### **The Great Ouse Boating Association Limited.**

This interests our association in that we own a riverside mooring close to the Waterbeach sewerage diversion works. From drawings supplied we have deduced that, though the works will be close, we will not be affected. However, we learn that Anglia Water have since asked for navigation rights on the river Cam to be “permanently extinguished” at an area around the sewage outfall between Horningsea and Fen Ditton. This was never discussed at earlier meetings with the project planners and we would strongly object to this proposal.
