Summary

This document provides a proportionate assessment of impact for all designated and non-designated assets within the 500m, 1km and ZTV study areas, as outlined in section 2 of the Historic Environment Baseline Report Application Document Ref 5.4.13.1. This includes: listed buildings, scheduled monuments, registered parks and gardens, conservation areas, non-designated built heritage assets such as locally listed buildings and non-designated archaeological assets both identified by the CHER and by surveys undertaken for the proposed development. Historic landscape character areas are separately assessed in Application document reference 5.4.13.3. The methodology followed for this assessment of impact is provided in section 2 of the Historic Environment Baseline Report Application Document Ref 5.4.13.1. Significant effects, and other key effects, are described in the Historic Environmental Statement chapter (Application document reference 5.2.13).

1 Impact Assessment Tables

1.1.1 The tables included in this document provide a proportionate assessment of impact from the proposed development for all historic environment assets within the 500m, 1km and ZTV study areas. This impact assessment has been undertaken in accordance with the methodology described in section 2 of the Historic Environment Baseline Report (Application document reference 5.4.13.1). Assessment of impact is considered for temporary construction effects, permanent construction effects and operational effects, in accordance with this methodology.

1.1.2 The below tables, [Table 1.1+Table 1.4](#), [Table 1.2+Table 1.7](#), [Table 1.3+Table 1.8](#), [Table 1.4+Table 1.4](#) and [Table 1.5+Table 1.5](#), provide an assessment of impact for every asset identified in the 500m and 1km study areas. Where no impact has been identified the reason for this assessment has also been described.

1.1.3 For assets within the ZTV study area, as described in section 2 of the Historic Environment Baseline Report (Application document reference 5.4.13.1), a desk-based assessment and supplementary setting survey (see EVT048 in Gazetteer of Events (Application document reference 5.4.13.7) was undertaken to determine if assets identified had the potential to be impacted by the proposed development. Assets with the potential to be affected would be subject to an assessment of impact as applied to assets in the 500m and 1km study areas. However, survey of these assets identified no assets with the potential to be impacted. The below tables, [Table 1.6+Table 1.6](#), [Table 1.7+Table 1.7](#), [Table 1.8+Table 1.8](#) and [Table 1.9+Table 1.9](#), provide the reason each asset was scoped out of further assessment.

1.1 Impact Assessments

1.1.1 The below, [Table 1.1+Table 1.4](#), provides an assessment of impact for listed buildings within the 1km study area. The project specific Unique Identifiers (UIDs) in column one may be cross referenced with the UIDs in Gazetteer of Assets (Application Document Ref 5.4.13.2) for further information on these assets.

Table 1.1: Listed Buildings impact assessment

UID	Heritage Value	Value Description	Construction phase - temporary				Construction phase - permanent				Operation phase									
			Impact?	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Impact?	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Impact?	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type
HE005	High	It is of high heritage value due to its historic and architectural interest, derived from its early architectural form and fabric. The churchyard and surrounding village are key element of the asset's setting which also contribute to its heritage value. In particular, the church's location on St John's Lane references the historic interest of the route to the River Cam. The dense residential development, tall hedgerows and narrow lanes in the vicinity impede long views towards the asset. This is an important element to the asset's value which has been negatively impacted.	No	No impact. Due to the distance between the asset and the Proposed Development, and the lack of intervisibility between the two, the asset's setting will not be altered during construction.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE006	High	It is of high heritage value due to its architectural and historic interest as a dwelling with a long history. The modern development in the vicinity of the asset diminishes the contribution the asset's setting makes to its value.	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and no construction works in the asset's vicinity. Therefore, the asset's setting will not be altered during the construction phase.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE007	High	It is of high heritage value due to its architectural interest, derived from its early architectural form and fabric. The village setting contributes significantly to the value of the church.	Yes	The asset is located to the north-west of the Proposed Development in the village of Waterbeach, which aids in the appreciation of the asset as a village church. The existing village setting will be altered by the temporary presence of construction traffic immediately adjacent to the asset. This will adversely impact the heritage value of the asset, as it will temporarily alter the quiet village that forms the setting of the asset. This will affect the ability to understand the historic interest of the asset as a village church.	Negligible	Adverse	Slight	Adverse	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE008	High	It is of high heritage value due to its architectural and historic interest as an important historic building within Fen Ditton. The surrounding farm buildings within the asset's setting make a positive contribution to its value, as they facilitate understanding of it as a rural Hall. Due to its location on the edge of Fen Ditton and set back from the High Street, it has a limited visual relationship with the rest of the village, though it is a key part of the history of the village.	No	No impact. There will be no intervisibility between the asset and the Proposed Development, nor construction works in the asset's vicinity. Therefore, the asset's setting will not be altered during the construction phase.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE009	High	It is of high heritage value due to its architectural and historic interest, derived from its early architectural form and fabric, and setting within a rural village. The historic village setting contributes significantly to the value of the church.	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and no construction works in the asset's vicinity. Therefore, the asset's setting will not be altered during the construction phase.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE010	High	It is of high heritage value due to its architectural and historic interest as an early example of a rectory building. Its setting, in close proximity to the Parish Church of St Mary the Virgin, and its prominence within Fen Ditton contribute to its value. The asset's extensive grounds, extending to the River Cam, provide a close relationship with the surrounding natural landscape and	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and no construction works in the asset's vicinity. Therefore, the asset's setting will not be altered during the construction phase.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral

UID	Heritage Value	Value Description	Construction phase - temporary				Construction phase - permanent				Operation phase									
			Impact?	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Impact?	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Impact?	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type
		emphasises the rural character of the building.																		
HE011	High	It is of high heritage value due to its architectural and historic interest, derived from its surviving historic fabric and historic value through its association with the Bishops of Ely. Its agricultural setting is a key element of the asset's value, as it facilitates understanding of the building's historic relationship with the surrounding farmland that once served the Abbey.	Yes	The asset is located immediately north of the Proposed Development. Its setting is principally characterised by the surrounding agricultural landscape. The existing rural setting of the asset will be altered by the temporary presence of construction machinery in close proximity to the asset, creating additional noise, movement and light in the asset's setting. This will adversely impact the heritage value of the asset, as it will temporarily alter the farmland that forms the setting of the asset. This will affect the ability to understand the heritage interest of the asset as a farmhouse. There will also be a temporary negligible impact caused by vibration created by the sheet piling works 320m from the Abbey.	Minor	Adverse	Moderate	Adverse	Yes	The Proposed Development, including landscaping, substantial tree planting and new street lighting along the B1047 Horningsea Road, will be visible in the landscape within the setting of Biggin Abbey. This will alter the flat, agricultural fenland that currently surrounds and characterises the asset's setting, reducing its relationship with an historically agricultural landscape. This will slightly diminish the contribution setting makes to the heritage value of Biggin Abbey.	Minor	Adverse	Moderate	Adverse	Yes	The Proposed Development will require new lighting along the B1047 Horningsea Road, as well as sensor-activated lighting within the site. It will also introduce the movement of vehicles throughout the site. Both the lighting and movement have the potential to alter the rural setting of Biggin Abbey, diminishing the contribution it makes to the value of the heritage asset.	Negligible	Adverse	Slight	Adverse
HE013	High	It is of high heritage value due to its architectural and historic interest as an example of a substantial farmhouse situated prominently within Fen Ditton. Its setting with other agricultural buildings in the vicinity emphasises the asset's location in an historic, rural village, which contributes to its value. Additionally, despite modern development within the setting of the asset, it retains a visual relationship with the other historic buildings in the area, like Manor Farmhouse to the south-west.	Yes	This asset is located to the south of the Proposed Development. Its setting is principally characterised by its village-edge location, with views across the countryside to the north. The existing setting will be temporarily altered due to the temporary presence of construction machinery to the north of the asset. This will slightly alter the rural character of the asset's setting, impacting the heritage value of the asset. However, this will not compromise the ability to understand the asset as a farmhouse, situated within its farmyard.	Negligible	Adverse	Slight	Adverse	Yes	The scheme will be visible in the distance within the setting of this asset to the north, altering the asset's setting slightly. This constitutes an adverse effect on the heritage value of the asset, as it will alter the ability to appreciate the rural character of the asset's setting. However, despite the insertion of the scheme into the landscape, overwhelmingly the setting will remain recognisably rural.	Negligible	Adverse	Slight	Adverse	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE014	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric, which allow for an understanding of the historic prominence of agriculture within the village. The asset's setting, close to other heritage assets, makes a positive contribution to its value, as it allows for an understanding of the village's development. However, it has a limited relationship with the surrounding countryside, due to extensive development in its backlands. The changed setting, therefore, diminishes the contribution that the setting makes to the value of the asset.	Yes	Construction activity, including additional noise and light have the potential to alter the rural character of the asset's setting to the north. However, due to the asset's location within an urban village context surrounded by vegetation, there is limited intervisibility between the asset and the Proposed Development, with only small glimpses of activity likely.	Negligible	Adverse	Slight	Adverse	No	No impact. Due to the distance and intervening vegetation between the asset and the Proposed Development, it is unlikely that there would be a permanent impact on the setting of this asset. The aspects of the asset's setting which contribute to its character, namely its village setting and other historic buildings in the vicinity, will not be affected by the Proposed Development.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE015	High	It is of high heritage value due to its architectural and historic interest, derived from its historic fabric and agricultural heritage. The asset's setting, close to Ditton Hall and other ancillary buildings, preserves the ability to understand the asset as part of an historic estate, which makes a positive contribution to its value.	No	No impact. The asset has no views in the direction of the asset, and as such, its setting, namely the surrounding ancillary agricultural buildings and the River Cam, will not be affected by the Proposed Development.	No change	Neutral	No effect	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by its construction.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE016	High	It is of high heritage value due to its historic interest, provided by its age, and architectural interest, with its high-quality design and craftsmanship, evident along the garden façade in particular. The asset's setting within parkland and with ancillary buildings in the vicinity makes a positive contribution to its value, as it preserves the ability to understand the asset as part of an historic estate.	No	No impact. Due to the distance between the Proposed Development and the asset, it is considered that the asset's rural, parkland setting will not be altered during construction.	No change	Neutral	No effect	Neutral	No	No impact. The Quy Hall estate is bounded by mature vegetation, which inhibits long views towards the Proposed Development. Additionally, due to the distance between the Proposed Development and the asset, it is unlikely that its construction will alter the asset's setting in any way - in particular the arrangement of formal gardens with parkland beyond, which facilitate understanding of the Hall as part of an historic estate.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE017	High	It is of high heritage value due to its architectural and historic interest as an example of a 20th century suburban church. The residential, suburban setting of the church	No	No impact. The urban setting of this church does not extend to the proposed scheme and features existing noise and light. Therefore, the ability to appreciate	No change	Neutral	No effect	Neutral	No	No impact. The urban setting of this church does not extend to the proposed scheme, and the ability to appreciate it as a	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the	No impact	Neutral	No effect	Neutral

		reflects the 20th century growth of this area of Cambridge, therefore contributing to the ability to understand the age and cause of the church's development. Despite its large tower, the church has a limited visual presence within the surrounding area.		It as a suburban 20th century church will not be affected.							suburban 20th century church will not be affected.						value of the asset and its setting will not be altered by the scheme.				
HE018	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. It has group value with the other heritage assets in Milton. However, the character has been altered by extensive modern development in Milton, which has increased the density of the settlement and reduced the intervisibility with Milton's historic environment.	No	No impact. The asset's urban village setting has existing noise and light and has no intervisibility with the Proposed Development. The Proposed Development will not alter the ability to understand the asset as part of a historic village.	No change	Neutral	No effect	Neutral	No	No impact. The Proposed Development will not be visible from the asset and will not alter the ability to understand the asset as part of a historic village.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral	
HE019	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. It has group value with the other heritage assets in Milton. However, the character has been altered by extensive modern development in Milton, which has increased the density of the settlement and reduced the intervisibility with Milton's historic environment.	No	No impact. The asset's urban village setting has existing noise and light and has no intervisibility with the Proposed Development. The Proposed Development will not alter the ability to understand the asset as part of a historic village.	No change	Neutral	No effect	Neutral	No	No impact. The Proposed Development will not be visible from the asset and will not alter the ability to understand the asset as part of a historic village.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral	
HE020	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. The character has been altered by extensive modern development in Milton, which has increased the density of the settlement and reduced the intervisibility between any remaining historic assets.	No	No impact. The asset's urban village setting has existing noise and light and has no intervisibility with the Proposed Development. The Proposed Development will not alter the ability to understand the asset as part of a historic village.	No change	Neutral	No effect	Neutral	No	No impact. The Proposed Development will not be visible from the asset and will not alter the ability to understand the asset as part of a historic village.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral	
HE021	High	It is of high heritage value due to its architectural and historic interest, derived from its prominence within the village depicting the local war effort. Only the public house, to the east, holds a historic relationship to the heritage asset, with the modern development setting diminishing the value and setting of the memorial.	No	No impact. The asset's built-up village setting will not be altered by the construction of the proposed scheme, and the asset has no long views in the direction of the scheme.	No change	Neutral	No effect	Neutral	No	No impact. The Proposed Development will not be visible from the asset and will not alter the ability to understand the asset as part of a historic village.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral	
HE022	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. It has group value with the other heritage assets in Milton. Late 20th- early 21st century housing located along Fen Road has changed and negatively contributed to the setting of the asset which historically was largely rural.	No	No impact. The asset's built-up village setting will not be altered by the construction proposed scheme, and the asset has no long views in the direction of the scheme.	No change	Neutral	No effect	Neutral	No	No impact. The Proposed Development will not be visible from the asset and will not alter the ability to understand the asset as part of a historic village.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral	
HE023	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. It has group value with the other heritage assets in Milton. Late 20th- early 21st century housing located along Fen Road has changed and negatively contributed to the setting of the asset which historically was largely rural.	No	No impact. The mature vegetation that surrounds the asset limits long views from the asset towards the scheme.	No change	Neutral	No effect	Neutral	No	No impact. The Proposed Development will not be visible from the asset and will not alter the ability to understand the asset as part of a historic village.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral	
HE024	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. Set away from Green End, the formed relationship of the river has not been interrupted and the trees inhibit intervisibility with the few other historic buildings located nearby.	No	No impact. Due to the distance and lack of intervisibility between the asset and the Proposed Development, the rural character of the asset's setting will not be affected during construction.	No change	Neutral	No effect	Neutral	No	No impact. Due to the distance and lack of intervisibility between the asset and the Proposed Development, the rural character of the asset's setting will not be affected by its construction.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral	
HE025	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. The wall has a limited presence within the village,	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and no construction works in the asset's vicinity. Therefore, the	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the	No impact	Neutral	No effect	Neutral

		overshadowed by mature trees. Its setting comprises the grounds of Ditton Hall which is contained by another outer boundary wall.		asset's setting will not be altered during the construction phase.							will not be altered by the construction of the scheme.						value of the asset and its setting will not be altered by the scheme.				
HE026	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. South of the country lane displays little change, in contrast to the modern housing located to the north. This disrupts the historic relationship of Greens End and Grassy Cottage.	No	No impact. Due to the distance and lack of intervisibility between the asset and the Proposed Development, the rural character of the asset's setting will not be affected during construction.	No change	Neutral	Neutral	Neutral	No	No impact. Due to the distance and lack of intervisibility between the asset and the Proposed Development, the rural character of the asset's setting will not be affected by its construction.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral	
HE027	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. South of the country lane displays little change, in contrast to the modern housing located to the north. This disrupts the historic relationship of Greens End and the listed building.	No	No impact. The asset is surrounded by 20th century development, which has limited long views towards the Proposed Development.	No change	Neutral	Neutral	Neutral	No	No impact. The asset is surrounded by 20th century development, which limits long views towards the Proposed Development. As such, the asset will not be affected by the construction of the scheme.	No change	Neutral	Neutral	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral	
HE028	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. The position of the cottages provides evidence of the historic and original settlement pattern, which was predominantly linear. The housing along this street is sympathetic, continuing to line the road. The grade II* listed Old Rectory opposite, the Parish Church of St Mary the Virgin's (grade II* listed) boundary wall and Church Street make a positive contribution to its setting.	No	No impact. There will be no construction works in the asset's vicinity and the Proposed Development will not be visible from the asset. As such, it will not alter the ability to understand it as an historic building within a historic village.	No change	Neutral	Neutral	Neutral	No	No impact. The density of development and narrow street width means that there are no views from the asset out of its immediate surroundings. As such, the asset's village setting will not be affected by the Proposed Development.	No change	Neutral	Neutral	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral	
HE029	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. It has group value with the other heritage assets in Fen Ditton.	No	No impact. There will be no construction works in the asset's vicinity and the Proposed Development will not be visible from the asset. As such, it will not alter the ability to understand it as an historic building within a historic village.	No change	Neutral	Neutral	Neutral	No	No impact. The density of development and narrow street width means that there are no views from the asset out of its immediate surroundings. As such, the asset's village setting will not be affected by the Proposed Development.	No change	Neutral	Neutral	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral	
HE030	High	It is of high heritage value due to its architectural and historic interest, derived from its use of traditional materials in a rural setting. Modern development has increased the density of the surrounding area and diminished its historic character. However, the mature trees and hedgerows in the vicinity of the asset retain the area's rural character to an extent. Overall, setting makes a positive contribution to the value of this asset.	Yes	Construction activity, including additional noise and light from the shaft 4 compound and waste water transfer tunnel construction to the north, have the potential to alter the rural character of the asset's setting to the north. However, due to the asset's location within an urban village context surrounded by vegetation, there is limited intervisibility between the asset and the Proposed Development, with only small glimpses of activity likely. As such, any impacts are unlikely to affect the character of the asset's setting, and therefore the asset's value.	Negligible	Adverse	Slight	Adverse	No	The Intermediate Shaft 4 will potentially be visible to the north within the setting of this asset. However, despite this insertion, the asset's village edge setting will remain recognisably rural.	Negligible	Adverse	Slight	Adverse	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral	
HE031	High	It is of high heritage value due to its architectural and historic interest, derived from its prominence within the village. It has group value with the rest of the heritage assets in Fen Ditton.	No	No impact. There will be no construction works in the asset's vicinity and the Proposed Development will not be visible from the asset. As such, it will not alter the ability to understand it as an historic building within a historic village.	No change	Neutral	Neutral	Neutral	No	No impact. The density of development and narrow street width means that there are no views from the asset out of its immediate surroundings. As such, the asset's village setting will not be affected by the Proposed Development.	No change	Neutral	Neutral	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral	
HE032	High	This row of assets is of high heritage value due to their architectural and historic interest, derived from their former use as almshouses. This asset has group value with other heritage assets emphasising the relationship with the Parish Church of St Mary the Virgin, opposite, and the listed 16 Church Street, to the north.	No	No impact. There will be no construction works in the asset's vicinity and the Proposed Development will not be visible from the asset. As such, it will not alter the ability to understand it as an historic building within a historic village.	No change	Neutral	Neutral	Neutral	No	No impact. The density of development and narrow street width means that there are no views from the asset out of its immediate surroundings. As such, the asset's village setting will not be affected by the Proposed Development.	No change	Neutral	Neutral	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral	
HE033	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. Its setting also contributes to its value, including its prominence within the village and its group value with the	No	No impact. There will be no construction works in the asset's vicinity and the Proposed Development will not be visible from the asset. As such, it will not alter the ability to understand it as an historic building within a historic village.	No change	Neutral	Neutral	Neutral	No	No impact. The density of development and narrow street width means that there are no views from the asset out of its immediate surroundings. As such, the asset's village setting	No change	Neutral	Neutral	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme. 		rest of the heritage assets in Fen Ditton, with which it has a strong relationship.								will not be affected by the Proposed Development.										
HE034	High	It is of high heritage value due to its architectural and historic interest, derived from its surviving historic form and fabric. Additionally, its setting makes a positive contribution to its value, due to its continued relationship with other heritage assets close by.	No	No impact. There will be no construction works in the asset's vicinity and the Proposed Development will not be visible from the asset. As such, it will not alter the ability to understand it as an historic building within a historic village.	No change	Neutral	Neutral	Neutral	No	No impact. The density of development and narrow street width means that there are no views from the asset out of its immediate surroundings. As such, the asset's village setting will not be affected by the Proposed Development.	No change	Neutral	Neutral	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE035	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and fabric, and its relationship with other heritage assets close by. The building is not dominated by its surroundings and remains a prominent building which positively contributes to its historic value.	No	No impact. There will be no construction works in the asset's vicinity and the Proposed Development will not be visible from the asset. As such, it will not alter the ability to understand it as an historic building within a historic village.	No change	Neutral	Neutral	Neutral	No	No impact. The density of development and narrow street width means that there are no views from the asset out of its immediate surroundings. As such, the asset's village setting will not be affected by the Proposed Development.	No change	Neutral	Neutral	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE036	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and fabric, and its setting on Fen Ditton's High Street where many historic assets still reside.	No	No impact. There will be no construction works in the asset's vicinity and the Proposed Development will not be visible from the asset. As such, it will not alter the ability to understand it as an historic building within a historic village.	No change	Neutral	Neutral	Neutral	No	No impact. The density of development and narrow street width means that there are no views from the asset out of its immediate surroundings. As such, the asset's village setting will not be affected by the Proposed Development.	No change	Neutral	Neutral	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE037	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and fabric. The asset's setting, which is largely unaltered, makes a positive contribution to its value.	No	No impact. There will be no construction works in the asset's vicinity and the Proposed Development will not be visible from the asset. As such, it will not alter the ability to understand it as an historic building within a historic village.	No change	Neutral	Neutral	Neutral	No	No impact. The density of development and narrow street width means that there are no views from the asset out of its immediate surroundings. As such, the asset's village setting will not be affected by the Proposed Development.	No change	Neutral	Neutral	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE038	High	It is of high heritage value derived from its historic interest as a 20th century feature of village life and association with Giles Gilbert Scott. It also has architectural interest as an iconic structure of the period. The setting of the asset allows for an understanding of it as a village telephone box.	No	No impact. There will be no construction works in the asset's vicinity and the Proposed Development will not be visible from the asset. As such, it will not alter the ability to understand it as an historic building within a historic village.	No change	Neutral	Neutral	Neutral	No	No impact. The density of development and narrow street width means that there are no views from the asset out of its immediate surroundings. As such, the asset's village setting will not be affected by the Proposed Development.	No change	Neutral	Neutral	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE039	High	It is of high heritage value due to its architectural and historic interest, which is derived from its historic form and appearance. Additionally, the asset's setting makes a positive contribution to its heritage value, due to the intervisibility between it and other heritage assets along Fen Ditton's High Street.	No	No impact. There will be no construction works in the asset's vicinity and the Proposed Development will not be visible from the asset. As such, it will not alter the ability to understand it as an historic building within a historic village.	No change	Neutral	Neutral	Neutral	No	No impact. The density of development and narrow street width means that there are no views from the asset out of its immediate surroundings. As such, the asset's village setting will not be affected by the Proposed Development.	No change	Neutral	Neutral	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE040	High	It is of high heritage value due to its architectural and historic interest, which is derived from its historic form and fabric, and the continued use of the farmhouse. The arable fields, ancillary barns and other buildings in the vicinity of the Hall help to understand its agricultural function and heritage. This makes a positive contribution to the value of the asset. However, the asset is situated close to the A14, which restricts its long views across the countryside to the north, negatively contributing to the value of the asset.	Yes	The asset is surrounded by the Proposed Development. The setting of the asset is characterised by the rural landscape and A14 road to the north. The existing rural setting of the asset will be temporarily altered by the presence of construction machinery and activity in close proximity to the asset, for example at the shaft 4 compound. This will create light and noise through movement of traffic and construction machinery. This will adversely impact the heritage value of the asset, as it will temporarily alter the rural landscape that forms the setting of the asset. This will affect the ability to understand the historic interest of the asset as a farmhouse. The asset's location close to the A14 means that there is existing light and noise within the asset's setting. However, the Proposed Development represents further degradation to the asset's agricultural setting. No impact is anticipated from the vibration created by the shaft site close to this asset.	Minor	Adverse	Moderate	Adverse	Yes	The Intermediate Shaft 4 will be situated south of the asset, altering the presently rural character of the asset's setting. Filtering will be offered by a small amount of intervening vegetation. In addition, the A14 and associated screening has severed the hall from farmland to the north and east, which separates the asset from the Proposed Development, reducing the severity of the impact from the proposed WWTP as a whole.	Minor	Adverse	Slight	Adverse	Yes	The Proposed Development will require sensor-activated lighting within the site and will introduce moving vehicles into the landscape. Both the lighting and movement have the potential to alter the rural setting of Poplar Hall, diminishing the contribution it makes to the value of the heritage asset. However, the A14 is situated in between the Proposed Development site and the heritage asset, which creates noise, light and movement. As such, the impact caused by the operation of the Proposed Development is diminished slightly.	Negligible	Adverse	Slight	Adverse
HE041	High	It is of high heritage value due to its architectural and historic interest, which is derived from its historic form and built fabric. Additionally, the asset's setting with other historic buildings located nearby positively	No	No impact. There will be no construction works in the asset's vicinity and the Proposed Development will not be visible from the asset due to intervening buildings. As such, it will not alter the	No change	Neutral	Neutral	Neutral	No	No impact. The density of development to the north of the asset means that there are no views from the asset towards the Proposed Development. As such, the asset's village setting	No change	Neutral	Neutral	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the	No impact	Neutral	No effect	Neutral

		contributes to the value of the asset, as it allows for an understanding of the history of the area.		ability to understand it as an historic building within a historic village.						will not be altered by the Proposed Development.						value of the asset and its setting will not be altered by the scheme.				
HE042	High	It is of high heritage value due to its historic interest, created through its possible association with Biggin Abbey in conjunction with the river and the building's historic use as a public house from the 19th to early 20th centuries. Additionally, the asset's historic form and fabric contributes to its architectural interest, and its setting positively contributes to the asset's value as it is largely unchanged from its rural historic setting.	Yes	The asset is situated to the north-west of the Proposed Development close to the River Cam, which forms a key part of the asset's setting. The existing setting of the asset will be altered by the temporary presence of construction machinery associated with the construction of the proposed Outfall Structure on the River Cam. The additional noise, light and movement caused during construction will alter the quiet river setting of the cottage. However, this would not be to the extent that it inhibits the ability to understand the asset as an historic rural cottage. This impact is minimised to an extent by the mature vegetation that surrounds the asset.	Negligible	Adverse	Slight	Adverse	No	No impact. Once constructed, the cottage will have very little intervisibility with the Outfall Structure and the Proposed Development. As such, the asset's rural, riverside setting will not be affected by the Proposed Development.	No change	Neutral	Neutral	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE043	High	It is of high heritage value due to its architectural and historic interest, which is derived from its historic form and fabric. The asset's setting also makes a positive contribution to the value of the asset, due to the number of historic buildings in the area.	Yes	This asset is located on the north side of High Ditch Road, to the south of the Proposed Development. Construction activity may be visible to the north of this asset beyond the A14, which has the potential to alter the rural character of the asset's setting slightly. This will adversely impact the heritage value of the asset. However, this will not compromise the ability to understand the asset as a farmhouse, situated within its farmyard.	Negligible	Adverse	Slight	Adverse	Yes	The scheme will be visible in the distance within the setting of this asset to the north, altering the asset's setting slightly. This constitutes an adverse effect on the heritage value of the asset, as it will alter the ability to appreciate the rural character of the asset's setting. However, despite the insertion of the scheme into the landscape, the setting will overwhelmingly remain recognisably rural.	Negligible	Adverse	Slight	Adverse	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE044	High	It is of high heritage value due to its architectural and historic interest, which is derived from the asset's historic form and fabric. The asset's setting also makes a positive contribution to the asset's value, as the number of historic buildings in the vicinity maintain the area's historic character.	No	No impact. There will be no construction works in the asset's vicinity and the Proposed Development will not be visible from the asset due to intervening buildings. As such, it will not alter the ability to understand it as an historic building within an historic village.	No change	Neutral	Neutral	Neutral	No	No impact. The density of development to the north of the asset means that there are no views from the asset towards the Proposed Development. As such, the asset's village setting will not be altered by the Proposed Development.	No change	Neutral	Neutral	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE045	High	It is of high heritage value due to its architectural and historic interest, which is derived from the asset's historic form and fabric. The asset's setting also makes a positive contribution to the asset's value, as the number of historic buildings in the vicinity maintain the area's historic character.	Yes	This asset is located on the north side of High Ditch Road, to the south of the Proposed Development. Construction activity may be visible to the north of this asset beyond the A14 and has the potential to slightly alter the rural character of the asset's setting. This will adversely impact the heritage value of the asset. However, it will not compromise the ability to understand the asset as a farmhouse, situated within its farmyard.	Negligible	Adverse	Slight	Adverse	Yes	The scheme will be visible in the distance within the setting of this asset to the north, altering the asset's setting slightly. This constitutes an adverse effect on the heritage value of the asset, as it will alter the ability to appreciate the rural character of the asset's setting. However, despite the insertion of the scheme into the landscape, the setting will overwhelmingly remain recognisably rural.	Negligible	Adverse	Slight	Adverse	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE046	High	It is of high heritage value due to its architectural and historic interest, which is derived from the asset's historic form and fabric. The asset's setting also makes a positive contribution to the asset's value, as the number of historic buildings in the vicinity maintain the area's historic character.	No	No impact. There will be no construction works in the asset's vicinity and the Proposed Development will not be visible from the asset due to intervening buildings. As such, it will not alter the ability to understand it as an historic building within an historic village.	No change	Neutral	Neutral	Neutral	No	No impact. The density of development to the north of the asset means that there are no views from the asset towards the Proposed Development. As such, the asset's village setting will not be altered by the Proposed Development.	No change	Neutral	Neutral	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE047	High	It is of high heritage value due to its architectural interest as a dovecote, and historic interest due to its original function as an agricultural building. The asset's setting also contributes to its value, as it is surrounded by buildings which maintain a farmyard character, though some are modern in age.	Yes	This asset is located on the north side of High Ditch Road, to the south of the Proposed Development within a farmyard with views of the countryside to the north. Construction activity may be visible to the north of this asset beyond the A14, which has the potential to alter the rural character of the asset's setting slightly. This will adversely impact the heritage value of the asset. However, this will not compromise the ability to understand the asset as a farmhouse, situated within its farmyard.	Negligible	Adverse	Slight	Adverse	Yes	The scheme will be visible in the distance within the setting of this asset to the north, altering the asset's setting slightly. This constitutes an adverse effect on the heritage value of the asset, as it will alter the ability to appreciate the rural character of the asset's setting. However, despite the insertion of the scheme into the landscape, the setting will overwhelmingly remain recognisably rural.	Negligible	Adverse	Slight	Adverse	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE048	High	It is of high heritage value due to its architectural and historic interest, which is derived from the asset's historic form and fabric. Its setting makes a negative contribution to the asset's value, due to the extent of modern development in its vicinity, which diminishes the ability to	Yes	No impact. The asset's village setting does not extend to the Proposed Development, and therefore will not be altered during construction.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	Neutral	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme. No impact	Neutral	No effect	Neutral
HE059	High	It is of high heritage value due to its architectural and historic interest, which is derived from its historic form and surviving historic fabric. The asset's setting also makes a positive contribution to the value of the asset, in particular the preserved close relationship between the asset and other historic buildings within Horningsea, which facilitate understanding of the historic appearance of the village.	No	No impact. The asset's village setting does not extend to the Proposed Development, and therefore will not be altered during construction.	No change	Neutral	Neutral	Neutral	No	No impact. The asset's village setting does not extend to the proposed scheme, and it will have no intervisibility with it. Its setting will not be affected.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE060	High	It is of high heritage value due to its architectural and historic interest. This is derived from its surviving historic form and fabric as a thatched cottage which allows for an appreciation of the village's rural origins. Its village setting contributes positively to its historic and architectural interest.	No	No impact. The asset's village setting does not extend to the Proposed Development, and therefore will not be altered during construction.	No change	Neutral	Neutral	Neutral	No	No impact. The asset's village setting does not extend to the proposed scheme, and it will have no intervisibility with it. Its setting will not be affected.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE061	High	It is of high heritage value due to its architectural and historic interest, which is derived from its historic form and surviving historic fabric. Additionally, its village setting with adjacent historic buildings positively contributes to the value of the asset.	No	No impact. The asset's village setting does not extend to the Proposed Development, and therefore will not be altered during construction.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE062	High	It is of high heritage value due to its architectural and historic interest, which is derived from its historic form and surviving historic fabric. Additionally, its village setting with adjacent historic buildings positively contributes to the value of the asset.	No	No impact. The asset's village setting does not extend to the Proposed Development, and therefore will not be altered during construction.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE063	High	It is of high heritage value derived from its historic interest as a 20th century feature of village life, and its association with Giles Gilbert Scott. It has architectural interest as an iconic structure of the period. Its village setting makes a positive contribution to its value.	No	No impact. There is dense, mature vegetation situated to the east of the asset, meaning that there will be no intervisibility between the Proposed Development and the asset. The asset's village setting does not extend to the proposed scheme, and therefore will not be altered during construction.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE064	High	It is of high heritage value due to its architectural and historic interest, derived from its historic fabric - particularly that which survives from the 17th century. This farmhouse allows for an appreciation of the village's agricultural and rural origins.	No	No impact. There is dense, mature vegetation situated to the east of the house, as well as a range of barns used for ancillary purposes and some residential. These inhibit long views towards the Proposed Development and, as such, the asset's setting will not be affected.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE065	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and fabric, which allows for an appreciation of the village's agricultural origins. Its rural village setting contributes positively to its heritage value.	No	No impact. The asset's farmyard setting does not extend to the Proposed Development and, therefore, it will not be altered during construction.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE066	High	It is of high heritage value due to its architectural and historic interest, which allows for an understanding of the 19th century expansion of Waterbeach. However, modern housing along the historic Cambridge Road has disrupted the asset's illustrative historic setting and value.	Yes	The asset is located to the north-west of the Proposed Development in the village of Waterbeach, which aids in the appreciation of the asset as a house within a village. The existing village setting will be altered by the temporary presence of construction traffic immediately adjacent to the asset. This will adversely impact the heritage value of the asset, as it will temporarily alter the quiet village that forms the setting of the asset.	Negligible	Adverse	Minor	Adverse	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral

No impact	Neutral	No effect	Neutral
HE070	High	It is of high heritage value, derived from its historic interest as a 20th century feature of village life and association with Giles Gilbert Scott. It has architectural interest as an iconic structure of the period.	No	No impact. The asset will have no intervisibility with the scheme, and its rural village setting will not be affected.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE071	High	It is of high heritage value, derived from its architectural and historic interest. This is derived from it being a rare example of a timber-framed barn, which allows for an appreciation of the village's agricultural origins. It has group value with Denny House, with which it shares historic interest. Its rural village setting contributes positively to its heritage value. However, modern housing along Waterbeach High Street has negatively impacted the value of the agricultural barn which historically would have been located along a rural country road.	No	No impact. The asset will have no intervisibility with the scheme, and its rural village setting will not be affected.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE072	High	It is of high heritage value, due to its architectural and historic interest, derived from it being an historic farmhouse composed of brick. It has group value with a small barn to the south. Its rural village setting contributes positively to its heritage value. However, modern housing along Waterbeach High Street has negatively impacted the value of the agricultural barn which historically would have been located along a rural country road.	No	No impact. The asset will have no intervisibility with the scheme, and its rural village setting will not be affected.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE073	High	It is of high heritage value, due to its architectural and historic interest, derived from its historic use as a coachman's house and surviving brickwork. It has group value with The Rookery opposite, as it allows for an understanding of the building's historic use. Its rural village setting contributes positively to this value. Modern housing contributes negatively towards its setting and the value of the asset.	No	No impact. The asset will have no intervisibility with the scheme, and its rural village setting will not be affected.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE074	High	It is of high heritage value due to its architectural and historic interest, derived from it being an early historic barn and its surviving timber-framed and thatch construction. It retains its rural village setting and has a historic relationship with Orchard House, which contribute positively to its heritage value.	Yes	The asset is located to the north-west of the Proposed Development in the village of Waterbeach, which aids in the appreciation of the asset as a barn within an historic village. The existing village setting will be altered by the temporary presence of construction traffic immediately adjacent to the asset. This will adversely impact the heritage value of the asset, as it will temporarily alter the quiet village that forms the setting of the asset.	Negligible	Adverse	Slight	Adverse	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE075	High	It is of high heritage value due to its architectural and historic interest, derived from its historic use as a rural cottage and surviving brick construction. Its rural village setting contributes positively to its heritage value.	Yes	The asset is located to the north-west of the Proposed Development in the village of Waterbeach, which aids in the appreciation of the asset as a house within an historic village. The existing village setting will be altered by the temporary presence of construction traffic immediately adjacent to the asset.	Negligible	Adverse	Slight	Adverse	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme. 				This will adversely impact the heritage value of the asset, as it will temporarily alter the quiet village that forms the setting of the asset.																
HE076	High	It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric. This allows for an understanding of the agricultural heritage of Waterbeach. The rural setting also positively contributes to its value through aiding understanding of its original agricultural use.	Yes	The asset is located to the north-west of the Proposed Development in the village of Waterbeach, which aids in the appreciation of the asset as a barn within an historic village. The existing village setting will be altered by the temporary presence of construction traffic immediately adjacent to the asset. This will adversely impact the heritage value of the asset, as it will temporarily alter the quiet village that forms the setting of the asset.	Negligible	Adverse	Slight	Adverse	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE077	High	It is of high heritage value due to its architectural and historic interest, derived from its architectural design and surviving historic fabric. This allows for an understanding of the agricultural heritage of Waterbeach. The garden and orchard setting of the asset positively contributes to its heritage value.	Yes	The asset is located in southern Waterbeach, to the north-west of the Proposed Development. Its village setting aids understanding of the asset as a substantial dwelling in an historic village. There will be a temporary construction impact on the asset's setting due to the presence of construction traffic travelling through the village. This will adversely impact the heritage value of the asset, as it will temporarily alter the quiet village that forms the setting of the asset, altering the experience of the asset as a rural house.	Negligible	Adverse	Slight	Adverse	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE078	High	It is of high heritage value due to its historic interest as a monument of importance to the local community. The setting positively contributes to its value as a memorial to the lost lives of the WWI.	Yes	The asset is located in southern Waterbeach, to the north-west of the Proposed Development. Its village setting aids understanding of the asset as a substantial dwelling in an historic village. There will be a temporary construction impact on the asset's setting due to the presence of construction traffic travelling through the village. This will adversely impact the heritage value of the asset, as it will temporarily alter the quiet village that forms the setting of the asset, altering the experience of the asset as a rural house.	Negligible	Adverse	Slight	Adverse	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme. No impact	Neutral	No effect	Neutral
HE079	High	It is of high heritage value due to its architectural and historic interest, derived from its surviving architectural form and character. The modern development along Way Lane has somewhat negatively impacted the setting of the asset, though trees and hedges near the asset have limited intervisibility between the modern buildings and the heritage asset.	No	No impact. The asset will have no intervisibility with the scheme, and its setting will not be affected.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE080	High	It is of high heritage value due to its historic interest as a farmhouse situated within its original, rural setting. It also has architectural interest due to its historic form and surviving historic fabric. The granary and barn associated with Eye Hall provides an historic relationship with the asset as they collectively formed part of the farmstead.	Yes	The asset is located to the south and west of the Proposed Development. The setting of the asset is the surrounding farmland, which aids in the appreciation of its historic function as a farmhouse. The existing rural setting of the asset will be altered due to the use of adjacent farm tracks for site access routes and construction traffic using Claythorpe Road to the west. This will adversely impact the heritage value of the asset, as it will temporarily alter the farmland that forms the setting of the asset. This will affect the ability to understand the historic interest of the asset as a former estate farmhouse and steading, surrounded by its farmland.	Minor	Adverse	Slight	Adverse	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE081	High	It is of high heritage value due to its historic interest as a barn situated within its original, rural setting. 		of Eye Hall, forming one side of the farmyard.		forms the setting of the asset. This will affect the ability to understand the historic interest of the asset as a former estate farmhouse and steading, surrounded by its farmland.																
HE082	High	It is of high heritage value due to its historic interest as a granary situated within its original, rural setting. It also has architectural interest due to its historic form and surviving historic fabric. The barn and associated Eye Hall provide an historic relationship with the asset as they collectively formed part of the farmstead. It has group value with Eye Hall, and the Barn to East of Eye Hall, forming one side of the farmyard.	Yes	The asset is located to the south and west of the Proposed Development. The setting of the asset is the surrounding farmland, which aids in the appreciation of its historic function as a farm building. The existing rural setting of the asset will be altered due to the use of adjacent farm tracks for site access routes and construction traffic using Clayhithe Road to the west. This will adversely impact the heritage value of the asset, as it will temporarily alter the farmland that forms the setting of the asset. This will affect the ability to understand the historic interest of the asset as a former estate farmhouse and steading, surrounded by its farmland.	Negligible	Adverse	Slight	Adverse	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE083	Medium	It is of medium heritage value due to its architectural and historic interest, derived from its surviving historic fabric and character. However, modern housing situated very close to the asset has negatively impacted the ability to appreciate its historic and architectural interest.	Yes	No impact. The asset's setting does not contribute to its value. The asset will have no intervisibility with the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE084	High	It is of high heritage value due to its architectural and historic interest, derived from its association with the Conservators of the River Cam, and its high-quality, decorative design. Clayhithe Road remains unchanged and continues to positively contribute to the value of the asset as a former turnpiked road controlled from the toll house.	Yes	This asset is located immediately north-west of the Proposed Development. The setting of the asset is principally characterised by the River Cam, arable fields and Clayhithe Road, which bridges the river adjacent to the heritage asset. This setting will be altered by the temporary presence of construction traffic on Clayhithe Road, which will diminish the ability to appreciate the rural nature of the asset and will increase noise and movement within the asset's setting. This will adversely impact the heritage value of the asset.	Negligible	Adverse	Minor	Adverse	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE085	High	It is of high heritage value due to its historic interest as a once important structure on the roadside. The asset's setting makes a positive contribution to its value, in particular its surviving relationship with the A1303 Newmarket Road which helps understanding of the building's historic purpose.	No	No impact. The asset will have no intervisibility with the scheme, and its setting will not be affected.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE086	High	It is of high heritage value, due to its architectural and historic interest, which is derived from its historic form and fabric. Additionally, its well-preserved rural setting, alongside buildings within Lock Farm, positively contribute to the value of the asset as an agricultural asset.	Yes	This asset is located to the north-east of the Proposed Development, adjacent to the River Cam to the east of Waterbeach. Its setting is principally characterised by its rural, tranquil setting. There will be a temporary construction impact on the asset's setting due to the presence of construction traffic in close proximity to the asset, affecting the ability to understand the asset as a rural barn.	Negligible	Adverse	Minor	Adverse	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE087	High	It is of high heritage value due to its architectural and historic interest as a former mill which has retained its relationship with the adjacent mill stream. The adaptive reuse of the asset and modern extensions of the hotel have negatively impacted its value, though the preserved historic fabric and features allow for a continued understanding of the original use of the asset. The setting is still predominantly rural, which positively contributes to the historic value of the former watermill.	No	No impact. The character of the asset's setting will not be affected by the proposed scheme due to the distance between the asset and the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. The character of the asset's setting will not be affected by the proposed scheme due to the distance between the asset and the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE088	High	It is of high heritage value due to its historic interest as a wall to the former mill which has retained its relationship with the adjacent mill stream. The adaptive reuse use of the mill and modern extension of the hotel has negatively impacted the setting of the wall which historically formed part of the boundary to the mill. The setting is still predominantly	No	No impact. The character of the asset's setting will not be affected by the proposed scheme due to the distance between the asset and the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. The character of the asset's setting will not be affected by the proposed scheme due to the distance between the asset and the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral

		rural, which positively contributes to the historic value of the former watermill boundary wall.																		
HE089	High	It is of high heritage value due to its architectural and historic interest as an 19th century ornament bridge. Quy Hall forms part of the asset's setting which positively contributes to the value of the bridge as the hall's former historic entrance. The bridge has group value with the rest of the Quy Hall estate.	No	No impact. The character of the asset's setting will not be affected by the proposed scheme due to the distance between the asset and the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. The character of the asset's setting will not be affected by the proposed scheme due to the distance between the asset and the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE090	High	It is of high heritage value due to its historic and architectural interest, derived from its historic form and fabric. The relationship between Quy Hall, the private road and these lodges are still understood. There is also little change in the setting of these assets, which is rural with open fields. The setting, therefore, positively contributes to the value of the asset. The lodges have group value with the rest of the Quy Hall estate.	No	No impact. The character of the asset's setting will not be affected by the proposed scheme due to the distance between the asset and the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. The character of the asset's setting will not be affected by the proposed scheme due to the distance between the asset and the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE091	High	It is of high heritage value due to its historic and architectural value, derived from its historic form and fabric. The relationship to Quy Hall, and the associated buildings, are still understood and there is little change in the setting of these assets, which is rural with open fields. Therefore, the setting positively contributes to the value of the asset. This garden feature has group value with the rest of the Quy Hall estate.	No	No impact. The character of the asset's setting will not be affected by the proposed scheme due to the distance between the asset and the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. The character of the asset's setting will not be affected by the proposed scheme due to the distance between the asset and the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE092	High	It is of high heritage value due to its historic and architectural value, derived from its historic form and fabric. The relationship to Quy Hall, and the associated buildings, are still understood and there is little change in the setting of these assets, which is rural with open fields. Therefore, the setting positively contributes to the value of the asset. This collective asset has group value with the rest of the Quy Hall estate.	No	No impact. The character of the asset's setting will not be affected by the proposed scheme due to the distance between the asset and the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. The character of the asset's setting will not be affected by the proposed scheme due to the distance between the asset and the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE093	High	It is of high heritage value due to its historic and architectural value, derived from its historic form and fabric. The relationship to Quy Hall, and the associated buildings, are still understood and there is little change in the setting of these assets, which is rural with open fields. Therefore, the setting positively contributes to the value of the asset. This asset has group value with the rest of the Quy Hall estate.	No	No impact. The character of the asset's setting will not be affected by the proposed scheme due to the distance between the asset and the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. The character of the asset's setting will not be affected by the proposed scheme due to the distance between the asset and the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE094	High	This row of assets is of high heritage value due to their architectural and artistic interest as a row of rural cottages still closely associated with the surrounding countryside. Wide grassy verges, hedgerows and mature trees help to reflect the historic, rural character of the village, which is otherwise diminished by the extent of modern development.	No	No impact. The character of the asset's setting will not be affected by the proposed scheme due to the distance between the asset and the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. The character of the asset's setting will not be affected by the proposed scheme due to the distance between the asset and the scheme.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral

1.1.2 The below, [Table 1.2/4-2](#), provides an assessment of impact for scheduled monuments within the 1km study area. The UIDs in column one may be cross referenced with the UIDs in Gazetteer of Assets (Application Document Ref 5.4.13.2) for further information on these assets.

Table 1.2: Impact to Scheduled monuments

UID	Heritage Value	Value Description	Construction phase - temporary				Construction Phase - permanent				Operation Phase									
			Construction Phase Temporary Impact	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Construction Phase Permanent Impact	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Operation Phase Impact	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type
HE001	High	Heritage value is derived from the archaeological remains and their ability to inform on nationally important archaeological deposits, especially relating to the evolution of settled sites over time.	None	No impact. There will be no physical effect to the remains and their setting does not extend to the proposed CWWTP.	x	x	x	x	None	No impact. There will be no physical effect to the remains and their setting does not extend to the proposed CWWTP.	x	x	x	x	None	No impact. The setting does not extend to the proposed CWWTP.	x	x	x	x
HE002	High	Heritage value is derived from the archaeological remains and their ability to inform on Roman occupation of the fens and the industrial use of this area during the period.	None	No impact. There will be no physical effect to the remains and their setting does not extend to the proposed CWWTP.	x	x	x	x	None	No impact. There will be no physical effect to the remains and their setting does not extend to the proposed CWWTP.	x	x	x	x	None	No impact. The setting does not extend to the proposed CWWTP.	x	x	x	x
HE003	High	Heritage value is derived from the archaeological remains and their ability to inform on the construction, management and use of an inland waterway during the Roman period.	None	No impact. The setting does not extend to construction activities.	x	x	x	x	None	No impact. The setting of the dyke is severed from the site by the River Cam and will not be altered by the proposed development.	x	x	x	x	None	No impact. The setting does not extend to the proposed CWWTP.	x	x	x	x
HE004	High	Heritage value is derived from the archaeological remains and their ability to inform on the religious history of the area and medieval occupation of the Fens. The asset's setting contributes to its rural character but does not aid understanding of the asset's heritage value. As such, setting is considered to make a neutral contribution to the asset's heritage value.	None	No impact. Construction traffic and activities will be separated from the asset by intervening built development and vegetation. Therefore, change in its setting will be minimal to none and will not affect value.	x	x	x	x	None	No impact. The site of the proposed CWWTP will not be visible from the asset due to topography and vegetation, therefore there will be no change within its setting.	x	x	x	x	None	No impact. The site of the proposed CWWTP will not be visible from the asset due to topography and vegetation, therefore there will be no change within its setting.	x	x	x	x

1.1.3 There are no registered parks and gardens within the 1km study area. Registered parks and gardens within the ZTV are assessed below in Section 1.2, [Table 1.8/1.9](#).

1.1.4 The below, [Table 1.3/1.4](#), provides an assessment of impact for conservation areas within the 1km study area. The UIDs in column one may be cross referenced with the UIDs in Gazetteer of Assets (Application Document Ref 5.4.13.2) for further information on these assets.

Table 1.3: Impact to Conservation Areas

UID	Heritage Value	Value Description	Construction phase - temporary				Construction Phase - permanent				Operation Phase								
			Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Construction Phase Permanent Impact	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Operation Phase Impact	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type
HE095	Moderate	Value is derived from the architectural interest of buildings like Biggin Abbey, located within the Conservation Area. The engineering of the lock itself provides historic interest, and archaeological interest is derived from medieval and post-medieval agricultural remains. The surrounding landscape contributes to the rural character of the asset.	The existing rural, river character of the conservation area will be altered by a construction compound located within the conservation area, the construction of a treated effluent discharge outfall structure and changes to the PRoW on the eastern side of the river. A PRoW through the conservation area is likely to be temporarily diverted during the construction phase, altering the way people engage with and appreciate the heritage asset.	Moderate	Adverse	Moderate	Adverse	Yes	There will be a permanent, physical impact due to the construction of riverbank protection works and outfall structure. Additionally, the Conservation Area Appraisal notes that Biggin Abbey is particularly prominent in views east from the river. These views (see viewpoint 11, Landscape Information paper) will be altered by the introduction of the Proposed Development into the landscape beyond Biggin Abbey, altering the character of the conservation area's setting.	Moderate	Adverse	Moderate	Adverse	Yes	The Proposed Development will require sensor-activated lighting within the site and will introduce moving vehicles into the landscape. Both the lighting and movement have the potential to alter the rural setting of the conservation area, diminishing the contribution it makes to the value of the heritage asset. However, the A14 is situated in close proximity, creating existing noise, light and movement. As such, the impact caused by the operation of the Proposed Development is diminished slightly.	Negligible	Adverse	Slight	Adverse
HE096	Moderate	Value is derived from the architectural interest of the buildings in the village centre, as well as the archaeological interest of ridge and furrow in surrounding fields and of Fleam Dyke. The agricultural, semi-rural Fen edge landscape makes a positive contribution to the value of the asset.	The existing village setting will be altered by the temporary presence of construction works in the north of the conservation area, and to the north-east of the conservation area. This will slightly alter the character of the countryside that forms the setting of the asset. This will affect the ability to understand its historic interest as an historic, rural village.	Minor	Adverse	Slight	Adverse	Yes	The construction of the ventilation column in the north of the conservation area will alter the character of this part of the heritage asset. There will also be a permanent construction impact caused by the land access route to Ventilation Shaft 4. The presence of the A14 and associated screening, which has severed the conservation area from farmland to the north and east, reduces the extent of the impact from the main site on the setting of the conservation area. However, the scheme will be visible from the eastern end of the Conservation Area.	Minor	Adverse	Slight	Adverse	Yes	The Proposed Development will require sensor-activated lighting within the site and will introduce moving vehicles into the landscape. Both the lighting and movement have the potential to alter the rural setting of the conservation area, diminishing the contribution it makes to the value of the heritage asset. However, the A14 is situated between the proposed development and the asset, creating existing noise, light and movement. As such, the impact caused by the operation of the Proposed Development is diminished slightly.	Negligible	Adverse	Slight	Adverse

UID	Heritage Value	Value Description	Construction phase - temporary					Construction Phase - permanent					Operation Phase						
			Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Construction Phase Permanent Impact	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Operation Phase Impact	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type
HE097	Moderate	Value is derived from the buildings in the village centre, which provide architectural interest. Historic interest is derived from the historic street pattern of the village. The surrounding rural landscape makes a positive contribution to the asset's value.	The existing village setting will be altered by the temporary presence of construction works in the countryside to the east of the village. This will slightly alter the character of the countryside that forms the setting of the conservation area. This will affect the ability to understand the historic interest of the asset as an historic, rural village.	Minor	Adverse	Slight	Adverse	Yes	The Proposed Development will result in a change to the farmland setting of the conservation area to its south-east.	Negligible	Adverse	Slight	Adverse	Yes	The Proposed Development will require sensor-activated lighting within the site and will introduce moving vehicles into the landscape. Both the lighting and movement have the potential to alter the rural setting of the conservation area slightly, diminishing the contribution it makes to the value of the heritage asset.	Negligible	Adverse	Slight	Adverse
HE098	Moderate	Value is derived from the historic buildings in the village centre, which provide architectural interest. The surrounding suburban development makes a negative contribution to the value of the asset.	No impact. The asset's village setting will not be altered by the construction proposed scheme, and the asset has no long views in the direction of the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. The asset's built-up village setting will not be altered by the construction of the proposed scheme, and the asset has no long views in the direction of the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. Due to the distance between the asset and the Proposed Development, there will be no change in the asset's setting or character.	No change	Neutral	Neutral	Neutral
HE099	Moderate	Value is derived from the buildings in the village centre, which provide architectural interest. The surrounding flat, Fenland landscape makes a positive contribution to the value of the asset.	The existing village setting will be altered by the temporary presence of construction traffic within the asset. This will adversely impact the heritage value of the asset, as it will temporarily alter the character of the quiet village that forms the asset's setting. This will affect the ability to understand the historic interest of the asset as an historic, rural village.	Minor	Adverse	Slight	Adverse	No	No impact. The asset will not be altered by the construction of the proposed scheme, and it has no long views in the direction of the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. Due to the distance between the asset and the Proposed Development, there will be no change in the asset's setting or character.	No change	Neutral	Neutral	Neutral

1.1.5 The below, [Table 1.4 Table 1.4](#), provides an assessment of impact for non-designated built heritage assets within the 500m study area. The UIDs in column one may be cross referenced with the UIDs in the Gazetteer of Assets (Application Document Ref 5.4.13.2) for further information on these assets.

Table 1.4: Impact to non-designated built heritage assets

UID	Heritage Value	Value Description	Construction phase - temporary					Construction phase - permanent					Operation phase							
			Impact?	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Impact?	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Impact?	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect type
HE1007	Medium	It is of medium heritage value due to its historic form and architectural interest as a defensive World War II structure. Its river setting makes a positive contribution to its value, as it allows for an understanding of its function.	No	No impact. The asset's setting does not extend to the Proposed Development, and as such the asset will have no intervisibility with the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	No impact. Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1011	Medium	It is of medium heritage value due to its historic form and architectural interest as a defensive World War II structure. Its setting makes a negative contribution to its value.	No	No impact. The asset's setting does not extend to the Proposed Development and, as such, the asset will have no intervisibility with the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	No impact. Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1074	Medium	It is of medium heritage value due to its historic form and fabric. Its largely unchanged rural setting provides historical context for the asset as a 19th rural inn situated along the country road, and therefore makes a positive contribution to its value.	Yes	There will be a temporary construction impact on the asset's setting due to the presence of construction traffic travelling past the asset. Although the asset is located close to a road, this increase in traffic will contribute to a degradation of the asset's rural setting.	Negligible	Adverse	Minor	Adverse	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	Due to the distance between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral

UID	Heritage Value	Value Description	Construction phase - temporary						Construction phase - permanent						Operation phase					
			Impact?	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Impact?	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Impact?	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect type
HE1141	Medium	It is of medium heritage value as a 19th century farmhouse, which provides architectural and historic interest. The asset's rural setting is largely unchanged, providing continuity in the historic relationship showing the agricultural practices and farms which still reside along Clayhythe Road. Its setting therefore makes a positive contribution to its value.	Yes	There will be a temporary construction impact on the asset's setting due to the presence of construction traffic travelling past the asset. This will alter the existing rural setting of the asset.	Negligible	Adverse	Minor	Adverse	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	Due to the distance between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1186	Medium	It is of medium heritage value due to its historic form and architectural interest as a defensive World War II structure. Its river setting makes a positive contribution to its value, as it allows for an understanding of its function.	No	No impact. Due to the distance and lack of intervisibility between the asset and the Proposed Development, the rural character of the asset's setting will not be affected during construction.	No change	Neutral	No effect	Neutral	No	No impact. Due to the distance and lack of intervisibility between the asset and the Proposed Development, the rural character of the asset's setting will not be affected by its construction.	No change	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1196	Medium	It is of medium heritage value due to its architectural interest. The relationship between Bannold Road and the River Cam is still understood. This is important to the asset's original function, which improved roads by controlling road access. Its setting therefore makes a positive contribution to its value.	Yes	There will be a temporary construction impact on the asset's setting due to the presence of construction traffic in close proximity to the asset, altering its tranquil setting.	Negligible	Adverse	Minor	Adverse	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and, therefore, the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	Due to the distance between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1303	Medium	It is of medium heritage value as an early pair of semi-detached houses dating to the 1920s, which hold architectural and historic interest as part of the suburban expansion of Cambridge during this period. Its setting, surrounded by other similar suburban housing, makes a positive contribution to its value.	No	The asset's setting does not extend to the Proposed Development, and as such the asset will have no intervisibility with the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	No impact. Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1304	Medium	It is of medium heritage value as a 1930s public house, though it retains almost none of its original interior, which diminishes its architectural interest. Its suburban setting contributes to its value, as it allows for an understanding of the asset as a suburban public house.	No	The asset's setting does not extend to the Proposed Development and, as such, the asset will have no intervisibility with the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	No impact. Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1056	Medium	It is of medium heritage value due to its historic interest and current use as a rural public house. Though there is modern development surrounding the asset, trees and hedgerows have helped the asset to retain a rural character. As such, the asset's setting makes a positive contribution to the value of the asset.	No	No impact. Due to the distance and lack of intervisibility between the asset and the Proposed Development, the rural character of the asset's setting will not be affected during construction.	No change	Neutral	No effect	Neutral	No	No impact. Due to the distance and lack of intervisibility between the asset and the Proposed Development, the rural character of the asset's setting will not be affected by its construction.	No change	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1173	Medium	It is of medium heritage value due to its historic and architectural interest. Its historic function is still understood as it is located alongside the	No	No impact. The asset's village setting does not extend to the Proposed Development and, therefore, will not be altered during construction.	No change	Neutral	No effect	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be	No change	Neutral	No effect	Neutral	No	Due to the distance and intervening vegetation between the asset and the Proposed Development, no impact is expected	Neutral	No effect	Neutral	Neutral

			Impact?	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Impact?	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Impact?	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect type
		road where houses of the same period still reside, continuing the historic relationship in Horningsea. As such, the asset's setting makes a positive contribution to the value of the asset.								altered by the construction of the scheme.						during operation as the character of the asset and its setting will be entirely preserved.				
HE1166	Medium	It is of medium heritage value due to its historic form and architectural interest as a defensive World War II structure. The asset's setting, close to the adjacent railway, makes a positive contribution to the value of the asset, as it allows for an understanding of the building's function.	No	No impact. The asset's setting close to the railway line will not be altered by the construction traffic associated with the Proposed Development. Additional traffic within the asset's setting will not alter the ability to understand or appreciate it.	No change	Neutral	No effect	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	Due to the distance and intervening vegetation between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved.	No change	Neutral	No effect	Neutral
HE1201	Medium	It is of medium heritage value due to its historic form as a river feature from the 19th century that is still in use today. Its river setting makes a positive contribution to the value of the asset, as it aids in understanding its function.		There will be a temporary construction impact on the asset's heritage value due to its proximity to the proposed Outfall Structure on the River Cam. The additional noise, light and movement caused during construction will alter the quiet river setting of the river lock; however, this would not be to the extent that it inhibits the ability to understand the asset as an historic rural cottage. This impact is minimised to an extent by the mature vegetation that surrounds the asset.	Negligible	Adverse	Minor	Adverse		No impact. Once constructed, the lock will have very little intervisibility with the Outfall Structure and the Proposed Development. As such, the asset's rural, river setting will not be affected by the Proposed Development.	No change	Neutral	No effect	Neutral	No	Due to the distance and vegetation situated between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1221	Medium	It is of medium heritage value due to its historic form and architectural interest as a defensive World War II structure. The asset's setting makes a positive contribution to the value of the asset, as it allows for an understanding of the building's function.	No	The asset's setting does not contribute to its value. The asset will have no intervisibility with the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	No impact. Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1231	Medium	It is of medium heritage value due to its historic and architectural interest as a post-medieval house. The asset's modern setting makes a negative contribution to its value, as it prevents understanding of its original historic context surrounded by farmland.	No	The asset's setting does not contribute to its value. The asset will have no intervisibility with the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	No impact. Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1232	Medium	It is of medium heritage value due to its historic and architectural interest as a post-medieval house. The asset's setting on the edge of Fen Ditton with low density development and open views to the west contributes to the ability to understand it as a typical domestic village building, and therefore makes a positive contribution to its value.	Yes	Construction activity, including additional noise and light within the Waterbeach Pipeline Construction Area and Shaft 4 compound, have the potential to alter the rural character of the asset's setting to the north. However, due to the asset's location within a village with vegetation to the east, there is limited intervisibility between the asset and the	Negligible	Adverse	Slight	Adverse	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	Due to the distance and vegetation situated between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral

			Impact?	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Impact?	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Impact?	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect type
				Proposed Development, with only small glimpses of activity likely. As such, any impacts are unlikely to affect the character of the asset's setting or, therefore, the asset's value.																
HE1233	Low	It is of low heritage value as it features traditional design and proportions but dates to the mid-20th century and as such has limited historic interest. Its rural village setting surrounded by vegetation makes a positive contribution to the value of the asset.	Yes	Construction activity, including additional noise and light created by the Waterbeach Pipeline Construction Area and Shaft 4 compound, have the potential to alter the rural character of the asset's setting to the north. However, due to the asset's location within an urban village context surrounded by vegetation, there is limited intervisibility between the asset and the Proposed Development, with only small glimpses of activity likely. As such, any impacts are unlikely to affect the character of the asset's setting or, therefore, the asset's value.	Negligible	Adverse	Slight	Adverse	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	Due to the distance and vegetation situated between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1234	Low	It is of low heritage value as a late 19th century farmhouse which has architectural interest as a landmark within the rural landscape north of Fen Ditton. Its rural setting makes a positive contribution to the value of the asset.	Yes	The asset is surrounded by the Proposed Development. The setting of the asset is characterised by the rural landscape, the River Cam and A14 road to the north. The existing rural setting of the asset will be altered by the temporary presence of construction machinery and activity associated with the Shaft 4 compound in close proximity to the asset. This will create light and noise through movement of traffic and construction machinery. This will adversely impact the heritage value of the asset, as it will temporarily alter the rural landscape that forms the setting of the asset. This will affect the ability to understand the historic interest of the asset as a farmhouse. No impact is anticipated from the vibration created by the shaft site close to this asset.	Minor	Adverse	Slight	Adverse	Yes	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	Yes	The Proposed Development will require sensor-activated lighting within the site and will introduce moving vehicles into the landscape. Both the lighting and movement have the potential to alter the rural setting of the asset, diminishing the contribution it makes to the value of the heritage asset. However, the A14 creates noise, light and movement, and is situated in between the Proposed Development site and the heritage asset. As such, the impact caused by the operation of the Proposed Development is diminished slightly.	Neutral	No effect	Neutral	Neutral

HE1235	Low	It is of low heritage value as a late 19th century dwelling associated with the Cambridge Sewage Farm and, more recently, the Waste Water Treatment Plant, which contributes to its historic interest.	Yes	The decommissioning of the existing Waste Water Treatment Plant will cause a construction impact due to additional noise and activity. There is existing activity, including the movement of large vehicles, associated with the operation of the Waste Water Treatment Plant, meaning the additional decommissioning activity represents only a minor increase.	Negligible	Adverse	Slight	Adverse	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	No impact. Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1236	Low	It is of low heritage value as a late 19th century dwelling associated with the Cambridge Sewage Farm and, more recently, the Waste Water Treatment Plant, which contributes to its historic interest.	Yes	The decommissioning of the existing Waste Water Treatment Plant will cause a construction impact due to additional noise and activity. There is existing activity, including the movement of large vehicles, associated with the operation of the Waste Water Treatment Plant, meaning the additional decommissioning activity represents only a minor increase.	Negligible	Adverse	Slight	Adverse	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	No impact. Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1237	Medium	It is of medium heritage value as a 19th century dwelling associated with the historically manually operated Baits Bite Lock, which contributes to its historic interest. It also has architectural interest, derived from its raised position, which reflects its proximity to the river. Its setting makes a positive contribution to its value, as it aids understanding of the building's former purpose.	No	No impact. There will be no construction works in the asset's vicinity and the Proposed Development will not be visible from the asset due to intervening buildings. As such, it will not alter the ability to understand it as an historic building associated with Baits Bite Lock.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	No impact. Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1238	Medium	It is of medium heritage value due to its architectural and historic interest, which is derived from its surviving historic form and fabric as a row of cottages which allow for an appreciation of the village's rural origins. Its village setting contributes positively to its historic and architectural interest.	No	No impact. The asset's village setting does not extend to the Proposed Development and, therefore, will not be altered during construction.	No change	Neutral	Neutral	Neutral	No	No impact. The asset's village setting does not extend to the proposed scheme, and it will have no intervisibility with it. Its setting will not be affected.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral
HE1400	Low	It is of low heritage value as an early pair of semi-detached houses dating to the 1920s, which hold architectural and historic interest as part of the suburban expansion of Cambridge during this period. Its setting, surrounded by other similar suburban housing, makes a positive contribution to its value.	No	The asset's setting does not extend to the Proposed Development, and as such the asset will have no intervisibility with the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	No impact. Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1401	Low	It is of low heritage value as a 1930s public house, though it retains almost none of its original interior, which diminishes its architectural interest.	No	The asset's setting does not extend to the Proposed Development, and as such the asset will have no intervisibility with the scheme.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	No impact. Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral

			Impact?	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Impact?	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	Impact?	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect type			
					Its suburban setting contributes to its value, as it allows for an understanding of the asset as a suburban public house.								altered by the construction of the scheme.									Impact is expected during operation, as the character of the asset and its setting will be entirely preserved.	
HE1402	Low	It is of low heritage value due to its historic and architectural interest as a post-medieval house. The asset's setting on the edge of Fen Ditton with low density development and open views to the west contributes to the ability to understand it as a typical domestic village building, and therefore makes a positive contribution to its value.	Yes	Construction activity, including additional noise and light within the Waterbeach Pipeline Construction Area and Shaft 4 compound have the potential to alter the rural character of the asset's setting to the north. However, due to the asset's location within a village with vegetation to the east, there is limited intervisibility between the asset and the Proposed Development, with only small glimpses of activity likely. As such, any impacts are unlikely to affect the character of the asset's setting, and therefore the asset's value.	Negligible	Adverse	Slight	Adverse	No	The Intermediate Shaft 4 will potentially be visible to the north within the setting of this asset. This will alter the rural setting of the asset slightly by introducing large construction machinery in the landscape. However, despite this insertion, the asset's village edge setting will remain recognisably rural.	Negligible	Adverse	Slight	Adverse	No impact	Due to the distance and vegetation situated between the asset and the Proposed Development, no impact is expected during operation, as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral	Neutral		
HE1403	Low	It is of low heritage value as it features traditional design and proportions but dates to the mid-20th century and as such has limited historic interest. Its rural village setting surrounded by vegetation makes a positive contribution to the value of the asset.	Yes	Construction activity, including additional noise and light created by the Waterbeach Pipeline Construction Area and Shaft 4 compound have the potential to alter the rural character of the asset's setting to the north. However, due to the asset's location within an urban village context surrounded by vegetation, there is limited intervisibility between the asset and the Proposed Development, with only small glimpses of activity likely. As such, any impacts are unlikely to affect the character of the asset's setting, and therefore the asset's value.	Negligible	Adverse	Slight	Adverse	No	The Intermediate Shaft 4 will potentially be visible to the north within the setting of this asset. However, despite this insertion, the asset's village edge setting will remain recognisably rural.	Negligible	Adverse	Slight	Adverse	No impact	Due to the distance and vegetation situated between the asset and the Proposed Development, no impact is expected during operation, as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral	Neutral		
HE1404	Low	It is of low heritage value as a late 19th century farmhouse which has architectural interest as a landmark within the rural landscape north of Fen Ditton. Its rural setting makes a positive contribution to the value of the asset.	Yes	The asset is surrounded by the Proposed Development. The setting of the asset is characterised by the rural landscape, the River Cam and A14 road to the north. The existing rural setting of the asset will be altered by the temporary presence of construction machinery and activity in close proximity to the asset associated with the Shaft 4 compound. This will create light and noise through movement of traffic and construction machinery. This will adversely impact the heritage value of the asset, as it will temporarily alter the rural landscape that forms the setting of the asset. This will	Minor	Adverse	Slight	Adverse	Yes	The Intermediate Shaft 4 will be situated approximately 60m east of the asset, altering the presently rural character of the asset's setting by introducing large construction equipment into the landscape. This therefore diminishes the contribution that setting makes to the value of the asset. The A14 and associated screening will act as a barrier between the asset and the site, reducing the severity of the impact from the proposed WWTP as a whole.	Minor	Adverse	Slight	Adverse	Yes	The Proposed Development will require sensor-activated lighting within the site and will introduce moving vehicles into the landscape. Both the lighting and movement have the potential to alter the rural setting of the asset, diminishing the contribution it makes to the value of the heritage asset. However, the A14 is situated in between the Proposed Development site and the heritage asset, which creates noise, light and movement. As such, the impact caused by the operation of the Proposed Development is diminished slightly.	Neutral	No effect	Neutral	Neutral	Neutral

				affect the ability to understand the historic interest of the asset as a farmhouse. No impact is anticipated from the vibration created by the shaft site close to this asset.																
HE1405	Low	It is of low heritage value as a late 19th century dwelling associated with the Cambridge Sewage Farm, and more recently the Waste Water Treatment Plant, which contributes to its historic interest.	Yes	The decommissioning of the existing Waste Water Treatment Plant will cause a construction impact due to additional noise and activity. There is existing activity, including the movement of large vehicles, associated with the operation of the Waste Water Treatment Plant, meaning the additional decommissioning activity represents only a minor increase.	Negligible	Adverse	Slight	Adverse	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	No impact. Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1406	Low	It is of low heritage value as a late 19th century dwelling associated with the Cambridge Sewage Farm, and more recently the Waste Water Treatment Plant, which contributes to its historic interest.	Yes	The decommissioning of the existing Waste Water Treatment Plant will cause a construction impact due to additional noise and activity. There is existing activity, including the movement of large vehicles, associated with the operation of the Waste Water Treatment Plant, meaning the additional decommissioning activity represents only a minor increase.	Negligible	Adverse	Slight	Adverse	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	No impact. Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1407	Low	It is of low heritage value as a 19th century dwelling associated with the historically manually operated Baits Bite Lock, which contributes to its historic interest. It also has architectural interest, derived from its raised position, which reflects its proximity to the river. Its setting makes a positive contribution to its value, as it aids understanding of the building's former purpose.	No	No impact. There will be no construction works in the asset's vicinity and the Proposed Development will not be visible from the asset due to intervening buildings. As such, it will not alter the ability to understand it as an historic building associated with Baits Bite Lock.	No change	Neutral	Neutral	Neutral	No	No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme.	No change	Neutral	No effect	Neutral	No	No impact. Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the character of the asset and its setting will be entirely preserved.	Neutral	No effect	Neutral	Neutral
HE1408	Low	It is of low heritage value due to its architectural and historic interest, which is derived from its surviving historic form and fabric as a row of cottages which allow for an appreciation of the village's rural origins. Its village setting contributes positively to its historic and architectural interest.	No	No impact. The asset's village setting does not extend to the Proposed Development, and therefore will not be altered during construction.	No change	Neutral	Neutral	Neutral	No	No impact. The asset's village setting does not extend to the proposed scheme and it will have no intervisibility with it. Its setting will not be affected.	No impact	Neutral	No effect	Neutral	No	Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme.	No impact	Neutral	No effect	Neutral

1.1.6 The below, Table 1.5 Table 1.5, provides an assessment of impact for known archaeological remains within the 500m study area. The UIDs in column one may be cross referenced with the UIDs in the Gazetteer of Assets (Application Document Ref 5.4.13.2) for further information on these assets. Operational effects on archaeological remains have been scoped out of this ES (see Chapter 13: Historic Environment, Application document 5.2.13) and are therefore not assessed here. No temporary effects from construction have been identified on archaeological remains. The potential for permanent effects from construction has been assessed for each asset. Where there is considered to be no potential for effect, the reason for this is given in the columns labelled 'scoping decision'.

Table 1.5: Impact to Non-Designated Archaeological Remains

MM reference	Value	Value Description	Scoping decision				Construction Phase - permanent						
			Scoped for site survey?	Scoped for assessment?	Scoped out reason	Scoped out reason 'other'	Impact?	Impact Description	Impact Magnitude	Impact Type	Effect Magnitude	Effect Type	
HE1001	Low	Heritage value is derived from the archaeological interest and the ability to inform on transport constructed to support the extractive industries in the fens.	N/A	N/A	No physical effect	X	X	X	X	X	X	x	x
HE1003	Moderate/medium	Heritage value is derived from the archaeological interest and the ability to inform on the early agricultural exploitation of the fen edge by isolated Roman farmsteads.	N/A	N/A	No physical effect	X	X	X	X	X	X	x	x
HE1005	Low	Heritage value is derived from the archaeological interest and the ability to inform on the agricultural activity associated with the fens villages, especially prior to large scale draining and enclosure.	N/A	N/A	No physical effect	X	X	X	X	X	X	x	x
HE1006	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.	N/A	N/A	No physical effect, Other	The archaeological remains do not survive; therefore, no effect is anticipated.	X	X	X	X	X	x	x
HE1009	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.	N/A	N/A	No physical effect, Other	The archaeological remains are not believed to survive; therefore, no effect is anticipated.	X	X	X	X	X	x	x
HE1016	Moderate/medium	Heritage value is derived from the archaeological interest and the ability to inform on early medieval use of the area, about which very little is known.	N/A	N/A	No physical effect	X	X	X	X	X	X	x	x
HE1017	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.	N/A	N/A	No physical effect, Other	The archaeological remains are not believed to survive; therefore, no effect is anticipated.	X	X	X	X	X	x	x
HE1018	Moderate/medium	Heritage value is derived from the ability to inform on the archaeology of pottery production during the Roman period alongside the larger industry in the area.	N/A	N/A	No physical effect	X	X	X	X	X	X	x	x
HE1020	Low	Heritage value is derived from the ability to inform on the widescale draining of the fens and its transformation to an intensely farmed agricultural landscape.	N/A	N/A	No physical effect	X	X	X	X	X	X	x	x
HE1021	Negligible	The remains have been removed by later construction and therefore hold no archaeological value, as they cannot inform on past human practices.	N/A	N/A	No physical effect, Other	The archaeological remains are not believed to survive; therefore, no effect is anticipated.	X	X	X	X	X	x	x
HE1023	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post-medieval period.	N/A	N/A	X	X	Yes	The remains of the coprolite mine will be removed by works associated with the construction of the final effluent pipeline.	Major	Adverse	Moderate	Adverse	
HE1024	Low	Heritage value is derived from the archaeological interest and the ability to inform on the intensive extraction industries in the fens during the post-medieval period.	N/A	N/A	No physical effect	X	X	X	X	X	X	x	x
HE1025	Moderate/medium	Heritage value is derived from the archaeological interest and the ability to inform on the early agricultural exploitation of the fen edge by isolated Roman farmsteads.	N/A	N/A	No physical effect	X	X	X	X	X	X	x	x
HE1026	Low	Heritage value is derived from archaeological remains and the ability to inform on the widescale draining of the fens and its transformation to a predominantly agricultural landscape, as well as post-medieval extractive industries.	N/A	N/A	No physical effect	X	X	X	X	X	X	x	x
HE1027	Moderate/medium	Heritage value is derived from the ability to inform on the archaeology of pottery production of Hovingsea Wares, including possible drying or storage associated with the fired clay shelf.	N/A	N/A	No physical effect	X	X	X	X	X	X	x	x
HE1029	Low	Heritage value is derived from archaeological remains and the ability to inform on the exploitation of the Cam by fenland villages, including how this has changed over time.	N/A	N/A	No physical effect	X	X	X	X	X	X	x	x

1.2 Scoping of ZTV Assets

1.2.1 This section provides information on the scoping of assets within the ZTV study area, which was undertaken to determine if assets in the ZTV study area had the potential to be impacted by the proposed development. The below, [Table 1.6 Table 1-6](#), provides information on listed buildings within the ZTV study area. The UIDs in column one may be cross referenced with the UIDs in Gazetteer of Assets (Application Document Ref 5.4.13.2) for further information on these assets.

Table 1.6: Listed Buildings in the ZTV study area

HE012	High	In	Out	No intervisibility. Character of asset's setting will be unchanged; asset's setting does not extend to the proposed CWWTP.	-	-	Asset is not in the ZTV, or any other study area, but was raised as a consideration by Historic England and has therefore been assessed here. Site survey determined that the setting was much altered by the presence of busy modern roads and the experience of the church within its church yard would not be altered by the introduction of the proposed development.

HE562	High	Out	Out	The asset's rural village setting will not be altered by the proposed scheme. It has no long views towards the scheme.	-	23/11/2021 00:00	
HE565	High	Out	Out	The asset's rural village setting will not be altered by the proposed scheme. It has no long views towards the scheme.	-	23/11/2021 00:00	
HE566	High	Out	Out	The asset's rural village setting will not be altered by the proposed scheme. It has no long views towards the scheme.	-	23/11/2021 00:00	
HE567	High	Out	Out	The asset's rural village setting will not be altered by the proposed scheme. It has no long views towards the scheme.	-	23/11/2021 00:00	
HE569	High	Out	Out	Setting of the asset has already been altered by a large development of flats to the east, between the asset and the scheme. ZTV is picking up the building's ridge alone.	-	23/11/2021 00:00	
HE570	High	Out	Out	The asset is situated in a very densely developed area, and has no long views towards the scheme. ZTV is picking up the building's ridge alone.	-	23/11/2021 00:00	
HE571	High	Out	Out	The urban, river setting of the asset will not be altered by the proposed scheme.	-	23/11/2021 00:00	
HE572	High	Out	Out	The asset is surrounded by other college buildings and its grounds. Its setting will not be affected by the proposed scheme.	-	23/11/2021 00:00	
HE573	High	Out	Out	ZTV is picking up the very pinnacle of the gateway, with the rest of the asset not in the ZTV. This asset's setting is predominantly urban and is surrounded by tall buildings on three sides, with the enclosed college courtyards behind. There are no long views towards the scheme.	-	23/11/2021 00:00	
HE574	High	Out	Out	The ZTV is picking up the building's ridge alone. The setting of the asset, comprising courtyards and other college buildings, will not be affected by the proposed scheme.	-	23/11/2021 00:00	
HE576	High	Out	Out	There is a substantial amount of intervening development between the asset and the scheme, so any change to outward view is very minor. Additionally, the setting of the asset is characterised by the surrounding college buildings of a range of phases, and this will not be affected by the proposed scheme.	-	23/11/2021 00:00	

UID	Heritage Value	Scoping decision		Scoped out reason	Scoped out reason 'other'	Scoped out date	Comments
		Scoped for site survey?	Scoped for assessment?				
HES78	High	Out	Out	The asset is situated in a very densely developed area and has no long views towards the scheme. Its setting will not be altered by the scheme. ZTV is picking up the building's ridge alone.	-	23/11/2021 00:00	
HES79	High	Out	Out	The asset is situated in a very densely developed area and has no long views towards the scheme. Its setting will not be altered by the scheme. ZTV is picking up the building's ridge alone.	-	23/11/2021 00:00	
HES80	High	Out	Out	The asset is surrounded by other college buildings and its grounds. Its setting will not be affected by the proposed scheme.	-	23/11/2021 00:00	
HES81	High	Out	Out	ZTV is picking up a tiny bit of the ridge. There are substantial buildings and vegetation between the scheme and the asset.	-	23/11/2021 00:00	
HES82	High	Out	Out	The asset has no long views in the direction of the scheme. Its setting is informed by the large college grounds and other college buildings which will not be affected by the proposed scheme.	-	23/11/2021 00:00	
HES83	High	Out	Out	Historic, dense urban setting will not be altered by the proposed scheme. ZTV is picking up the building ridge.	-	23/11/2021 00:00	
HES86	High	Out	Out	Its setting is the densely vegetated cemetery with mature trees and hedges which reduce intervisibility between the asset and the area outside of the cemetery. Additionally, it is already overshadowed by the adjacent ARU Start-up Lab.	-	23/11/2021 00:00	
HES87	High	Out	Out	The asset is surrounded by other college buildings and its grounds. Its setting will not be affected by the proposed scheme.	-	23/11/2021 00:00	

1.2.2 The below, [Table 1.7 Table 1-7](#), provides information on scheduled monuments within the ZTV study area. The UIDs in column one may be cross referenced with the UIDs in the Gazetteer of Assets (Application Document Ref 5.4.13.2) for further information on these assets.

HE180	High	Out	Out	No intervisibility – vegetation. Distance from asset to the proposed CWWTP. Asset's setting does not extend to the proposed CWWTP. Character of asset's setting will be unchanged	-	31/03/2022	
HE181	High	In	Out	No intervisibility – vegetation. Distance from asset to the proposed CWWTP. Asset's setting does not extend to the proposed CWWTP. Character of asset's setting will be unchanged.	-	26/11/2021	Anglesey Abbey Registered Park and Garden has been raised as a consideration by multiple stakeholders and therefore has been subject to more detailed analysis. A setting assessment survey (EVT047) was undertaken to understand the relationship between the park and gardens and location of the Proposed WWTP. This informed the assessment that the character of the asset's setting would not be altered by the proposed WWTP as its setting was not considered to extend to the Scheme Order Limits. This is due to vegetation which provides screening towards the proposed WWTP (even in winter). In addition, due to the angle of key outward views, these do not intersect the Scheme Order Limits. Therefore, no impact to the asset is predicted from the proposed development.
HE588	High	Out	Out	No intervisibility – vegetation. Distance from asset to the proposed CWWTP. Asset's setting does not extend to the proposed CWWTP. Character of asset's setting will be unchanged.	-	27/11/2021	
HE589	High	Out	Out	No intervisibility – vegetation. Distance from asset to the proposed CWWTP. Asset's setting does not extend to the proposed CWWTP. Character of asset's setting will be unchanged.	-	28/11/2021
