Summary

This document provides a proportionate assessment of impact for all designated and non-designated assets within the 500m, 1km and ZTV study areas, as outlined in section 2 of the Historic Environment Baseline Report Application Document Ref 5.4.13.1. This includes: listed buildings, scheduled monuments, registered parks and gardens, conservation areas, non-designated built heritage assets such as locally listed buildings and non-designated archaeological assets both identified by the CHER and by surveys undertaken for the proposed development. Historic landscape character areas are separately assessed in Application document reference 5.4.13.3. The methodology followed for this assessment of impact is provided in in section 2 of the Historic Environment Baseline Report Application Document Ref 5.4.13.1. Significant effects, and other key effects, are described in the Historic Environmental Statement chapter (Application document reference 5.2.13).

1 Impact Assessment Tables

- 1.1.1 The tables included in this document provide a proportionate assessment of impact from the proposed development for all historic environment assets within the 500m, 1km and ZTV study areas. This impact assessment has been undertaken in accordance with the methodology described in section 2 of the Historic Environment Baseline Report (Application document reference 5.4.13.1). Assessment of impact is considered for temporary construction effects, permanent construction effects and operational effects, in accordance with this methodology. As described in paragraph 2.2.5 of the Environmental Statement Chapter 13 (Historic Environment), these impacts are described without consideration of mitigation. Impact assessment of all heritage assets within the study area (see section 2.3 below) is provided in the Impact Assessment Tables (Appendix 13.4, App Doc Ref: 5.4.13.4). Impact assessment relating to significant effects, key assets and a summary of effects on designated assets is provided within Chapter 13 (App Doc Ref 5.2.15).
- 1.1.2 The below tables, <u>Table 1.1</u>, <u>Table 1.2</u>, <u>Table 1.2</u>, <u>Table 1.3</u>, <u>Table 1.3</u>, <u>Table 1.4</u> and <u>Table 1.5</u>, provide an assessment of impact for every asset identified in the 500m and 1km study areas. Where no impact has been identified the reason for this assessment has also been described.
- 1.1.3 For assets within the ZTV study area, as described in section 2 of the Historic Environment Baseline Report (Application document reference 5.4.13.1), a desk-based assessment and supplementary setting survey (see EVT048 in Gazetteer of Events (Application document reference 5.4.13.7) was undertaken to determine if assets identified had the potential to be impacted by the proposed development. Assets with the potential to be affected would be subject to an assessment of impact as applied to assets in the 500m and 1km study areas. However, survey of these assets identified no assets with the potential to be impacted. The below tables, Table 1.6 Table 1.7 Table 1.7 Table 1.8 and Table 1.9 Table

1.1 Impact Assessments

1.1.1 The below, <u>Table 1.1</u> provides an assessment of impact for listed buildings within the 1km study area. The project specific Unique Identifiers (UIDs) in column one may be cross referenced with the UIDs in Gazetteer of Assets (Application Document Ref 5.4.13.2) for further information on these assets.

| | | Impact? | Impact Description | Impact Magnitude | Impact Type | Effect Magnitude | Effect Type | Impact? | P Impact Description | Impact Magnitude | | Effect Magnitude | Effect Type | Impact? | Impact Description | Impact Magnitude | Impact Type | Effect Magnitude | Effect Type |
| HE005 High | It is of high heritage value due to its historic and architectural interest, derived from its early architectural form and fabric. The churchyard and surrounding village are key element of the asset's setting which also contribute to its heritage value. In particular, the church's location on St John's Lane references the historic interest of the route to the River Cam. The dense residential development, tall hedgerows and narrow lanes in the vicinity impede long views towards the asset. This is an important element to the asset's value which has been negatively impacted. | No | No impact. Due to the distance between the asset and the Proposed Development, and the lack of intervisibility between the two, the asset's setting will not be altered during construction. | No change | Neutral | Neutral | Neutral | No | No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme. | No impact | Neutral | No effect | Neutral | No | Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme. | No impact | Neutral | No effect | Neutral |
| HE006 High | It is of high heritage value due to its architectural and historic interest as a dwelling with a long history. The modern development in the vicinity of the asset diminishes the contribution the asset's setting makes to its value. | No | No impact. There will be no intervisibility between the asset and the Proposed Development, and no construction works in the asset's vicinity. Therefore, the asset's setting will not be altered during the construction phase. | No change | Neutral | Neutral | Neutral | No | No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme. | No impact | Neutral | No effect | Neutral | No | Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme. | No impact | Neutral | No effect | Neutral |

1

| Value | | | | | | | | | | | | | | | | | | | |
|------------|--|---------|--|---------------------|---------|---------------------|----------------|---------|--|---------------------|----------------|---------------------|---------|---------|--|---------------------|----------------|---------------------|----------------|
| | | Impact? | Impact Description | Impact Magnitude | | Effect Magnitude | Effect Type | Impact? | Impact Description | Impact Magnitude | Impact Type | Effect Magnitude | | Impact? | Impact Description | Impact Magnitude | Impact Type | Effect Magnitude | Effect Type |
| HE007 High | It is of high heritage value due to its architectural interest, derived from its early architectural form and fabric. The village setting contributes significantly to the value of the church. | Yes | The asset is located to the north-west of the Proposed Development in the village of Waterbeach, which aids in the appreciation of the asset as a village church. The existing village setting will be altered by the temporary presence of construction traffic immediately adjacent to the asset. This will adversely impact the heritage value of the asset, as it will temporarily alter the quiet village that forms the setting of the asset. This will affect the ability to understand the historic interest of the asset as a village church. | Negligible | Adverse | Slight | Adverse | No | No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme. | No impact | Neutral | No effect | Neutral | No | Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme. | No impact | Neutral | No effect | Neutral |
| HE008 High | It is of high heritage value due to its architectural and historic interest as an important historic building within Fen Ditton. The surrounding farm buildings within the asset's setting make a positive contribution to its value, as they facilitate understanding of it as a rural Hall. Due to its location on the edge of Fen Ditton and set back from the High Street, it has a limited visual relationship with the rest of the village, though it is a key part of the history of the village. | | No impact. There will be no intervisibility between the asset and the Proposed Development, nor construction works in the asset's vicinity. Therefore, the asset's setting will not be altered during the construction phase. | No change | Neutral | Neutral | Neutral | No | No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme. | No impact | Neutral | No effect | Neutral | No | Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme. | No impact | Neutral | No effect | Neutral |
| HE009 High | It is of high heritage value due to its architectural and historic interest, derived from its early architectural form and fabric, and setting within a rural village. The historic village setting contributes significantly to the value of the church. | No | No impact. There will be no intervisibility between the asset and the Proposed Development, and no construction works in the asset's vicinity. Therefore, the asset's setting will not be altered during the construction phase. | No change | Neutral | Neutral | Neutral | No | No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme. | No impact | Neutral | No effect | Neutral | No | Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme. | No impact | Neutral | No effect | Neutral |
| HE010 High | It is of high heritage value due to its architectural and historic interest as an early example of a rectory building. Its setting, in close proximity to the Parish Church of St Mary the Virgin, and its prominence within Fen Ditton contribute to its value. The asset's extensive grounds, extending to the River Cam, provide a close relationship with the surrounding natural | | No impact. There will be no intervisibility between the asset and the Proposed Development, and no construction works in the asset's vicinity. Therefore, the asset's setting will not be altered during the construction phase. | No change | Neutral | Neutral | Neutral | No | No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme. | No impact | Neutral | No effect | Neutral | No | Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme. | No impact | Neutral | No effect | Neutral |

| | landscape and emphasises the rural character of the building. | | | | | | | | | | | | | | | | | | |
| HE011 High | It is of high heritage value due to its architectural and historic interest, derived from its surviving historic fabric and historic value through its association with the Bishops of Ely. Its agricultural setting is a key element of the asset's value, as it facilitates understanding of the building's historic relationship with the surrounding farmland that once served the Abbey. | | The asset is located immediately north of the Proposed Development. Its setting is principally characterised by the surrounding agricultural landscape. The existing rural setting of the asset will be altered by the temporary presence of construction machinery in close proximity to the asset, creating additional noise, movement and light in the asset's setting. This will adversely impact the heritage value of the asset, as it will temporarily alter the farmland that forms the setting of the asset. This will affect the ability to understand the heritage interest of the asset as a farmhouse. There will also be a temporary negligible impact caused by vibration created by the sheet piling works 320m from the Abbey. | | | Moderate | Adverse | | The Proposed Development, including landscaping, substantial tree planting and new street lighting along the B1047 Horningsea Road, will be visible in the landscape within the setting of Biggin Abbey. This will alter the flat, agricultural fenland that currently surrounds and characterises the asset's setting, reducing its relationship with an historically agricultural landscape. This will slightly diminish the contribution setting makes to the heritage value of Biggin Abbey. | | | Moderate | Adverse | | The Proposed Development will require new lighting along the B1047 Horningsea Road, as well as sensor- activated lighting within the site. It will also introduce the movement of vehicles throughout the site. Both the lighting and movement have the potential to alter the rural setting of Biggin Abbey, diminishing the contribution it makes to the value of the heritage asset. | | Adverse | | Adverse |
| HE013 High | It is of high heritage value due to its architectural and historic interest as an example of a substantial farmhouse situated prominently within Fen Ditton. Its setting with other agricultural buildings in the vicinity emphasises the asset's location in an historic, rural village, which contributes to its value. Additionally, despite modern development within the setting of the asset, it retains a visual relationship with the other historic buildings in the area, like Manor Farmhouse to the south-west. | | This asset is located to the south of the Proposed Development. Its setting is principally characterised by its village-edge location, with views across the countryside to the north. The existing setting will be temporarily altered due to the temporary presence of construction machinery to the north of the asset. This will slightly alter the rural character of the asset's setting, impacting the heritage value of the asset. However, this will not compromise the ability to understand the asset as a farmhouse, | | Adverse | Slight | Adverse | · Yes | The scheme will be visible in the distance within the setting of this asset to the north, altering the asset's setting slightly. This constitutes an adverse effect on the heritage value of the asset, as it will alter the ability to appreciate the rural character of the asset's setting. However, despite the insertion of the scheme into the landscape, overwhelmingly the setting will remain recognisably rural. | Negligible | Adverse | : Slight | Adverse | No | Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme. | No impact | Neutral | No effect | Neutral |

UID Heritage Value Description Construction phase - temporary Construction phase - permanent Operation phase

| Value | value Description | Constru | ction phase - temporary | | | | | | action phase - permanent | | | | | opera. | on phase | | | | |

| | | | situated within its farmyard. | | | | | | | | | | | | | | | | |
| HE014 High | It is of high heritage value due to its architectural and historic interest, derived from its historic form and surviving historic fabric, which allow for an understanding of the historic prominence of agriculture within the village. The asset's setting, close to other heritage assets, makes a positive contribution to its value, as it allows for an understanding of the village's development. However, it has a limited relationship with the surrounding countryside, due to extensive development in its backlands. The changed setting, therefore, diminishes the contribution that the setting makes to the value of the asset. | Yes | Construction activity, including additional noise and light have the potential to alter the rural character of the asset's setting to the north. However, due to the asset's location within an urban village context surrounded by vegetation, there is limited intervisibility between the asset and the Proposed Development, with only small glimpses of activity likely. | Negligible | Adverse | Slight | Adverse | : No | No impact. Due to the distance and intervening vegetation between the asset and the Proposed Development, it is unlikely that there would be a permanent impact on the setting of this asset. The aspects of the asset's setting which contribute to its character, namely its village setting and other historic buildings in the vicinity, will not be affected by the Proposed Development. | No impact | Neutral | No effect | Neutral | No | Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme. | No impact | Neutral | No effect | Neutral |
| HE015 High | | No | No impact. The asset has no views in the direction of the asset, and as such, its setting, namely the surrounding ancillary agricultural buildings and the River Cam, will not be affected by the Proposed Development. | | Neutral | No effect | Neutral | No | No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by its construction. | No impact | Neutral | No effect | Neutral | No | Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme. | No impact | Neutral | No effect | Neutral |
| HE016 High | It is of high heritage value due to its historic interest, provided by its age, and architectural interest, with its high-quality design and craftsmanship, evident along the garden façade in particular. The asset's setting within parkland and with ancillary buildings in the vicinity makes a positive contribution to its value, as it preserves the ability to understand the asset as part of an historic estate. | No | No impact. Due to the distance between the Proposed Development and the asset, it is considered that the asset's rural, parkland setting will not be altered during construction. | | Neutral | No effect | Neutral | No | No impact. The Quy Hall estate is bounded by mature vegetation, which inhibits long views towards the Proposed Development. Additionally, due to the distance between the Proposed Development and the asset, it is unlikely that its construction will alter the asset's setting in any way- in particular the arrangement of formal gardens with parkland beyond, which facilitate understanding of the Hall as part of an historic estate. | No impact | Neutral | No effect | Neutral | No | Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme. | No impact | Neutral | No effect | Neutral |
| HE017 High | <u> </u> | | No impact. The urban setting of this church does not extend to the proposed scheme and features existing noise and light. Therefore, the ability to appreciate it as a suburban 20th century church will not be affected. | _ | Neutral | No effect | Neutral | No | No impact. The urban setting of this church does not extend to the proposed scheme, and the ability to appreciate it as a suburban 20th century church will not be affected. | No impact | Neutral | No effect | Neutral | No | Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme. | No impact | Neutral | No effect | Neutral |

| HE040 High | It is of high heritage value due to its architectural and historic interest, which is derived from its historic form and fabric, and the continued use of the farmhouse. The arable fields, ancillary barns and other buildings in the vicinity of the Hall help to understand its agricultural function and heritage. This makes a positive contribution to the value of the asset. However, the asset is situated close to the A14, which restricts its long views across the countryside to the north, negatively contributing to the value of the asset. | Yes | The asset is surrounded by the Proposed Development. The setting of the asset is characterised by the rural landscape and A14 road to the north. The existing rural setting of the asset will be temporarily altered by the presence of construction machinery and activity in close proximity to the asset, for example at the shaft 4 compound. This will create light and noise through movement of traffic and construction machinery. This will adversely impact the heritage value of the asset, as it will temporarily alter the rural landscape that forms the setting of the asset. This will affect the ability to understand the historic interest of the asset as a farmhouse. The asset's location close to the A14 means that there is existing light and noise within the asset's setting. However, the Proposed Development represents further degradation to the asset's agricultural setting. No impact is anticipated from the vibration created by the shaft site close to | | Adverse | Moderate | Adverse | e Yes | The Intermediate Shaft 4 will be situated south of the asset, altering the presently rural character of the asset's setting. Filtering will be offered by a small amount of intervening vegetation. In addition, the A14 and associated screening has severed the hall from farmland to the north and east, which separates the asset from the Proposed Development, reducing the severity of the impact from the proposed WWTP as a whole. | Minor | Adver | se Slight | Adverse | Yes | The Proposed Development will require sensor-activated lighting within the site and will introduce moving vehicles into the landscape. Both the lighting and movement have the potential to alter the rura setting of Poplar Hall, diminishing the contribution it makes to the value of the heritage asset. However, the A14 is situated in between the Proposed Development site and the heritage asset, which creates noise, light and movement. As such, the impact caused by the operation of the Proposed Development is diminished slightly. | 3 | Adverse | Slight | Adverse |

| HE070 High | It is of high heritage value, derived from its historic interest as a 20th century feature of village life and association with Giles Gilbert Scott. It has architectural interest as an iconic structure of the period. | No | No impact. The asset will have no intervisibility with the scheme, and its rural village setting will not be affected. | No change | Neutral | Neutral | Neutral | No | No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme. | No impact | Neutral | No effect | Neutral | No | Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme. | No impact | Neutral | No effect | Neutral |
| HE071 High | It is of high heritage value, derived from its architectural and historic interest. This is derived from it being a rare example of a timber-framed barn, which allows for an appreciation of the village's agricultural origins. It has group value with Denny House, with which it shares historic interest. Its rural village setting contributes positively to its heritage value. However, modern housing along Waterbeach High Street has negatively impacted the value of the agricultural barn which historically would have been located along a rural country road. | No | No impact. The asset will have no intervisibility with the scheme, and its rural village setting will not be affected. | No change | Neutral | Neutral | Neutral | No | No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme. | No impact | Neutral | No effect | Neutral | No | Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme. | No impact | Neutral | No effect | Neutral |
| HE072 High | It is of high heritage value, due to its architectural and historic interest, derived from it being an historic farmhouse composed of brick. It has group value with a small barn to the south. Its rural village setting contributes positively to its heritage value. However, modern housing along Waterbeach High Street has negatively impacted the value of the agricultural barn which historically would have been located along a rural country road. | | No impact. The asset will have no intervisibility with the scheme, and its rural village setting will not be affected. | No change | Neutral | Neutral | Neutral | No | No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme. | No impact | Neutral | No effect | Neutral | No | Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme. | No impact | Neutral | No effect | Neutral |
| HE073 High | It is of high heritage value, due to its architectural and historic interest, derived from its historic use as a coachman's house and surviving brickwork. It has group value with The Rookery opposite, as it allows for an understanding of the building's historic use. Its rural village setting contributes positively to this value. Modern housing contributes negatively towards its setting and the value of the asset. | | No impact. The asset will have no intervisibility with the scheme, and its rural village setting will not be affected. | No change | Neutral | Neutral | Neutral | No | No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme. | No impact | Neutral | No effect | Neutral | No | Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme. | No impact | Neutral | No effect | Neutral |

| HE095 | Medium | Value is derived from the architectural interest of buildings like Biggin Abbey, located within the Conservation Area. The engineering of the lock itself provides historic interest, and archaeological interest is derived from medieval and postmedieval agricultural remains. The surrounding landscape contributes to the rural character of the asset. | The existing rural, river character of the conservation area will be altered by a construction compound located within the conservation area, the construction of a treated effluent discharge outfall structure and changes to the PROW on the eastern side of the river. A PROW through the conservation area is likely to be temporarily diverted during the construction phase, altering the way people engage with and appreciate the heritage asset. | | Adverse | Moderate | Adverse | Yes | There will be a permanent, physical impact due to the construction of riverbank protection works and outfall structure. Additionally, the Conservation Area Appraisal notes that Biggin Abbey is particularly prominent in views east from the river. These views (see viewpoint 11, Landscape Information paper) will be altered by the introduction of the Proposed Development into the landscape beyond Biggin Abbey, altering the character of the conservation area's setting. | | Adverse | Moderate | Adverse | Yes | The Proposed Development will require sensor- activated lighting within the site and will introduce moving vehicles into the landscape. Both the lighting and movement have the potential to alter the rural setting of the conservation area, diminishing the contribution it makes to the value of the heritage asset. However, the A14 is situated in close proximity, creating existing noise, light and movement. As such, the impact caused by the operation of the Proposed Development is diminished slightly. | Negligible | Adverse | Slight | Adverse |
| HE096 | Medium | Value is derived from the architectural interest of the buildings in the village centre, as well as the archaeological interest | The existing village setting will be altered by the temporary presence of construction works in the north of the | Minor | Adverse | Slight | Adverse | Yes | The construction of the ventilation column in the north of the conservation area will alter the character of this part of the heritage | Minor | Adverse | Slight | Adverse | Yes | The Proposed Development will require sensor- activated lighting within the site and will introduce moving | Negligible | Adverse | Slight | Adverse |

| HE1141 | Medium | It is of medium heritage value as a 19th century farmhouse, which provides architectural and historic interest. The asset's rural setting is largely unchanged, providing continuity in the historic relationship showing the agricultural practices and farms which still reside along Clayhythe Road. Its setting therefore makes a positive contribution to its value. | Yes | There will be a temporary construction impact on the asset's setting due to the presence of construction traffic travelling past the asset. This will alter the existing rural setting of the asset. | Negligible | Adverse | Slight | Adverse | No | No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme. | No change | Neutral | No effect | Neutral | No | Due to the distance between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved. | Neutral | No effect | Neutral | Neutral |
| HE1186 | Medium | It is of medium heritage value due to its historic form and architectural interest as a defensive World War II structure. Its river setting makes a positive contribution to its value, as it allows for an understanding of its function. | No | No impact. Due to the distance and lack of intervisibility between the asset and the Proposed Development, the rural character of the asset's setting will not be affected during construction. | No change | Neutral | No effect | Neutral | No | No impact. Due to the distance and lack of intervisibility between the asset and the Proposed Development, the rural character of the asset's setting will not be affected by its construction. | No change | Neutral | No effect | Neutral | No | Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved. | Neutral | No effect | Neutral | Neutral |
| HE1196 | Medium | It is of medium heritage value due to its architectural interest. The relationship between Bannold Road and the River Cam is still understood. This is important to the asset's original function, which improved roads by controlling road access. Its setting therefore makes a positive contribution to its value. | Yes | There will be a temporary construction impact on the asset's setting due to the presence of construction traffic in close proximity to the asset, altering its tranquil setting. | Negligible | Adverse | Slight | Adverse | No | No impact. There will be no intervisibility between the asset and the Proposed Development, and, therefore, the asset's setting will not be altered by the construction of the scheme. | No change | Neutral | No effect | Neutral | No | Due to the distance between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved. | Neutral | No effect | Neutral | Neutral |

| HE1166 | Medium | asset. It is of medium heritage value due to its historic form and architectural interest as a defensive World War II structure. The asset's setting, close to the adjacent railway, makes a positive contribution to the value of the asset, as it allows for an understanding of the building's | No | No impact. The asset's setting close to the railway line will not be altered by the construction traffic associated with the Proposed Development. Additional traffic within the asset's setting will not alter the ability to understand or appreciate it. | No change | Neutral | No effect | Neutral | No | No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the asset's setting will not be altered by the construction of the scheme. | No change | Neutral | No effect | Neutral | No | Due to the distance and intervening vegetation between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved. | No change | Neutral | No effect | Neutra |
| E1201 | Medium | function. It is of medium heritage value due to its historic form as a river feature from the 19th century that is still in use today. Its river setting makes a positive contribution to the value of the asset, as it aids in understanding its function. | | There will be a temporary construction impact on the asset's heritage value due to its proximity to the proposed Outfall Structure on the River Cam. The additional noise, light and movement caused during construction will alter the quiet river setting of the river lock; however, this would not be to the extent that it inhibits the ability to understand the asset as an historic rural cottage. This impact is minimised to an extent by the mature vegetation that surrounds the asset. | Negligible | Adverse | Slight | Adverse | | No impact. Once constructed, the lock will have very little intervisibility with the Outfall Structure and the Proposed Development. As such, the asset's rural, river setting will not be affected by the Proposed Development. | No change | Neutral | No effect | Neutral | No | Due to the distance and vegetation situated between the asset and the Proposed Development, no impact is expected during operation as the character of the asset and its setting will be entirely preserved. | Neutral | No effect | Neutral | Neutra |
| IE1221 | Medium | It is of medium heritage value due to its historic form and architectural interest as a defensive World War II structure. | No | The asset's setting does not contribute to its value. The asset will have no intervisibility with the scheme. | No change | Neutral | Neutral | Neutral | No | No impact. There will be no intervisibility between the asset and the Proposed Development and, therefore, the | No change | Neutral | No effect | Neutral | No | No impact. Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the character of the asset and its setting will be entirely preserved. | Neutral | No effect | Neutral | Neutral |
| HE1401 | Low | | No | The asset's setting does not extend to the Proposed Development, and as such the asset will have no intervisibility with the scheme. | No change | Neutral | Neutral | Neutral | No | No impact. There will be no intervisibility between the asset and the Proposed Development, and therefore the asset's setting will not be altered by the construction of the scheme. | | Neutral | No effect | Neutral | No | No impact. Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the character of the asset and its setting will be entirely preserved. | Neutral | No effect | Neutral | Neutral |
| HE1402 | Low | house. It is of low heritage value due to its historic and architectural interest as a postmedieval house. The asset's setting on the edge of Fen Ditton with low density development and open views to the west contributes to the ability to understand it as a typical domestic village building, and therefore makes a positive contribution to its value. | Yes | Construction activity, including additional noise and light within the Waterbeach Pipeline Construction Area and Shaft 4 compound have the potential to alter the rural character of the asset's setting to the north. However, due to the asset's location within a village with vegetation to the east, there is limited intervisibility between the asset and the Proposed Development, with only small glimpses of activity likely. As such, any impacts are unlikely to affect the | | Adverse | Slight | Adverse | No | The Intermediate Shaft 4 will potentially be visible to the north within the setting of this asset. This will alter the rural setting of the asset slightly by introducing large construction machinery intthe landscape. However, despite this insertion, the asset's village edge setting will remain recognisably rural. | Negligible | Adverse | Slight | Adverse | No impact | Due to the distance and vegetation situated between the asset and the Proposed Development, no impact is expected during operation, as the character of the asset and its setting will be entirely preserved. | Neutral | No effect | Neutral | Neutral |

| | | | | asset's setting, and therefore the asset's value. | | | | | | | | | | | | | | | | |
| HE1403 | Low | It is of low heritage value as it features traditional design and proportions but dates to the mid-20th century and as such has limited historic interest. Its rural village setting surrounded by vegetation makes a positive contribution to the value of the asset. | Yes | Construction activity, including additional noise and light created by the Waterbeach Pipeline Construction Area and Shaft 4 compound have the potential to alter the rural character of the asset's setting to the north. However, due to the asset's location within an urban village context surrounded by vegetation, there is limited intervisibility between the asset and the Proposed Development, with only small glimpses of activity likely. As such, any impacts are unlikely to affect the character of the asset's setting, and therefore the asset's value. | Negligible | Adverse | Slight | Adverse | No | The Intermediate Shaft 4 will potentially be visible to the north within the setting of this asset. However, despite this insertion, the asset's village edge setting will remain recognisably rural. | Negligible | Adverse | Slight | Adverse | No impact | Due to the distance and vegetation situated between the asset and the Proposed Development, no impact is expected during operation, as the character of the asset and its setting will be entirely preserved. | Neutral | No effect | Neutral | Neutral |
| HE1404 | Low | It is of low heritage value as a late 19th century farmhouse which has architectural interest as a landmark within the rural landscape north of Fen Ditton. Its rural setting makes a positive contribution to the value of the asset. | Yes | The asset is surrounded by the Proposed Development. The setting of the asset is characterised by the rural landscape, the River Cam and A14 road to the north. The existing rural setting of the asset will be altered by the temporary presence of construction machinery and activity in close proximity to the asset associated with the Shaft 4 compound. This will create light and noise through movement of traffic and construction machinery. This will adversely impact the heritage value of the asset, as it will temporarily alter the rural landscape that forms the setting of the asset. This will affect the ability to | Minor | Adverse | Slight | Adverse | Yes | The Intermediate Shaft 4 will be situated approximately 60m east of the asset, altering the presently rural character of the asset's setting by introducing large, construction equipment into the landscape. This therefore diminishes the contribution that setting makes to the value of the asset. The A14 and associated screening will act as a barrier between the asset and the site, reducing the severity of the impact from the proposed WWTP as a whole. | | Adverse | Slight | Adverse | Yes | The Proposed Development will require sensor- activated lighting within the site and will introduce moving vehicles into the landscape. Both the lighting and movement have the potential to alter the rural setting of the asset, diminishing the contribution it makes to the value of the heritage asset. However, the A14 is situated in between the Proposed Development site and the heritage asset, which creates noise, light and movement. As such, the impact caused by the operation of the | | No effect | Neutral | Neutral |

makes a positive

| | | contribution to its value, as it aids understanding of the building's former purpose. | | | - | | - | | | | | | - | | | | - | | - | |
| HE1408 | Low | It is of low heritage value due to its architectural and historic interest, which is derived from its surviving historic form and fabric as a row of cottages which allow for an appreciation of the village's rural origins. Its village setting contributes positively to its historic and architectural interest. | No | No impact. The asset' village setting does not extend to the Proposed Development, and therefore will not be altered during construction. | s No change | Neutral | Neutral | Neutral | No | No impact. The asset's village setting does not extend to the proposed scheme and it will have no intervisibility with it. Its setting will not be affected. | No impact | Neutral | No effect | Neutral | No | Due to the distance and intervening development between the asset and the Proposed Development, no impact is expected during operation, as the value of the asset and its setting will not be altered by the scheme. | | Neutral | No effect | Neutral |

1.1.6 The below, Table 1.5 Table 1.5, provides an assessment of impact for known archaeological remains within the 500m study area. The UIDs in column one may be cross referenced with the UIDs in the Gazetteer of Assets (Application Document Ref 5.4.13.2) for further information on these assets. Operational effects on archaeological remains have been scoped out of this ES (see Chapter 13: Historic Environment, Application document 5.2.13) and are therefore not assessed here. No temporary effects from construction have been identified on archaeological remains. The potential for permanent effects from construction has been assessed for each asset. Where there is considered to be no potential for effect, the reason for this is given in the columns labelled 'scoping decision'.

1.2 Scoping of ZTV Assets

1.2.1 This section provides information on the scoping of assets within the ZTV study area, which was undertaken to determine if assets in the ZTV study area had the potential to be impacted by the proposed development. The below, <u>Table 1.6 Table 1.6</u>, provides information on listed buildings within the ZTV study area. The UIDs in column one may be cross referenced with the UIDs in Gazetteer of Assets (Application Document Ref 5.4.13.2) for further information on these assets.

| HE012 | High | In | Out | No intervisibility. Character of asset's setting will be unchanged; asset's setting does not extend to the proposed CWWTP. | - | - | Asset is not in the ZTV, or any other study area, but was raised as a consideration by Historic England and has therefore been assessed here. Site survey determined that the setting was much altered by the presence of busy modern roads and the experience of the church within its church yard would not be altered by the introduction of the proposed development. |

| HE565 | High | Out | Out | The asset's rural village setting will not be altered by the proposed scheme. It has no long views towards the scheme. | - | 23/11/2021 00:00 | |
| HE566 | High | Out | Out | The asset's rural village setting will not be altered by the proposed scheme. It has no long views towards the scheme. | - | 23/11/2021 00:00 | |
| HE567 | High | Out | Out | The asset's rural village setting will not be altered by the proposed scheme. It has no long views towards the scheme. | - | 23/11/2021 00:00 | |
| HE569 | High | Out | Out | Setting of the asset has already been altered by a large development of flats to the east, between the asset and the scheme. ZTV is picking up the building's ridge alone. | - | 23/11/2021 00:00 | |
| HE570 | High | Out | Out | The asset is situated in a very densely developed area, and has no long views towards the scheme. ZTV is picking up the building's ridge alone. | - | 23/11/2021 00:00 | |
| HE571 | High | Out | Out | The urban, river setting of the asset will not be altered by the proposed scheme. | - | 23/11/2021 00:00 | |
| HE572 | High | Out | Out | The asset is surrounded by other college buildings and its grounds. Its setting will not be affected by the proposed scheme. | - | 23/11/2021 00:00 | |
| HE573 | High | Out | Out | ZTV is picking up the very pinnacle of the gateway, with the rest of the asset not in the ZTV. This asset's setting is predominantly urban and is surrounded by tall buildings on three sides, with the enclosed college courtyards behind. There are no long views towards the scheme. | - | 23/11/2021 00:00 | |
| HE574 | High | Out | Out | The ZTV is picking up the building's ridge alone. The setting of the asset, comprising courtyards and other college buildings, will not be affected by the proposed scheme. | | 23/11/2021 00:00 | |
| HE576 | High | Out | Out | There is a substantial amount of intervening development between the asset and the scheme, so any change to outward view is very minor. Additionally, the setting of the asset is characterised by the surrounding college buildings of a range of phases, and this will not be affected by the proposed scheme. | | 23/11/2021 00:00 | |
| HE578 | High | Out | Out | The asset is situated in a very densely developed area and has no long views towards the scheme. Its setting will not be altered by the scheme. ZTV is picking up the building's ridge alone. | - | 23/11/2021 00:00 | |

| HE579 | High | Out | Out | The asset is situated in a very densely developed area and has no long views towards the scheme. Its setting will not be altered by the scheme. ZTV is picking up the building's ridge alone. | - | 23/11/2021 00:00 | |
| HE580 | High | Out | Out | The asset is surrounded by other college buildings and its grounds. Its setting will not be affected by the proposed scheme. | - | 23/11/2021 00:00 | |
| HE581 | High | Out | Out | ZTV is picking up a tiny bit of the ridge. There are substantial buildings and vegetation between the scheme and the asset. | - | 23/11/2021 00:00 | |
| HE582 | High | Out | Out | The asset has no long views in the direction of the scheme. Its setting is informed by the large college grounds and other college buildings which will not be affected by the proposed scheme. | | 23/11/2021 00:00 | |
| HE583 | High | Out | Out | Historic, dense urban setting will not be altered by the proposed scheme. ZTV is picking up the building ridge. | - | 23/11/2021 00:00 | |
| HE586 | High | Out | Out | Its setting is the densely vegetated cemetery with mature trees and hedges which reduce intervisibility between the asset and the area outside of the cemetery. Additionally, it is already overshadowed by the adjacent ARU Start-up Lab. | - | 23/11/2021 00:00 | |
| HE587 | High | Out | Out | The asset is surrounded by other college buildings and its grounds. Its setting will not be affected by the proposed scheme. | - | 23/11/2021 00:00 | |

1.2.2 The below, <u>Table 1.7</u> Table 1.7, provides information on scheduled monuments within the ZTV study area. The UIDs in column one may be cross referenced with the UIDs in the Gazetteer of Assets (Application Document Ref 5.4.13.2) for further information on these assets.

| HE180 | High | Out | Out | No intervisibility – vegetation. Distance from asset to the proposed CWWTP. Asset's setting does not extend to the proposed CWWTP. Character of asset's setting will be unchanged | - | 31/03/2022 | |
| HE181 | High | In | Out | No intervisibility – vegetation. Distance from asset to the proposed CWWTP. Asset's setting does not extend to the proposed CWWTP. Character of asset's setting will be unchanged. | - | 26/11/2021 | Anglesey Abbey Registered Park and Garden has been raised as a consideration by multiple stakeholders and therefore has been subject to more detailed analysis. A setting assessment survey (EVT047) was undertaken to understand the relationship between the park and gardens and location of the Proposed WWTP. This informed the assessment that the character of the asset's setting would not be altered by the proposed WWTP as its setting was not considered to extend to the Scheme Order Limits. This is due to vegetation which provides screening towards the proposed WWTP (even in winter). In addition, due to the angle of key outward views, these do not intersect the Scheme Order Limits. Therefore, no impact to the asset is predicted from the proposed development. |
| HE588 | High | Out | Out | No intervisibility – vegetation. Distance from asset to the proposed CWWTP. Asset's setting does not extend to the proposed CWWTP. Character of asset's setting will be unchanged. | - | 27/11/2021 | |
| HE589 | High | Out | Out | No intervisibility – vegetation. Distance from asset to the proposed CWWTP. Asset's setting does not extend to the proposed CWWTP. Character of asset's setting will be unchanged. | - | 28/11/2021 | |
| HE590 | Hlgh | Out | Out | No intervisibility – vegetation. Distance from asset to the proposed CWWTP. Asset's setting does not extend to the proposed CWWTP. Character of asset's setting will be unchanged. | - | 29/11/2021 | |
