## Comments on Anglian Water's Response to the Local Impact Report

**Application by Anglian Water Limited for an Order Granting Development Consent for the Cambridge  
Waste Water Treatment Plant Relocation project (CWWTPR) (ref: WW010003)**

**Deadline 3**

18 December 2023

## Comments on Anglian Water’s Response to the Local Impact Report

This document sets out the Cambridge City Council’s (CCC) comments on Anglian Water’s response **[REP2-036]** to CCC’s Local Impact Report (LIR) **[REP1-128]** superseded by **[REP2-043]**.

### Anglian Water [Applicant] – [REP2-036]

AW Ref No.	CCC LIR Topic	Comment
4.	<b>Planning Policy</b>	CCC has no further comments to make in respect of planning policy but reserve the right to comment further should matters referred to in this section be changed or updated.
5.	<b>Strategic Development Plan Context</b>	CCC has no further comments to make in respect of the Strategic Development Plan Context but reserve the right to comment further should matters referred to in this section be changed or updated.
7.	<b>Carbon</b>	<p>CCC acknowledges that it is difficult to quantify carbon impact when there are still a number of assumptions to be made in respect of construction carbon and possible outcomes for the project. As the Applicant’s response notes, draft requirements 21 (Carbon management plan) and 7 (Detailed Design) would address some of these uncertainties as the scheme progresses to detailed design stage. Notwithstanding this, a reporting mechanism (by way of a DCO requirement) should be in place as part of the DCO.</p> <p>CCC seeks further clarity in respect of capital replacements and their exclusion from the carbon figures. It is acknowledged that these are not regular, annual emissions, but if they have been captured in the tables referenced, then it is unclear why they would not be included [Table 2-20 and 2-21 of Appendix 10.1 GHG Calculations [APP-109].</p>

<b>8.</b>	<b>Noise and Vibration</b>	CCC has no further comments to make in respect of noise and vibration but reserve the right to comment further should matters referred to in this section be changed or updated.
<b>9.</b>	<b>Odour Impact</b>	CCC has no further comments to make in respect of odour impact but reserve the right to comment further should matters referred to in this section be changed or updated.
<b>10.</b>	<b>Land contamination</b>	CCC has no further comments to make in respect of land contamination but reserve the right to comment further should matters referred to in this section be changed or updated.
<b>11.</b>	<b>Air Quality</b>	CCC has no further comments to make in respect of air quality but reserve the right to comment further should matters referred to in this section be changed or updated.
<b>12.</b>	<b>Public Health</b>	CCC notes the Applicant's comments in respect of local jobs for local people <b>[REP2-036]</b> . It is not clear why links have been made with Wisbech college on training and skills as this college is less connected to the area and would involve greater distances to travel which would increase carbon footprint. This needs to be clarified. It is not clear why such links have not been made to the Cambridge Regional College and the City Council would encourage engagement with this college. CCC would expect to see linkages with all suitable local training institutions to enable more sustainable connections.
<b>13.</b>	<b>Community impact</b>	CCC has no further comments to make in respect of community impact but reserve the right to comment further should matters referred to in this section be changed or updated.
<b>14.</b>	<b>Highways and Transportation</b>	CCC has no further comments to make in respect of highways and transportation but the right reserve to comment further should matters referred to in this section be changed or updated.
