1 Introduction

1.1 Note on the advertisement's formatting.

- 1.1.1 The copies of the Statement of Community Consultation (SoCC) advertisements within this appendix do not feature a header containing the title, page number, or other traditional elements typically found in a newspaper article. The reason for this absence is that the proofs represent full-page advertisements rather than an editorial piece. As such, it lacks the conventional elements of a news article header and includes only the content related to the advertisement itself. The front covers of the 09 June 2021 editions of Cambridge News and Cambridge Independent, in which the SoCC advertisements were published, are included in this appendix.

Cambridge Waste Water Treatment Plant Relocation Project

Notice publicising a Statement of Community Consultation in accordance with Section 47 (6) of the Planning Act 2008

The Project

Anglian Water Services Limited of Lancaster House, Lancaster Way, Ermine Business Park, Huntingdon, Cambridgeshire ("Anglian Water") is proposing to relocate its Cambridge Waste Water Treatment Plant on Cowley Road and build a new, low carbon waste water treatment plant that will continue to provide vital services for the community and the environment, recycling water and nutrients, producing green energy, and helping Cambridge to grow sustainably.

South Cambridgeshire District Council and Cambridge City Council recently consulted on a draft Area Action Plan (AAP) for a new low carbon city district in North East Cambridge, which could create 8,000 homes and 20,000 jobs over the next 20 years. Achieving the regeneration of the area relies on the relocation of Anglian Water's Cambridge Waste Water Treatment Plant. Anglian Water will work closely with stakeholders and the local community to develop the project with consideration to the feedback it receives.

The relocation project is a Nationally Significant Infrastructure Project (NSIP). Accordingly, Anglian Water must submit an application for a Development Consent Order (DCO) to the Secretary of State for the Environment, Food and Rural Affairs (DEFRA) under Section 37 of the Planning Act 2008.

Statement of Community Consultation

As part of the relocation project, Anglian Water has a duty to consult the local community under Section 47 of the Planning Act 2008. Anglian Water has therefore prepared a Statement of Community Consultation (SoCC) that explains how people living in the vicinity of the site will be consulted throughout the pre-application process and how it intends to consult on the Preliminary Environmental Information which will inform the final Environmental Statement. The consultation process is designed to provide information about the project

and provide the opportunity for local communities to have their say and help develop the proposals.

This advertisement provides formal notice of the publication of the SoCC which can be viewed and downloaded free of charge on the project website www.cwwtpr.com. Hard copies are also available to take away free of charge from the Community Access Point (CAP) sites listed below.

The Consultation Process

Anglian Water also announces its phase two public consultation. This consultation is being held between **23 June - 18 August 2021**. During this time, Anglian Water will host a series of consultation activities, which are available to all interested members of the community and explained in the SoCC. Members of the public can view our virtual exhibition which can be accessed via the project website. All consultation material will be available to view and download free of charge on our website from 23 June 2021.

Hard copies of consultation materials will be available to take away free of charge during our phase two consultation period from the CAP sites listed. Consultation documents will also be able to be requested in large print, audio or braille formats by contacting us using the details below. Requests for translated summary documents will be considered on a case-by-case basis.

Feedback can be provided during our phase two consultation through our digital engagement platform, accessible via our website. Feedback forms and FREEPOST envelopes will also be available from the CAP sites listed or to download directly from our website and emailed or posted back to us. All feedback must be received by 23:59 on **18 August 2021**.

Community Access Point (CAP) sites

- **South Cambridgeshire District Council**, South Cambridgeshire Hall, Cambourne Business Park, Cambourne, Cambridge, CB23 6EA: Currently accessible by appointment, due to COVID-19 restrictions
- **East Cambridgeshire District Council**, The Grange, Nutholt Lane, Ely, CB7 4EE: Currently closed, but this remains subject to change in line with latest COVID-19 restrictions

Inside Culture: Interviews with James Blunt and Mark Watson

'I thought I was dying... others need to hear this'

Exclusive Long Covid sufferer Adelina tells how she went from being virtually paralysed to riding a bike in 12 days

By Alex Spencer
alex.spencer@liffemedia.co.uk

Inside: East West Rail
As consultation closes, there's a fresh protest, a new petition and an MP's verdict
page 7

A Cambridge businesswoman has told how she was preparing to die just days after being struck down by symptoms so serious she could not remember how to do basic tasks and had crushing fatigue that left her almost paralysed.

Adelina Chalmers, 38, pictured, was left exasperated when doctors could not find an explanation for what seemed to be her long Covid symptoms.

"Overnight, it had got really bad and was much worse than Covid itself. I thought I was going to die," she said.

She was so distraught she began investigating assisted suicide.

But then Adelina, known to clients

as the Geek Whisperer in her role as a consultant to technology and engineering companies, had a chance phone conversation with a doctor friend in Europe about nutritional deficiencies being noticed in long Covid patients.

"That changed everything - and two weeks after seeking a simple treatment at a Cambridge clinic she is back on her feet, making plans to return to work and has even enjoyed her first bike ride.

"If I hadn't been given the right treatment, I would have ended up disabled," she said. "I want to tell people about this."
