Cambridge Waste Water Treatment Relocation Project

Historic Environment Impact Assessment Table

## **Summary**

This document provides a proportionate assessment of impact for all designated and non-designated assets within the 500m, 1km and ZTV study areas, as outlined in section 2 of the Historic Environment Baseline Report Application Document Ref 5.4.13.1. This includes: listed buildings, scheduled monuments, registered parks and gardens, conservation areas, non-designated built heritage assets such as locally listed buildings and non-designated archaeological assets both identified by the CHER and by surveys undertaken for the Pproposed Development. Historic landscape character areas are separately assessed in Appendix 13.3, (Applicantion Decument Refrequence 5.4.13.3). The methodology followed for this assessment of impact is provided in in section 2 of the Historic Environment Baseline Report (Appendix 13.1, App DocApplication Document Ref 5.4.13.1). Significant effects, and other key effects, are described in the Historic Environmental Statement chapter (App Doc Ref Application document reference 5.2.13).

### 1 Impact Assessment Tables

- 1.1 The tables included in this document provide a proportionate assessment of impact from the Puroposed Development for all historic environment assets within the 500m, 1km and ZTV study areas. This impact assessment has been undertaken in accordance with the methodology described in section 2 of the Historic Environment Baseline Report (Appendix 13.1, Application Devicement Report (Appendix 13.1). Assessment of impact is considered for temporary construction effects, permanent construction effects, in accordance with this methodology.
- 1.1.2 The below tables, Table 1-1, Table 1-2, Table 1-3, Table 1-3
- 1.1.3 For assets within the ZTV study area, as described in section 2 of the Historic Environment Baseline Report (Appendix 13.1, App Application Document Reference 5.4.13.1), a desk-based assessment and supplementary setting survey (see EVT048 in Gazetteer of Events (Appendix 13.7, App Doc Ref Application document reference 5.4.13.7) was undertaken to determine if assets identified had the potential to be impacted by the Puroposed Development. Assets with the potential to be affected would be subject to an assessment of impact as applied to assets in the 500m and 1km study areas. However, survey of these assets identified no assets with the potential to be impacted. The below tables, Table 1-2, Table 1-2, Table 1-3, Table 1-3, Table 1-3, Table 1-4, Table 1-4,

#### 1.1 Impact Assessments

1.1.1 The below, Table 1=1,1, provides an assessment of impact for listed buildings within the 1km study area. The project specific Unique Identifiers (UIDs) in column one may be cross referenced with the UIDs in Gazetteer of Assets (Application Document Ref 5.4.13.2) for further information on these assets.

			<del>Phase</del>						<b>Phase</b>			<b>Magnitude</b>				<b>Phase</b>	<b>Description</b>					
			Temporary Impact?						Permanent Impact=?							Impact?						
HEOOS	High	It is of high heritage value due to its historic and architectural interest, derived from its early architectural form and fabric. The churchyard and surrounding village are key element of the asset's setting which also contribute to its heritage value. In particular, the church's location on St John's Lane references the historic interest of the route to the River Cam. The dense residential development, tall hedgerows and narrow lanes in the vicinity impede long views towards the asset. This is an important element to the asset's value which has been negatively impacted.	No	No impact. Due to the distance between the asset and the Proposed Development, and the lack of intervisibility between the two, the asset's setting will not be altered during construction.	No change	Neutral	Neutral	Neutral	No -	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No impact		Neutral	No effect	Neutral	No No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral	
HE006	High	It is of high heritage value due to its architectural and historic interest as a dwelling with a long history. The modern development	No	No impact. 1.1.2 The below, Table 1 = 2, provides an assessment of impact for scheduled monuments within the 1km study area. The UIDs in column one may be cross referenced with the UIDs in Gazetteer of Assets (Application Document Ref 5.4.13.2) for further information on these assets.

UID	Heritage Value	Value Description	Construction phas	se - temporary					Construction Phas	se - permanent					Operation Pha	ase				
			Construction Phase Temporary Impact	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Construction Phase Permanent Impact	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Operation Phase Impact	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type
HE001	High	Heritage value is derived from the archaeological remains and their ability to inform on nationally important archaeological deposits, especially relating to the evolution of settled sites over time.	None	No Impact. There will be no physical effect to the remains and their setting does not extend to the proposed CWWTP.	х	х	х	х	None	No Impact. There will be no physical effect to the remains and their setting does not extend to the proposed CWWTP.	х	х	х	х	None	No Impact. The setting does not extend to the proposed CWWTP.	х	х	х	х
HE002	High	Heritage value is derived from the archaeological remains and their ability to inform on Roman occupation of the fens and the industrial use of this area during the period.	None	No Impact. There will be no physical effect to the remains and their setting does not extend to the proposed CWWTP.	х	х	х	х	None	No Impact. There will be no physical effect to the remains and their setting does not extend to the proposed CWWTP.	х	х	х	х	None	No Impact. The setting does not extend to the proposed CWWTP.	х	х	х	х
HE003	High	Heritage value is derived from the archaeological remains and their ability to inform on the construction, management and use of an inland waterway during the Roman period.	None	No impact. The setting does not extend to construction activities.	х	x	х	х	None	No impact. The setting of the dyke is severed from the site by the River Cam and will not be altered by the Pproposed  Development.	х	x	х	x	None	No Impact. The setting does not extend to the proposed CWWTP.	х	x	х	х
HE004	High	Heritage value is derived from the archaeological remains and their ability to inform on the religious history of the area and medieval occupation of the Fens. The asset's setting contributes to its rural character but does not aid understanding of the asset's heritage value. As such, setting is considered to make a neutral contribution to the asset's heritage value.	None	No impact. Construction traffic and activities will be separated from the asset by intervening built development and vegetation. Therefore, change in its setting will be minimal to none and will not affect value.	х	х	х	х	None	No impact. The site of the proposed CWWTP will not be visible from the asset due to topography and vegetation, therefore there will be no change within its setting.	х	х	х	х	None	No impact. The site of the proposed CWWTP will not be visible from the asset due to topography and vegetation, therefore there will be no change within its setting.	х	х	х	х

	Value																		
			Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Construction Phase Permanent Impact	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Operation Phase Impact	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type
HE095	Moderate	Value is derived from the architectural interest of buildings like Biggin Abbey, located within the Conservation Area. The engineering of the lock itself provides historic interest, and archaeological interest is derived from medieval and post-medieval agricultural remains. The surrounding landscape contributes to the rural character of the asset.	The existing rural, river character of the conservation area will be altered by a construction compound located within the conservation area, the construction of a treated effluent discharge outfall structure and changes to the PROW on the eastern side of the river. A PROW through the conservation area is likely to be temporarily diverted during the construction phase, altering the way people engage with and appreciate the heritage asset.	Moderate	Adverse	Moderate	Adverse	Yes	There will be a permanent, physical impact due to the construction of riverbank protection works and outfall structure. Additionally, the Conservation Area Appraisal notes that Biggin Abbey is particularly prominent in views east from the river. These views (see viewpoint 11, Landscape Information paper) will be altered by the introduction of the Proposed Development into the landscape beyond Biggin Abbey, altering the character of the conservation area's setting.	Moderate	Adverse	Moderate	Adverse	Yes	The Proposed Development will require sensor-activated lighting within the site and will introduce moving vehicles into the landscape. Both the lighting and movement have the potential to alter the rural setting of the conservation area, diminishing the contribution it makes to the value of the heritage asset. However, the A14 is situated in close proximity, creating existing noise, light and movement. As such, the impact caused by the operation of the Proposed Development is diminished slightly.	Negligible	Adverse	Slight	Adverse
HE096	Moderate	Value is derived from the architectural interest of the buildings in the village centre, as well as the archaeological interest of ridge and furrow in surrounding fields and of Fleam Dyke. The agricultural, semi-rural Fen edge landscape makes a positive contribution to the value of the asset.	The existing village setting will be altered by the temporary presence of construction works in the north of the conservation area, and to the north-east of the conservation area. This will slightly alter the character of the countryside that forms the setting of the asset. This will affect the ability to understand its historic interest as an historic, rural village.	Minor	Adverse	Slight	Adverse	Yes	The construction of the ventilation column in the north of the conservation area will alter the character of this part of the heritage asset. There will also be a permanent construction impact caused by the land access route to Ventilation Shaft 4. The presence of the A14 and associated screening, which has severed the conservation area from farmland to the north and east, reduces the extent of the impact from the main site on the setting of the conservation area. However, the scheme will be visible from the eastern end of the Conservation Area.	Minor	Adverse	Slight	Adverse	Yes	The Proposed Development will require sensor-activated lighting within the site and will introduce moving vehicles into the landscape. Both the lighting and movement have the potential to alter the rural setting of the conservation area, diminishing the contribution it makes to the value of the heritage asset. However, the A14 is situated between the Puroposed Development and the asset, creating existing noise, light and movement. As such, the impact caused by the operation of the Proposed Development is diminished slightly.	Negligible	Adverse	Slight	Adverse
HE097	Moderate	Value is derived from the buildings in the village centre, which provide architectural interest. Historic interest is derived from the historic street pattern of the village. The surrounding rural landscape makes a positive contribution to the asset's value.	The existing village setting will be altered by the temporary presence of construction works in the countryside to the east of the village. This will slightly alter the character of the countryside that forms the setting of the conservation area. This will affect the ability to understand the historic interest of the asset as an historic, rural village.	Minor	Adverse	Slight	Adverse	Yes	The Proposed Development will result in a change to the farmland setting of the conservation area to its south-east.	Negligible	Adverse	Slight	Adverse	Yes	The Proposed Development will require sensor-activated lighting within the site and will introduce moving vehicles into the landscape. Both the lighting and movement have the potential to alter the rural setting of the conservation area slightly, diminishing the contribution it makes to the value of the heritage asset.	Negligible	Adverse	Slight	Adverse
HE098	Moderate	Value is derived from the historic buildings in the village centre, which provide architectural interest. The surrounding suburban development makes a negative contribution to the value of the asset.	No impact. The asset's village setting will not be altered by the construction proposed scheme, and the asset has no long views in the direction of the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. The asset's built- up village setting will not be altered by the construction of the proposed scheme, and the asset has no long views in the direction of the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. Due to the distance between the asset and the Proposed Development, there will be no change in the asset's setting or character.	No change	Neutral	Neutral	Neutral
HE099	Moderate	Value is derived from the buildings in the village centre, which provide architectural interest. The surrounding flat, Fenland landscape makes a positive contribution to the value of the asset.	The existing village setting will be altered by the temporary presence of construction traffic within the asset. This will adversely impact the heritage value of the asset, as it will temporarily alter the character of the quiet village that forms the asset's	Minor	Adverse	Slight	Adverse	No	No impact. The asset will not be altered by the construction of the proposed scheme, and it has no long views in the direction of the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. Due to the distance between the asset and the Proposed Development, there will be no change in the asset's setting or character.	No change	Neutral	Neutral	Neutral

HE1007	Medium	It is of medium heritage value due to its historic form and architectural interest as a defensive World War II structure. Its river setting makes a positive contribution to its value, as it allows for an understanding of its function.	NO	No impact. The asset's setting does not extend to the Proposed Development, and as such the asset will have no intervisibility with the scheme.	No change	Neutral	Neutral	Neutral	No.	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	No impact. Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1011	Medium	It is of medium heritage value due to its historic form and architectural interest as a defensive World War II structure. Its setting makes a negative contribution to its value.	No	No impact. The asset's setting does not extend to the Proposed Development and, as such, the asset will have no intervisibility with the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	No impact. Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1074	Medium	It is of medium heritage value due to its historic form and fabric. Its largely unchanged rural setting provides historical context for the asset as a 19th rural inn situated along the country road, and therefore makes a positive contribution to its value.	Yes	There will be a temporary construction impact on the asset's setting due to the presence of construction traffic travelling past the asset. Although the asset is located close to a road, this increase in traffic will contribute to a degradation of the asset's rural setting.	Negligible	Adverse	Minor	Adverse	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	Due to the distance between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1141	Medium	It is of medium heritage value as a 19th century farmhouse, which provides architectural and historic interest. The asset's rural setting is largely unchanged, providing continuity in the historic relationship showing the agricultural practices and farms which still reside along Clayhythe Road. Its setting it therefore makes a positive contribution to its value.	Yes	There will be a temporary construction impact on the asset's setting due to the presence of construction traffic travelling past the asset. This will alter the existing rural setting of the asset.	Negligible	Adverse	Minor	Adverse	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	Due to the distance between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1186	Medium	It is of medium heritage value due to its historic form and architectural interest as a defensive World War II structure. Its river setting makes a	No	No impact. HE1238	Medium	It is of medium heritage value due to its architectural and historic interest, which is derived from its surviving historic form and fabric as a row of cottages which allow for an appreciation of the village's rural origins. Its village setting contributes positively to its historic and architectural interest.	No	No impact. The asset's village setting does not extend to the Proposed Development and, therefore, will not be altered during construction.	No change	Neutral	Neutral	Neutral	No	No impact. The asset's village setting does not extend to the proposed scheme, and it will have no intervisibility with it. Its setting will not be affected.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral

1.1.6 The below, Table 1 - 5, provides an assessment of impact for known archaeological remains within the 500m study area. The UIDs in column one may be cross referenced with the UIDs in the Gazetteer of Assets (Application Document Ref 5.4.13.2) for further information on these assets. Operational effects on archaeological remains have been scoped out of this ES (see Chapter 13: Historic Environment, Application document 5.2.13) and are therefore not assessed here. No temporary effects from construction have been identified on archaeological remains. The potential for permanent effects from construction has been assessed for each asset. Where there is considered to be no potential for effect, the reason for this is given in the columns labelled 'scoping decision'.

#### Scoping of ZTV Assets 1.2

This section provides information on the scoping of assets within the ZTV study area, which was undertaken to determine if assets in the ZTV study area had the potential to be impacted by the Proposed Development. The below, Table 1-6, provides information on listed buildings within the ZTV study area. The UIDs in column one may be cross referenced with the UIDs in Gazetteer of Assets (Application Document Ref 5.4.13.2) for further information on these assets. 1.2.1

Table 1=_6: Liste	ed Buildings in the ZTV	study area					
UID	Heritage Value	Scoping decision					Comments
		Scoped for site survey?	Scoped for assessment?	Scoped out reason	Scoped out reason 'other'	Scoped out date	
HE012	High	În .	Out	No intervisibility. Character of asset's setting will be unchanged; asset's setting does not extend to the proposed CWWTP.	-	<u>.</u>	Asset is not in the ZTV, or any other study area, but was raised as a consideration by Historic England and has therefore been assessed here. Site survey determined that the setting was much altered by the presence of busy modern roads and the experience of the church within its church yard would not be altered by the introduction of the Pcroposed Development.
