description	Value	Value Description
HE118 4	05229	Site of cross, Cambridge	54710 0	261400	Post Medieva I	Religious ritual and funerary	Cross	The site of a cross, recorded on historic mapping c.1840. Now an area of hard standing within the Eexisting CWWTP.	The archaeological remains are buried or removed and therefore setting does not contribute to their value.	Negligi ble	The remains have been <u>buried</u> or removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE118 7	09005	Enclosure complex, Fen Ditton	55050 0	259800	Undated	Monument by form>	Enclosure	Cropmarks of a rectangular enclosure with internal divisions which indicate the site of a possible Roman settlement.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the archaeological interest and the ability to inform on FRoman occupation of the fens
HE118 9	MCB6772	Deserted settlement and building remains, Eye Hall	54995 0	263470	Post Medieva I	Domestic	Deserted Settlemen t	Cropmarks showing a deserted settlement and building remains founded in 1911 ₇₂ these are likely associated with the recorded medieval and post-medieval settlement (HE1158).	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from archaeological remains and the ability to inform on medieval settlement and associated activity, especially of a deserted settlement which that has not continued into the present, and associated activity.
HE119 1	MCB2261 5	Rectory Farm, Milton	54673 0	261830	Post Medieva I	Domestic	Farm	The site of a farm, labelled 'Rectory Farm' on the 1st edition Ordnance Survey Map (1885). The asset has been demolished and the area is now Cambridge Science Park.	The archaeological remains are buried or removed and therefore setting does not contribute to their value.	Negligi ble	The remains have been <u>buried</u> or removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE119 4	05548	Roman pottery kiln, Horningsea	54950 0	263340	Roman	Industrial	Pottery Kiln	Earthmarks likely representing a pottery kiln are visible as a discrete dark area. Loose sherds included in the fill date to the Roman period.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the ability to inform on the archaeology of pottery production of Horningsea Wares, especially the scale and extent of this production.
HE119 8	MCB2831 9	Earthwork enclosures, Horningsea	54922 0	262490	Medieva I, Post Medieva I	Agriculture and Subsistenc e	Burgage Plot	Linear earthworks marking the boundaries of the former gardens at Horningsea _{7.} gGiven their long narrow form, they may have been burgage plots.	Set on the periphery of the village of Horningsea, towards the banks of the River Cam and relative to the buildings lining the High Street.	Low	Heritage value is derived from archaeological remains and the ability to inform on medieval settlement and agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE120 0	MCB2743 5	Later prehistoric enclosures, Fen Ditton	54909 0	260140	Late Prehisto ric	Agriculture and Subsistenc e	Enclosure	Cropmarks relating to a series of enclosures, including a rectilinear, sub rectangular and two double-ditched enclosures as well as a trackway. Dated by their form.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the rarity of archaeological remains and the ability to inform on possible prehistoric settlement and activity within the fens.

UID HE120 6	CHER MCB2010 5	Furrows and Undated Ditch at St Johns Innovation Park, Cowley Road, Cambridge	Easting 54703 0	Northing 261580	Date Undated	Class Agriculture and Subsistenc e	Type Ridge and furrow	Description Six trial trenches excavated at St jJohn's innovation park identified two furrows and a ditch which pre-dated these. The features were not dated.	Setting Description The archaeological remains are buried or removed and therefore setting does not contribute to their value.	Value Negligi ble	Value Description The remains have been <u>buried</u> or removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE120 7	05324a	Medieval earthworks , Horningsea	54914 0	261130	Medieva I	Agriculture and Subsistenc e	Ridge and furrow	Earthworks relating to broad ridge and furrow were identified south of Horningsea in 1972. The area has since been ploughed, affecting survival, but the earthworks can still be made out in places.	The remains are set in agricultural fields north of the A14 and south of Horningsea.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE120 9	05612	Ridge and furrow, Horningsea	54910 0	261100	Medieva I	Agriculture and Subsistenc e	Ridge and furrow	Likely a continuation of HE1207, broad ridge and furrow earthworks have been recorded north of the A14. Their survival has been affected by ploughing.	The remains are set in agricultural fields north of the A14 and south of Horningsea.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE121 0	05393	C19th kiln and clay quarry, Horningsea	54905 0	261860	Post Medieva I	Industrial	Pottery Kiln	A kiln and clay pit is recorded in this location in 1809, evidence of a coprolite quarry has also been identified.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the postmedieval period.
HE121 1	05324	Roman artefact scatter, Horningsea	54915 0	261130	Roman	Monument <by form=""></by>	Artefact Scatter	The Fenland Survey Project identified a scatter of roman artefacts likely relating to HE1006. No features were identified, and it is likely the site was removed by a borrow pit.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the archaeological interest and the ability to inform on Roman activity in this area. This had been reduced by later mining.
HE121 2	MCB2056 1	Site of Former Gravel Pit, Sandy Park Road, Milton	54777 0	261050	Post Medieva I	Industrial	Extractive Pit	A gravel pit is recorded here on the 1st edition Ordnance Survey Map ₇ . hHowever, the remains lie underneath a housing estate and have largely been removed.	The archaeological remains are buried or removed and therefore setting does not contribute to their value.	Negligi ble	The remains have been <u>buried</u> or removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.

Low	Heritage value is derived from the archaeological interest and the ability to inform on the history of the Fens during the Second World War. The asset has been demolished but there is potential for below ground archaeological remains to survive.

UID	CHER	Name	Easting	Northing	Date	Class	Туре	Description	Setting Description	Value	Value Description
HE122 9	MCB2530 8	Public air raid shelters, Waterbeac h	54993 0	265510	Modern	Defence	Air raid shelter	The site of an air raid shelter built on public land. Remains may survive below ground of this and the other nearby shelters (HE1227, HE1228 and HE1226).	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the history of the Fens during the Second World War. The asset has been demolished but there is potential for below ground archaeological remains to survive.
HE123 0	MCB2734 5	Rectilinear enclosure of an unknown date, Dean Plantation, Quy	55121 0	261100	Undated	Monument <by form=""></by>	Subrectan gular enclosure	Cropmarks of a small subrectangular or rectilinear enclosure have been observed on historic aerial imagery from dry seasons. The form indicates a prehistoric date.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the archaeological interest and the ability to inform on the prehistoric occupation of the fen edge.
HE123 2	MCB3015 4	River Cam Navigation	54923 0	266330	Post Medieva I	Transport	River Navigatio n	The Cam is believed to have been navigated since at least the Roman period. This record relates to the post-medieval use of the river and 18th century improvements to aid navigation.	The navigated stretch of the river leads from the Great Ouse, three miles above Ely, to Cambridge. The setting is broadly the flat agricultural land of the fens, interspersed with small settlements, but is becoming urban near its southern end.	Low	Heritage value is derived from the archaeological interest and the ability to inform on navigational improvements to the River Cam during the post- medieval period.
HE123 5	MCB3046 3	Ditches and enclosure, Fen Ditton	55035 0	260540	Medieva I, Post Medieva I	Agriculture and Subsistenc e	Subrectan gular enclosure	Earthworks of a subrectangular enclosure and series of drainage ditches, one aligning with the parish boundary, were identified on historic aerial imagery.	Set in agricultural fields west of Quy Hall, on the Horningsea/Fen Ditton Parish Boundary.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE123 6	MCB3055 7	Field boundary south of Clayhithe Road, Horningsea /Fen Ditton	54975 0	262780	Medieva I, Post Medieva I	Agriculture and Subsistenc e	Field Boundary	Soilmarks of a probable field boundary, which survived as earthworks in 1947 but have since been ploughed out.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE123 7	MCB3050 2	Linear feature 200m west of Station House, Stow cum Quy	55114 0	261560	Undated	Monument <by form=""></by>	Linear feature	Cropmarks of a linear feature of unknown date, possibly of geological origin.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the potential archaeological remains and the ability to inform on past human practices.

UID	CHER	Name	Easting	Northing	Date	Class	Туре	Description	Setting Description	Value	Value Description
HE123 8	MCB3058 5	Former extractive pits at Biggin Abbey, Fen Ditton	54874 0	261670	Post Medieva I	Industrial	Extractive Pit	Cropmarks on historic aerial photography were interpreted as the remains of extractive pits south of Biggin Abbey. This is supported by evaluation undertaken for the Pproposed Ddevelopment.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post- medieval period.
HE123 9	MCB3047 7	Irregular shaped cropmark north west of Quy Hall	55101 0	261640	Undated	Monument <by form=""></by>	Linear feature	Two sets of cropmarks, one of a linear feature and one possible irregular enclosure, which were identified from historic aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the potential archaeological remains and the ability to inform on past human practices.
HE124 0	MCB3046 9	Ditch, west of Quy Park, Stow cum Quy	55095 0	261020	Post Medieva I	Agriculture and Subsistenc e	Drainage ditch	A cropmark of a probable drainage ditch, identified from historic aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE124 2	MCB3056 6	Linear features east of the River Cam, Horningsea	54910 0	262370	Undated	Transport	Trackway	Earthworks of a linear feature and probable trackway identified on historic aerial imagery. They may relate to an adjacent former brickworks or to HE1302.	Any surviving earthworks are set on the western periphery of Horningsea, in fields towards the bank of the River Cam.	Low	Heritage value is derived from the potential archaeological remains and the ability to inform on past human practices.
HE124 3	MCB3055 4	Linear earthworks south of Eye Hall, Horningsea	54973 0	263060	Undated	Transport	Trackway	Earthworks of a linear feature and probable trackway identified on historic aerial imagery. These are undated, but similar to others in the area such as HE1242 and HE1302.	Any surviving earthworks are set within a pastoral agricultural field south-west of Eye Hall and East of Clayhithe Road.	Low	Heritage value is derived from the archaeological interest and the ability to inform on past human practices.
HE124 4	MCB3057 2	Possible trackway near the River Cam, Fen Ditton	54833 0	261120	Post Medieva I	Transport	Trackway	A linear earthwork which was identified from historic aerial imagery. It may represent a trackway to the Cam or to the nearby extractive pits.	The earthworks are set on the northern edge of Fen Ditton, on a stretch of common land on the eastern bank of the Cam.	Low	Heritage value is derived from archaeological remains and the ability to inform on the extensive extraction industries in the fens during the postmedieval period.
HE124 5	MCB3106 3	A probable Second World War pillbox	55070 0	265490	Modern	Defence	Pillbox	A probable, square pillbox can be seen on aerial photography from 1944. It has since been destroyed.	Any surviving archaeological remains are buried and therefore do not have a setting.	Negligi ble	The asset has been demolished and there is limited potential for below ground remains to survive.
HE124 6	MCB3050 5	Linear feature 200m south-west of Station House,	55117 0	261430	Undated , Medieva I, Post Medieva I	Agriculture and Subsistenc e	Field Boundary	Part of an earlier field system, visible as cropmarks, comprising two linear features at a right-angle. They -pre-date available historic mapping of the area.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.

		Biggin Abbey, Fen Ditton						probable enclosure. They are amongst the medieval and post-medieval activity here, but appear to relate to a separate phase of settlement.	setting does not contribute to their value.		the ability to inform on past human practices.
HE126 0	MCB3054 4	T shaped ditch at the south end of Car Dyke, Waterbeac h	54961 0	264070	Undated	Monument 	Ditch	A T-Shaped ditch was identified through remote sensing survey. It may be contemporary with a later ditch excavated to compliment the earlier Car Dyke.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and their ability to help understand either Roman activity relating to Car Dyke or later medieval landscape divisions.
HE126 1	MCB3050 0	Linear feature north west of Quy Hall, Stow cum Quy	55099 0	261540	Undated	Monument <by form=""></by>	Linear feature	A cropmark of a linear feature, possibly a medieval or post-medieval boundary, which has been identified from historic aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE126 2	MCB3056 7	Rectangula r features, 250m east of Horningsea Road, Horningsea	54951 0	262150	Undated , Roman	Agriculture and Subsistenc e	Subrectan gular enclosure	Cropmarks and soilmarks of a subrectangular enclosure and linear feature which have been identified form historic aerial imagery. They have been identified as possibly Roman from their form.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the archaeological interest and the ability to inform on the Roman settlement of the fen edge.
HE126 3	MCB3055 5	Linear features south of Clayhithe Road, Horningsea	54981 0	262760	Medieva I, Post Medieva I	Transport	Trackway	The ploughed out remains of a trackway and field boundary, still visible as a soilmark in aerial imagery from 1999. The features form a right angle, and the trackway may join with others identified west of Clayhithe Road.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from archaeological remains and the ability to inform on medieval/post-medieval occupation of the fens.
HE126 4	MCB3057 3	WWII bombing craters, Chesterton Fen, Milton	54805 0	261400	Modern	Unassigned	Bomb crater	Surviving subtle earthworks of one crater, -visible on LiDAR, and the site of two further craters which have been removed by later development. They would have formed a straight line, each approximately 250m apart.	The remains are set in agricultural fields between Fen Road and the A14, on the western bank of the Cam. The existing WWTP is to the west.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the bombing of the fens during WWII.
HE126 5	MCB3106 2	A Second World War type 24 pillbox	55077 0	265680	Modern	Defence	Pillbox	A type 24 pillbox, shaped as an irregular hexagon, is visible on aerial photography taken in 1944. It has since been destroyed.	Any surviving archaeological remains are buried and therefore do not have a setting.	Negligi ble	The asset has been demolished and there is limited potential for below ground remains to survive.

UID	CHER	Name	Easting	Northing	Date	Class	Туре	Description	Setting Description	Value	Value Description
HE126 6	MCB3053 6	Cropmarks along a possible Roman road, 500m west of Mulberry House Farm, Waterbeac h	54943 0	264020	Roman	Monument form>	Linear Feature	Cropmarks of a ring ditch and a long linear feature which continues both sides of Car Dyke and both sides of the Railway. The remains were identified on 1940s aerial photography as earthworks but now appear now-levelled.	The archaeological remains are buried and therefore setting does not contribute to their value.	Mediu m	Heritage value is derived from the archaeological interest and the ability to inform on prehistoric monuments, trackways and crossings within the Fens, likely predating the Roman channel of Car Dyke.
HE126 7	MCB3028 8	Searchlight battery, Waterbeac h	55024 0	266140	Modern	Defence	Searchlig ht battery	The site of a searchlight battery. The search light was removed by 1946 and by 1960 the aerial imagery no longer shows earthworks of the emplacement. The area is now a housing estate.	Any surviving archaeological remains are buried and therefore do not have a setting.	Negligi ble	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE126 8	MCB3093 3	A Second World War Royal Air Force sewage works	55027 0	266480	Modern	Water supply and drainage	Waterwor ks	Waterbeach WWTW was constructed for the nearby RAF Waterbeach. The site remains a waterworks but has been heavily altered and the military buildings removed.	The remains are set in agricultural fields north of Waterbeach, surrounded by mature hedgerows. The remains of the RAF site are approximately 700m to the west.	Low	Heritage value is derived from the extant sewage works and its ability to inform on the infrastructure associated with RAF Waterbeach during WWII.
HE126 9	MCB3063 7	Furlong boundaries and ridge and furrow in the parish of Fen Ditton	54886 0	260300	Medieva I, Post Medieva I	Agriculture and Subsistenc e	Furlong Boundary	Levelled earthworks of furlong boundaries and ridge and furrow. They are not readily visible but can be identified on LiDAR surveys. Some of the boundaries may date to the former open field system from the 18th century.	The remains are set in agricultural fields to the north-east of Fen Ditton.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE127 0	MCB3049 5	Linear cropmarks to 500m west of Quy Hall	55101 0	261340	Medieva I, Post Medieva I	Monument <by form=""></by>	Linear feature	A cropmark of two L-shaped features, possibly field boundaries or drainage ditches, which were identified from historic aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE127 1	MCB3054 5	Parallel drainage ditches south west of Mulberry	54965 0	263820	Post Medieva I, Modern	Water supply and drainage	Drainage System	Earthworks of three parallel drainage ditches were identified by remote sensing. They are parallel to post medieval and modern field boundaries.	The earthworks lie in a heavily ploughed agricultural field.	Low	Heritage value is derived from the ability of the archaeological remains to inform on the drainage of the Fens for agriculture in the postmedieval and modern periods

		House Farm, Horningsea									and how this has influenced the field pattern.
HE127 2	MCB3056 1	Trackway, east of Kings Farm, Horningsea	54955 0	262570	Medieva I, Post Medieva I	Transport	Trackway	Levelled earthworks of two parallel features forming a short trackway, which can be seen on historic aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on medieval/post-medieval occupation of the fens.
HE127 3	MCB3057 0	Linear feature west of Green End, Fen Ditton	54814 0	260780	Medieva I, Post Medieva I	Monument <by form=""></by>	Linear feature	Levelled Earth Bankearthworks of a linear feature, visible on historic aerial imagery. It may be a former water channel related to the water_meadow to the north (HE1249).	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on irrigation techniques and management during the medieval/post-medieval period.
HE127 4	MCB3046 7	Drainage ditches, west of Quy Park, Stow cum Quy	55094 0	260670	Post Medieva I	Water supply and drainage	Drainage ditch	Cropmarks of drainage ditches, probably post-medieval in date, which have been identified from historic aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE127 5	CB14513	Wooden structure and kilns, Car Dyke/River Cam junction	54960 0	264000	Roman	Industrial	Pottery manufact uring site	Excavations in 1997 identified a series of features likely associated with Car Dyke. These included pottery kilns and a substantial timber building. The remains were heavily truncated. Horningsea and Samian wares were found associated with the building.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the ability of the archaeological remains to inform on the production, storage and distribution of pottery in the Roman period. This ability is reduced by the truncation of the remains.
HE127 6	MCB3064 0	Furlong boundaries and ridge and furrow in the parish of Horningsea	54975 0	262180	Medieva I, Post Medieva I	Agriculture and Subsistenc e	Ridge and furrow	Ploughed out earthworks of ridge and furrow, as well as furlong boundaries, which have been levelled and filled in. They can be seen on historic aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE127 7	MCB3050 9	Ridge and furrow earthworks at Clayhithe Farm, Horningsea	55024 0	264260	Medieva I, Post Medieva I	Agriculture and Subsistenc e	Ridge and furrow	Earthwork remains of ridge and furrow, parallel to existing field boundaries, which were identified through remote sensing.	The earthworks lie in a heavily ploughed agricultural field.	Low	Heritage value is derived from the ability of the archaeological remains to inform on medieval and post-medieval agricultural activity in the Fens and especially the development of the field pattern around Clayhithe.

UID	CHER	Name	Easting	Northing	Date	Class	Туре	Description	Setting Description	Value	Value Description
HE127 8	MCB3055 8	Trackway, south of Clayhithe Road, Horningsea /Fen Ditton	54977 0	262690	Medieva I, Post Medieva I	Transport	Trackway	Cropmarks of two parallel ditches which curve slightly have been interpreted as a probable trackway. The marks were identified from historic aerial imagery and the remains may relate to other similar trackways nearby.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on Mmedieval/post-medieval occupation of the fens.
HE127 9	MCB3058 1	Area of features from coprolite extraction, Poplar Hall, Fen Ditton	54849 0	261360	Post Medieva I	Industrial	Extractive Pit	Levelled earthworks of probable coprolite extraction features, as well as a pit which survives as a pond and a spoil heap forming a rectangular mound. Also related to HE1084 and HE1092.	The remains are set within the farmyard and gardens of Poplar Hall Farm, surrounded by agricultural fields on the eastern bank of the Cam.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post- medieval period.
HE128 0	MCB3054 2	Linear features to the southern end of Car Dyke, Waterbeac h	54956 0	264310	Roman	Monument <by form=""></by>	Linear feature	Linears and small sub-circular features which survive as cropmarks, they These have been tentatively associated with the nearby Roman pottery working sites.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability to inform on the archaeology of pottery production within the fen edge.
HE128 1	MCB3047 6	Linear ditch north west of Quy Hall	55097 0	261580	Undated	Monument <by form=""></by>	Linear ditch	A linear cropmark which is visible on historic aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from archaeological remains and the ability to inform on historic agricultural practices.
HE128 2	MCB3049 8	Field boundaries south of Allicky Farm, Stow cum Quy	55098 0	261940	Medieva I, Post Medieva I	Agriculture and Subsistenc e	Field Boundary	Cropmarks of several field boundaries which align with boundaries shown on historic mapping.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE128 3	MCB3058 4	Linear features, east of Biggin Abbey, Horningsea	54984 0	261460	Post Medieva I	Agriculture and Subsistenc e	Ridge and furrow	Linear cropmarks which likely relate to drainage ditches, as well as the possible remains of ridge and furrow. A hop ground building was also historically recorded here, therefore, the features may be associated with hop growing.	The drainage ditches are buried and therefore setting does not contribute to their value. The ridge and furrow is set within mixed-use agricultural fields on the slight slope of Honey Hill.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.
HE128 4	MCB3047 0	Ditches, west of Quy Park, Stow cum Quy	55093 0	261080	Post Medieva I	Water supply and drainage	Drainage ditch	Cropmark remains of two straight ditches, cut perpendicular to one another and likely for drainage.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the widescale draining of the fens and its transformation to an

											intensely farmed agricultural landscape.
HE128 6	MCB3051 0	Site of a brickworks south of Clayhithe Farm, Horningsea	55018 0	264160	Post Medieva I	Industrial	Brick and Tilemakin g Site	A pond which is likely a former brick or clay pit was identified on aerial imagery. Historic mapping shows a brickworks in this location.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability of the archaeological remains to inform on the process of brickmaking and the prevalent open-cast mining in the Fens in the post-medieval period.
HE128 7	MCB3106 0	A Second World War type 22 pillbox	55027 0	265870	Modern	Defence	Pillbox	The site of a type 22 hexagonal pillbox, the upstanding structure was removed by 1968 and the area has been redeveloped into housing. No remains are expected to survive.	The archaeological remains are buried <u>or removed</u> and therefore setting does not contribute to their value.	Low	The remains have been buried or removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE128 8	MCB3055 9	Site of a pump, Horningsea	54956 0	262650	Post Medieva I	Water supply and drainage	Pump	The site of a pump, marked as a demolished structure on historic mapping. No aboveground remains survive, but they can be seen on historic aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the postmedieval period.
HE128 9	MCB3049 3	Linear feature to the north of Quy Hall, Stow cum Quy	55117 0	261210	Medieva I, Post Medieva I	Monument <by form=""></by>	Linear feature	A linear cropmark, which is visible on historic aerial imagery, possibly representing a field boundary or drainage ditch. Another cropmark runs perpendicular, supporting this interpretation.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE129 0	MCB3054 3	Linear features on the west side of Car Dyke, Waterbeac h	54950 0	264270	Roman	Monument <by form=""></by>	Linear feature	A series of cropmarks identified on historic aerial imagery comprising a linear feature, small sub-circular features and a possible subrectangular enclosure. They have been interpreted as associated with Car Dyke.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the early industrial and agricultural exploitation of the fen edge by isolated Roman farmsteads.
HE129 1	MCB3058 7	Linear feature, west of the River Cam, Milton	54883 0	262220	Undated	Monument <by form=""></by>	Linear feature	levelled earthworks of a ditch and bank, which were observed on historic aerial imagery but ploughed out by 2017 when LiDAR survey of the area was undertaken.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.

HE129 2	MCB3093 1	A Second World War Royal Air Force satellite camp	55004 0	265740	Modern	Defence	Royal Air Force Camp	The site of a Second World War Royal Air Force satellite camp. The building-s_have been levelled and housing constructed, but some remains may survive to the east.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the use of the fen edge during WWII.
HE129 3	MCB3121 6	Ridge and Furrow and Furlong Boundaries in the parish of Waterbeac h	54940 0	265970	Medieva I, Post Medieva I	Agriculture and Subsistenc e	Ridge and furrow	Ridge and Furrow and furlong field boundaries which survive as earthworks and cropmarks.	The earthworks and cropmarks are set within agricultural fields around the settlement of Waterbeach.	Low	Heritage value is derived from the ability of the archaeological remains to inform on the medieval and post-medieval exploitation of the fens for agriculture.
HE129 4	MCB3050 1	Linear feature west of Station House, Stow cum Quy	55114 0	261540	Undated	Monument <by form=""></by>	Linear feature	A cropmark of a linear feature which has been identified on historic aerial imagery. Another feature crosses this.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE129 5	MCB3055 6	Drainage ditches/fiel d boundaries south of Clayhithe Road, Horningsea	54989 0	262830	Medieva I, Post Medieva I	Agriculture and Subsistenc e	Field Boundary	A series of levelled earthworks and soilmarks representing field boundaries and drainage ditches. They may relate to the trackway at HE1263.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE129 6	MCB3028 9	pillbox, Milton	54855 0	262050	Modern	Defence	Pillbox	The site of a <u>sSecond</u> <u>wW</u> orld <u>wW</u> ar pillbox. No above-ground remains survive, however there may be buried remains.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the history of the Fens during the Second World War. The asset has been demolished but there is potential for below ground archaeological remains to survive.
HE129 7	MCB3049 0	Linear feature to the north of Quy Hall, Stow cum Quy	55123 0	261340	Medieva I, Post Medieva I	Agriculture and Subsistenc e	Field Boundary	The cropmark remains of a probable field boundary which havethat has been identified from historic aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.

UID	CHER	Name	Easting	Northing	Date	Class	Туре	Description	Setting Description	Value	Value Description
HE129 8	MCB3043 7	Purported Roman road, Waterbeac h	54950 0	263950	Roman	Transport	Road	A road of unknown date extending north-east to southwest between the railway and river. Reported to be Roman, howeverbut excavation has revealed that this is not necessarily the case.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability of the archaeological remains to inform on transport within the Fens likely predating the railway. The asset may also inform on historic use of or crossings of the River Cam.
HE129 9	MCB3056 2	Trackway north of Biggin Abbey, Fen Ditton	54875 0	261970	Medieva I, Post Medieva I	Transport	Trackway	The ploughed out earthworks of a former trackway, which can be seen on historic aerial imagery and appear to align with mapping for 1808.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on Mmedieval/post-medieval occupation of the fens.
HE130 0	MCB3057 1	Former extractive pit, at Green End, Fen Ditton	54837 0	261070	Post Medieva I	Industrial	Extractive Pit	An oval shape extractive pit, likely for coprolite, was formerly located here. There are no earthworks visible above ground, howeverbut below ground remains may survive.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the postmedieval period.
HE130 1	MCB3046 8	Drainage ditches, west of Quy Park, Stow cum Quy	55113 0	260910	Post Medieva I	Water supply and drainage	Drainage ditch	A linear cropmark, likely representing a former drainage ditch, whichthat has beene identified from historic aerial imagery.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE130 2	MCB3056 5	Possible trackways, east of the River Cam, Horningsea	54894 0	262210	Medieva I, Post Medieva I	Transport	Trackway	eEarthworks of two linear features, which may be a former trackway. They most likely relate to nearby medieval and post-medieval activity.	The remains are set within agricultural fields on the eastern bank of the Cam, parallel to a field boundary.	Low	Heritage value is derived from the archaeological interest and the ability to inform on Mmedieval/post-medieval occupation of the fens.
HE130 3	N/A	Area of coprolite mining			Post Medieva I	Industrial	Extractive Pit	An area of extensive coprolite mining, defined through survey and map regression, surrounding Horningsea to the south, east and north-east.	The archaeological remains are buried and therefore setting does not contribute to their value.	Negligi ble	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the postmedieval period.
HE130 4	N/A	Trackway			Roman, Medieva I	Transport	Trackway	A likely FRoman trackway and associated pits. It likely led to the Roman cropmarks at HE1006. The trackway was recut in the medieval period.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on Roman activity in the chalk lowlands, as well as medieval re-use of eatrlier features.
HE130 5	N/A	Palaeochan nel			Prehisto ric,	Monument <by form=""></by>	Palaeocha nnel	Trial trenching identified this Palaeochannel, from within	The archaeological remains are buried and therefore	Low	Heritage value is derived from the archaeological interest and the ability to inform on the

					Neolithi c			which a struck Neolithic flint was recovered.	setting does not contribute to their value.		geoarchaeeological development of the area as well as Neolithic activity.
HE130 6	N/A	Enclosure Ditches			mMedie val, Post Medieva I	Agriculture and Subsistenc e	Field system	A series of medieval and post- medieval ditches, likely relating to the historic agricultural use of the area, were identified near Fen Ditton within the waste water transfer tunnel.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on the development of the agricultural landscape around Fen Ditton and past field systems.
HE130 7	N/A	Area of Settlement Activity			Bronze Age, Iron Age	Domestic	Settlemen t	An area of potential settlement activity was identified from a series of pits and postholes during trial trenching. Finds included a significant assembly of animal bones from multiple pits.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the archaeological interest and the ability to inform on early permanent settlements in the chalk lowlands and the continuation of sites through prehistoric periods.
HE130 8	N/A	Area of Settlement Activity			Mesolit hic, Neolithi c, Bronze Age, Iron Age	Domestic	Settlemen t	A pit containuing in situ Mesolithic or Neolithic deposits, which has been overlain by settlement activity similar to HE13087.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the archaeological interest and the ability to inform on late stone age flint working, early permanent settlements in the chalk lowlands and the continuation of sites through prehistoric periods.
HE130 9	N/A	Urned Cremation			Bronze Age, Iron Age	Religious ritual and funerary	Crematio n Burial	An urned cremation was recovered in trench 46, believed to be late Bronze Age or early Iron Age. The surroundings have the potential to contain additional cremations.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the archaeological interest and the ability to inform on late Bronze Age to early Iron Age funerary practices.
HE131 0	N/A	Urned Cremation			Bronze Age, Iron Age	Religious ritual and funerary	Crematio n Burial	An urned cremation was recovered in trench 69, believed to be late Bronze Age or early Iron Age. The surroundings have the potential to contain additional cremations.	The archaeological remains are buried and therefore setting does not contribute to their value.	Moder ate	Heritage value is derived from the archaeological interest and the ability to inform on late Bronze Age to early Iron Age funerary practices.
HE131 1	08322	Cropmark Enclosures, Milton			Undated	Monument <by form=""></by>	Earthwor k	Cropmark system of enclosures possibly dating to the Romano-British period.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the potential archaeological remains and the ability to inform on past human practices.
HE131 3	08330	Post- Medieval and			Post Medieva I	Monument <by form=""></by>	Boundary Ditch	Nine trenches produced a single definite feature, possibly a boundary ditch, which	The archaeological remains are buried <u>or removed</u> and	Negligi ble	The remains have been buried or removed by later construction and therefore

UID	CHER	Name	Easting	Northing	Date	Class	Туре	Description	Setting Description	Value	Value Description
		undated features, St. John's Innovation Park, Cowley						contained one sherd of 17th- 18th century pottery, and an undated dubious posthole-sized feature.	therefore setting does not contribute to their value.		hold no archaeological value, as they cannot inform on past human practices.
HE104 3	05678	Roman ditch, Milton			Roman	Monument dy form>	Ditch	Gravel pit with ditches containing Roman Sherds.	The archaeological remains are buried or removed and therefore setting does not contribute to their value.	Negligi ble	The remains have been <u>buried</u> or removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.
HE131 7	05408	Wharf, Horningsea			Medieva I, Post Medieva I	Maritime	Wharf	Two, largely infilled, wharves at the end of Dock Lane and St John's Lane where Horningsea meets the Cam.	Setting primarily relates to the River Cam, with the topography and vegetation around the River otherwise enclosesing the wharves. Horningsea is to the east, but few buildings are visible.	Low	Heritage value is derived from archaeological remains and the ability to inform on the exploitation of the Cam by fenland villages, including how this has changed over time.
HE131 8	11207	Soilmarks and earthworks , A45 Quy fieldwalkin g survey field 20, Horningsea			Undated	Monument dy form>	Earthwor k	Fieldwalking produced no finds. Bands of gravels may indicate encroachment of the field on the earlier monument by ploughing. Slight earthworks around Abbey appear to be largely the result of garden activities.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the potential archaeological remains and the ability to inform on past human practices.
HE131 9	06341	Site of wind pump, Horningsea			Post Medieva I	Industrial	Wind Pump	Site of a wind pump, southwest of Bottisham Lode. Built in 1821-1822 to drain land to the south-west of Bottisham Lode.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.
HE132 1	MCB3059 0	Linear cropmarks 350m north west of Manor House, Milton			Undated	Monument <by form=""></by>	Subrectan gular Enclosure	Linear cropmarks, parallel to a drainage ditch, forming subrectangular enclosures. Mapped as part of the East Cambridgeshire Aerial Investigation and Mapping project.	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the potential archaeological remains and the ability to inform on past human practices.
HE132 2	MCB3059 1	Possible watermead ow, west of Horningsea Manor			Medieva I, Post	Agriculture and	Water Meadow	A possible water_meadow of medieval/post medieval date is visible on historic aerial photographs as earthworks and was mapped as part of the East Cambridgeshire Aerial	The archaeological remains are buried and therefore setting does not contribute to their value.	Low	Heritage value is derived from the archaeological interest and the ability to inform on irrigation techniques and management during the

HE095	Moderate	Value is derived from the architectural interest of buildings like Biggin Abbey, located within the Conservation Area. The engineering of the lock itself provides historic interest, and archaeological interest is derived from medieval and post medieval agricultural remains. The surrounding landscape contributes to the rural character of the asset.	The existing rural, river character of the conservation area will be altered by a construction compound located within the conservation area, the construction of a treated effluent discharge outfall structure and changes to the PROW on the eastern side of the river. A PROW through the conservation area is likely to be temporarily diverted during the construction phase, altering the way people engage with and appreciate the heritage asset.	Minor	Adverse	Moderate	Adverse		There will be a permanent, physical impact due to the construction of river bank protection works and outfall structure. Additionally, the Conservation Area Appraisal notes that Biggin Abbey is particularly prominent in views east from the river. These views (see viewpoint 11, Landscape Information paper) will be altered by the introduction of the Proposed Development into the landscape beyond Biggin Abbey, altering the character of the	Moderate	Adverse	Moderate	Adverse	Yes	The Proposed Development will require sensor-activated lighting within the site and will introduce moving vehicles into the landscape. Both the lighting and movement have the potential to alter the rural setting of the conservation area, diminishing the contribution it makes to the value of the heritage asset. However, the A14 is situated in close proximity, creating existing noise, light amovement. As such, the impact caused by the optention of the Proposed	Negligible	Adverse	Slight	Adverse
									area's setting.						Development is diminished slightly.

This will affect the ability to understand the historic interest of the asset as an historic, rural village.												setting of the conservation area slightly, diminishing the contribution it makes to the value of the heritage asset.				
HE098	Moderate	Value is derived from the historic buildings in the village centre, which provide architectural interest. The surrounding suburban development makes a negative contribution to the value of the asset.	No impact. The asset's village setting will not be altered by the construction proposed scheme, and the asset has no long views in the direction of the scheme.	No change	Neutral	Neutral	Neutral	Ne	No impact. The asset's built up village setting will not be altered by the construction proposed scheme, and the asset has no long views in the direction of the scheme.	No change	Neutral	Neutral	Neutral	Ne	No impact. Due to the distance between the asset and the Proposed Development, there will be no change in the asset's setting or character.	No change	Neutral	Neutral	Neutral
HE099	Moderate	Value is derived from the buildings in the village centre, which provide architectural interest. The surrounding flat, Fenland landscape makes a positive contribution to the value of the asset.	The existing village setting will be altered by the temporary presence of construction traffic within the asset. This will adversely impact the heritage value of the asset, as it will temporarily alter the character of the quiet village that forms the asset's setting. This will affect the ability to understand the historic interest of the asset as an historic, rural village.	Negligible	Adverse	Slight	Adverse	Ne	No impact. The asset will not be altered by the construction proposed scheme, and it has no long views in the direction of the scheme.	No change	Neutral	Neutral	Neutral	Ne	No impact. Due to the distance between the asset and the Proposed Development, there will be no change in the asset's setting or character.	No change	Neutral	Neutral	Neutral
