

STP Supporting Information

QUESTION 1.4.4.2: Have you engaged with your Sustainability and Transformation Partnership?
More information on STPs can be found here: [NHS England > System change \(STPs and ICSs\)](#)

SUSTAINABILITY AND TRANSFORMATION PARTNERSHIPS

The NHS and local government officers in Cambridgeshire have come together to develop a major new plan to keep Cambridgeshire and Peterborough *Fit for the Future*. The Sustainability and Transformation Partnership covers hospital services, community healthcare, mental health, social care and GP services. The STP’s plan (prepared in October 2016) aims to:

- improve the quality of the services it provides;
- encourage and support people to take action to maintain their own health and wellbeing;
- ensure that its health and care services are financially sustainable and that it makes best use of the money allocated to it;
- align NHS and local authority plans.

Fit for the Future sets out a single overall vision for health and care, including:

- supporting people to keep themselves healthy
- primary care (GP services)
- urgent and emergency care
- planned care for adults and children, including maternity services
- care and support for people with long term conditions or specialised needs, including mental ill health.

Through discussion with staff, patients, carers and partners the STP has identified four priorities for change and developed a 10-point plan to deliver these priorities:

| Fit for the Future programme | |
|---|---|
| At home is best | 1. People powered health and wellbeing 2. Neighbourhood care hubs |
| Safe and effective hospital care, when needed | 3. Responsive urgent and expert emergency care 4. Systematic and standardised care 5. Continued world-famous research and services |
| We're only sustainable together | 6. Partnership working |
| Supported delivery | 7. A culture of learning as a system 8. Workforce: growing our own 9. Using our land and buildings better 10. Using technology to modernise health |

As part of the overall Health strategy for the proposed development it will be important to discuss existing issues, potential impacts arising from the scheme, and opportunities to address future needs, with Fit for Future
